LETTERS OF TRANSMITTAL

31 July 1996

Sir,

I have the honour to transmit to you the financial statements of the United Nations Relief and Works Agency for Palestine Refugees in the Near East for the biennium 1994-1995 ended 31 December 1995, which were submitted by the Commissioner-General. These statements have been examined and include the audit opinion of the Board of Auditors.

In addition, I have the honour to present the report of the Board of Auditors with respect to the above accounts.

Accept, Sir, the assurances of my highest consideration.

(Signed) Osei Tutu PREMPEH
Auditor General of Ghana
and Chairman
United Nations Board of Auditors

The President of the General Assembly
of the United Nations
New York

29 March 1996

Sir,

Pursuant to financial regulation 12.1, I have the honour to submit the accounts of the United Nations Relief and Works Agency for the Palestine Refugees in the Near East for the biennium ended 31 December 1995, which I hereby approve. The financial statements have been prepared and certified as correct by the Comptroller.

Accept, Sir, the assurances of my highest consideration.

Yours faithfully,

(Signed) Peter HANSEN
Commissioner-General

The Chairman of the Board of Auditors
United Nations
New York

I. FINANCIAL REPORT FOR THE BIENNIUM ENDED 31 DECEMBER 1995

Operations

1. The United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA) provides education, health and relief and social services to about 3.2 million Palestine refugees in five areas in the Near East. These areas are Jordan, Lebanon, the Syrian Arab Republic and the West Bank and Gaza Strip area. Its headquarters are in Vienna; headquarters branches are located in Amman, Jordan, and Gaza.

2. During the 1994-1995 biennium, 819,052 children were enrolled in UNRWA's 642 elementary and preparatory schools, served by 11,755 teachers. An additional 119,956 pupils attended government and private schools at these education levels and 57,880 students attended schools at the secondary level at no expense to UNRWA. During the biennium, vocational, technical and pre-service teacher training was provided in eight training centres, with a total enrolment of 10,706 trainees and 549 instructors. Additionally, in-service training courses were provided for 1,379 teachers through the education development centres attached to each field office. At the university level, 1,752 students benefited from the Agency's scholarship programme. Total expenditure in the biennium on the education programme amounted to \$277.5 million against a biennium budget of \$309.1 million, representing about 47.7 per cent of the Agency's total regular budget.

3. The Agency's health programme covers curative and preventive medical services, which are provided through 122 health clinics. During the biennium, 12,921,616 visits were paid to these clinics by refugee patients for medical consultations. Hospitalization is provided at heavily subsidized rates in 27 hospitals with which the Agency has special agreements. In Jordan these services are provided through a cash reimbursement scheme. During the biennium, 249,440 bed days were utilized by refugees in contracted hospitals. Environmental health services are also part of the health programme, as is the supplementary feeding programme for pre-school children, pregnant women and nursing mothers. Total expenditure in the biennium on the health programme amounted to \$102.5 million against a biennium budget of \$118.9 million, representing about 18.3 per cent of the Agency's total regular budget.

4. The Agency's relief and social services provide socio-economic support for the most disadvantaged of the Palestine refugees and facilitate self-reliance. At the end of 1995, 181,383 refugees were enrolled in the special hardship programme, representing 5.6 per cent of the total registered refugee population. They belonged to 45,567 families, an average of four persons per family receiving "special hardship" assistance, consisting of food, shelter repair, selective cash grants for those in extreme distress, preferential access to vocational and teacher training and small grants or loans to establish individual or group self-support projects. The social services comprise family casework (counselling and support to solve socio-economic problems), poverty alleviation projects and related skill-training, women's programmes, community-based rehabilitation of the disabled and projects to develop community facilities, especially for children and youths. These services are open to all eligible refugees. Total expenditure in the biennium on the relief and social services programme amounted to \$58.3 million against a biennium budget of \$64.6 million, representing about 10 per cent of the Agency's total regular budget.

5. In support of the three substantive programmes described above, the Agency provides supply and transport, architectural and engineering services for construction and maintenance, and administrative services, which together accounted for the remaining 24 per cent of the Agency's total regular budget.

6. UNRWA operates an emergency-related fund titled Extraordinary Measures in Lebanon and the Occupied Territory (EMLOT). In the biennium, UNRWA received over \$20.8 million in cash and in-kind contributions to EMLOT, but expended almost \$28.4 million. The over-expenditure of \$7.6 million, together with the balance brought forward from 1993, resulted in a deficit by the end of the biennium of \$17.8 million. The accounts for this fund are shown in statements XII and XIII.

7. The Expanded Programme of Assistance (EPA) was set up in addition to the immediate measures that the Agency had undertaken in response to the situation arising from the intifadah and the Israeli countermeasures. The Agency requested and received special contributions for improving the infrastructure in the West Bank and Gaza Strip area shelter rehabilitation in new or expanded sewage systems in the camps, and to some limited extent for providing the Agency with better facilities to run its education, health and relief and social programmes in the West Bank and Gaza Strip area. In the biennium, 89 projects were under implementation and expenditure amounted to \$17.4 million was incurred, leaving \$5 million available at the end of 1995. However, it is anticipated that this programme will be phased out and replaced by the Peace Implementation Programme. The accounts for EPA are contained in statements XIV and XV.

8. Following the historic signing of the Declaration of Principles on Interim Self-Government Arrangements, by the Government of the State of Israel and the Palestine Liberation Organization (PLO) on 13 September 1993, UNRWA initiated a new programme, entitled the Peace Implementation Programme (PIP). The programme was developed in close consultation with the Agency's Advisory Commission, major donors and the Palestinian leadership and was officially launched by the Commissioner-General on 6 October 1993. Under this programme, the Agency has begun to undertake special construction and development projects in the West Bank and Gaza Strip, addressing the needs of Palestine refugees in education, environmental health, primary health care, income generation and social services. The programme also targets similar needs of Palestine refugees residing in Jordan, Lebanon and the Syrian Arab Republic. Projects developed under the programme respond to objectives identified by the Secretary-General's Task Force on Economic and Social Development of the Gaza Strip and Jericho. The programme forms part of the United Nations integrated approach in support of the transition period in the West Bank and Gaza Strip and will replace the Expanded Programme of Assistance, which will be gradually phased out. At 31 December 1995, total pledges for the Peace Implementation Programme amounted to over \$152.6 million. The accounts for this programme are contained in statements XVIII and XIX.

9. The quality and adequacy of hospital services in Gaza have deteriorated to a level considered to be far from acceptable by international standards. In 1990, the Commissioner-General launched an appeal for funds to construct a 232-bed general hospital to provide much needed additional hospital beds and other health services such as outpatient, diagnostic, therapeutic and supporting services. During the biennium, the Agency received \$11.0 million. The accounts for the Gaza General Hospital Fund are shown in statements XVI and XVII.

10. The General Assembly, in its resolution 48/40 A of 10 December 1993,

inter alia, requested that the headquarters of UNRWA should be transferred as soon as practicable to its area of operations. The Secretary-General has directed that action be taken so that the move of UNRWA headquarters from Vienna to its area of operations, Gaza, may be achieved promptly and efficiently. The Agency has prepared detailed plans to implement the instructions of the Secretary-General and the request of the General Assembly and planned to transfer its headquarters to Gaza on or about 15 July 1996.

Biennium budget and expenditure

11. The financial statements and schedules in chapter V show the financial results of the Agency's operations. At the end of that chapter, notes to the financial statements explain the Agency's accounting policies and give additional information on the individual statements and schedules.

12. The following paragraphs summarize the financial results for the biennium. As for previous accounting periods, UNRWA's accounts will be published, in a summarized version, highlighting the Agency's financial results for 1994-1995.

