5. Economic and social development in Western Asia	116

* The approved programme budget will subsequently be issued in final form as *Official Records of the General Assembly, Sixty-second Session, Supplement No. 6 (A/62/6/Add.1)*.

Overview

- 22.1 Through the transfer of knowledge and expertise, the regular programme of technical cooperation, established by the General Assembly in its resolution 58 (I), serves to support developing countries, least developed countries, countries with economies in transition and countries emerging from conflict in their capacity-building efforts geared towards achieving internationally agreed development goals and the outcomes of United Nations conferences and summits. The programme's broad objective is to support and advance processes aimed at developing the capacities of Governments, through both individuals and institutions, to formulate and implement policies for sustainable economic and social development. Sharing of experiences across countries and regions, South-South cooperation and building of knowledge networks to facilitate continued exchange and assistance and ensure sustainability are increasingly being promoted through the programme.
- 22.2 The technical cooperation activities of the implementing entities is a natural extension of their normative and analytical work that enables developing countries to benefit both from the knowledge acquired through that work and from the experience of different geographic regions, allowing for sharing and exchange of good practices across regions. Equally important is the contribution that the technical cooperation work achieved under the programme brings to the normative and analytical activities of the implementing entities, and ultimately the support provided to the intergovernmental dialogue.
- 22.3 The basic rationale for the programme — complementing technical assistance available from other sources of funds and enabling the Organization to respond to specific requests for advisory services and technical assistance on issues that United Nations entities are mandated to address but that may fall outside the established priorities of the voluntarily financed programmes — has not fundamentally changed over the years. The key element that differentiates the regular programme of technical cooperation from other technical cooperation support available within the United Nations system is that it allows a fast and flexible response to requests of developing countries to meet small-scale but urgent requirements, as defined by them, and enables those countries to harness the expertise that exists in United Nations entities that typically have a strong analytical base.
- 22.4 The mandate review undertaken by Member States during 2006 in response to a request contained in the 2005 World Summit Outcome (General Assembly resolution 60/1) addressed the mandate of the regular programme of technical cooperation. The suggestions for improving overall management and accountability, monitoring and reporting on the regular programme of technical cooperation were prepared by the Secretariat and submitted to an informal working group. A number of other issues were raised by delegations concerning objectives and criteria, duplication and the use of advisers, and a suggestion was made that the Office of Internal Oversight Services conduct a review of the programme.
- 22.5 Global and regional entities engaged in the implementation of activities under the programme benefit from several coordination and consultative frameworks available in the Secretariat. The Executive Committee on Economic and Social Affairs brings together all of the United Nations entities participating in the programme, thus ensuring better coherence and synergy. The Executive Committee, whose substantive focus is on the harmonization of its members' programmes, helps to achieve a more rational division of labour and complementarity between the global and regional entities. At a different level, a dialogue between the Executive Committee and the United Nations Development Group, currently under way, leads to deeper awareness by a larger group of entities of the specific expertise and operational strengths and improved access to knowledge available in the Secretariat to benefit those implementing projects and doing operational work at the country

level. Information exchanges on existing and future capacity-building work occur in inter-agency coordination frameworks dedicated to the review of operational activities, particularly in the context of the triennial comprehensive policy review of operational activities. These exchanges serve to strengthen awareness about the technical expertise of the non-resident agencies. The regular programme of technical cooperation also ensures that the implementing entities can participate in the United Nations Development Assistance Framework (UNDAF) and contribute to relevant country processes and policy frameworks. Finally, liaising with the Bretton Woods institutions, the Organization for Economic Cooperation and Development (OECD), regional development banks and other regional organizations allows a better understanding of operational priorities and practices of other global and regional institutions and contributes to the overall impact in the field.

- 22.6 In line with General Assembly resolution 2514 (XXIV) and Economic and Social Council resolution 1434 (XLVII), activities financed under this budget section continue to focus on short-term advisory services, training and field projects as outlined below. Special emphasis is placed on learning and on transferring new knowledge, skills and technologies. The activities are oriented to respond to needs expressed by Member States and by regional and subregional cooperation groups, either at the request of a State or as directed by the intergovernmental process. The interventions are small-scale and focused, targeting specific elements identified by Member States as a requirement to meet their international commitments.

Short-term advisory services

- 22.7 Advisory services ensure the provision of high-level technical expertise, the transfer of knowledge from global and regional entities to Governments on policy-related issues, development strategies and programmes and the formulation or evaluation of projects and programmes. The advisers represent the critical interface between the countries and the implementing entities, facilitating country-level access to the expertise of the Organization. These services are often carried out in the framework of advisory missions, which are increasingly prepared and followed up through mechanisms utilizing information and communications technology. Advisory missions often lead to the formulation of technical cooperation projects, implemented either by a Government or in partnership with a United Nations entity. This serves to enhance the multiplier effect and the longer-term impact of the mission. Advisory missions also provide technical support to nationally executed programmes, including monitoring and evaluation, thereby ensuring that programme implementation is consistent with the outcomes of United Nations conferences.

Field projects

- 22.8 Technical cooperation through field projects may originate in response to either specific Government requests or proposals by the concerned entities in the context of their approved substantive work programmes. Such projects may be country-based but can often also be interregional or intercountry, and are increasingly geared towards testing and operationalizing new approaches to development needs or to filling gaps where funds from other sources are insufficient to cover priority areas. Different kinds of inputs may be combined to best meet the particular needs involved and to maximize the multiplier function of the activity.

Training

- 22.9 Training is aimed at building knowledge and skills, which will contribute to strengthening national capacity for policy development and the effective implementation of national policies, in line with respective national realities. Training is often conducted in the context of seminars and workshops, as well as through the provision of short-term fellowships, which foster more in-depth reviews and

opportunities for learning. The exchange of best practices and South-South cooperation are consistently fostered. A main consideration guiding the training conducted under the programme is that the subjects covered should play a catalytic role in the development process and should contribute to linking local needs and conditions with the follow-up process of major conferences. The selection of venue is guided by the centrality of access to participants and the capacity of the host country. Even where the organizing entity is a global one, the participation of the relevant regional commissions is encouraged in the interest of sustainability and continued regional support after the event.

- 22.10 The overarching objective that guides the programming of the resources allocated to individual entities under the programme and the overall strategy and criteria followed for implementation are:
- (a) *Objective:* The objective is to support, through the transfer of knowledge and expertise, developing countries, least developed countries, countries with economies in transition and countries emerging from conflict in their capacity-building efforts towards the achievement of internationally agreed development goals and the outcomes of United Nations conferences and summits;
 - (b) *Strategy:* The strategy to promote the above objective consists of:
 - (i) Responding to requests of Governments for urgent advice on policy-related issues;
 - (ii) Providing Governments with specific advice on sectoral matters relevant to their development strategies and programmes;
 - (iii) Assisting Governments in the formulation or evaluation of programmes and projects leading to the enhancement of national programmes;
 - (iv) Developing networks of experts and practitioners in the respective sectoral areas to facilitate information-sharing, synergies and potential collaboration, especially through information and communications technology, workshops and seminars;
 - (c) *Criteria:* The following criteria are relevant to all implementing entities of the programme:
 - (i) Activities should be primarily responsive to the requests of developing countries and be of a short-term nature (i.e., conceived and implemented within less than two calendar years); longer-term initiatives that require a phased approach and that build on knowledge acquired through previous interventions may continue, pending the mobilization of external resources;
 - (ii) Activities should fall within one of the implementing entity's priority areas as mandated by its governing body and on which the implementing entity plays a demonstrable leadership role in normative and analytical functions;
 - (iii) Activities should build capacity in developing countries, including for meeting treaty and related normative obligations and, through the feedback of experience gained at the country level, enrich the analytical functions of the implementing entity for the benefit of all Member States;
 - (iv) Activities that aid in the preparation of specialized components of a country's development strategy or that help to prepare requests for larger-scale funding from other sources are encouraged.
- 22.11 Modalities used for the delivery of technical cooperation are intended to be flexible, utilizing those best suited to the objective being pursued, including but not limited to advisers, consultants, training, fellowships, distance learning, toolkits, knowledge networks and field projects.

- 22.12 Given the nature of the programme, its presentation in the proposed programme budget remains at the level of major sectoral themes with an indication of implementing entities responsible for implementation. At the same time, linkages with the biennial programme plan and priorities for the period 2008-2009 (A/61/6/Rev.1), indicating the relationship of the proposed activities to the relevant part of the biennial programme plan, are systematically provided at the subprogramme level.
- 22.13 Efforts continue to incorporate the principles of results-based budgeting, especially the logical framework approach, into the implementation of the Organization's technical cooperation activities, including individual advisory services and training. The logical framework, which was initiated in the biennium 2004-2005 at the section level and then expanded to the programme level in 2006-2007, is now reflected for each of the 55 subprogrammes, which provide services under the regular programme. Each subprogramme, and by extension each related entity, is now directly accountable for defining their expected accomplishments, determining the appropriate indicators of achievement and, ultimately, the achievement of results.
- 22.14 The new, enhanced format includes an activity summary for each subprogramme, reflecting the number of activities and outputs implemented in 2004-2005 and those expected to be implemented in 2006-2007. As the nature and scope of activities are subject to requests from Member States and cannot be accurately estimated at this stage, the current number of activities is indicative of the activities to be implemented in 2008-2009. The activity summary includes: (a) all advisory missions implemented within the framework of this section, including those carried out by interregional and regional advisers, regular staff and consultants; (b) the number of seminars/workshops and (in brackets) the number of participants from developing countries who benefited directly from attendance, including those funded under other resources; and (c) the number of short-term fellowships, including sponsorship of attendance by officials of developing countries at meetings organized by other entities. The individual subprogramme tables also reflect actual expenditure data for 2004-2005, revised estimates for 2006-2007 and estimated requirements for 2008-2009, by object of expenditure.
- 22.15 In the absence of formal programmatic reporting, the achievements attained within the framework of the regular programme have not always been visible. Therefore, the enhanced format also includes an impact summary detailing the major highlights and key achievements of the programme during the biennium 2004-2005 and expected achievements for 2006-2007 and 2008-2009. For the first time, information on the regular programme of technical cooperation was included in the report on programme performance of the United Nations for the biennium 2004-2005 (A/61/64). For 2006-2007, the number of projects prepared, follow-up funding generated, conventions ratified and acceded to or reporting obligations met and new legislation or policies adopted by the countries served will be included in the programme performance report for the biennium 2006-2007, as well as implementation constraints, lessons learned from addressing them and knowledge gained from monitoring and evaluation. A website dedicated to the programme was also developed (<http://www.un.org/esa/rptc/>), including a platform for the sharing of information on the activities of the programme across implementing entities.
- 22.16 The resource requirements proposed under this section, by component, object of expenditure and implementing entity, are summarized in tables 22.1, 22.2 and 22.3 below.

Table 22.1 **Requirements by component**

22.18 The resources proposed for the biennium 2008-2009 are at the same level as those approved for the biennium 2006-2007. It is anticipated that 2,232 work-months of regional and interregional advisory services will be required in the biennium 2008-2009, the same level as required during 2006-2007.

Total	19 925.1	20 792.4	13 181.0	2 069.7	1 093.3	1 457.0	3 088.8	1 042.6	21 932.4

^a Subject to change in response to assistance requests received; shown for indicative purposes only.

- 22.19 The requirements for sectoral advisory services amount to \$21,932,400, or 43.6 per cent of the total resources proposed under this section, and cover the 16 sectors shown in table 22.5 above. It is anticipated that 792 work-months of interregional advisory services will be required during the biennium 2008-2009, which is at the same level as during the biennium 2006-2007.

1. Economic and social affairs: \$13,181,000

- 22.20 The activities in this sector are implemented by the Department of Economic and Social Affairs in support of programme 7, Economic and social affairs, of the biennial programme plan for the period 2008-2009 (A/61/6/Rev.1). More specifically, the Department's activities centre on: (a) providing advice and technical assistance to Member States on ways and means to translate the outcomes of United Nations conferences and summits, including internationally agreed development goals and other targets and commitments, into interregional, regional and country-level action; and (b) building national capacity, particularly for national policy formulation.

(a) Enhanced capacity of developing countries to implement the Beijing Platform for Action and the concluding comments of the Committee on the Elimination of Discrimination against Women and to use the procedures of the Optional Protocol to the Convention on the Elimination of All Forms of Discrimination against Women	(a) Percentage of participants that rate the overall usefulness and timeliness of workshops/advisory services as good/excellent and that acquired knowledge and skills obtained from the advisory services and trainings	<ul style="list-style-type: none">• Organizing and providing regional, subregional and national training events to increase knowledge and enhance capacity to implement the Beijing Platform for Action, the concluding comments of the Committee and the Optional Protocol to the Convention• Organizing and providing training for greater understanding of violence against women as a form of discrimination and a violation of women’s human rights and enhanced capacity to eliminate violence against women• Providing advisory services to Member States to more effectively promote and protect the human rights of women			
(b) Enhanced coordination and cooperation among all stakeholders in the implementation of the Beijing Platform for Action and the concluding comments of the Committee	(b) Percentage of participants that make good/excellent comments about the workshops’ role in increasing cooperation and coordination among Government officials, non-governmental organizations, United Nations country teams and parliamentarians				

(c) Greater understanding of violence against women as a form of discrimination and violation of women's rights and enhanced capacity to eliminate violence against women				(c) Percentage of countries trained that focus on violence against women as a form of discrimination and a violation of women's rights and demonstrate enhanced capability to eliminate violence against women in their reports under article 18 of the Convention	
<i>Activity summary</i>				<i>Impact summary</i>	
	<i>Actual 2004-2005</i>	<i>Estimate 2006-2007</i>	<i>Estimate 2008-2009</i>	<p>The subprogramme provided advisory services and carried out training, workshops and consultations for representatives of national machineries for the advancement of women, Government officials and judicial practitioners. As part of the programme, a total of 129 participants from 50 Member States were trained through a series of capacity-building workshops in 2004-2005. Written and oral feedback from the training activities indicate that the vast majority of participants (97 per cent) felt that the workshops contributed a great deal (rating 1 out of 4, with 4 being the lowest) to their understanding of how the substantive provisions of the Convention could be implemented, and had better equipped them for the preparation of reports to the Committee. A number of States that have participated in these training activities have since submitted their reports, and indications are that the training activities organized by the Division provided an important impetus for this development. Expected achievements for the future include the enhanced capacity to implement the Beijing Platform for Action, follow-up to the concluding comments of the Committee, the opportunities provided for the furtherance of women's human rights by the Optional Protocol to the Convention and intensification of efforts to eliminate all forms of violence against women.</p>