13. Statement I shows the budget for the biennium 1994-1995 (the planned expenditure for those two years) and the actual expenditure.

14. The statement shows the grand total of all the Agency's activities. They are contained in different sub-budgets, starting with the General Fund, which comprises the different services, and continuing with funded ongoing activities and other activities. A graph showing the different sub-budgets, their status and their connection to each other is included. It should be noted that, for 1996-1997, the Agency has adopted a simplified budgetary format.

15. The Agency's budget as detailed in statement I is the operating budget for the biennium 1994-1995. It consists of the following elements (in millions of United States dollars):

Regular budget	647.8
Extraordinary Measures in Lebanon and the Occupied Territory (all funds) (EMLOT)	35.1
Expanded Programme of Assistance (EPA)	23.1
Gaza General Hospital	24.6
Peace Implementation Programme (PIP)	119.9
Headquarters relocation to Gaza	<u>3.5</u>
	<u>854.0</u>

16. The figure for the regular budget includes \$9 million budgeted for various capital and special projects on the basis of funds received before the year but not spent by the end of 1995. The reason for including these budgetary provisions is to enable meaningful comparisons to be made between the budget and expenditure figures also under the heading of capital and special projects.

17. The budget figure for the Expanded Programme of Assistance (EPA) consists

of allotments set up on the basis of the funds received from 1988 to 1995 in response to various appeals made by the Agency to solicit special contributions for projects aimed at improving the living conditions of the refugee population, mainly in the West Bank and Gaza.

Financial results

18. UNRWA's General Fund ended the biennium with an excess of income over expenditure of about \$15.7 million.

19. The Working Capital of UNRWA is not a statutory operating reserve but is the balance remaining in the General Fund after liabilities are deducted from assets. The working capital account is used for three purposes: (a) to meet temporary, current year imbalances in cash flow, (b) to fund unforeseen needs and (c) in the event of a substantial reduction in the Agency's programme, to meet any extraordinary liquidating liabilities. The working capital was increased in the biennium by \$15.7 million, the excess of income over expenditure, and therefore rose from \$5.5 million to \$10.2 million. (Pledges made by several donors for 1995 were not received until early 1996. The accounting principles of the Agency require that those contributions be recorded when they are received. Of those outstanding pledges, \$3.8 million were subsequently received.)

20. Statement III shows the Agency's working capital, as well as all other fund balances. It should be noted, however, that these other balances are earmarked for special purposes and would therefore not be available to cover part of the costs of the Agency's core programmes, if such a need should occur.

21. The results for the biennium show, as previously stated, a surplus of \$15.7 million, and, as at 31 December 1995, the working capital of the Agency was \$10.2 million. It should be recalled, however, that reserves were set aside which could be treated as part of the working capital. With this, the Agency's revised working capital as at 31 December 1995 would increase by \$8.3 million to \$18.5 million. On the other hand, the working capital may have to be decreased by the following items:

(a) Funded ongoing activities are projects that are part of the core programme of the Agency, a designation used because the Agency has tried to obtain specific donations for the individual components. This has been moderately successful. At 31 December 1995, the accumulated deficit for funded ongoing activities was \$1.9 million. If donations cannot be obtained, this deficit, or part thereof, will have to be absorbed by the working capital of the General Fund.

(b) The accumulated deficit at the end of 1995 for the EMLOT programme of \$17.8 million has to be funded, and the only source is the working capital of the General Fund.

(c) In addition, there are two projects in the EPA programme and one project in the Gaza General Hospital programme that have a combined accumulated deficit as at 31 December 1995 of \$6.1 million. This deficit has to be funded, and, again, the working capital of the General Fund is the only source.

(d) The Agency is committed, from 1 January 1996, to set aside each biennium a certain amount so that over a given period there will be sufficient funds to cover termination payments to staff when the Agency is dissolved. The

working capital fund of the Agency is not in a position to absorb this commitment.

22. Statement IV shows that the Agency had approximately \$84 million in cash on hand at the end of 1995. This reflects the fact that UNRWA received a considerable amount of funds for the Peace Implementation Programme which it was not able to spend in the same period. This does not depict a surplus but shows mainly funds that are earmarked for projects in the current and coming years.

23. Statement V shows income and expenditure for the General Fund alone (see also statement II). Statement VI shows assets and liabilities for the General Fund (see also statement III). Schedule I shows expenditure of the General Fund in more detail, schedule 2 shows contributions in cash, schedule 3 contributions in kind and schedule 4 miscellaneous income; schedule 5 shows adjustments to those accounts. Schedule 6 shows income from sales of various production units.

24. Statements VIII to XXI and the schedules that complement those statements show income/expenditure and assets/liabilities for each of UNRWA's sub-budgets. These sub-budgets and their relation to the regular budget are shown in the graph that follows. Again, cash and in-kind contributions are shown. The tables go into some detail to show donors what happened to their funds earmarked for special projects.

25. The accounts of the Area Staff Provident Fund are shown in statements XXII to XXIV. The total assets of the funds rose from \$732.6 million to \$745.9 million. Net investment income for the biennium was \$86.7 million, compared to \$142.8 million for the previous biennium.

II. REPORT OF THE BOARD OF AUDITORS

Introduction

1. The Board of Auditors has audited the financial statements of the United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA) for the period 1 January 1994 to 31 December 1995 in accordance with General Assembly resolution 74 (I) of 7 December 1946 and article XII of the Financial Regulations of UNRWA. The audit has been conducted in conformity with article XII of the Financial Regulations and Rules of the United Nations and the annex thereto, and with the Common Auditing Standards of the Panel of External Auditors of the United Nations, the specialized agencies and the International Atomic Energy Agency. These standards require that the Board plan and perform the audit to obtain reasonable assurance as to whether the financial statements are free of material misstatement.

2. The audit was conducted primarily to enable the Board to form an opinion as to whether the expenditures recorded in the biennium 1994-1995 had been incurred for the purposes approved by the governing bodies; whether income and expenditures were properly classified and recorded in accordance with the Financial Regulations and Rules; and whether the financial statements of UNRWA presented fairly the financial position as at 31 December 1995 and the results of the operations for the period then ended. The audit included a general review of financial systems and internal controls and a test examination of accounting records and other supporting evidence to the extent the Board considered necessary to form an opinion on the financial statements.

3. In addition to the audit of the accounts and financial transactions, the Board carried out reviews under regulation 12.5 of the United Nations Financial Regulations and Rules. The reviews concerned the efficiency of financial procedures, the internal financial controls and, in general, the administration and management of UNRWA.

4. The audit was carried out at UNRWA's Vienna headquarters, its headquarters branch at Amman and the field offices in the Syrian Arab Republic, the West Bank and Gaza.

5. During the period under review, the Board continued its practice of reporting the results of specific audits through management letters containing detailed observations and recommendations to the Administration. This practice helped to maintain an ongoing dialogue with the Administration on audit issues.

6. The present report covers matters which, in the opinion of the Board, should be brought to the attention of the General Assembly. The Board's observations and conclusions were discussed with the Administration, whose views, where appropriate, have been reflected in the report. The report is divided into two parts, covering the audit of financial statements and management issues, respectively. A summary of the Board's main recommendations and findings is reported in paragraphs 10 to 20. The detailed findings are reported in paragraphs 21 to 34 and 36 to 69.

Follow-up on actions taken on previous audit recommendations

7. Pursuant to General Assembly resolution 47/211 of 23 December 1993, the Board has reviewed measures taken to implement its prior recommendations. The Board noted that a number of effective measures were taken by the Administration to implement the recommendations made by the Board in its audit report for the biennium ended 31 December 1993. Detailed actions taken and the comments of the Board thereon are outlined in the annex to the present report of the Board.

Overall results

8. The Board's examination disclosed that the recording of the unutilized balance of \$12 million of a cash contribution as income received in advance was not consistent with the Agency's policy of recognizing income on the cash basis of accounting; and in-kind donations valued at \$3.7 million received in the biennium were omitted from the financial statements. These omissions were not considered material to the accuracy of the financial statements as a whole. Accordingly, the Board has placed an unqualified opinion on the financial statements of UNRWA.

9. Programme management was on the whole satisfactory. However, one project, the Irrigation Technology Project, discussed in paragraphs 44 and 45, was found to have been implemented in a manner not consistent with the Agency's programme management procedures, especially in regard to monitoring and control of expenditure.

Summary of recommendations

10. The Board recommends that the following corrective actions, presented in order of priority, should be taken:

- (a) An improvement in financial management is warranted in view of the fact that the present balance in the working capital is not enough to discharge fully its obligations. For example, fund-raising initiatives may be intensified and monitoring and control of expenditure strengthened (see para. 25);
- (b) The Agency should ensure strict adherence to its programme management procedures on acceptance and disbursement of project funds, as well as reporting on them to assure donors of the effective utilization of their contributions (see para. 54);
- (c) In view of its implications for the General Fund's cash flow, the Agency may wish to review its policy of advance authorization of funds to pre-finance projects prior to receipt of contributions, by limiting its application and strengthening its monitoring. Meanwhile, to minimize the effect of advance authorizations on the General Fund the Board recommends that:
 - (i) Advance authorizations should be given only in respect of projects which are actually ready to take off;
 - (ii) The implementation of projects should be expedited to ensure speedy reimbursements to the General Fund (see para. 69);
- (d) For the purpose of transparency, the recording of an unutilized balance of cash contributions as income received in advance is not consistent

with the Agency's policy of recognizing income on the cash basis of accounting. In the future, cash contributions should be recognized as income in the year they are received (see paras. 32 and 33);

(e) UNRWA's involvement in any project should be at the very start of the planning process to provide the necessary expertise in the development of a feasible project plan and realistic implementation schedules to expedite project delivery (see para. 58);

(f) Monitoring and reporting of deliveries of in-kind donations to Gaza General Hospital should be effectively coordinated between headquarters, Vienna, and the field office, Gaza, to facilitate their prompt accounting (see para. 28);

(g) To improve planning with appropriate consideration for sustainability, the Agency should develop a more effective system of consultation and coordination with all parties concerned (see para. 62).

Summary of findings

Accounts and financial reporting

11. The operational results of the General Fund showed a surplus of \$15.7 million for the biennium ended 31 December 1995, compared to a deficit of \$37.4 million incurred for the prior biennium. Income from all funds exceeded expenditure by \$25.6 million (see para. 21).

12. The working capital of \$18.5 million in the General Fund as at 31 December 1995 would be reduced to \$10.2 million after the reserve of \$8.3 million earmarked for specific purposes is set against it. However, in the absence of adequate donor contributions, the working capital cannot fund the total deficit of \$24.9 million on the other funds, thus indicating a precarious financial position (see paras. 22 and 25).

13. The non-recording of three in-kind contributions received in the biennium has resulted in the understatement of both income and expenditure of the General Fund by \$3.7 million (see para. 27).

14. Owing to the low price of flour and other utilization restrictions, a donor's cash contribution for the purchase of flour to feed Palestine refugees could not be fully expended. Also, the recording of the unutilized balance of \$12 million as income received in advance is not consistent with the Agency's policy of recognizing income on the cash basis of accounting and did not ensure transparency in financial reporting (see paras. 30 and 32).

15. Although the presentation of UNRWA's financial statements for the biennium 1994-1995 conforms to the United Nations System Accounting Standards, further work is required to achieve full compliance in the future (see para. 34).

Provident Fund

16. Total assets of the Provident Fund increased by only 1.8 per cent to \$745.8 million as at 31 December 1995, from \$732.6 million at 31 December 1993, compared to a significant increase of 19.3 per cent in 1993 over 1991 (see para. 38).

Programme management

17. The Groba Irrigation Technology Project was implemented without due regard to the Agency's programme management procedures, and as a result the project suffered a number of deficiencies in project design, expenditure monitoring and control and donor reporting (see para. 52).

18. Inadequate consultation and coordination in project planning between UNRWA, the implementing partners and major donors resulted in shortcomings such as, over- and underestimation of resources, inadequate feasibility studies and doubtful future sustainability of some projects under implementation (see paras. 56 and 58).

19. In addition to internal causes of high staff turnover and unrealistic implementation schedules, external factors such as difficulties in land acquisition militated against timely and efficient project implementation (see paras. 64 and 65).

20. Agreements with donors requiring UNRWA to pre-finance projects prior to the payment of pledged contributions could have serious cash-flow implications for the General Fund, due to the slow reimbursement procedure caused, principally by implementation delays (see paras. 68 and 69).

Part I: Financial statements

Accounts and financial reporting

Operational results

21. The operational results of the General Fund showed a surplus of \$15.7 million for the biennium ended 31 December 1995, compared to a deficit of \$37.4 million for the previous biennium. Total income amounted to \$510.7 million against an expenditure of \$495 million. The Agency recognizes income from contributions (about 95 per cent of its total income) on the cash basis of accounting; consequently, contributions are recorded as income only upon receipt and not when due. Based on this policy, the total receipts of all funds amounted to \$704.4 million against an overall expenditure of \$678.8 million, resulting in a surplus of \$25.6 million for the biennium. Total receipts represented 82.5 per cent of the budgeted income of \$853.9 million.

Working capital

22. The Agency's working capital is not a statutory operating reserve; it is a balance remaining in the General Fund after short-term liabilities are deducted from current assets. The working capital as at 31 December 1995 was \$18,455,398. Included in the working capital are reserves earmarked for specific purposes - emergencies, \$6.5 million, and Gaza General Hospital construction costs, \$1.8 million - thus reducing the balance of the working capital from \$18.5 million to \$10.2 million.

23. The balances at the end of the biennium of the Agency's other funds was as follows (in United States dollars):

Funded ongoing activities	(1 881 725)
Capital/special projects	4 080 602
Extraordinary Measures in Lebanon and the Occupied Territory (EMLOT)	(17 755 405)
Expanded Programme of Assistance (EPA)	5 027 962
Gaza General Hospital	(5 244 508)
Peace Implementation Programme (PIP)	42 075 362
Headquarters relocation to Gaza	<u>3 518 965</u>
Total	<u>29 821 255</u>

24. Balances in the other funds of UNRWA, totalling \$16.3 million at the beginning of the biennium, increased to \$29.8 million by 31 December 1995, due largely to the low utilization of PIP contributions (62 per cent of total receipts of \$97.9 million was spent). The deficits for EMLOT (\$17.8 million) and Gaza General Hospital (\$5.2 million) occurred because expenditures exceeded receipts in large amounts. It is noted that fund balances are earmarked for specific purposes and are not available for expenditure by the General Fund or any other fund.

25. As analysed by the Agency in its financial report for the biennium 1994-1995, the working capital may have to be decreased by the accumulated deficit balances amounting to \$24.9 million on the other funds (funded ongoing activities, \$1.9 million; EMLOT, \$17.8 million; and Gaza General Hospital, \$5.2 million) as no other funding source is immediately available. This would effectively leave the revised working capital a deficit of \$14.7 million. This situation calls for improvement in financial management, especially by expanding and intensifying fund-raising initiatives and strengthening the monitoring and control of expenditure.