	Actual 2004-2005	Estimate 2006-2007	Estimate 2008-2009	<p>In 2004-2005, the subprogramme continued to assist countries in implementing the commitments established under internationally agreed conference outcomes. Advisory missions were undertaken with funding from the regular programme of technical cooperation and extrabudgetary funding to seven countries to assist in the development of strategic planning and policymaking capacity for social development and social integration, as well as in the areas of youth development; implementation of the Madrid International Plan of Action on Ageing; support for the development and adoption of the convention on the rights of persons with disabilities; social assessment and use of participatory methodologies for planning and evaluation; and peacebuilding and the reduction of small arms. In addition, a total of seven policy workshops were held to engage participants in discussions of relevant issues and to develop strategies and their capacity to respond to identified priorities. A sample of the subjects discussed include HIV/AIDS and family well-being; youth and employment in post-conflict situations in the Arab region; youth and the global media culture; young people with disabilities; and forging partnerships for social protection. The responses of Governments and workshop participants have been universally positive, as reflected in letters of appreciation received from Governments and requests for additional or follow-up advisory services and in the responses of workshop participants to evaluation questionnaires.</p>

<i>Expected accomplishments</i>		<i>Indicators of achievement</i>	<i>Main activities</i>			
(a) Enhancement of national capacity of developing countries and countries with economies in transition for the implementation of actions and national strategies for sustainable development in energy, water and natural resources		(a) Percentage of countries assisted that have used information obtained from the advisory missions and workshops in their work		<ul style="list-style-type: none">• Providing advice to Member States upon their request, to strengthen their capacities for the implementation of Agenda 21, the Programme for the Further Implementation of Agenda 21, the Johannesburg Plan of Implementation and internationally agreed development goals, including those contained in the United Nations Millennium Declaration, the Barbados Programme of Action for the Sustainable Development of Small Island Developing States, the Mauritius Strategy for Implementation, and the outcomes of major United Nations conferences relevant to the subprogramme• Organizing workshops/seminars to enhance technical, human and institutional capacities of countries by sharing good practices and successful experiences and promoting capacity-building partnerships or sustainable development		
(b) Strengthened technical skills and understanding of developing countries to implement actions and national strategies for sustainable development in energy, water and natural resources		(b) Percentage of participants in workshops that acquired knowledge on how to implement various sustainable development activities				

<i>Activity summary</i>				<i>Impact summary</i>
	<i>Actual 2004-2005</i>	<i>Estimate 2006-2007</i>	<i>Estimate 2008-2009</i>	<p>In 2004-2005, institutional and technical capacity was strengthened in water resources management, water sector monitoring, management of water information systems, development of water policy, legislative frameworks and institutions, energy financing, energy-efficiency policies, renewable energy development, energy sector legal and regulatory reforms, cleaner fossil fuels and hydropower. Awareness about the importance of achieving water and sanitation goals and access to energy services and their impact on sustainable development was raised at different levels. Capacity-building efforts through these workshops proved instrumental in scaling up good practices and innovative solutions in the implementation of the sustainable development agenda. In this regard, water utilities of different countries benefited from a range of partnerships, which enabled them to learn from each other's experiences. Enhanced capacity allowed the countries to better integrate water- and energy-related initiatives into national sustainable development strategies. Monitoring the impact of sustainable development became more effective. Countries benefited from enhanced cooperation in sharing knowledge and best practices in the joint management of water and energy resources for supporting sustainable livelihood approaches.</p>

(a) Enhanced capacity of national statistical offices to routinely collect, compile, store, analyse and disseminate official statistics and indicators in the economic, social, demographic and environmental fields	(a) Percentage of countries assisted that have used information obtained from the advisory missions in their work	<ul style="list-style-type: none">• Providing advice to Member States upon their request, to strengthen their capacity to collect, compile, store, analyse and disseminate official statistics and indicators in the economic, social, demographic and environmental fields to produce quality data for policy formulation, with a special focus on census and basic economics• Organizing workshops to increase knowledge in support of capacity-building in the collection and analysis of statistics and indicators• Organizing study visits for officials from developing countries in order to upgrade their professional capabilities in the areas of statistics and cartography and to develop regional and international networks			
(b) Strengthened skills and understanding of national staff to compile and disseminate core economic, social and environmental data in accordance with international standards and frameworks	(b) Percentage of participants in workshops that acquired knowledge on how to produce, analyse or disseminate statistics				

<i>Activity summary</i>				<i>Impact summary</i>
	<i>Actual 2004-2005</i>	<i>Estimate 2006-2007</i>	<i>Estimate 2008-2009</i>	<p>In 2004-2005, the subprogramme contributed to the improvement of national statisticians' awareness and knowledge of international statistical standards and best practices. Eleven workshops were carried out during the biennium, and 78 per cent of respondents to evaluation questionnaires distributed at the end of the workshops stated that they had learned new statistical knowledge during the workshop. In addition, 87 advisory missions were undertaken in the following areas: use of information technology in statistics, statistical organization and management, national accounts and population and housing censuses. In evaluations carried out after the advisory missions, all surveyed countries indicated that the mission had provided their offices with new statistical knowledge. The subprogramme also provided countries with the tools and skills needed to formulate and implement strategies to develop their national statistical systems. As indicated by responses to follow-up surveys, participants of the Division's workshops found them useful or better. In addition, more than 60 per cent of respondents stated that they had been able to implement the workshops' recommendations. In a follow-up survey on the advisory missions, it was found that 62 per cent of the recommendations made by the advisers had been implemented. For instance, the support provided to Oman resulted in its implementing the 1993 System of National Accounts and its experience subsequently being used as a model for the other Gulf States at a regional workshop. The workshops and advisory services in the area of Millennium Development Goal indicators have contributed to the increase in the number of Millennium Development Goal country reports from 63 in 2003 to 155 in August 2005. Eighty-five per cent of national statistical offices participated in the country reporting process on the Millennium Development Goals.</p>

(a) Strengthened institutional and technical capacity of national and subnational public administration for improved public service delivery	(a) Number of methodologies considered for implementation and number of manuals utilized by Member States as a result of advisory services provided	<ul style="list-style-type: none">• Providing advisory services through needs-assessment and diagnostic missions related to the substantive expertise of the subprogramme in the areas of governance and public administration, socio-economic governance and management and knowledge management• Organizing group training at the request of developing countries and countries with economies in transition to promote common approaches among Member States on issues related to governance system and institutions; public service and management innovation; ethics, transparency and accountability; social and economic governance; public financial management; and knowledge systems for development and e-government for development			
(b) Strengthened human resources capacity of public administrations in the areas of professionalism and ethics in the public sector, participatory governance and post-crisis reconstruction of governance and public administration systems, including through the use of information and communications technologies	(b) Percentage of positive evaluations by the participants on the relevance and timeliness of the training workshops and seminars				

<i>Activity summary</i>				<i>Impact summary</i>
	<i>Actual 2004-2005</i>	<i>Estimate 2006-2007</i>	<i>Estimate 2008-2009</i>	<p>Technical cooperation activities carried out in the biennium 2004-2005, given the strong mandate to achieve the Millennium Development Goals, were aimed at strengthening institutional, technical and human resources capacity of developing countries and countries with economies in transition. To achieve the Millennium Development Goals, the subprogramme provided advisory services through 74 needs-assessment, diagnostic and project formulation missions. Eight methodologies have been developed, including a public administration strategy for Kosovo. A total of 20 projects were formulated and 12 training modules developed. Considerable part of the activities financed under the regular programme of technical cooperation contributed to the increased awareness and knowledge of internationally recognized standards/best practices in the areas of governance and public administration in developing countries and countries with economies in transition. Those efforts also facilitated cooperation, exchanges and mutual support in the process of the modernization of public administration. Representatives of more than 100 countries attended 14 workshops organized during the biennium. The subprogramme supported the sixth Global Forum on Reinventing Government, where nine technical workshops were attended by 100 ministers of public administration. Ninety per cent of respondents confirmed the relevance of topics covered by seminars organized under the programme. Three declarations, including the Brisbane Declaration on community engagement in the achievement of the Millennium Development Goals were adopted, and the implementation of the Ibero-American Charter for the Public Service that was adopted by the ministers of the region, has further been promoted.</p>

2. Trade and development: \$2,069,700

- 22.21 The activities in this sector are implemented by the United Nations Conference on Trade and Development (UNCTAD) in support of programme 10, Trade and development, of the biennial programme plan for the period 2008-2009 (A/61/6/Rev.1). They focus on: (a) provision of technical advice on policy options and their implications as well as opportunities for technical assistance in trade, investment and related areas, drawing mainly on mandates and policy issues provided in the São Paulo Consensus; and (b) the provision of training for Government officials and policy practitioners on key issues on the international economic agenda with a view to increasing their capacity to build more effective and integrated policy responses to a changing global economy, as mandated in paragraph 166 of the Bangkok Plan of Action and subsequent decisions by the Trade and Development Board; and (c) policy advice, technical support and policy coordination of the assistance provided in the context of the integrated framework for trade-related technical assistance to least developed countries among the six relevant agencies (UNCTAD, the World Trade Organization, the International Trade Centre UNCTAD/WTO (ITC), the United Nations Development Programme (UNDP), the World Bank and the International Monetary Fund (IMF)).

Advisory services	8	8	5	Integrated Framework for Trade-Related Technical Assistance to Least-Developed Countries is a joint endeavour among UNCTAD, the World Trade Organization, ITC, UNDP, the World Bank and IMF, and its assistance is financed through multiple sources. Its diagnostic studies have not only provided the assistance framework for participating agencies, but is also used by some bilateral aid donors in examining their assistance strategy for least developed countries. During the biennium 2004-2005, three more developing countries mainstreamed their trade policies into national development strategies, bringing the total number of successful country cases of mainstreaming to five. Nine other countries had been working on the process. Furthermore, incoming countries to the framework had been assisted in the pre-diagnostic process at regional workshops in Rwanda in 2004 and Sierra Leone in 2005. UNCTAD specifically assisted in conducting or validating joint diagnostic studies for three developing countries on investment, three on customs and investment and one on trade and development strategies. Three more developing countries were also assisted specifically in their effort to enhance the national ownership of the process.

3. Human settlements: \$1,093,300

- 22.22 The activities in this sector are implemented by the United Nations Centre for Human Settlements (UN-Habitat) and are in support of programme 12, Human settlements, of the biennial programme plan for the period 2008-2009 (A/61/6/Rev.1). More specifically, this programme offers specialized technical expertise and operational support to requesting Governments and other Habitat Agenda partners by offering short-term advisory services on strategically selected high-priority issues, identifying, developing and launching innovative cooperation programmes and providing specialized support for the implementation, monitoring and replication of such cooperation programmes. In addition, special attention will be given to providing support in post-disaster situations to complement actions from other agencies.

<i>Activity summary</i>				<i>Impact summary</i>	
	<i>Actual 2004-2005</i>	<i>Estimate 2006-2007</i>	<i>Estimate 2008-2009</i>	<p>In 2004-2005, the subprogramme contributed to an increase in the awareness and knowledge of Habitat Agenda partners about adequate shelter and sustainable urban development, with a total of about 50 advisory missions in an average of 15 countries per biennium. At the request of Member States and with the objective of responding more effectively to countries' needs, UN-Habitat provides central and local governments and their partners with the methodologies, guidelines and tools to formulate and implement policies in the areas of social housing, slum-upgrading, urban land management, socio-economic integration of vulnerable groups, local leadership, integrated territorial development and the linking of reconstruction to development in post-disaster situations used to improve and/or elaborate on cities' development and housing strategies and policies. In 2006-2007, at the request of the respective Governments, concept notes were prepared for four countries for the setting up of a territorial planning framework and slum-upgrading project in the context of returning to peace and democracy, the setting up of decentralized instruments for social housing and informal settlement upgrading and the facilitation of post-disaster human settlements rehabilitation, including housing.</p>

4. International drug control, crime and terrorism prevention and criminal justice: \$1,457,000

- 22.23 The activities in this sector are implemented by the United Nations Office on Drugs and Crime (UNODC) in support of programme 13, International drug control, crime and terrorism prevention and criminal justice, of the biennial programme plan for the period 2008-2009 (A/61/6/Rev.1). More specifically, the activities of UNODC centre on providing advice and ad hoc technical assistance to Member States, in response to requests from Governments, in meeting their treaty and normative obligations pertaining to the conventions on drug control, transnational organized crime, corruption and terrorism, which will serve as a catalyst for and contribute to strengthening those countries' national capacities for tackling major drug control and crime problems. The programme is designed to respond rapidly to requests for assistance and provides such assistance through: (a) the provision of advisory services (in relation to both legal and policy questions); (b) the training of criminal justice policymakers and professionals in specialized areas; and (c) the assessment of specific country needs and the subsequent design of longer-term technical assistance programmes.

(b) Enhancement of the knowledge and skills of policymakers and criminal justice officials on the implementation of the conventions on drug control, transnational organized crime, corruption and terrorism and of the United Nations standards and norms on crime prevention and criminal justice	(b) Number of long-term technical assistance field projects designed and launched as a result of advisory services/ assessments and their overall value in United States dollars.				

<i>Activity summary</i>				<i>Impact summary</i>
	<i>Actual 2004-2005</i>	<i>Estimate 2006-2007</i>	<i>Estimate 2008-2009</i>	<p>Advisory services provided by the programme have directly contributed towards the ratification of the three drug control conventions, the Convention against Transnational Organized Crime and the Convention against Corruption according to the following breakdown: 29 ratifications in 2003; 52 in 2004; 53 in 2005; and 50 in 2006 (as at 15 November 2006). Since 2004 more than 2,000 policymakers and officials have been trained, with special emphasis on Portuguese-speaking countries, where little assistance had been provided previously. At the request of Member States, and with the objective of responding more effectively to organized crime, a specialized counter-kidnapping training programme has been developed and training conducted in the Caribbean (28-30 March 2006) and Latin America (8-10 August 2006). Training materials in the areas of police oversight and integrity, firearms marking and record-keeping (in line with Firearms Protocol of the Convention against Transnational Organized Crime) and effective law enforcement responses to violence against women and children were developed in 2006. A pilot training programme for paralegals who will operate as mentors in post-conflict countries was conducted in 2006. In order to respond more effectively to the requirements of Member States, the programme has actively sought to develop longer-term field projects to ensure sustainable technical assistance. Those efforts resulted in a doubling of the number of criminal justice/rule of law projects (from 8 to 16) during the course of 2006. Particular focus has fallen on post-conflict States and, at the request of United Nations peacekeeping missions and the countries concerned, assessment/programming missions were conducted in 10 post-conflict States in 2005-2006. The programme has developed three unique software packages: the Mutual Legal Assistance Writer Tool to facilitate international cooperation; a tool for management and coordination of cases for prosecutors; and the recently completed Criminal Justice Assessment Toolkit, a detailed set of 16 modules for the effective structuring of assessments and the determination of appropriate technical assistance interventions. The Criminal Justice Assessment Toolkit was developed jointly with the Department of Peacekeeping Operations, and joint training will be conducted with the United Nations Development Programme. Training will also be provided for the two other software packages.</p>

5. Human rights: \$3,088,800

- 22.24 The activities in this sector will be implemented by the Office of the United Nations High Commissioner for Human Rights (OHCHR) in support of programme 19, Human rights, of the biennial programme plan for the period 2008-2009 (A/61/6/Rev.1). At the request of Member States, technical assistance will be provided in the form of: (a) advisory services; (b) global, regional, subregional and national technical cooperation projects; (c) conferences, seminars, workshops and group training; (d) fellowships; and (e) documentation and information as it relates to both advisory services and technical cooperation. The objective of these activities is to cooperate with countries in efforts to strengthen the implementation of international human rights standards at the national level, including through assistance to requesting Member States, support to national plans and capacity-building for the protection and promotion of all human rights.