Non-recording of in-kind donations

26. In-kind donations in the form of equipment and material were received from the Government of Denmark for the Gaza General Hospital project at various times prior to the end of the biennium. These donations, valued at \$3,737,388 (equipment, \$2,506,938; materials for manufacturing doors, \$780,000; and material for manufacturing furniture, \$450,450), were not recorded in the accounts of the Agency for the biennium ended 31 December 1995.

27. As required by the Agency's accounting procedures, appropriate administrative purchase orders should have been issued for the items to enable their proper values, totalling \$3,737,388, to be recorded as income and expenditure simultaneously in the accounts. The Agency's failure to record these in-kind contributions meant that both income and expenditure figures for the biennium were understated by \$3.7 million.

28. The Administration accepted the Board's recommendation to strengthen coordination between headquarters and the field office to permit effective monitoring, recording and reporting of deliveries of in-kind donations to Gaza General Hospital. Also, for more accurate reporting in future years, the value

of donations should be reflected in the financial statements. The Administration is of the opinion that coordination with the field office will be facilitated by the pending move of the Agency's headquarters to Gaza.

Utilization and recording of cash contributions for purchase of flour

29. Under an agreement on the Food Aid Programme, UNRWA has submitted estimates annually since 1993 to the Government of Japan for cash contributions for the purchase of flour milled from American wheat for the benefit of Palestine refugees in Jordan, the Syrian Arab Republic, Lebanon, Gaza and the West Bank.

30. Between June 1993 and September 1995, Japan paid \$28,282,828 to UNRWA, covering the three-year period 1993-1995, for the purchase of flour to feed the refugees. By 31 December 1995, UNRWA had purchased only \$16.3 million worth of flour, leaving an unutilized balance of \$12 million. The low utilization was attributed to the low acquisition cost of flour and the fact that by the nature of the contribution unutilized funds could not be used for any other purpose.

31. The Administration shared the concern of the Board on the underutilization of the Japanese contribution for flour and agreed to explore with the donor other means of ensuring effective utilization of this important contribution. Meanwhile, the Agency is taking action to utilize the funds available to build up a four-month buffer stock of flour for use in emergencies.

32. The treatment of the unutilized balance of the food aid contribution as income for future years is not consistent with the fundamental accounting principle of recognizing income in the year to which it relates. The balance relates to paid pledges for 1994-1995 and should therefore be recognized as income for the biennium 1994-1995. Consequently, the unutilized balance of \$12,017,214 recorded as income for future years understated the total contributions paid by Governments for the 1994-1995 biennium by this amount. Similarly, the income received in advance in the statement of assets and liabilities (statement III) was overstated by \$12,017,214.

33. For the purpose of transparency, and in line with the Agency's policy of recognizing income on the cash basis of accounting, cash contributions should be recorded as income in the year they are received.

United Nations System Accounting Standards

34. The Board assessed the extent to which UNRWA's financial statements for the 1994-1995 biennium conform to the United Nations System Accounting Standards. The review indicated that the presentation of UNRWA's financial statements for 1994-1995 is generally consistent with the standards but that further work needs to be done in the 1996-1997 biennium to bring the UNRWA financial statements fully into line with those standards. The main areas for attention include:

(a) The presentation of the statement of income and expenditures and changes in reserves and fund balances (statement II) should be improved to disclose changes in reserves and fund balances which were omitted from the current statement; and

(b) The statement of assets, liabilities and fund balances (statement III) should be improved further to include the value of land and buildings. The value of land and buildings of \$641,680 was omitted from statement III.

35. Although UNRWA explained to the Board that it is not its policy to

capitalize land and buildings, the Board considers that UNRWA should take steps to apply the United Nations System Accounting Standards more closely.

Write-off of losses of cash, receivables and property

36. Losses reported to the Board for the biennium ended 31 December 1995 totalled \$116,428, made up of cash (\$17,575), equipment (\$58,550), supply handling losses (\$40,290) and other losses (\$13). The cash losses represent uncollectable accounts receivable written off.

Ex gratia payments

37. In keeping with UNRWA's financial regulation 11.5, the Board was advised of six ex gratia payments of \$50,236 made during the biennium 1994-1995.

Part II: Management issues

Provident Fund investment portfolio

38. The Provident Fund investment portfolio, including investments held in schillings at 31 December 1995, totalled \$745,834,200, as follows (in United States dollars):

Baring International, London	190 387 306
Bank Austria, Vienna	30 034 874
Creditanstalt Bankverein, Vienna	187 695 648
Paribas Asset Management, Paris	171 622 349
Warburg Asset Management, London	80 629 675
WorldInvest, London	37 960 962
State Street, Paris	41 023 293
Security lending/cash	<u>802 192</u>
Subtotal	740 156 299
Portfolio in schillings	<u>5 677 901</u>
Total	<u>745 834 200</u>

The total assets of the Provident Fund increased by only 1.8 per cent to \$745,834,200 as at 31 December 1995, from \$732,601,708 as at 31 December 1993, compared to a significant increase of 19.3 per cent in 1993 over 1991.

39. The Board's audit further disclosed that UNRWA's bond managers underperformed against the benchmark in 1994, recording an average return of -4.3 per cent against the market average return of -1.7 per cent.

40. It was observed that, owing to their poor performance, the investment contracts of three bond managers were terminated and new managers hired. An investment performance report issued for the period ended 31 December 1994 on the Provident Fund attributed the underperformance of the bond managers to investment selection and currency hedging.

41. Internal control weaknesses noted by the Board, such as delays in checking the global custodians' monthly reports, are being remedied through the establishment of a new post in the Provident Fund secretariat to assist in handling the large volume of work in this area. In addition, a new procedure aimed at eliminating delays in placing funds on call accounts has been introduced.

Programme management

The Peace Implementation Programme

Background information

42. UNRWA officially launched the Peace Implementation Programme (PIP) on 6 October 1993 in response to the signing of the Peace Accords on 13 September 1993. The main objective of the programme in the West Bank and Gaza Strip was to target assistance to those areas where the beneficiaries required significant short-term improvements. Under the programme the Agency has begun to undertake special construction and development projects in the West Bank and Gaza Strip, to meet the needs of refugees in education, environmental health, primary health care, social services, and income generation generally in the form of loans to small-scale enterprises. The programme also targets similar needs of Palestine refugees residing in Jordan, Lebanon and the Syrian Arab Republic.

43. The programme was implemented in two phases. As of February 1995, total contributions and confirmed pledges for PIP projects in phase I (6 October 1993- 29 September 1994) amounted to \$93.9 million; those in phase II (30 September 1994-1 March 1995) totalled a little over \$9 million. A large part of the contributions, \$88.6 million (91 per cent), was to fund projects in the West Bank and Gaza, with the remainder for Jordan, Lebanon and the Syrian Arab Republic.

44. Among the PIP projects which a Government had offered to fund was a pilot agricultural project - the Irrigation Technology Project. UNRWA accepted the Government's contribution of \$1.118 million as an in-kind donation to be implemented through Groba, a private company, because UNRWA lacked the expertise to implement this type of project.

45. Based on financial improprieties alleged to have been committed by an UNRWA staff member in respect of funds donated for an agricultural pilot project in the West Bank and Gaza Strip, the Commissioner-General requested the Board to audit the implementation of PIP in the two areas. The audit was carried out between March and May 1995 and the results communicated to the Commissioner-General in August 1995. The Board's examination covered the Groba Irrigation Technology Project, compliance with the Agency's clearance procedures, and project planning and implementation.

Groba Irrigation Technology Project

46. In an earlier investigation of the Groba Irrigation Technology Project, carried out at the request of the Commissioner-General, the Office of Internal Oversight Services (OIOS) had come to certain conclusions about an UNRWA staff member, former Director of Projects and Development. Following its examination of the relevant documentation, the Board fully shares the following OIOS conclusions as set forth below:

- (a) On two occasions (13 December 1993 and 10 June 1994), the former Director had received two payments of \$80,000 and \$30,000, respectively, from the implementing agent, Groba, into his private account. The payments constituted a private arrangement between the staff member and the company to act as a cashier to undertake local disbursements on the company's behalf in the Gaza Strip. This arrangement of lodging project funds in a staff member's private bank account was improper regardless of whether or not there was any personal benefit to the staff member;
- (b) The staff member failed to disclose his ownership of the land which was under consideration for the project and the consequent potential benefit to him personally;
- (c) As officer responsible for the project, the staff member requested the transfer of a second instalment of funds (35 per cent) before the project had been completed, contrary to the terms of the UNRWA-Groba agreement;
- (d) The donor's requirement for the presentation of audited accounts was not complied with because the staff member, who was responsible for monitoring the implementation of the project, failed to bring this request to the attention of appropriate UNRWA officers.

47. Based on the above findings and the subsequent report of the Joint Disciplinary Committee, the staff member was dismissed.

Non-compliance with Agency's clearance procedures

48. In its audit of PIP, the Board examined the factors that may have contributed to the improper management of the Groba project and concluded that problems had arisen from non-compliance with the Agency's existing programme-management procedures.

49. The Groba project was a purely agricultural project, based on irrigation technology for the implementation of which the Agency's Projects and Development Office did not have the necessary expertise. Further, the decision to accept the contribution for the project as an in-kind donation to be implemented by a third party was not consistent with the Agency's clearance procedures since the project was unrelated to the traditional programmes operated by the Agency over the years.

50. The Agency's clearance procedures require that first time drafts or changes, revisions or new conditions requested by a donor should be cleared with the Legal Department, the Finance Department and the Department of Administration, depending on their respective functions. Such procedures also require the External Relations Office to coordinate all clearance requirements within the Agency and to advise the donor accordingly.

51. The audit disclosed that the staff member, in his role as Officer-in-Charge

of the External Relations Office and at the same time Chief of the Projects and Development Office, should have ensured compliance with the clearance procedures prior to acceptance of the contribution. However, the staff member failed to obtain the required clearance.

52. As a result of non-compliance with the Agency's own procedures, the Groba project was implemented differently from other UNRWA projects in regard to its project design, expenditure monitoring, control and reporting. Funds were not recorded as UNRWA income but were treated as funds held for other organizations. Consequently, normal Agency procedures with regard to contracting, procurement, budgeting and expenditure control, as well as project monitoring on site, were not observed. No adequate financial records were maintained by UNRWA except what was recorded by the implementing agent, and it was thus not possible to submit an annual report and audited accounts, as requested by the donor.

53. The Administration agrees, in hindsight, that the Agency should not have accepted the contribution and passed it on to a third party without establishing appropriate financial and administrative controls. The Agency said it has learned from this experience and will take steps to ensure that funds received from a donor would inevitably be managed in accordance with the Agency's financial control procedures, rules and regulations.

54. The Board considers the management of this project a serious flaw in project implementation. To forestall the recurrence of a similar situation, the Board recommends that the Agency should ensure strict adherence to its financial control and programme management procedures on the acceptance and disbursement, as well as reporting of project funds, to assure donors of the effective utilization of their contributions.

Project planning

55. Thirty-eight projects valued at \$52.2 million were selected for examination to determine whether projects were planned and implemented in accordance with the Agency's established procedures and with due regard to economy and efficiency. The selection was based on type of programmes (education, health and environmental sanitation, and relief and social services), dollar value, location and impact on refugees.

56. On project planning, weaknesses such as inadequate consultation and coordination and unrealistic cost estimates were noted. Of the pledge of \$20 million made by a donor, \$1.9 million was earmarked for funding health projects in health institutions in Jerusalem. The beneficiary Health Council decided to use the fund to construct a radiotherapy centre and this was communicated to the director of UNRWA operations. The relevant UNRWA project offices were not adequately consulted at the planning stage and, as a result, there was no effective coordination between the various offices - the Development Office, the Office of the Director of Health and the Field Health Programme Office.

57. As a result of the failure to liaise with the relevant parties at the inception of the project, the preliminary proposal lacked important components such as human resources development and training and running costs, thus raising serious questions regarding the sustainability of the radiotherapy centre. Also, additional funding was needed - the total estimated cost of the project was \$2.7 million but only \$1.9 million was available.

58. In another case, a project for establishment of a central public health

laboratory, estimated to cost \$2 million, was formulated without prior consultation with UNRWA. UNRWA was later requested by the donor to implement the project. UNRWA expressed concerns that there was no adequate feasibility study and that the project's sustainability was doubtful. The Board is of the opinion that UNRWA's involvement in any project should be at the very start of the planning process to provide the necessary expertise in the development of a feasible project plan to facilitate effective project implementation.

59. It was further observed that resources were overestimated by 44.2 per cent on five projects in respect of construction of health facilities, environmental feasibility studies and acquisition of vehicles. This would suggest that the proposals were not based on realistic and verifiable assumptions. The Administration, however, attributed the sharp drop in the actual requirements to the downsizing of the original construction plans or an overestimation of resources by some field offices.

60. UNRWA operates a school health education programme funded from the General Fund with the objective of providing health services to children in the elementary and preparatory schools as an integral part of its primary health care programme. One Government is providing funding for a similar school health education programme amounting to \$276,678 for two years with the objective of extending to the schools of the beneficiary Authority similar services being offered in UNRWA schools.

61. It was observed that the cost estimates for this project included a high recurrent cost of \$167,034, or 60 per cent of the estimated cost of the project, for two years. There would therefore be the need to look for alternative funding after two years.

62. To improve project planning with adequate consideration for sustainability, it is necessary for the Agency to develop a more effective system of consultation and coordination with all parties concerned.

63. The Administration welcomed the recommendation and told the Board that it would ensure that adequate consultation and coordination is undertaken with all parties before accepting contributions which have high recurrent costs in order to ensure a project's future sustainability.

Project implementation

(a) Delayed implementation

64. The Board noted that, at the time some projects were submitted and approved by donors for funding, no confirmed lands were available. For example, for some projects for which an agreement was signed with a donor in June 1994, confirmed sites became available only in November 1994. Out of the five schools to be constructed and equipped, tenders for the construction of four had not been invited nine months after the signing of the agreement. Also, actual construction had not started in respect of the construction of three health posts at Yabad, Beit Our and Ein Arik ten months after the agreement. In the case of the Nablus Polyclinic, co-funded by two donors, tenders were expected to be ready only in mid-April 1995.

65. In addition to internal causes such as high turnover of staff and improper estimating of time-frames, the Administration attributed the delays in implementing projects to frequent closures of the West Bank, which severely disrupted schedules for construction, consultancy services, tendering and

preparation of drawings. Also to blame were changes in sites occasioned by owners renegeing on agreements, necessitating re-design and re-drawing.

66. The Board acknowledges the difficulties in land acquisition and the volatile security situation in the area. Nevertheless, a low utilization of funds arising from delayed implementation of projects would undermine the Agency's capacity for programme delivery. The Administration endorsed the Board's recommendation that project implementation should be improved through the establishment of realistic implementation schedules, taking into consideration the special circumstances in the area. The Agency also acknowledges the need to secure a site before a project proposal is submitted to a donor for funding.