(a) Enhanced awareness, knowledge and skills of policymakers and public officials and of regional and subregional organizations on international human rights standards and mechanisms and on the human rights implications of their work (b) Enhanced cooperation among Governments, national human rights institutions and non-governmental organizations within their respective regions in dealing with human rights issues that require a regional approach and initiative.	(a) Number of regional organizations that have reported changes to OHCHR as a result of intervention (b) Number of regional/national initiatives taken as a result of regional meetings	<ul style="list-style-type: none">• To provide advisory services and training in response to requests from Governments to promote the strengthening of mechanisms to enhance the integration of human rights into national development• To mainstream human rights into national policies and programmes, including in the areas of peace and security• To enhance understanding of human rights and provide support on the application of international human rights instruments for judicial officers and legal human rights personnel• To assist Governments in their reporting obligations under the different human rights instruments• To develop tools and monitoring instruments to assist Member States in the monitoring process made in fulfilling their reporting obligations			

				<ul style="list-style-type: none"> • To review with Member States the follow-up recommendations arising from international human rights mechanisms • To strengthen regional capacity for promoting the implementation of human rights policies, including the integration of human rights in social development, conflict prevention and conflict resolution efforts • To promote the participation of human rights actors in policy dialogues with regional organizations
<i>Activity summary</i>				<i>Impact summary</i>
	<i>Actual 2004-2005</i>	<i>Estimate 2006-2007</i>	<i>Estimate 2008-2009</i>	<p>In 2006, a total of 20 indigenous representatives (11 women and 9 men, 16 of whom were sponsored through regular budget funds and 4 through voluntary contributions) participated in the four linguistic components (English, Spanish, French and Russian) of the indigenous fellowship programme. In 2004, a comprehensive evaluation of the indigenous fellowship programme was undertaken and in December 2006 a supplementary evaluation was carried out. Both evaluations underline the importance of the programme to indigenous peoples and its multiplier effect. All those responding had undertaken training with their own communities; many had subsequently made use of the human rights mechanisms; others had participated in expert seminars or were involved in negotiating with legislative bodies. Apart from funding the above fellowships, the regular programme of technical cooperation has contributed towards travel to regional, subregional and national workshops, training sessions, consultation missions with Governments and meetings and missions to promote system-wide coordination of human rights activities and cooperation with regional organizations.</p>

6. Humanitarian assistance: \$1,042,600

- 22.25 The activities in this sector are implemented by the Office for the Coordination of Humanitarian Affairs in support of programme 22, Humanitarian assistance, of the biennial programme plan for the period 2008-2009 (A/61/6/Rev.1). The programme will provide advisory services and training to promote natural disaster reduction and facilitate the smooth transition from emergency relief to rehabilitation and development; to develop and promote common policy on humanitarian issues for the United Nations system and its partners; to mobilize and coordinate assistance in complex emergencies; and to mobilize and coordinate assistance for disasters. The Office for the Coordination of Humanitarian Affairs will continue to contribute to strengthening and developing national capacity, developing and enhancing national emergency plans in post-disaster emergency situations and promoting the standardization of language and procedures in national contingency planning in disaster-prone and emergency-affected countries.

^a The breakdown is subject to change in response to assistance requests received and is shown for indicative purposes only.

- 22.26 The estimate for this component (\$28,318,100) comprises 56.4 per cent of the total resources proposed under this section. In accordance with General Assembly resolution 2803 (XXVI), provision is made for a system of regional and subregional advisory services for the purpose of assisting developing countries that are members of the regional commissions in solving problems that they may encounter in their national development efforts. The advisory services are made available in response to requests from Governments and involve advisory missions on an individual or joint multidisciplinary basis. The resources for regional and subregional advisory services are provided in the form of work-months estimated to meet the requirements in particular fields during the biennium. The regional advisers are engaged on a temporary basis and receive support from substantive divisions and administrative services of the regional commissions.
- 22.27 It is anticipated that 1,440 work-months of regional advisory services will be required in the biennium 2008-2009, the same level as required during 2006-2007.

1. Economic and social development in Africa: \$10,090,300

- 22.28 Activities in this area are implemented by the Economic Commission for Africa (ECA) in support of programme 14, Economic and social development in Africa, of the biennial programme plan for the period 2008-2009 (A/61/6/Rev.1). During the biennium, the activities of ECA under this programme will be geared towards providing advisory services and group training aimed at strengthening the capacity of member States and their development organizations in formulating and implementing appropriate policies and programmes for accelerated and sustained growth for poverty reduction, in line with the goals and priorities of the New Partnership for Africa's Development (NEPAD) and the internationally agreed development goals, including those contained in the United Nations Millennium Declaration and the outcomes of the major United Nations conferences since 1992. The efforts will be coordinated to ensure an appropriate balance between regional and subregional activities, with priority assigned to the specific needs of the regional economic communities, the African Union and the NEPAD programme.

Subprogramme 1. Trade, finance and economic development

<i>Implementing entity:</i> ECA, Trade, Finance and Economic Development Division		<i>Budget summary (thousands of United States dollars)</i>		
<i>Relationship to the biennial programme plan, 2008-2009:</i> programme 14, subprogramme 1, expected accomplishments (a) and (b)		<i>Actual 2004-2005</i>	<i>Estimate 2006-2007</i>	<i>Estimate 2008-2009</i>
<i>Objectives:</i> To strengthen the capacity of member States to design, implement and monitor sound macroeconomic policies, including financial, monetary and external trade policies, in order to achieve higher economic growth and sustainable development, consistent with the priorities of NEPAD.		Advisory services	1 400.5	2 394.8
		Travel of staff	144.3	80.3
		Furniture and equipment	29.5	36.2
		Seminars/workshops/ field projects	170.0	90.0
		Total	1 744.3	2 601.3
<i>Expected accomplishments</i>	<i>Indicators of achievement</i>	<i>Main activities</i>		
(a) Strengthened national capacity to design, implement and monitor sound macroeconomic policies, including financial, monetary and external trade policies, in order to achieve higher economic growth and sustainable development, consistent with the priorities of NEPAD (b) Enhanced knowledge and skills of policymakers in designing and implementing sound macroeconomic policies and programmes, including financial, monetary and external trade policies	(a) Increased number of countries adopting growth-enhancing policies and strategies as a result of ECA advisory services (b) Increased number of participants trained who are able to design and implement sound macroeconomic policies, including financial, monetary and external trade policies	Advisory services will focus on strengthening the capacity of national policymakers and trade negotiators for effective trade negotiations by helping them to understand the emerging issues of relevance to Africa in the context of World Trade Organization agreements and other trade-related multilateral initiatives, such as the trade-for-aid initiative; strengthening the capacity of African countries for the effective negotiation of economic partnership agreements, including preparing them for future multilateral rounds of negotiations and the negotiation of bilateral trade and investment agreements and treaties; and assisting member States and subregional groupings in addressing issues related to the regional implication of the multilateral trading system, as well as the relationship between regional preferential and integration schemes and the multilateral trading system.		

<i>Activity summary</i>				<i>Impact summary</i>
	<i>Actual 2004- 2005</i>	<i>Estimate 2006- 2007</i>	<i>Estimate 2008- 2009</i>	<p>In 2004-2005, the subprogramme contributed to strengthening the capacity of African countries for effective policymaking in the areas of trade and effective participation in bilateral and multilateral trade negotiations within the context of the World Trade Organization agreements and the Doha Round. A total of 14 advisory missions and 4 workshops were undertaken to build and strengthen national capacity in the areas of trade for development and regional integration, with particular emphasis on capacity-building assistance to member States and regional economic communities in the ongoing negotiations of economic partnership agreements between Africa and the European Union. The assistance provided also enabled member States to understand the implications of Economic partnership agreements for the regional integration process in Africa. A notable example of ECA assistance is the input it provided to the third Common Market for Eastern and Southern Africa regional negotiating forum on impact assessment of economic partnership agreements held in Antananarivo in October 2004, which resulted in a common negotiating position for the region. In addition, the subprogramme provided technical support on World Trade Organization-related issues of importance to African countries within the framework of the Doha Round in order to promote common approaches among member States on these issues. Areas covered included agriculture, implementation issues, World Trade Organization rules, market access, accession to the World Trade Organization and systemic issues such as operationalizing special and differential treatment to African countries in the multilateral trading system. In 2006-2007 and 2008-2009, it is expected that regular programme of technical cooperation activities in this area will contribute to strengthening the capacity of member States for effective trade negotiations within the context of the World Trade Organization agreement by strengthening capacity of African trade negotiators in understanding emerging issues on the World Trade Organization agenda of relevance to Africa and other trade-related multilateral initiatives, such as the trade-for-aid initiative. Activities will also help African countries to effectively negotiate economic partnership agreements, including the negotiation of other bilateral trade and investment agreements and treaties and to formulate common regional positions.</p>

		Seminars/workshops/ field	75.4	30.0	30.0
		Total	722.4	924.3	543.1
Expected accomplishments	Indicators of achievement	Main activities			
Improved national capacity for designing and implementing policies and programmes that take into account the interrelationships between agriculture and the environment, to be used in national sustainable development plans and strategies and other national plans and strategies to achieve food security and sustainable development	Increased number of member States with national sustainable development plans and strategies and other national plans and strategies, including poverty reduction strategies, that reflect the linkages between agriculture, food security and environmental sustainability	<ul style="list-style-type: none">• Providing advisory services in response to requests from Governments and their intergovernmental organizations, business sector and civil society organizations to enhance capacity for:<ul style="list-style-type: none">– Management and mainstreaming of climate information for sustainable agriculture in national, regional and subregional development frameworks and programmes– Agribusiness development and management, including through strengthening public-private partnerships at the national, regional and subregional levels– Designing and implementing national sustainable agricultural strategies and programmes, taking into account regional and subregional perspectives• Undertake training activities to:<ul style="list-style-type: none">– Develop the capacity of policymakers, the business community and civil society organizations to use tools for the effective integration of environmental concerns and sustainable agriculture into the formulation and implementation of growth and poverty reduction strategies and programmes– Assist member States to design and implement programmes for achieving NEPAD priorities and the Millennium Development Goals in the areas of food security, agriculture and the environment			

<i>Activity summary</i>				<i>Impact summary</i>
	<i>Actual 2004-2005</i>	<i>Estimate 2006-2007</i>	<i>Estimate 2008-2009</i>	In 2008-2009, it is expected that the subprogramme's activities will contribute to strengthening the capacity of member States for the effective integration of environmental concerns into policy formulation and programme development at the national, regional and subregional levels in line with the Millennium Development Goals, NEPAD and the Plan of Implementation of the World Summit on Sustainable Development. During the biennium 2008-2009, the Division will undertake six advisory missions and conduct one group training workshop in its main areas of focus. These activities will be useful in improving the understanding of policymakers and other stakeholders of the linkages between agriculture, food security and environmental sustainability, including enhancing their skills in integrating those issues into national sustainable development policies and programmes. The activities will also result in an increase in the number of African countries adopting and implementing national sustainable development plans and strategies and other national plans and strategies that address the problems of food insecurity and low agricultural productivity on the continent.

Improved capacity of member States to design and implement information policies and programmes related to the promotion of appropriate science and technology, including information and communications technologies, to address Africa's development challenges and priorities, as well as build knowledge economies	Increased number of countries that have formulated and implemented policies and programmes related to developing knowledge economies through the use of science, technology and innovation as a result of ECA assistance	Providing advisory services and training activities, in response to requests from Governments, to strengthen capacity for the development of integrated policies and strategies for building an African digital economy and creating an enabling environment for knowledge economies. This includes strengthening science, technology and innovation systems for Africa's development; providing support to the NEPAD science and technology consolidated plan of action; and promoting the establishment of science and technology parks and incubators in member States. Assistance will also be provided to member States and regional institutions in effectively mainstreaming information and communications technologies and science and technology issues into national development policies and frameworks, as well as in the implementation of science and technology recommendations emanating from the World Summit on the Information Society and the World Summit on Sustainable Development.			

<i>Activity summary</i>				<i>Impact summary</i>
	<i>Actual 2004-2005</i>	<i>Estimate 2006-2007</i>	<i>Estimate 2008-2009</i>	<p>The assistance provided by the subprogramme was instrumental in strengthening capacities to formulate, coordinate and implement information and communications technology policies and strategies at the national and regional levels. In 2004-2005, the Division undertook 37 advisory missions and conducted 33 policy workshops and 4 field projects focused on strengthening capacity for the formulation and implementation of policies and strategies for promoting the use of information and communications technologies for development at the national and regional levels. Those activities contributed to the increase in the number of countries initiating or completing the development of their national information and communication infrastructure plans and strategies. As a complement to activities at the national level, assistance was provided to several regional economic communities in the development and implementation of regional information and communications infrastructure plans and strategies, including the harmonization of policies and plans at the subregional level. Another key accomplishment includes ECA mobilization of African stakeholders for their effective participation and contribution in the World Summit on the Information Society process and leading the implementation of the outcomes of the 2005 Tunis phase, especially activities for the post-Summit process in areas such as Internet governance and financing mechanisms for the information society. In 2006-2007, the activities have contributed to strengthening capacity for formulating and implementing policies and strategies for promoting the use of information and communications technologies for development. During the biennium, 16 advisory missions and 4 policy workshops are expected to be undertaken in support of the development and implementation of information and communications technology policies and strategies at the national and regional levels. Those activities are expected to result in an increase in the number of countries initiating or completing the development of their national information and communication infrastructure plans and strategies. In 2008-2009, activities under this subprogramme will focus on strengthening capacity for the development of integrated policies and strategies for building an African digital economy and creating an enabling environment for knowledge economies, including strengthening of science, technology and innovation systems for Africa's development. Activities in this area will contribute to an increase in the number of countries that formulate and implement policies and programmes related to developing knowledge economies through the use of science, technology and innovation, including enhancing capacity for mainstreaming information and communications technology and science and technology into national development policies and frameworks</p>

		Travel of staff	243.9	64.4	64.1
		Seminars/workshops/field projects	61.9	60.0	60.0
		Total	2 228.1	1 405.8	1 088.0
Expected accomplishments	Indicators of achievement	Main activities			
(a) Increased national capacity to adopt policies and implementing programmes for integrated natural resources development, including energy resources and other regional public goods, with a view to promoting regional integration	(a) Increased number of policies and programmes adopted and implemented by African countries and regional economic communities to strengthen and develop natural resources, including energy resources, as well as other regional public goods	Provide advisory and group training activities, in response to requests from Governments, to build and strengthen national capacity for natural resources policy design and implementation, with emphasis on the solid minerals, petroleum/gas and energy sectors; mainstream natural resources wealth in growth and poverty reduction strategies and transboundary natural resources development; and harmonize regional policies, laws and regulations. Advisory services in this area will also support the establishment of a peer learning group on natural resources management to serve as a forum for policymakers to share experiences and identify best practices. Advisory services will also focus on providing support to the African Union and the regional economic communities in implementing the Abuja Treaty and the integration objectives of NEPAD, with an emphasis on capacity for policy and programme development and implementation in the context of the African Union/United Nations framework for collaboration and the African Union 10-year capacity-building programme.			
(b) Enhanced knowledge and skills of policymakers and other stakeholders for integrated natural resources development and management, including energy resources and other regional public goods	(b) Increased number of policymakers and other stakeholders that acquire knowledge and skills on integrated natural resources development and management, including energy resources and other regional public goods				
(c) Strengthened capacity for policymaking at the national, regional and subregional levels to support the implementation of NEPAD priorities and other regional initiatives	(c) Increased number of countries harmonizing their national policies and other common policy measures towards achieving the regional integration objectives of NEPAD and the Abuja Treaty				

<i>Activity summary</i>				<i>Impact summary</i>
	<i>Actual 2004-2005</i>	<i>Estimate 2006-2007</i>	<i>Estimate 2008-2009</i>	In 2004-2005, the regular programme of technical cooperation activities in the area of water resources development and management contributed to strengthening the capacity of member States for the sustainable development and efficient management of water resources within the framework of the African Water Vision for 2025, the Millennium Development Goals and the NEPAD priorities. During the biennium, the Division undertook 16 advisory missions and conducted 10 workshops in its main areas of focus. In addition, two field projects were undertaken, which resulted in the development and launch of the African water development report process and the setting up of the African Water Information Clearing House as an authoritative mechanism for monitoring progress made in the development of water resources in Africa. Feedback received from beneficiaries of these activities attest to the relevance and usefulness of the assistance provided. Activities in this area in 2008-2009 will contribute to strengthening national capacity for natural resources policy design and implementation, including the harmonization of regional policies, laws and regulations in support of integration in the natural resources sector. Activities in this area will also contribute to an increase in the number of countries harmonizing their national policies and other common policy measures with a view to achieving the regional integration objectives of NEPAD and the Abuja Treaty as a result of ECA institutional and capacity-building support.

Subprogramme 5. Gender and women in development

Implementing entity: ECA, African Centre for Gender and Development		Budget summary (thousands of United States dollars)			
Relationship to the biennial programme plan, 2008-2009: programme 14, subprogramme 6, expected accomplishment (a)			Actual 2004-2005	Estimate 2006-2007	Estimate 2008-2009
<i>Objectives:</i> To improve the capacity of member States to mainstream gender concerns in national policies, programmes and strategies in order to achieve gender equality and enhance the role of women in development in line with the commitments contained in various global and regional programmes of action.		Advisory services	704.5	916.8	481.9
		Consultants	4.1	—	—
		Travel of staff	114.4	42.9	32.0
		Seminars/workshops/field projects	120.3	60.0	30.0
		Total	943.3	1 019.7	543.9
Expected accomplishments		Indicators of achievement		Main activities	
(a) Enhanced capacity of African countries to formulate and implement gender-sensitive policies and programmes for accelerating progress towards women’s empowerment, gender equality and reducing poverty (b) Enhanced capacity of policymakers and other stakeholders in the use of tools and methodologies for ensuring gender-responsive policies and programmes		(a)Increased number of African countries adopting and implementing development policies and programmes that reflect a gender perspective (b) Increased number of participants in ECA training activities able to apply the tools and methodologies to mainstream gender into national policies and programmes, including budgetary processes		Provide advisory services and training activities, in response to requests from Governments, to strengthen capacity for gender mainstreaming in development policies, programmes and strategies, including in the areas of peace and security; and enhance capacity for the use of monitoring tools and instruments for measuring progress in the implementation of regional and global commitments on women’s human rights. Regional and subregional training activities will also be organized for stakeholders, including public sector officials and private sector managers, on the use of tools for gender mainstreaming, including gender analysis and gender budgeting.	
Activity summary			Impact summary		
	Actual 2004-2005	Estimate 2006-2007	Estimate 2008-2009	The subprogramme contributed to enhancing the capacity of member States for mainstreaming gender in national development policies and programmes for achieving poverty reduction and to making progress towards the goals of women’s empowerment and gender equality contained in the Beijing and Dakar Platforms for Action. In this context, the activities included 28 advisory missions and 6 workshops during the biennium 2004-2005 in the areas of promoting women’s human and legal rights and promoting the socio-economic empowerment of women.	
Advisory services	28	14	12		
Seminars/workshops	6	3	1		
Total	34	17	13		

Approximately 65 per cent of the respondents to evaluation questionnaires distributed at the end of the workshops and advisory missions confirmed that ECA activities had had an impact on the implementation of their national strategies for the promotion of women and had enhanced their capacity to use tools and instruments for monitoring and tracking progress in the implementation of the Convention on the Elimination of All Forms of Discrimination against Women and its Optional Protocol. In the area of promoting the socio-economic empowerment of women, it was also ascertained that ECA technical assistance to some member States in developing policies, strategies and technical capacity for gender mainstreaming had also contributed to the progress made towards achieving the gender-related targets of the Millennium Development Goals and in the establishment of two subregional enterprise development facilities (in East Africa and West Africa) to enhance market access of women through information-sharing and networking.

Subprogramme 6. Subregional activities for development

<i>Implementing entity:</i> ECA, subregional offices for North, West, Central, East and Southern Africa		<i>Budget summary (thousands of United States dollars)</i>		
<i>Relationship to the biennial programme plan, 2008-2009:</i> programme 14, subprogramme 7, expected accomplishment (a)		<i>Actual</i> 2004-2005	<i>Estimate</i> 2006-2007	<i>Estimate</i> 2008-2009
<i>Objectives:</i> To strengthen the capacity of member States to formulate and implement harmonized policies and programmes in support of integration efforts at the subregional and regional levels within the overall framework of the New Partnership for Africa's Development and the internationally agreed development goals, including those contained in the United Nations Millennium Declaration.		Advisory services	—	432.8 2 821.7

Subprogramme 8. Social development

<i>Implementing entity:</i> ECA, African Centre for Gender and Social Development		<i>Budget summary (thousands of United States dollars)</i>			
<i>Relationship to the biennial programme plan, 2008-2009:</i> programme 14, subprogramme 10, expected accomplishment (a)		<i>Actual 2004-2005</i>	<i>Estimate 2006-2007</i>	<i>Estimate 2008-2009</i>	
<i>Objectives:</i> To strengthen the capacity of member States to formulate policies and programmes designed to reduce poverty, achieve the targets of the Millennium Declaration and deliver equitable social services and integrate human and social dimensions in the development process, in line with internationally agreed development goals (including the Millennium Development Goals and the New Partnership for Africa’s Development.		Advisory services	—	426.7	482.2
		Travel of staff	—	21.5	32.1
		Seminars/workshops/ field projects	—	30.0	30.0
		Total	—	478.2	544.3
<i>Expected accomplishments</i>		<i>Main activities</i>			
Improved capacity of member States to design, implement and monitor poverty reduction strategies consistent with internationally agreed development goals, including those contained in the United Nations Millennium Declaration and the priorities of NEPAD		Increased number of countries that align their national development policies and programmes, including poverty reduction strategies, with the Millennium Development Goals			
		Provide advisory services and training activities, in response to requests from Governments, to strengthen national capacity for designing, implementing and monitoring strategies and programmes for achieving growth and poverty reduction; and contribute to improving capacity for achieving the Millennium Development Goals in Africa by strengthening the links among pro-poor growth, growth consistent with the Millennium Development Goals, employment creation and poverty reduction. Activities in this area will also support the exchange of best practices and peer learning processes on poverty reduction strategies to ensure that the second-generation policy reduction strategies address the deficiencies identified in the first generation, including gender sensitivity, employment creation, social exclusion and health-related issues, such as HIV/AIDS, tuberculosis and malaria.			
<i>Activity summary</i>		<i>Impact summary</i>			
	<i>Actual 2004- 2005</i>	<i>Estimate 2006- 2007</i>	<i>Estimate 2008- 2009</i>	The subprogramme contributes to strengthening the capacity of member States for effective policy formulation and programme development. Feedback received from beneficiaries of those activities attest to the relevance and usefulness of the assistance provided. For example, 42 per cent of respondents to evaluation questionnaires distributed at the end of the workshops and advisory missions in 2006 confirmed that	
Advisory services	—	14	12		
Seminars/workshops	—	4	1		
Total		18	13		

the workshops and services were relevant and useful in building and enhancing the capacity for better policy formulation and implementation for poverty reduction in line with the relevant goals of the Millennium Declaration and the priorities of NEPAD. The activities also provided member States with the tools and skills needed to formulate and implement effective poverty reduction strategies, including the capacity to integrate social development issues into national development policies and strategies, with particular emphasis on health issues such as HIV/AIDS. The accomplishments in 2006-2007 will continue into 2008-2009, particularly in strengthening national capacity for better policy formulation and implementation for poverty reduction in line with the relevant goals of the Millennium Declaration and the priorities of NEPAD. At the end of the two bienniums, it is expected that activities in this area would result in an increase in the number of African countries able to align their national development strategies and programmes with the MDGs.

2. Economic and social development in Asia and the Pacific: \$5,168,700

- 22.29 The activities in this region are implemented by the Economic and Social Commission for Asia and the Pacific (ESCAP) in support of programme 15, Economic and social development in Asia and the Pacific, of the biennial programme plan for the period 2008-2009 (A/61/6/Rev.1). During the biennium 2008-2009, technical cooperation activities will focus on strengthening the technical, managerial and organizational capacities of developing member and associate member States to plan and deliver more effective policies and programmes, particularly in support of the Millennium Development Goals and the outcomes of other global conferences. Throughout this process, approaches that incorporate sustainable environmental development, gender and the use of information and communications technology will be emphasized. Activities will be short term in nature and will be implemented in response to requests for assistance from member States in support of subprogramme expected accomplishments. Activities will specifically address the needs of ESCAP priority countries for technical cooperation activities (i.e., least developed countries, landlocked developing countries, countries with economies in transition and Pacific island developing States). Participatory planning exercises for larger-scale projects that strengthen linkages between ESCAP normative, analytical and technical cooperation functions will also be implemented where appropriate.

		Total	845.7	575.9	601.5
Expected accomplishments	Indicators of achievement	Main activities			
(a) Increased national capacity to formulate and implement effective, sustainable and gender-responsive economic and development policies for achieving the Millennium Development Goals, particularly in the area of poverty reduction	(a) Increased number of measures taken by policymakers and planners to ensure that economic and development policies for achieving the Millennium Development Goals, particularly those related to reducing poverty, are more effective, sustainable and gender-responsive	<ul style="list-style-type: none">Advisory services to be carried out by one regional adviser (based in Bangkok): missions, in response to requests from Governments, to assist in building Government capacity in reviewing, formulating and evaluating policies and programmes for poverty reduction and identifying and facilitating the adoption and adaptation of good practices to achieve the Millennium Development GoalsGroup training: workshops to be conducted in response to specific requests for assistance from member States, on issues relating to: governance and decentralization; low-income housing policy; macroeconomic issues faced by countries with economies in transition; outcomes of global meetings such as the Millennium Declaration and the Monterrey Consensus; and national capacity-building for designing plans, policies and programmes for poverty reduction			
(b) Increased capacity of Governments, civil society and the private sector in Asia and the Pacific, particularly the least developed countries, to formulate and implement poverty reduction programmes that are effective, sustainable and gender-responsive and that focus on economically vulnerable groups	(b) Increased number of measures taken in countries to formulate and implement poverty reduction programmes that are effective, sustainable and gender-responsive				
(c) Improved national capacity to formulate and implement development policies, projects and/or research programmes that reduce rural poverty through the sustainable development of secondary crops.	(c) Increased percentage of participants in ESCAP activities who are able to formulate and implement rural development policies, research programmes or projects that include sustainable development of secondary crops				

<i>Activity summary</i>				<i>Impact summary</i>
	<i>Actual</i> 2004- 2005	<i>Estimate</i> 2006- 2007	<i>Estimate</i> 2008- 2009	In 2004-2005, the activities of the subprogramme consisted of 1 field project, training workshops (over 85 participants) and 31 advisory missions in support of expected accomplishments for 2004-2005 and 2006-2007. A field project was implemented on reducing extreme poverty and improving the urban environment through decentralized and community-based solid waste management, with results feeding into normative work and through the Urban Forum. Training workshops were implemented in support of the subprogramme for the provision of technical assistance in: operationalizing a pro-poor housing policy; conducting a midterm review of the implementation of the Programme of Action for the Least Developed Countries for the Decade 2001-2010; Millennium Development Goals 7, target 11 (regional); policy advocacy for the use of information and communications technology for development (South-South cooperation); and sharing of experiences in community-based poverty reduction strategies among the least developed countries. Advisory services focusing on the needs of least developed countries and landlocked developing countries, were implemented in the following fields: impact assessment the rural development projects and assessment of the institutional aspect of Government poverty reduction strategies; community-based tsunami recovery; assistance to national planning commissions in decentralization; system development for creating self-employment opportunities and generating income in the country; to review methods for creating employment and generating income; system development for participatory planning, monitoring and evaluation (four countries); and participatory monitoring of the poverty reduction strategic papers. Advisory services and training in 2008-2009 will continue to support the expected accomplishments of the subprogramme through the provision of niche technical assistance needs linked to the normative and analytical role of the Organization.

(a) Increased national capacity in Asia and the Pacific, particularly the least developed countries, to provide data required for measuring progress towards achieving internationally agreed development goals	(a) Increased number of national statistical systems benefiting from ESCAP and Statistical Institute for Asia and the Pacific assistance that are able to provide data according to international statistical standards for measuring progress towards achieving national and internationally agreed development goals, including the Millennium Development Goals		<ul style="list-style-type: none">• Advisory services to be carried out by one regional adviser (based in Bangkok): missions, in response to requests from Governments, to assist in building national capacity in the areas of economic statistics and evaluating country needs for economic statistics from the standpoint of policymaking and other key analytical uses; reviewing country practices and methodologies in all areas of economic statistics and advising on their improvement and coherence in line with internationally accepted concepts, definitions and classifications• Training: workshops to be implemented in response to specific requests for assistance from member States focusing on the development of harmonized methodologies and approaches for intercountry comparison of poverty-related phenomena relating to internationally agreed development goals, including the Millennium Development Goals, and in the outcomes of the major United Nations conferences and international agreements since 1992		
(b) Increased access to comparable development and short-term indicators for policymakers, the development community and the public at large	(b) Increased number of freely accessible websites providing official statistics that conform to international standards and good practices, reflect gender concerns and indicate progress towards achieving national and internationally agreed development goals				
(c) Increased knowledge and understanding of key national and regional socio-economic trends, especially progress towards the Millennium Development Goals, by national official statisticians and	(c) Increased percentage of national statisticians and policymakers who indicate that they found ESCAP analytical outputs on national and regional socio-economic trends, especially progress towards the				

policymakers in the Asia and Pacific region				Millennium Development Goals, relevant and useful	
<i>Activity summary</i>				<i>Impact summary</i>	
	<i>Actual</i> 2004- 2005	<i>Estimate</i> 2006- 2007	<i>Estimate</i> 2008- 2009	Activities under this subprogramme consisted of both training workshops (over 150 participants in 2004-2005) and advisory services (35 missions in 2004-2005) in support of expected accomplishments for 2004-2005 and 2006-2007. Training activities ranged from management seminars for heads of national statistical offices from all member States in the region to supporting the Association of Southeast Asian Nations Task Force on Harmonization of Statistical Classification. Workshops were also implemented on statistics for monitoring the achievement of the Millennium Development Goals in Asia and the Pacific (linked to ESCAP analytical work), dissemination of statistics, and training workshops on the non-observed economy (now a Development Account project following strong interest from member States). Advisory services, focusing on the needs of least developed countries and landlocked developing countries, were implemented in the following fields: household living standards surveys, data for developing better indicators of the economic role of women; strengthening of capacity following the International Conference on Official Poverty Statistics, statistical dissemination methodologies, poverty estimation and analysis methodology, development of statistical master plans, participatory poverty assessment, economic statistics and elaboration of the long-term programme of technical assistance for the development of basic economic indicators, international standard classifications for socio-economic surveys and measurement of the informal sector. Advisory services in 2008-2009 will continue to support the expected accomplishments of the subprogramme through the provision of niche technical assistance needs linked to the normative and analytical role of the Organization.