(b) Advance authorization of funds

67. In accordance with the Agency's programme management procedures, an advance authorization of funds is given by the Controller upon the signing of an agreement between the donor and the Agency and when there is a need to initiate implementation prior to receipt of funds from donors. Advance authorizations are therefore meant to ensure speedy commencement of projects which might otherwise be delayed.

68. As of 3 April 1995, total advance authorizations issued amounted to \$51.6 million, of which expenditure (obligations and disbursements) totalled \$26.3 million, leaving a large unutilized balance of \$25.3 million on hold in a reserve. Total sums received from donors amounted to \$19.3 million. The Agency was therefore yet to be reimbursed with \$7 million spent on projects on behalf of donors.

69. The Board considers the release of funds through advance authorizations to pre-finance projects prior to receipt of pledged contributions risky because of its cash flow implications for the General Fund. It was also not apparent that the stated objective of advance authorizations, namely to expedite project implementation, was being realized. For example, the Board noted that UNRWA advanced \$17.9 million against a pledge of \$20 million from one donor but nearly nine months after the agreement was signed, UNRWA had obligated \$6.5 million and disbursed only \$0.7 million from those funds. Under the agreement, the Agency would be reimbursed only after the projects had been implemented and respective disbursements made. This implies that the actual reimbursement due from the donor was limited to \$0.7 million. The Agency may wish to consider reviewing this policy by limiting its application based on need to specified projects and strengthening its monitoring. Meanwhile, to minimize the burden imposed on the General Fund by advance authorizations, the Board recommended and the Administration agreed that:

(a) Advance authorizations should be given only in respect of projects which are actually ready to take off;

(b) The implementation of projects should be expedited to ensure speedy reimbursements to the General Fund.

70. The Administration said that the Agency was aware of the risk to its cash position but concurred in this arrangement because the donor's rules and regulations did not permit any other arrangement. The Administration further stated that the Agency's budgetary system provides the necessary controls to minimize the effect on cash flow of advance authorization of funds.

Internal audit

71. The two recommendations of the Board on the internal audit office of UNRWA in its report for the biennium 1990-1991 concerned the need to increase coverage of headquarters offices and departments and the avoidance of the use of internal audit in line functions. The Board's follow-up on the implementation of these recommendations did not disclose the use of any of the internal auditors in line functions. UNRWA now has two headquarters locations, in Vienna and Amman. The internal audit coverage was found to be greater in Amman than in Vienna because most of the headquarters offices and departments are located there. However, coverage was not extensive but was limited to the review of specific activities within the offices. The Board intends to conduct an in-depth review of the adequacy of the internal audit function in UNRWA during the current biennium.

Cases of fraud and presumptive fraud

72. UNRWA informed the Board of four cases of fraud that came to notice during the biennium ended 31 December 1995. Three of these cases involved a loss to the Agency of \$74,484. The perpetrators of one of the three cases have not been detected. The fourth case concerned the trading of confidential information by staff members with contractors for commission payments. It was not possible to determine the impact on the Agency of these irregular commission payments.

73. In all, the appointments of 17 staff members were terminated and five others suffered various penalties. The Agency's contribution of \$43,558 was deducted from one of the dismissed staff member's total Provident Fund credits. The staff member was also not paid separation indemnities, amounting to approximately \$15,000. The Agency has taken appropriate measures to strengthen internal controls over the disbursement documentation and contracting procedures.

Acknowledgement

74. The Board of Auditors wishes to express its appreciation for the cooperation and assistance extended by the Commissioner-General, senior officers of UNRWA and members of their staff.

ANNEX

Follow-up on actions taken to implement the recommendations
of the Board of Auditors in its report for the biennium
ended 31 December 1993 a/

I. RECOMMENDATION 9 (a)

1. Programme delivery should be further improved through comprehensive project planning, including adequate feasibility studies and the elimination of avoidable delays in project execution.

Measures taken by the Administration

2. All field offices have been requested to adequately plan all projects and prepare, where necessary, feasibility studies. To further improve project planning, priority lists were introduced in November 1995 based on input from each field office and in close coordination with the three programme departments. Priority lists are updated every six months and are approved by the Agency's General Cabinet.

Comments of the Board

3. While acknowledging some improvement in project planning and delivery, the Board's audit of the Peace Implementation Programme in the current biennium disclosed that deficiencies in project planning, including implementation delays, persist. As discussed in the present report, further improvements are required in this area.

II. RECOMMENDATION 9 (b)

4. Utilization of idle computers in the West Bank should be consistent with the original purpose for which they were acquired. The Agency should also establish a clear policy on the administrative use of programme equipment to ensure efficient utilization of project funds.

Measures taken by the Administration

5. Headquarters Instruction No. 4, on personal computer facilities, was reissued in October 1994 with clear instructions on the acquisition and implementation of project-related computers. West Bank computers in question will be transferred back to the Department of Relief and Social Services as originally intended.

a/ Official Records of the General Assembly, Forty-ninth Session, Supplement No. 5C (A/49/5/Add.3), sect. II, para. 9.

Comments of the Board

6. It was noted that Administrative Instruction No. 4 was issued to emphasize the utilization of project-related computers. However, evidence is lacking to confirm the effective use of the idle computers in the West Bank.

III. RECOMMENDATION 9 (c)

7. Property management and accountability should be emphasized as follows:

(a) Missing property items should be fully investigated to establish personal responsibility for any losses;

(b) Adequate property records should be maintained;

(c) Movements of items should be properly authorized and adequately documented;

(d) Responsibility for the control of property should be formally delegated to appropriate custodians.

Measures taken by the Administration

8. The Agency has set up a Register of Fixed Assets and has an annual exercise to confirm the physical existence of items appearing on the register. Furthermore, all department heads have been reminded to notify the Supply Division of any movements in the location of property. Investigations are carried out until missing items are located or personal responsibility is established. A complete inventory of Vienna headquarters is maintained on a paradox application and is constantly updated. All equipment moved from Vienna headquarters to Amman headquarters had been properly documented by means of issuing value and locator cards. Custodial responsibilities are formally delegated in accordance with the provisions of Organization Directive No. 12.

Comments of the Board

9. The recommendation has been implemented, although the inventory count for the year ended 31 December 1995 had not been completed by April 1996.

IV. RECOMMENDATION 9 (d)

10. The Agency should establish and enforce a clear policy on the ownership of property acquired for projects through third-party contributions and donations.

Measures taken by the Administration

11. The Agency's position is that ownership of such property resides with the Agency. Only when the Agency decides that such property is of no value to the Agency can ownership be transferred.

Comments of the Board

12. The retention by the Agency of ownership of property acquired through third-party contributions is consistent with the view of the Agency's legal adviser. The application of this policy by the field offices will be verified in the Board's future audits.

V. RECOMMENDATION 9 (e)

13. The Agency's Motor Transport Technical Instructions should be reviewed to include the payment of a reasonable compensation to the Agency as a cost-recovery measure and to emphasize personal accountability for damage to property.

Measures taken by the Administration

14. The relevant Motor Transport Technical Instruction has been reviewed. The Instruction currently allows staff to be charged up to a maximum of 10 per cent of monthly salary if they are deemed negligent. If gross negligence is involved, the total cost of the damage may be levied.

Comments of the Board

15. The 10 per cent compensation clause and full recovery in case of gross negligence introduced by the Administration are yet to be applied to actual situations. Their application will be monitored in future audits.

VI. RECOMMENDATION 9 (f)

16. UNRWA headquarters should consult with the field offices in the procurement of equipment meant for projects implemented outside headquarters.