Subprogramme 3. Development of Pacific island countries and territories

Implementing entity: ESCAP, ESCAP Pacific Operations Centre		Budget summary (thousands of United States dollars)		
Relationship to the biennial programme plan, 2008-/2009: programme 15, subprogramme 3		Actual 2004-2005 ^a	Estimate 2006-2007	Estimate 2008-2009
<i>Objectives:</i> To develop and implement policies for the achievement of relevant development goals, including the Millennium Development Goals, in the Pacific region, taking into account the special needs of the small island developing States, as contained in the Mauritius Strategy.	Advisory services	487.8	1 073.7	1 058.7
	Consultants	27.8	151.8	162.3
	Travel of staff	31.4	214.8	228.8
	Seminars/workshops	65.7	180.0	180.0
	Total	612.7	1 620.3	1 629.8
Expected accomplishments	Indicators of achievement	Main activities		
(a) Increased national capacity to develop policies and strategies to improve the lives of vulnerable groups (b) Improved subregional cooperation to strengthen sustainable economic and social development of small island developing States	(a) Increased number of effective measures implemented to improve the livelihoods of vulnerable groups (b) Increased number of good practices shared between the Asia and the Pacific subregions in implementing the Millennium Development Goals and the Mauritius Strategy	<ul style="list-style-type: none"> Professional advisory services to be carried out by two regional advisers (based at the ESCAP Pacific Operations Centre): missions, in response to requests from Governments, to assist in building national capacity in formulating, implementing and evaluating social development plans and programmes in the Pacific island countries; mainstreaming cross-cutting issues related to gender, disability, youth and other emerging social issues in plans and programmes in a range of development sectors; and promoting the implementation of the Millennium Development Goals in Pacific island countries. Also, missions will be undertaken to build national capacity in formulating, implementing and evaluating development policy as a strategy for fostering sustainable development and reducing poverty; providing assistance on deregulation and liberalization issues; developing the strategic and corporate plans of national and provincial and municipal authorities; and mainstreaming local and cultural governance practices Workshops to be organized in response to specific requests for assistance from member States focusing on increasing the capacity of Governments to formulate and implement effective gender-responsive poverty reduction programmes that focus on promoting sustainable access to services for socially vulnerable groups 		

<i>Activity summary</i>				<i>Impact summary</i>
	<i>Actual 2004- 2005</i>	<i>Estimate 2006- 2007</i>	<i>Estimate 2008-2009</i>	
Advisory Services	—	30	50	Using the resources of the regular programme of technical cooperation, the Pacific Operations Centre has contributed to the development of national policy on disability, commercial sexual exploitation of children, the Pacific Urban Agenda and national development strategies, including the impact of trade adjustment costs. Regional advisory services facilitated the development of a policy paper on vulnerable groups for the Pacific Leaders' ESCAP special session, and the establishment of regional partnerships that brought the Pacific Urban Agenda to the United Nations human rights theme group and the inter-agency group. Advisory services led to the establishment of the President's National Advisory Council on Children and a trafficking task force in the Federated States of Micronesia. Through the regional programme of activities on disability, national policies are under completion in three countries. Advisory services also led to the development of the island development plan for one country and development project planning guides for the other. With the Pacific Islands Forum secretariat, advisory services facilitated the estimation of trade adjustment costs for trade with the European Union for all Pacific island member States. In 2008-2009, ESCAP regional advisory services and training activities in the Pacific will continue to focus on strengthened normative social development policy and development policy and strategic planning (promoting Millennium Development Goal-based poverty reduction strategy papers) in line with the objectives of the subprogramme.

^a In 2004-2005 this subprogramme's activities were implemented under other subprogrammes.

Subprogramme 4. Trade and investment

Implementing entity: ESCAP, Trade and Investment Division		Budget summary (thousands of United States dollars)		
Relationship to the biennial programme plan, 2008-2009: programme 15, subprogramme 4		Actual 2004- 2005	Estimate 2006- 2007	Estimate 2008- 2009
Objectives: to achieve a more equitable distribution of benefits from the globalization process through increased trade and investment in support of the internationally agreed development goals, including the Millennium Development Goals.		Advisory services	254.8	411.4
		Travel of staff	83.2	64.4
		Seminars/workshops	256.2	50.4
		Total	594.2	526.2
Expected accomplishments	Indicators of achievement	Main activities		
(a) Increased national capacity to effectively negotiate, conclude and implement multilateral and other trade agreements supporting the internationally agreed development goals, including the Millennium Development Goals	(a) (i) Increased number of member countries making progress towards becoming members of regional and multilateral trade agreements (e.g. Asia-Pacific Trade Agreement and World Trade Organization)	<ul style="list-style-type: none"> Advisory services to be carried out by one regional adviser (based in Bangkok): missions, in response to requests from Governments, to assist in building national capacity in trade and investment-related areas as well as in trade efficiency and facilitation, electronic commerce, trade information services, small- and medium-sized enterprise development and investment promotion and facilitation Workshops to be conducted in response to specific requests for assistance from member States in capacity-building to implement multilateral and regional trade and investment agreements and mechanisms, such as the Bangkok Agreement, the ongoing Doha Round of negotiations and related World Trade Organization issues and enterprise development, particularly for small- and medium-sized enterprises 		
	(ii) Percentage of officials and others benefiting from ESCAP activities who indicate that they can use or have used knowledge and skills to negotiate agreements and formulate and implement trade policies			
(b) Increased capacity and regional cooperation to develop and implement trade efficiency policies and programmes to promote international competitiveness	(b) (i) Percentage of officials and others benefiting from ESCAP activities who indicate that they can use or have used knowledge and skills to develop and implement trade efficiency policies and programmes			
	(ii) Increased number of users of ESCAP online trade information services for strengthened regional cooperation			

<p>(c) Increased capacity to design and implement policies and programmes that create an enabling environment for investment and promote a competitive business sector</p> <p>(d) Increased capacity to design and implement policies and programmes that promote sustainable economic growth and rural poverty reduction through agro-technology transfer and agro-based enterprise development</p>				<p>(c) Percentage of officials and others benefiting from ESCAP activities who indicate that they can use or have used knowledge and skills to design and implement policies and programmes that create an enabling environment for investment or promote a competitive business sector</p> <p>(d) Percentage of officials and others benefiting from ESCAP activities who indicate that they can use or have used knowledge and skills acquired with assistance from the Asian and Pacific Centre for Agricultural Engineering and Machinery to promote sustainable economic growth and poverty reduction in rural areas through the transfer of agro-technology and enterprise development</p>	
<i>Activity summary</i>				<i>Impact summary</i>	
	<i>Actual 2004-2005</i>	<i>Estimate 2006-2007</i>	<i>Estimate 2008-2009</i>	<p>Activities under the subprogramme consisted of a field project, training workshops (over 215 participants in 2004-2005) and advisory services (24 missions in 2004-2005) in support of expected accomplishments for 2004-2005 and 2006-2007. A World Trade Organization/ESCAP technical assistance programme was implemented, with capacity development activities undertaken in support of accession to the World Trade Organization and multilateral trade negotiation. Training workshops were implemented in support of trade and development in the following fields: high-level consultations on the Doha Development Agenda negotiation issues; enhancing export competitiveness of Asian fruits; World Trade Organization support for Pakistan; capacity development for the implementation of the Bangkok Agreement; harmonization of e-commerce legislation in the region; and World Trade Organization capacity-building in Bhutan (with the International Telecommunication Union). Advisory services, focusing on the needs of least developed countries and landlocked developing countries, were implemented in the following fields: preparation of World Trade Organization requests and Bay of Bengal Initiative for Multisectoral Technical and Economic Cooperation services negotiations; identification of interests and priorities for the aid-for-trade programme (4 countries); industry development and investment promotion (1 country); and the establishment of a multifaceted trade development office (1 country). Advisory services and training in 2008-2009 will continue to support the expected accomplishments of the subprogramme through the provision of niche technical assistance needs linked to the normative and analytical role of the Organization.</p>

3. Economic development in Europe: \$3,088,300

- 22.30 The activities in this region are carried out by the Economic Commission for Europe (ECE) secretariat in support of the objectives set out in programme 16, Economic development in Europe, of the biennial programme plan for the period 2008-2009 (A/61/6/Rev.1). More specifically, activities are focused on: (a) increasing knowledge of internationally recognized standards and best practices in the areas of ECE competence in the countries of Eastern Europe, the Caucasus and Central Asia, and South-Eastern Europe and improving their national capacity to implement legally binding ECE instruments and other regional standards; (b) strengthening the ability of transition/emerging market economies to formulate and implement policies aimed at the achievement of internationally agreed goals; (c) finding solutions to cross-border problems through improving transboundary cooperation; and (d) supporting economic cooperation and integration processes involving countries with economies in transition.

Subprogramme 1. Environment

<i>Implementing entity:</i> ECE, Environment, Housing and Land Management Division		<i>Budget summary (thousands of United States dollars)</i>			
<i>Relationship to the biennial programme plan, 2008-2009:</i> programme 16, subprogramme 1, expected accomplishments (a) and (b)			<i>Actual</i> <i>2004-2005</i>	<i>Estimate</i> <i>2006-2007</i>	<i>Estimate</i> <i>2008-2009</i>
<i>Objectives:</i> To strengthen the capacity of countries of Eastern Europe, the Caucasus and Central Asia and South-Eastern Europe to manage shared water and other natural resources and to cooperate on common environmental problems.		Advisory services	351.1	333.9	473.4
		Consultants	3.2	4.8	16.1
		Travel on official business	35.8	51.6	45.0
		Total	390.1	390.3	534.5
<i>Expected accomplishments</i>		<i>Indicators of achievement</i>		<i>Main activities</i>	
(a) Strengthened capacity to develop transboundary water cooperation and national integrated water resources management plans in the Eastern Europe, the Caucasus and Central Asian and South-Eastern European region (b) Improved transboundary environmental and natural resources management in Central Asia by introducing provisions and principles of ECE environmental conventions	(a) Number of established bi- or multilateral environmental agreements among the Eastern Europe, the Caucasus and Central Asian and South-Eastern European countries	<ul style="list-style-type: none">• Providing advice to member States, upon their request, aimed at promoting the rational use of water and energy resources and strengthening subregional cooperation• Organizing workshops or other capacity-building events to strengthen the capacity of countries with economies in transition to develop cooperation with neighbouring countries on environmental protection and shared natural resources, as well as to assist in the implementation of ECE environmental conventions or protocols• Fund-raising and implementation of projects requested by member countries in priority subregions			
	(b) Number of new ratifications of ECE environmental conventions and protocols by recipient countries				

<i>Activity summary</i>				<i>Impact summary</i>
	<i>Actual 2004-2005</i>	<i>Estimate 2006-2007</i>	<i>Estimate 2008-2009</i>	<p>In 2004-2005 the impact of the subprogrammes' activities was mainly in establishing a formal framework for cooperation among countries on shared water resources, as well as in ratification by countries of ECE conventions or protocols. Two examples were the protocol of intentions between Ukraine and Moldova to improve their cooperation and joint management of the Dniester River (2005) and the establishment of the Kazakh-Kyrgyz Bilateral Commission on the Chu and Talas Rivers in 2006. Technical assistance was provided through the implementation of a number of extrabudgetary projects, managed by the regional adviser, including a project funded by the Development Account, managed jointly with the regional adviser on energy. The regular programme of technical cooperation-related technical assistance in the area of the environment contributed in 2004-2005 to 60 new ratifications of ECE conventions and protocols. Capacity-building activities provided training to 300 national experts during 15 workshops. More than 70 per cent of participants evaluated the workshops as very useful. In 2006-2007, the improved transboundary cooperation on the Chu and Talas and Dniester Rivers has been established. In 2007, a new air pollution monitoring station will be established in Kazakhstan. Furthermore, significant work on dam safety in Central Asia has been implemented. In 2008-2009, the focus will be on finalizing a regional water database for Central Asia as well as improving transboundary water cooperation in South-Eastern Europe. It is also the objective to establish national legislation and a regional agreement on dam safety in Central Asia.</p>

		Total	431.9	392.6	442.9
<i>Expected accomplishments</i>	<i>Indicators of achievement</i>	<i>Main activities</i>			
(a) Further developed national institutional frameworks and corresponding implementation practices of member countries, in line with the ECE Fundamental Principles of Official Statistics	(a) (i) Number of countries ensuring better compliance with the Fundamental Principles through revisions of their national statistical legislation (ii) Number of ECE recommendations implemented to improve national institutional frameworks for official statistics	<ul style="list-style-type: none"> • Providing assistance in reviewing institutional frameworks (statistical laws) and major practices in member countries by carrying out advisory missions and organizing workshops/seminars 			
(b) Enhanced capacity of national statistical offices to routinely collect, compile, store, analyse and disseminate official statistics and indicators in the economic, social, demographic and environmental fields in accordance with international standards and frameworks	(b)(i) Percentage of countries assisted that have reportedly used information obtained from advisory missions (ii) Percentage of participants in workshops affirming that the training received has strengthened their capacity to produce, analyse or disseminate statistics	<ul style="list-style-type: none"> • Providing statistical assistance to the less developed countries of the region so that they can produce essential macroeconomic, social and demographic statistics, including the indicators for achieving the Millennium Development Goals • Organizing workshops to increase knowledge in support of capacity-building in the collection and analysis of statistics and indicators • Developing study visits for officials from countries with economies in transition in order to upgrade their professional capabilities in statistics and to develop regional and international networks 			

<i>Activity summary</i>				<i>Impact summary</i>
	<i>Actual 2004- 2005</i>	<i>Estimate 2006- 2007</i>	<i>Estimate 2008-2009</i>	
Advisory services	21	20	20	Through the activities under this subprogramme, the ECE Statistical Division contributed in 2004-2005 and 2006-2007 to the improvement of awareness and knowledge of international statistical standards and best practices in the national statistical offices. Technical assistance was demand-driven and targeted countries with economies in transition, especially in South-Eastern Europe and the Commonwealth of Independent States. A total of five global assessments of national statistical systems were carried out, resulting in 60 recommendations. The regional adviser has participated in about 10 advisory missions per year. The main themes were the implementation of the Fundamental Principles of Official Statistics, building up systems for monitoring Millennium Development Goal indicators, statistical organization and management, national accounts and population and housing censuses. According to post-mission satisfaction surveys, the countries involved indicated that the mission provided their offices with new statistical knowledge. The regional adviser acted, during 2004-2005 and 2006-2007, as an organizer of 18 training workshops in the area of Millennium Development Goal indicators and social and economic statistics. A substantial part of the training and development activities have been performed in good cooperation with other United Nations entities, such as UNDP, UNICEF, ESCAP, and the Department of Economic and Social Affairs. During the biennium 2008-2009, the activities are planned to be carried out at the same level — 20 advisory missions and 10 seminars/training workshops.