Measures taken by the Administration

17. The Office of Projects and Development maintains close contact with and cooperates fully with all field offices in the formulation of project proposals. This was strengthened by the relocation to Jerusalem in September 1994 of the Projects and Development Office, which is thus now based in the area of operations closer to all the field offices which prepare project proposals based on their own needs. Each proposal is reviewed by a number of relevant departments and offices for clearance. Once all clearances have been obtained, the Projects Office finalizes the proposal, which is then submitted to interested donors by the Chief of the External Relations Office.

Comments of the Board

18. The recommendation has been implemented. Its full effect will be closely monitored in future audits.

VII. RECOMMENDATION 9 (g)

19. Early action should be taken to ensure adequate segregation of duties and responsibilities of the staff of the Computer Operations Unit to provide assurance of data integrity.

Measures taken by the Administration

20. The Administration has reported that the Information Systems Office is making every effort to provide adequate segregation of duties and responsibilities between development and operations staff. It has also established new procedures and clear lines of authority between the two areas. The Agency is of the opinion that data integrity is now adequately protected.

Comments by the Board

21. The recommendation has been implemented.

III. AUDIT OPINION

We have examined the following appended financial statements, numbered I to XXVI properly identified, the relevant schedules numbered 1 to 21, and the supporting explanatory notes of the United Nations Relief and Works Agency for Palestine Refugees in the Near East for the financial period ended 31 December 1995, in accordance with the Common Auditing Standards of the Panel of External Auditors of the United Nations, the specialized agencies and the International Atomic Energy Agency. Our examination included a general review of the accounting procedures and such tests of the accounting records and other supporting evidence as we considered necessary in the circumstances.

In our opinion, the financial statements present fairly the financial position of the organization as at the end of the biennium and the results of its operations for the biennium then ended; that they were prepared in accordance with the stated accounting policies which were applied on a basis consistent with that of the preceding financial period; and that the transactions were in accordance with the Financial Regulations and legislative authority.

In accordance with our usual practice, we have issued a long form report on our audit of the financial statements of the United Nations Relief and Works Agency for Palestine Refugees in the Near East, as provided for in the Financial Regulations.

SCHEDULE 19

AREA STAFF PROVIDENT FUND AND VIENNA HEADQUARTERS
AREA STAFF PROVIDENT FUNDGeneral administration charges as at 31 December 1995

(United States dollars)

1993	1995
Provident Fund secretariat	
412 499 Established posts	456 746
1 666 Computer equipment	0
8 566 Travel costs	15 353
0 Temporary assistant	1 226
<u>6 055 Other costs</u>	<u>2 305</u>
428 786 Subtotal	475 630
339 514 Other manning table posts	443 494
1 722 Temporary assistant	0
17 383 Investment Advisory Committee	12 317
34 520 Interpreters	36 468
45 632 Travel costs	57 529
2 076 Entertainment expenses	2 096
771 Other charges	0
<u>870 404</u>	<u>1 027 534</u>

The above charges have been allocated to each fund based on the total credits due to participants in each fund as at 31 December 1995 with the exception of:
 (a) the travel costs of Staff Provident Fund representatives and (b) staff costs incurred in the fields of operation. The costs of these two items are charged to the Area Staff Provident Fund. Therefore the allocation is as follows:

865 511	Area Staff Provident Fund	1 019 819
4 893	Vienna Headquarters Area Staff Provident Fund	7 715
<u>870 404</u>		<u>1 027 534</u>

SCHEDULE 20

AREA STAFF PROVIDENT FUND AND VIENNA HEADQUARTERS AREA
STAFF PROVIDENT FUNDLoan scheme administration charges as at 31 December 1995

(United States dollars)

1993	1995

ANNEX

Notes to the financial statements

Note 1. Summary of significant accounting policies

(a) The Agency utilizes a system of fund accounting by which it operates the following funds or types of funds:

- (i) The General Fund is for the funding of the operating costs of running the Agency's core activities, that is, its regular programmes of education, health and relief services, plus operational and common services, including general management and administration. It receives unearmarked contributions.
- (ii) Project Funds are divided into two categories: funded ongoing activities and capital and special projects. The first category covers activities which are defined as having an indefinite life and which would be funded out of the Agency's own resources in the absence of special contributions. They are treated in a manner similar to the activities covered under the General Fund. The second category is comprised of funds earmarked for construction projects or for some other capital or special projects which are usually of a non-recurrent character, such as the procurement of certain equipment. Project funds within this category which are to cover recurrent costs of extra-regular activities as proposed by the donor(s) do not represent any commitment on the part of the Agency to continue those activities if contributions cease.
- (iii) The Extraordinary Measures for Lebanon and the Occupied Territory (EMLOT) Fund is the result of merging the Lebanon Emergency Fund and the Fund for Extraordinary Measures in the Occupied Territory. It was decided to merge those two funds in 1990 because of the basic similarities in the objectives of each fund. The Lebanon Emergency Fund and the Extraordinary Measures for the Occupied Territory Fund were established in 1987 and 1988, respectively. Both funds were set up to alleviate the hardship of Palestine refugees caused by the civil unrest prevailing throughout those areas of operation.
- (iv) The Expanded Programme of Assistance (EPA) Fund was set up in 1988 in order to improve the environmental conditions of the refugee population in the Occupied Territory through, for example, better housing conditions and new or expanded sewage systems. It also aims in a limited way to provide the Agency with better facilities to run its education, health and relief programmes in the Occupied Territory.
- (v) The Peace Implementation Programme (PIP) was launched in October 1993 following the historic signing of the Declaration of Principles on Interim Self-Government Arrangements by the Palestine Liberation Organization and Israel in September 1993. The programme is replacing the Expanded Programme of Assistance, which will be gradually phased out. Thus, under PIP, the Agency has begun to undertake special construction and development projects in the West Bank and Gaza Strip to meet the needs of the Palestine refugees in education, environmental health, primary health care, income generation and social services. The programme also targets similar needs of

Palestine refugees residing in Jordan, Lebanon and the Syrian Arab Republic.

- (vi) The Gaza General Hospital Fund was launched in 1990 to construct a general hospital in Gaza Town. The hospital will provide 232 much-needed hospital beds and other health services such as outpatient, diagnostic, therapeutic and supporting services.
- (vii) The Area Staff Provident Fund was set up to provide a retirement fund for area staff members on their separation. Contributions to the fund are made both by the Agency and the area staff members themselves.

(b) A contribution that has been accepted and donated for a particular purpose and thus attributed to a specific project fund or to the Extraordinary Measures in Lebanon and the Occupied Territory Fund cannot be transferred without the donor's consent to any other fund. Nor can the Provident Fund or part of it be used for any other purpose than the one for which the fund was established. However, contributions to the General Fund which are received without restrictions regarding their use can be used, if the financial situation so permits and the Commissioner-General deems it appropriate, to fund such projects for which special donations are sought but not found. In such cases part of the contributions to the General Fund can be reallocated to other funds. The Agency's system of fund accounting provides a full identification of income and expenditure by purpose and the complete separation of the assets and liabilities of each fund. Contributions or allocations to funds other than the General Fund are attributed to individual prefixes which are kept as distinct financial and accounting entities with separate double-entry groups of accounts. Separate financial statements are prepared for these funds.

(c) The Agency's income and assets arising from contributions are recognized on the cash basis of accounting. This represents 95 per cent of the Agency's total income. However, income arising from miscellaneous sources - bank interest, exchange rate gains and other miscellaneous income - are recognized on the accrual basis of accounting. The Agency's expenditure and liabilities are recognized on the accrual basis of accounting. This is in line with the Agency's policy of basing its accounts on the premise of a going concern and on the principle of prudence. Contributions are recorded at the donor's valuation. The difference between the donor's valuation and market value, if any, is shown in the accounts as excess valuation.