<i>Expected accomplishments</i>	<i>Indicators of achievement</i>	<i>Main activities</i>			
(a) Enhanced capacity of experts in countries with economies in transition to implement international and ECE instruments	(a) Number of recipient countries that have expressed satisfaction with technical assistance received	<ul style="list-style-type: none">• Providing advice to countries with economies in transition on the elaboration of sustainable energy policies and programmes• Organizing workshops/seminars and providing advisory services aimed at assisting countries with economies in transition in strengthening the sustainability of energy production and use, with special focus on energy security, restructuring of energy systems, implementation of energy reforms, formation of energy efficiency markets and renewable energy• Preparing and implementing projects and providing advisory services aimed at assisting Governments in meeting the objectives of the United Nations Framework Convention on Climate Change and relevant ECE conventions			
(b) Progress in addressing energy conservation and efficiency issues in economies in transition, especially those leading to a reduction in energy-related environmental impacts, including progress in the formation of energy efficiency markets in those countries	(b) Percentage of participants affirming that the training received has strengthened their capacity				

<i>Activity summary</i>				<i>Impact summary</i>
	<i>Actual 2004- 2005</i>	<i>Estimate 2006-2007</i>	<i>Estimate 2008-2009</i>	<p>The Sustainable Energy Division's technical cooperation activities are implemented through subregional or country-oriented projects. During the biennium 2004-2005, on the basis of the assistance provided by the subprogramme's activities, four projects were completed and three new ones were started. The total value of funding awarded to the new projects from extrabudgetary sources was \$17 million. The technical assistance projects have influenced the formulation and application of new national energy policies in some countries in the Commonwealth of Independent States. The use of biomass as a fuel has become one of the priorities of energy strategies and policies in two countries. Assistance in the field of application of clean coal technologies was provided to countries in Central Asia in the framework of the United Nations Development Account project, co-managed by the regional adviser. Capacity-building activities provided training to over 330 national experts during eight workshops. More than 80 per cent of participants evaluated the workshops as very useful. In addition, some 28 advisory missions were conducted during the biennium 2004-2005. During 2006-2007, 12 advisory missions were completed in 2006 to assist national government agencies in the formulation and/or implementation of sustainable energy projects for a total value of \$32 million in five countries. The implementation of these multi-year projects will continue during 2008-2009, providing Governments and local experts with experience with sustainable energy policies, inter alia, in the practical application of the Kyoto Protocol to the United Nations Framework Convention on Climate Change through its flexible mechanisms, such as the clean development mechanism and joint implementation.</p>

4. Economic and social development in Latin America and the Caribbean: \$5,385,400

- 22.31 The activities in this region are implemented by the Economic Commission for Latin America and the Caribbean (ECLAC), in support of programme 17, Economic and social development in Latin America and the Caribbean, of the biennial programme plan for the period 2008-2009 (A/61/6/Rev.1). The objectives are to enhance the technical capacity of policymakers to design, formulate, implement and evaluate new policy alternatives, to strengthen their knowledge and understanding of issues affecting economic and social development and to support the incorporation of new tools and methodologies in the monitoring of economic and social trends in the framework of internationally agreed development goals. Particular emphasis will be placed on supporting countries in consolidating measures and policies to achieve progress towards meeting the internationally agreed development goals, in particular those derived from the Millennium Declaration and the 2005 World Summit and its outcome (General Assembly resolution 60/1). Activities will also aim at providing assistance to the countries of the region to meet their unanticipated and short-term development needs and requirements stemming from changes in the dynamics of their particular development agenda. The programme will seek to mobilize other supplementary sources of funding to create synergy with other technical cooperation activities implemented by the Commission.

(a) Enhanced national capacity of Latin American and Caribbean countries to design and adopt trade policies as well as to implement and manage agreements resulting from trade negotiations at the bilateral, subregional and multilateral levels	(a) Number of countries assisted that have used information and inputs obtained from ECLAC advisory services in the design or implementation of their trade policies	<ul style="list-style-type: none">• Providing advisory services to member States, at their request, to enhance their capacity to conduct trade policies, assess the impact of trade liberalization and knowledge in trade-related matters, including World Trade Organization issues and Doha Round results• Organizing workshops to increase technical capacity to negotiate, implement and manage trade agreements; participating in training courses for trade policymakers jointly organized with subregional institutions, multilateral and regional agencies• Elaborating technical studies, seminars and round tables with the private sector and governmental and non-governmental agencies to improve understanding of trade policy			
(b) To improve transparency in trade policymaking, raising the knowledge and participation of civil society regarding trade-related matters	(b) Number of participants in technical workshops, including civil society and private sector representatives, that assess the knowledge acquired on the management of specific trade-related issues as useful for their work				

<i>Activity summary</i>				<i>Impact summary</i>
	<i>Actual 2004-2005</i>	<i>Estimate 2006-2007</i>	<i>Estimate 2008-2009</i>	<p>The subprogramme has provided policy recommendations and technical assistance to member States in order to strengthen their institutional and professional capacity for trade negotiations and implementation, the most noteworthy being the three workshops held on the implementation of the free-trade agreement with the United States, each attended by some 40 high-level Government and business organization officials from five countries in close collaboration with other regional organizations. As a result of the dissemination of the outputs of the subprogramme and in recognition of its recommendations, Government requests for technical assistance have increased markedly, and the usefulness of technical assistance was reflected in the number of missions undertaken by staff members. In addition, the subprogramme intensified cooperation with organizations in charge of regional integration (e.g., Mercosur, Andean Community, Secretariat for Central American Economic Integration, Latin American Integration Association, Andean Development Corporation) in search for greater convergence of trade rules and disciplines within and among the existing schemes.</p>

Strengthened capacity of national policymakers to evaluate, design and implement financing measures and sectoral policies to foster productive development and innovation processes at the microeconomic level			(a) Number of countries that have used information and recommendations obtained from ECLAC advisory services in designing microeconomic policies (b) Number of participants in workshops that consider the knowledge acquired on financing issues and tools as useful for the design of sectoral and innovation policies		<ul style="list-style-type: none">• Provide technical assistance to ECLAC member States in the evaluation and design of financing and innovation policies for productive development at the microeconomic level• Organize technical seminars and sectoral workshops gathering policymakers of the region to discuss and present applied financing tools for the design of productive development and innovation policies at the microeconomic level			
<i>Activity summary</i>				<i>Impact summary</i>				
	<i>Actual 2004-2005^a</i>	<i>Estimate 2006-2007</i>	<i>Estimate 2008-2009</i>	During 2004-2005, the subprogramme carried out technical assistance services and capacity-building in the areas of cluster development of micro- and small firms, including direct support for the development of strategic plans and work programmes in four countries of the region. In 2006-2007, technical assistance was provided to Governments of the region to support the development of national strategies for the development of the information society, with particular emphasis on generating universal access to information and communications technology. As a result, four countries took concrete steps to elaborate and implement a national strategy based on recommendations from ECLAC technical assistance (jointly implemented with the World Bank, Regulatel and the European Commission). It is expected that in 2008-2009, national staff from at least five countries of the region will use recommendations from ECLAC technical assistances services in the development of innovation policies and new financing tools for productive development.

(a) Strengthened capacity of national policymakers to design and implement macroeconomic policies and measures aimed at greater stability in growth based on the assessment of determinants of growth	(a) Number of countries assisted that have used information and recommendations obtained from ECLAC advisory services in the design of macroeconomic policies	<ul style="list-style-type: none">• Providing technical assistance to ECLAC member States in the evaluation and design of national macroeconomic policy measures and programmes• Organizing seminars, workshops and round tables gathering policymakers of the region to present new theoretical frameworks or models, discuss emerging issues (such as international migration, mobility and social protection of migrants) and exchange best practices• Organizing and coordinating applied projects and networks of policymakers, including analytical studies and dissemination activities, to foster the development of greater coordination and implementation of advanced tools in the formulation of macroeconomic policies			
(b) Increased understanding from national policymakers of emerging issues affecting growth in the context of globalization	(b) Number of countries that incorporate new theoretical frameworks and new decision-making instruments in the evaluation and formulation of macroeconomic policies				
(c) Increased exchange and coordination among Latin American and Caribbean countries and between countries and regional or subregional institutions in the analysis and design of macroeconomic policies	(c) Number of participants in macroeconomic dialogue networks considering activities and operations as beneficial for coordination purposes				

<i>Activity summary</i>				<i>Impact summary</i>
	<i>Actual 2004-2005</i>	<i>Estimate 2006-2007</i>	<i>Estimate 2008-2009</i>	<p>During 2004-2005, on the basis of the subprogramme's activities, ECLAC developed the Macroeconomic Dialogue Network (REDIMA) gathering high-level authorities of central banks and ministries of finance in three subregions (Central America, the Andean Community and Mercosur plus Chile), providing technical assistance and training in support of macroeconomic policy coordination to participants of 17 countries in the region. Three training workshops were organized in 2005 and another five in 2006, each counting an average of 15 participants. The specific technical issues addressed were fiscal expenditure, regional financial markets, fiscal harmonization and macroeconomic asymmetry. In 2006, 89 per cent of participants considered the recommendations received in workshops as "very useful" for their work. In 2006-2007, as a result of the project's recommendations, Central American countries have decided to set up and institutionalize a formal technical group gathering high-level representatives from central banks and ministries of finance. The programme also contributed to enhancing awareness among policymakers, managers and other important actors in the social sphere on social equity and cohesion and about the severe conditions affecting pension systems in the region. Eleven countries in Latin America and the Caribbean received advice on the fundamental reforms needed to face the challenges posed by the low coverage, high transaction costs and limited investment alternatives affecting pension funds. The following results are expected during 2008-2009: establishment of concrete macroeconomic measures and mechanisms in the technical group and training and technical assistance on emerging issues.</p>

				Total	—	391.9
Expected accomplishments		Indicators of achievement		Main activities		
(a) Enhanced technical capacity of Latin American and Caribbean countries to monitor population trends and tackle population and development issues for use in social programming		(a) Percentage of countries receiving advisory services from ECLAC that used the information and recommendations in policy design		<ul style="list-style-type: none">• Providing advice to member States, at their request, to strengthen their capacity to assess demographic trends and their determinants and impacts on social sector demands as an input for social and economic policies• Organizing workshops and seminars to enhance knowledge on the topics mentioned above, and study visits of officials from developing countries in order to upgrade their professional capabilities in this area• Collaborate in the coordination and execution of at least one technical cooperation project in the areas mentioned in the first point above		
(b) Increased technical capacity of countries of the region to monitor progress in the implementation of the recommendations and goals of relevant international agreements (International Conference on Population and Development, Madrid International Plan of Action on Ageing and relevant Millennium Development Goals)		(b) Number of participants in workshops that consider the knowledge gained on emerging population and development issues as useful for their work				
Activity summary				Impact summary		
	Actual 2004-2005	Estimate 2006-2007	Estimate 2008-2009	During 2004-2005, the subprogramme started to adapt and develop new methods for using demographic trends for projections of sector demands. Over the biennium 2006-2007, these new methods were used to implement country-level measurements of sectoral demands and their relationship to social protection policies in the Latin American and Caribbean region. For 2008-2009 the plan is to extend the previous work to more countries of the region by revising population estimates and projections and assessing the impact on specific policies, such as those related to social protection, poverty reduction, education and health, including reproductive health.

<i>Expected accomplishments</i>		<i>Indicators of achievement</i>		<i>Main activities</i>			
(a) Enhanced capacity of national, regional and local staff in countries of the region to evaluate and design sustainable environmental and urban development policies in the framework of relevant international and regional Conventions		(a) Number of countries assisted that have used recommendations obtained from ECLAC advisory services in the formulation of sustainable environmental and urban policies		<ul style="list-style-type: none">• Provision of advice to ECLAC member States, at their request, to monitor and devise sustainable environmental and urban policies• Organization of training courses, technical workshops and fellowships to present and discuss methodological frameworks, indicators and models for measuring performance in terms of environmental and urban sustainable development in collaboration with other international organizations (UN-Habitat, the United Nations Environment Programme, OECD)• Implementation of at least two technical cooperation projects on environmental sustainability and urban development			
(b) Improved knowledge of national technical staff on the monitoring of progress made towards meeting the Millennium Development Goals related to environmental and urban development		(b) Number of participants from regions or municipalities in training courses and workshops that are implementing the related methodologies in the design of their environmental and urban development policies					
<i>Activity summary</i>				<i>Impact summary</i>			
	<i>Actual 2004-2005</i>	<i>Estimate 2006-2007</i>	<i>Estimate 2008-2009</i>	In 2004-2005, sustainable development profiles for each country of the region were prepared on the basis of a systematic conceptual framework, and a set of indicators of sustainable development and geo-referenced information were developed by ECLAC with programme funding. ECLAC has developed the concept of “syndromes of sustainability of development”, and a related methodology for the elaboration of sustainable development indicators was tested in four countries of the region, resulting in the identification of systemic multi-causal linkages useful in designing integrated policies to promote sustainable development. Three regional courses were conducted aimed at building technical and institutional capacity in the region to develop sustainable development indicators and to apply the methodology to identify syndromes of sustainability of development at the field level. A total of 140 relevant professionals from 15 countries of the region were trained. In the case of one country, the

Seminars/ workshops	3 (140)	—	3 (45)				
Fellowships	—	—	1				
Field projects	—	—	2				
Total	15	12	16				

methodology was implemented by country authorities, which enabled the release of a complete sustainable development indicators system. In 2006-2007, based on the results, one Government passed a law enforcing the use of the methodology for the elaboration of sustainable development indicators at the national or subnational level. In 2008-2009, it is expected that two more countries will carry out similar initiatives to develop their own sustainable development indicators implementing ECLAC methodology and counting with ECLAC technical assistance. Other countries of the region will receive training in the use of the methodology.

Subprogramme 7. Natural resources and infrastructure

<i>Implementing entity:</i> ECLAC, Natural Resources and Infrastructure Division		<i>Budget summary (thousands of United States dollars)</i>			
<i>Relationship to the biennial programme plan, 2008-2009:</i> programme 17, subprogramme 9, expected accomplishments (a) and (b)		<i>Actual 2004-2005</i>	<i>Estimate 2006-2007</i>	<i>Estimate 2008-2009</i>	
<i>Objectives:</i> To strengthen the capacity of Latin American and Caribbean countries to sustainably manage their natural resources and provide efficient public utility and infrastructure services leading to greater social equity.		Advisory services	60.7	320.8	325.5
		Travel of staff	20.9	36.4	28.4
		Seminars/workshops	—	—	30.0
		Total	81.6	357.2	383.9
<i>Expected accomplishments</i>	<i>Indicators of achievement</i>	<i>Main activities</i>			
(a) Enhanced capacity to assess and implement policies for the sustainable management and conservation of natural resources based on appropriate economic and institutional evaluation	(a) Number of countries assisted that have used recommendations obtained from ECLAC advisory services in the formulation of measures related to natural resources management	<ul style="list-style-type: none">• Provision of advice to ECLAC member States, at their request or the request of relevant organizations, on devising sustainable policies for natural resources, evaluating public utility and infrastructure services and legislating with a view to promoting productivity and equity• Organization of technical workshops, fellowships and focused round tables for the exchange of best practices and discussions among officials from developing countries in order to upgrade their professional capabilities in the area of natural resources management and design of policy and regulatory frameworks on public utility and infrastructure services			
(b) Strengthened skills of national staff to evaluate alternatives for policymaking, planning, organization and regulation of public utilities and infrastructure services and systems	(b) (i) Number of participants in workshops, round tables or networks on management of natural resources and public utilities that apply recommendations received in the design of relevant policies (ii) Number of agencies in infrastructure services in the region using methodological inputs and recommendations received				

<i>Activity summary</i>				<i>Impact summary</i>
	<i>Actual 2004-2005</i>	<i>Estimate 2006-2007</i>	<i>Estimate 2008-2009</i>	<p>The subprogramme contributed to the improvement of national capabilities in water management and the provision of water-based public utility services. Twenty advisory missions in the areas of water management and public utilities services regulation were undertaken. In evaluations carried out after the advisory missions, all surveyed countries indicated that the mission provided their offices with new management and regulation knowledge. Furthermore, missions received an average rating of 4.3 (scale 1-5, 1 being poor and 5 being excellent) and all were rated good or above. The subprogramme activities also provided countries with the tools and skills needed to formulate and implement strategies to develop their national water management and public utility regulation systems. As indicated by responses to follow-up surveys, participants in the workshops found them useful or better. In addition, more than 60 per cent of respondents stated that they had been able to implement the workshops' recommendations. Likewise, in a survey in follow-up to the advisory missions, it was found that 62 per cent of the recommendations made by the advisers had been implemented. For instance, in one country, drafters included the notion of the duty to be efficient in their 2006 water services regulation.</p>

Subprogramme 8. Statistics and economic projections

<i>Implementing entity:</i> ECLAC, Statistics and Economic Projections Division				<i>Budget summary (thousands of United States dollars)</i>		
<i>Relationship to the biennial programme plan, 2008-2009:</i> programme 17, subprogramme 10, expected accomplishments (a) and (b)				<i>Actual 2004-2005</i>	<i>Estimate 2006-2007</i>	<i>Estimate 2008-2009</i>
<i>Objectives:</i> To strengthen capacity of Latin American countries to collect, compile, store, analyse, harmonize and disseminate official statistics and indicators in the social and environmental fields to produce quality data for the design and monitoring of public policies in the region.				Advisory services	172.6	287.3
				Other personnel costs	4.4	124.1
				Travel of staff	13.4	26.9
				Seminars/workshops	—	—
				Total	190.4	438.3
<i>Expected accomplishments</i>				<i>Indicators of achievement</i>		
(a) Strengthened skills and understanding of national staff to compile and disseminate core social and environmental data in accordance with international standards and frameworks				(a) Number of countries assisted that have used methodological recommendations obtained from an advisory mission in the design of household surveys		
(b) Strengthened capacity to monitor the evolution of social indicators (in particular those included in the Millennium Development Goals and other internationally agreed development goals) for social planning and formulation of social policies				(b) Number of participants in training workshops rating the results as useful or very useful for social monitoring purposes		
				<ul style="list-style-type: none"> • Providing advice to ECLAC member States, at their request, to strengthen their capacity to collect, compile, store, analyse and disseminate official statistics and indicators in the social and environmental fields to produce quality data for policy development, with a special focus on census and basic economics • Organizing workshops and training courses to improve methodology in the collection and analysis of social and environmental statistics, the monitoring of the Millennium Development Goals and other internationally agreed development goals at the national and local levels and the design of related social policies 		
<i>Activity summary</i>				<i>Impact summary</i>		
	<i>Actual 2004-2005</i>	<i>Estimate 2006-2007</i>	<i>Estimate 2008-2009</i>	The technical assistance provided to national statistical agencies and ministries of planning has led to improvements in the capabilities of national staff, in particular in the area of social and economic indicators related to internationally agreed development goals such as labour market data, poverty incidence rates and income distribution indexes. In 2004-2005, the subprogramme organized 6 training activities targeted to approximately 210 public sector officials from 16 countries of the region on the generation of social indicators and methodologies to assess the efficiency and effectiveness of social policies and programmes and to measure their impact on living standards. In one country, technical assistance services have led to the design of the national strategy for the development of social policies. In the biennium 2006-2007, technical assistance to this country is geared towards supporting the implementation of two specific programmes derived from this national strategy: the “Comer es primero” programme and the unique beneficiaries system based on ECLAC recommendations. In 2008-2009, it is expected that four countries of the region will adopt a new methodology based on ECLAC advisory services to design a new income/expenditure basket to be included in their household surveys in the area of employment conditions and social statistics.

<i>Relationship to the biennial programme plan, 2008-2009:</i> programme 17, subprogramme 11, expected accomplishments (a) and (b)		<i>Actual 2004-2005</i>	<i>Estimate 2006-2007</i>	<i>Estimate 2008-2009</i>	
<i>Objectives:</i> To achieve dynamic growth and sustainable, inclusive and equitable development within a robust and democratic institutional framework to enable the countries in the subregion to fulfil the goals set out in the Millennium Declaration.		Advisory services	—	305.3	335.6
		Consultants	—	—	32.3
		Travel of staff	—	107.4	96.2
		Seminars/workshops	—	—	30.0
		Total	—	412.7	494.1
<i>Expected accomplishments</i>	<i>Indicators of achievement</i>	<i>Main activities</i>			
(a) Enhanced capacity of ECLAC member States to assess poverty reduction and related economic challenges and formulate relevant policies, including at the macroeconomic level	(a) Percentage of institutional stakeholders from member States evaluating technical cooperation provided as “useful” or “very useful” to assess poverty reduction and economic challenges and formulate relevant policies	<ul style="list-style-type: none">• Provision of advisory services to member States through analysis, advice and substantive contributions to training activities aimed at strengthening their analysis of development challenges and formulation of policy options• Organization of study visits for officials from member States in order to strengthen their knowledge and professional capability to analyse development challenges, identify policy options and promote cooperation among the countries• Organization of at least one field project in macroeconomics or disasters			
(b) Strengthened technical and analytical skills of ECLAC member States to develop and implement policies in trade and integration, sustainable development, disaster assessment and risk management	(b) Percentage of institutional stakeholders from member States evaluating technical cooperation provided as “useful” or “very useful” to develop and implement policies in trade and integration, sustainable development, disaster assessment and risk management				

<i>Activity summary</i>				<i>Impact summary</i>
	<i>Actual 2004-2005^a</i>	<i>Estimate 2006-2007</i>	<i>Estimate 2008-2009</i>	<p>The subprogramme responded appropriately and quickly to ad hoc requests for technical cooperation assistance. Examples of technical cooperation support in 2004-2005^a included trade negotiations under the Central America Free Trade Agreement with the United States of America and between Andean countries and the United States, the economic and social impacts of trade agreements, competitiveness, foreign investment, fiscal policy, assessment of the Millennium Development Goals, poverty reduction, social account matrices, gender and economics, Plan Puebla Panama, electrical sector reforms and the Central American emergency energy plan. In some cases, support initiated with the regular programme funds could be further developed into proposals financed from extrabudgetary resources; this is the case of the trade capacity strengthening project (with the Canadian International Development Agency) now under way. Considering the whole advisory services programme (including other funding), 25 member State Governments of ECLAC have benefited, including all 10 Governments of the subregion, and involved collaboration with 24 other United Nations entities. About 40 per cent of advisory service missions received funding by sponsoring organizations, one indication of the high regard given to this support. Technical cooperation assistance includes: (a) work with one country on long-term development options and poverty reduction, food security and water, with plans for the bienniums 2006-2007 and 2008-2009 including social protection, economic and fiscal policy, trade capacity-building, disaster evaluation and risk management advice and training; (b) macroeconomic capacity-building and policy advice, including capacity-building in macroeconomic modelling for the central banks of Central America and their subregional coordinating body with Department of Economic and Social Affairs/Development Account funding and technical cooperation financing of the regional adviser in 2004-2005; (c) the ongoing work on disasters for which ECLAC is highly recognized, with the financing of the ECLAC focal point for disasters for 2006-2007; highlights include the carrying out of disaster evaluations at the request of governments in eight countries in Latin America and the Caribbean and technical cooperation for evaluations of the impact of the earthquake and tsunami that affected Indonesia and India, permitting the concerned Governments to plan their disaster relief and reconstruction efforts and to present requests to international donors; the highly recognized ECLAC disaster evaluation methodology, which has been adopted by the World Bank; an extensive training programme within Latin America and the Caribbean and other regions; work to develop risk assessment methodologies.</p>

<i>Implementing entity:</i> ECLAC, subregional headquarters for the Caribbean		<i>Budget summary (thousands of United States dollars)</i>		
<i>Relationship to the biennial programme plan, 2008-2009:</i> programme 17, subprogramme 12, expected accomplishments (a) and (b)		<i>Actual 2004-2005</i>	<i>Estimate 2006-2007</i>	<i>Estimate 2008-2009</i>
<i>Objectives:</i> To improve long-term sustainable development patterns and strategies in the Caribbean countries.		Advisory services	—	325.0
		Consultants	—	33.5
		Travel of staff	—	74.9
		Seminars/workshops	—	30.0
		Total	—	487.3
<i>Expected accomplishments</i>	<i>Indicators of achievement</i>	<i>Main activities</i>		
(a) Enhanced technical capacity of countries of the subregion to monitor progress in the implementation of their national plans to accomplish the Mauritius Strategy for the Sustainable Development of Small Island Developing States	(a) Number of countries assisted that rated the usefulness of ECLAC advisory services as useful or very useful	<ul style="list-style-type: none"> • Provision of advice to member States, at their request, on issues relating to new phases of the implementation of the Programme of Action for the Sustainable Development of Small Island Developing States • Organization of workshops to increase knowledge in support of capacity-building in the assessment of natural disasters 		
(b) Increased technical capacity in the countries of the subregion for the assessment of the socio-economic and environmental effects of natural disasters	(b) Number of participants in workshops who consider the knowledge acquired on the development and use of methodology for the assessment of socio-economic and environmental effects of natural disasters as useful for their work			

<i>Activity summary</i>				<i>Impact summary</i>
	<i>Actual 2004-2005^a</i>	<i>Estimate 2006-2007</i>	<i>Estimate 2008-2009</i>	<p>During 2004-2005,^a the subprogramme's activities focused on the follow-up, by small island developing States, of the Barbados Programme of Action for the Sustainable Development of Small Island Developing States and the outcome of the international meeting on small island developing States on promoting the designation of the Caribbean Sea as a special area in the context of sustainable development. In addition, 16 small island developing States in the region have benefited from the sharing of best international practices from other geographical areas with common features regarding the legal, political and technical feasibility of establishing a regime for the Caribbean Sea as an enclosed or semi-enclosed sea, according to the provisions of the 1982 Convention on the Law of the Sea. The evaluations of the socio-economic and environmental effects of natural disasters that were conducted in 10 Latin American and Caribbean countries affected mainly by hurricanes and floods were used to identify reconstruction needs, formulate reconstruction project profiles and submit requests to international donors in at least five countries in 2004 and three in 2005. ECLAC methodology was the basis for interregional technical assistance provided to the Asian Preparedness Centre in the aftermath of the tsunami that hit countries in the Indian Ocean basin. In 2006-2007 the ECLAC methodology for post-disaster assessment of socio-economic and environmental effects was transmitted to the Asian Disaster Preparedness Centre in Indonesia and to the Caribbean Disaster Emergency Response Agency in Belize. The following results are expected in 2008-2009: (a) the adoption of new methodologies for the follow-up of national plans related to small island developing States; and (b) the development of national measures and plans for the assessment and prevention of natural disasters based on ECLAC training.</p>

5. Economic and social development in Western Asia: \$4,585,400

- 22.32 The activities in this region are implemented by the Economic and Social Commission for Western Asia (ESCWA) in support of programme 18, Economic and social development in Western Asia, of the biennial programme plan for the period 2008-2009 (A/61/6/Rev.1). More specifically, ESCWA activities will focus on strengthening the technical, managerial and organizational capacities of developing member countries to plan and deliver more effective policies and programmes, particularly in support of the Millennium Development Goals and the outcomes of the major United Nations conferences and international agreements since 1992. ESCWA will also address the emerging needs of the least developed countries and countries emerging from conflict. Special attention will be placed on identifying, testing and supporting the adoption and adaptation of good practices as well as knowledge-sharing in the areas of water and energy, social policies, globalization and information and communications technology. Efforts will focus on the management of strategically planned technical cooperation activities at the regional, subregional and national levels, with an emphasis on transboundary programmes/projects.