(d) At 31 December 1995, pledges amounting to \$106,326,472 were outstanding as follows (in United States dollars):

	Cash	In kind	Total
Relocation of headquarters	25 000	-	25 000
General Fund	10 069 146	7 193 758	17 262 904
Funded ongoing activities	332 249	10 128 883	10 461 132
Capital and special projects	528 042	-	528 042
Emergency Measures for Lebanon and the Occupied Territory Fund	1 243 487	1 293 229	2 536 716
Expanded Programme of Assistance	800 264	11 535	811 819
Gaza General Hospital	3 557 711	8 540 210	12 097 921
Peace Implementation Programme	54 759 801	-	54 759 801
	<u>71 315 700</u>	<u>27 167 635</u>	<u>98 483 335</u>

As at 26 March 1996, \$16,693,645 of the above amount had been received (\$12,859,200 in cash and \$3,784,445 in kind).

(e) The financial period of the Agency is now two calendar years.

(f) The accounts of the Agency are maintained in United States dollars. Transactions in other currencies are translated into United States dollars at the time of the transaction, using UNRWA book exchange rates. At the end of the financial period, assets and liabilities not in United States dollars are reflected in United States dollars at the then applicable rates of exchange. Gains or losses on exchange of currencies are treated as an addition to or deduction from income.

(g) Costs for the purchases of all kinds of supplies are immediately charged to expenditure at the time the goods are received and paid for. As a consequence, stocks or inventories are not included as assets in any of the Agency's funds. However, an exception is made for the production units, the reason for which is explained below. Although the Agency's stocks and inventories are not treated as assets, stock records and strict inventory control are maintained. The approximate value of the Agency's stocks and inventories based on historical cost as at 31 December 1995 amounted to \$18.9 million.

(h) The Agency has four production units which are all meant to be self-supporting. These are the Printing Unit, which is located in Beirut, and the Embroidery Centre, the Carpentry Unit and the Contracting Section, located in Gaza. Through 1987, these units were part of the General Fund. Beginning in 1988, they were set up as separate projects to be governed by a new set of instructions (Finance Technical Instruction No. 41) which will enable management to better control them and assess their performance. For such assessment, the recording of stocks on hand is indispensable. Therefore, as an exception to the Agency's accounting policies, stocks appear as assets in the accounts of the production units. The value of such stocks is approximately 9.9 per cent of the total stockholdings of the Agency.

(i) A provision is made in the budget for separation and repatriation

payments to staff members who will leave the Agency during the financial period. Reserves have not been established for separation and repatriation for future years, as such payments would be expected to be met from future income and operating reserves. The accumulated termination benefits as at 31 December 1995 are estimated at about \$130 million.

General Fund

Note 2. Accounts receivable (statement III)

Accounts receivable reported in statement III do not include claims against Governments for, inter alia, damages to Agency property amounting to \$12,217,194. They are in the nature of memorandum accounts. As the collection of these claims is considered doubtful, a provision of 100 per cent has been set up against these claims.

Note 3. Provision for unliquidated obligations (statement III)

The provision for unliquidated obligations is for budgeted items for which a contract has been issued not later than at the end of the biennium but for which the goods or services have not yet been received. This provision will be liquidated at the end of the biennium.

Note 4. Provision for goods in transit (statement III)

The provision for goods in transit is a provision for purchase orders raised prior to the year end but for which the related goods have not been received.

Note 5. Provision for carry-forwards (statement III)

The provision for carry-forwards is for items budgeted in the current year for which justification has been given that these items be charged to the current year's expenditure.

Note 6. Contingent liabilities

The Agency may have contingent liabilities of a material but undeterminable amount in respect of certain claims for subsidies by Governments. In addition, in connection with a dispute with a supplier which is still unresolved there is a contingent liability to the extent of \$225,000.

Note 7. Fixed assets

(a) Fixed assets are not reported in statement III. They are summarized below at original cost values (in United States dollars):

Vehicles (excluding those surveyed but not yet disposed of)	17 034 440
Other equipment	37 391 042
Land owned by UNRWA	219 049
Buildings on land owned by UNRWA	<u>422 631</u>
	<u>55 067 162</u>

(b) The Agency has only the right of current occupancy of buildings (schools, training centres, ration distribution centres, clinics, warehouses and other installations) constructed by it on land owned by Governments or leased from private owners. The total cost of construction of such buildings, including the cost of financing purchase of land by local governments in certain cases and of compensation to private landowners of leased land, as at 31 December 1995 was \$186,136,546.

(c) The Agency has also constructed refugee shelters at a total cost of \$23,836,519 on land owned by Governments or individuals. The legal status of these shelters is uncertain.

Area Staff Provident Funds

Note 8. Continuing participants and retirees credits (statement XXIV)

(a) The continuing participants' credits and the retirees' credits are held in United States dollars and Austrian schillings, depending on which fund the staff member has elected to join.

(b) During the biennium, investment managers State Street, Paris, Deutsche Bank, Frankfurt and Bank Austria, Vienna, were appointed. World Invest, London, Warburg Asset Management, London, and Creditanstalt Bankverein, Vienna, ceased to be managers of the Fund, making a total of seven managers for the United States dollar denominated fund.

Note 9. Investments and investment income (statements XXIV and XXVI and schedules 17 and 18)

(a) The assets of the Fund are managed by professional investment management groups. These investments are valued at cost or market value, whichever is lower. This results in valuation of \$740,156,299 for the dollar fund and \$5,677,901 for the Austrian schilling fund. However, all the investment managers based their valuations on market value which, as at 31 December 1995, was \$772,795,198 for the dollar fund and \$5,677,901 for the Austrian schilling fund.

(b) Because of the difference in valuation as well as the different accounting treatment of accrued management fees, the investment figures at year-end differ from the figures indicated by the global custodian.

Note 10. Contributions and funding - Area Staff Provident Fund (statement XXIII and schedule 17)

Funds drawn from the investment managers totalled \$73,442,000. This figure represents the difference between total Agency and participants' contributions received and payments made by the Agency on behalf of the Area Staff Provident Fund. This interrelationship is as follows for the biennium (in United States dollars):

Contributions during the biennium	73 873 637
Loan repayments	20 151 220
<u>Add:</u> Transfers, lump sum, less withdrawals and reinstatements	<u>2 334 000</u>
	<u>96 358 857</u>
<u>Add:</u> Underfunding by the General Fund as at 1 January 1994	<u>114 411</u>
	<u>96 473 268</u>
<u>Less:</u> Payments made from the General Fund during the biennium	<u>170 031 080</u>
	<u>73 557 812</u>
<u>Less:</u> Funds drawn from the investment managers to the General Fund	<u>73 442 000</u>
Overfunding by the General Fund as at 31 December 1995	<u>115 812</u>

Note 11. Contributions and funding - Vienna Headquarters Area Staff Provident Fund (statement XXVI and schedule 18)

During the biennium, an amount of \$10,598,647 (equivalent to \$1,049,371) was advanced by the General Fund. This figure represents the difference between total Agency and participants' contributions received and payments made by the Agency on behalf of the Vienna Headquarters Area Staff Provident Fund. This interrelationship is as follows for the biennium (in United States dollars):

Contributions during the biennium	2 190 893
Loan repayments	<u>151 304</u>
	<u>2 342 197</u>
<u>Less:</u> Overfunding by the General Fund as at 1 January 1994	<u>19 269</u>
	<u>2 361 466</u>
<u>Less:</u> Payments made from the General Fund during the biennium	<u>3 513 035</u>
	<u>1 151 569</u>
<u>Less:</u> Funds drawn from the investment manager during the biennium	<u>1 049 371</u>
Overfunding by the General Fund as at 31 December 1995	<u>102 198</u>