(b) Enhanced knowledge and improved skills of national officers, practitioners and end-users to address opportunities and constraints for the sustainable management of natural resources	(b) Number of participants in workshops who have used the knowledge acquired in their work				

<i>Activity summary</i>				<i>Impact summary</i>
	<i>Actual 2004-2005</i>	<i>Estimate 2006-2007</i>	<i>Estimate 2008-2009</i>	<p>The subprogramme rendered services to foster the development of strategies and plans of action for the efficient and sustainable management of water and energy resources and on environmental issues within the context of sustainable development. The subprogramme continued to advocate an integrated and coherent approach to sustainable development through regional action towards the integrated management of water resources, renewable energy, sanitation, desertification, land degradation and biodiversity. Those efforts were aimed at implementing the outcomes of the global conferences and summits, especially the World Summit on Sustainable Development and the Sustainable Development Initiative in the Arab Region, and ensuring the achievement of the Millennium Development Goals. In this context, during the biennium 2004-2005, 84 advisory services were rendered and three training workshops were conducted with positive impact. Eight member countries directly benefited from advisory services in 2006 in reviewing, formulating and evaluating policies and programmes related to sustainable development. By the end of 2007, more than 45 advisory missions to member countries will have been completed with a view to promoting and developing regional cooperation and integration and reinforcing and improving capacity for the formulation and implementation of policies, strategies and programmes for the sustainable management of natural resources at the regional and national levels. Continued emphasis will be placed in 2008-2009 on strengthening understanding and implementation of the processes, mechanisms and tools necessary for the sustainable management of natural resources and increasing awareness among policymakers and other stakeholders of appropriate mechanisms and tools for sustainable production and consumption patterns in the water and energy sectors, with special emphasis on environmental considerations.</p>

Subprogramme 2. Integrated social policies

Implementing entity: ESCWA, Social Development Division		Budget summary (thousands of United States dollars)			
Relationship to the biennial programme plan, 2008-2009: programme 18, subprogramme 2, expected accomplishment (a)		Actual 2004-2005	Estimate 2006-2007	Estimate 2008-2009	
Objectives: To enhance the capacity of the countries of the region, particularly the least developed countries and countries emerging from conflict, in formulating, implementing and monitoring integrated social policies and adapting ESCWA regional frameworks and best practices on managing social policies advocated by ESCWA to national specificities using a participatory approach.		General temporary assistance	697.9	329.3	348.5
		Consultants	41.5	21.9	65.6
		Travel of staff	65.1	41.3	72.2
		Contractual services	6.7	-	-
		Seminars/workshops	24.9	142.0	67.0
		Total	836.1	534.5	553.3
Expected accomplishments	Indicators of achievement	Main activities			
(a) Strengthened capacity of member countries to adopt an integrated and participatory approach for social policy formulation, implementation and monitoring	(a) (i) Increase in the number of member countries and other national stakeholders, including civil society organizations, requesting ESCWA policy advice on social policy analysis, design, approaches, implementation and monitoring systems required to foster social equity and inclusion (ii) Number of countries that have taken active steps to revisit their social development strategies on the basis of ESCWA recommendations	<ul style="list-style-type: none">• Providing policy advice and technical support to ESCWA member countries and civil society institutions at their request, to sharpen their understanding of social equity and inclusion, enhance their capacity to design and formulate integrated social policies and programmes and facilitate implementation of integrated social policies and strengthen their institutional capacities to manage, monitor and adjust social development policies and projects on the basis of the principles of social equity and responsible partnership and the impact on marginalized groups. The advisory services will support the monitoring of the implementation of the Millennium Development Goals and the outcomes of the international conferences while giving special attention to identifying good practices in matters of integrated social policies• Organizing subregional workshops for Government and civil society entities to foster partnerships for social policy formulation and implementation• Organizing study tours for officials from selected member countries in order to expose them to successful social policy processes and outcomes and facilitate exchange of success stories and lessons learned. Study tours are also expected to facilitate and enhance regional and international networking in this area and create a critical mass in favour of equitable social development			
(b) Increased understanding of national stakeholders of the principles, approaches and instruments of integrated social policies	(b) Number of countries and national stakeholders that have used the knowledge acquired in their social policy provisions				

<i>Activity summary</i>				<i>Impact summary</i>
	<i>Actual 2004-2005</i>	<i>Estimate 2006-2007</i>	<i>Estimate 2008-2009</i>	<p>In 2004-2005 and 2006-2007, the subprogramme endeavoured to enlist the support of member States for the concept of integrated social policies through advocacy, knowledge-sharing and technical assistance. In 2006 five member countries directly benefited from advisory services in the areas of assessing national social policy processes or determining suitable mechanisms for designing, implementing, and evaluating integrated social policies. As a result, orientation workshops were conducted to build the capacity of the newly recruited staff for adapting ESCWA regional frameworks to national specificities and determining suitable mechanisms for designing, implementing and evaluating national social policies. Technical support was provided to the International Symposium on International Migration and Development, with specific focus on the Gulf Cooperation Council countries. By the end of 2007, more than 32 advisory missions to member countries will have been completed with a view to providing a regional platform for debating the issues, mechanisms and instruments for the development of sound social policy options; continuous dialogue on international migration, including labour migration policies, in the light of the report of the Secretary-General on international migration and development and the report of the Global Commission on International Migration; participatory development methodologies and monitoring social policy in urban settings. Continued emphasis will be placed in 2008-2009 on strengthening understanding of the processes, mechanisms and tools necessary for effective social policy formulation, implementation and monitoring; enhancing the capacity of civil society institutions to participate in public policymaking and the implementation of social development projects; and increasing awareness among policymakers and other stakeholders of the linkages between demographic changes, social inclusion and the need for equal access to services and development.</p>

			<p>The subprogramme continued to advocate an integrated and coherent approach to reach common understanding on key regional issues and building consensus for promoting regional cooperation and integration, targeted at implementing the outcomes of the global conferences and summits, especially the International Conference on Financing for Development and the Doha Development Agenda, and achieving the Millennium Development Goals by 2015. The subprogramme rendered services to promote the development of policies, strategies and plans of action for the harmonization and implementation of transport agreements and trade facilitation and to strengthen the skills of Government officials on the World Trade Organization and new rounds of negotiations. Eleven member countries directly benefited from advisory services in 2006 on reviewing, formulating and evaluating policies and programmes, World Trade Organization issues, trade and transport facilitation and implementation of the Integrated Transport System in the Arab Mashreq. The subprogramme also assisted in the development of schemes and systems to enhance the capacity and efficiency of member States' ports, including training needs; and provided technical support for the formulation of multimodal transport legislation. By the end of 2007, 70 advisory missions to member countries will have been completed with a view to promoting and developing regional cooperation and integration and reinforcing and improving capacity for the formulation and implementation of policies, strategies and programmes for economic development and trade and transport facilitation at the regional and national levels. Increased attention will be placed in 2008-2009 on increasing awareness and building consensus among policymakers and other stakeholders for regional cooperation and moving towards regional integration; strengthening understanding and implementation of the processes, mechanisms and tools necessary for sound economic development; increasing foreign direct investment and trade and transport facilitation; and enhancing the knowledge and skills of government officials for successful trade and World Trade Organization negotiations and the implementation and monitoring of the Integrated Transport System in the Arab Mashreq.</p>

Subprogramme 4. Information and communication technology for regional integration

Implementing entity: ESCWA, Information and Communication Technology Division		Budget summary (thousands of United States dollars)			
Relationship to the biennial programme plan, 2008-2009: programme 18, subprogramme 4, expected accomplishment (a)			Actual 2004-2005	Estimate 2006-2007	Estimate 2008-2009
Objectives: To promote the implementation of the ESCWA regional plan of action for building the information society, particularly in relation to the information and communication technology (ICT) sector, to enhance socio-economic development and regional integration. 			<p>There has been a strong and increasing demand for technical cooperation services in the ICT field in 2006-2007, mainly as a result of the Tunis Agenda for the Information Society. Six member countries directly benefited from advisory services in 2006 in the areas of e-government and e-readiness; the establishment of centralized data warehousing systems; sector-specific ICT services, functions and applications (such as in education; land and maritime transport; development of a web-based enquiry point for responding to standardization and measurement enquiries; and in national statistical offices); information technology structure, applications and databases (ESCWA Statistical Information System, with a special focus on the industrial and ICT indicators for the Gulf Cooperation Council countries); and the identification and formulation of ICT projects. By the end of 2007, more than 30 advisory services will have been provided to member countries with a view to developing their capacity to harness information and communication technology for socio-economic development and regional integration and to bridging the digital divide. The subprogramme will, in 2008-2009, sustain its efforts towards improved understanding of opportunities and challenges faced at the national, regional and subregional levels for implementing the regional plan of action for building the information society and improving connectivity in and between member States by enhancing affordability and unifying standards and through regional peering. Special attention will be given to building governmental capacity to bridge the digital divide between ESCWA member countries to increase understanding and improved skills of national offices on ICT core indicators and means of measuring, monitoring and reporting for policymaking; implementing policies and plans of action to enhance the ICT sector, including the Millennium Development Goals and the World Summit on the Information Society outcomes; improving the provision of e-services; and supporting the development of public-private partnership mechanisms for regional integration. The subprogramme will also contribute to strengthening networking and knowledge-sharing by building communities of practice in the areas of ICT policymaking, community development and others, and ensuring the effective use of ICT at the national and the regional levels.</p>

Subprogramme 5. Statistics for evidence-based policymaking

<i>Implementing entity:</i> ESCWA, Statistics Division		<i>Budget summary (thousands of United States dollars)</i>		
<i>Relationship to the biennial programme plan, 2008-2009:</i> programme 18, subprogramme 5, expected accomplishment (a)		<i>Actual 2004-2005</i>	<i>Estimate 2006-2007</i>	<i>Estimate 2008-2009</i>
<i>Objectives:</i> To strengthen the capacity of ESCWA member countries to improve the national institutional framework for official statistics, including the monitoring of progress towards the achievement of the Millennium Development Goals by 2015.		General temporary assistance	- 329.2	359.2
		Consultants	- 192.0	100.7
		Travel of staff	- 44.3	71.9

<i>Expected accomplishments</i>	<i>Indicators of achievement</i>	<i>Main activities</i>		
(a) Enhanced institutional framework for national statistics to collect, produce and disseminate in a timely manner official statistics and indicators in the economic, social, and environmental fields, with special emphasis on the System of National Accounts 1993, population and housing censuses and household surveys	(a) Percentage of member countries that accepted and applied ESCWA policy recommendations and technical advice	<ul style="list-style-type: none"> • Organization of study tours for officials from member countries to upgrade their professional competencies in the area of statistics and to support the development of a regional and international network • Organization of workshops to facilitate the exchange of experiences, increase knowledge and improve skills in the collection, analysis and dissemination of economic and social statistics and indicators, notably on statistical dissemination and communication, short-term and structural business statistics, and measurement of poverty 		
(b) Strengthened skills of staff of national statistical offices to produce, compile, disseminate and use economic, social and environmental data in accordance with international standards and frameworks	(b) Percentage increase in countries assisted that take steps to implement recommendations made by ESCWA			

<i>Activity summary</i>				<i>Impact summary</i>
	<i>Actual 2004-2005^a</i>	<i>Estimate 2006-2007</i>	<i>Estimate 2008-2009</i>	<p>There has been a strong and increasing demand for technical cooperation services for statistical development in 2006-2007, partly triggered by the needs assessment for statistics development. The needs assessment for capacity development of the national statistical offices in countries of the ESCWA region, conducted in mid-2006, identified gaps where capacity-building was needed and ascertained the required efforts to raise the performance level of the concerned institutions. Areas of focus identified are sampling, short-term statistics, including labour statistics, poverty statistics, social-demographic statistics, including on international migration, economic statistics, including on national accounts, and dissemination and communication practices, including knowledge-sharing among member countries. Nine member countries directly benefited from advisory services in 2006 in the areas of sampling techniques; social statistics, e.g., labour force surveys and labour market analyses, and population and housing censuses in the context of development; economic statistics, e.g., national accounts; sector statistics, e.g., agricultural census, industrial survey and sustainable development statistics; and on statistical information applications and databases (DevInfo and ESCWA Statistical Information System). By the end of 2007, more than 20 advisory services will have been provided to member countries with a view to developing their capacity to produce, disseminate and use timely, reliable and comparable statistics. In addition, staff from national statistical offices of all member countries have acquired new skills and knowledge in statistics for monitoring and reporting on the Millennium Development Goals and in the areas of, inter alia, DevInfo, the System of National Accounts 1993, population and housing censuses and methodologies for the analysis of statistical data and for measuring the efficiency of production in industrial establishments. The efforts of the subprogramme in 2008-2009 will be geared towards further developing the institutional capacity of national statistical offices for the production, compilation, processing, analysis, dissemination and use of timely, reliable and comparable statistics and indicators in the social, economic and environmental fields, thereby advocating the application of international methodologies and standards and promoting networking, sharing of experiences and adoption of best practices.</p>

Subprogramme 6. Advancement of women

<i>Implementing entity:</i> ESCWA, Centre for Women		<i>Budget summary (thousands of United States dollars)</i>		
<i>Relationship to the biennial programme plan, 2008-2009:</i> programme 18, subprogramme 6, expected accomplishment (a)		<i>Actual 2004-2005</i>	<i>Estimate 2006-2007</i>	<i>Estimate 2008-2009</i>
<i>Objectives:</i> To strengthen the capacity of national mechanisms and civil society institutions for the empowerment and advancement of women to address gender imbalances and mainstream a gender perspective, with special emphasis on the participation of women in legislative and executive authorities.		General temporary assistance	- 318.2	352.7
		Consultants	- 123.5	29.5
		Travel of staff	- 14.7	31.5
		Seminars/workshops	- 54.0	111.6
		Total	- 510.4	525.3
<i>Expected accomplishments</i>	<i>Indicators of achievement</i>	<i>Main activities</i>		
(a) Increased advocacy for addressing gender imbalances and mainstreaming a gender perspective, with particular attention to the participation of women in legislative and executive authorities (b) Improved understanding and knowledge and strengthened skills of national mechanisms to compile and disseminate core data and report on the advancement and empowerment of women in accordance with international conventions and frameworks	(a) Percentage increase in countries expressing interest in addressing gender imbalances and mainstreaming a gender perspective into development efforts (b) Percentage increase in countries assisted that take steps to implement recommendations made by ESCWA	<ul style="list-style-type: none"> • Providing advice to Member States, at their request, to strengthen their capacity to collect, compile, store, analyse and disseminate information and indicators on the advancement and empowerment of women to produce quality country reports under the Convention on the Elimination of All Forms of Discrimination against Women; increasing knowledge in support of United Nations conventions and resolutions related to the advancement and empowerment of women and the formulation and implementation of national programmes, projects and plans; providing on-the-job training and assisting in the preparation of expert group meetings, seminars and workshops at the regional or subregional level; preparing technical papers and background documents in support of the implementation of the Millennium Development Goals and the outcome of the follow-up to the Fourth World Conference on Women • Organizing workshops to increase knowledge in support of United Nations conventions and resolutions related to the advancement and empowerment of women; to advocate the participation of women in the political arena; and to mainstream a gender perspective in development policies, programmes and plans 		

<i>Activity summary</i>				<i>Impact summary</i>
	<i>Actual 2004-2005^a</i>	<i>Estimate 2006-2007</i>	<i>Estimate 2008-2009</i>	<p>In 2004-2005, there was an increase in the number of ESCWA member countries that adopted a gender-mainstreaming approach in national policies (from three in 2003 to five in 2005), attributable mainly to ESCWA activities in awareness-raising, information dissemination, technical support and capacity-building. ESCWA also provided support to national machineries for women in formulating gender-sensitive policies and in reporting under the Convention on the Elimination of All Forms of Discrimination against Women. Six member countries directly benefited from advisory services in 2006 in the areas of gender mainstreaming and gender analysis, reporting under the Convention and advancement of women. By the end of 2007, more than 30 advisory missions will have been completed, covering most ESCWA member countries, with a view to developing the capacity to integrate the gender perspective into development policies, programmes and plans and to produce and disseminate in a timely manner national reports under the Convention. In addition, more than 140 staff from national mechanisms and civil society institutions of all member countries acquired new skills and knowledge in monitoring and reporting under the Convention, and in gender mainstreaming and gender analysis in the context of the 10-year review of the Beijing Platform for Action. The efforts of the subprogramme in 2008-2009 will be geared towards further improving the understanding of United Nations conventions and resolutions on women, and thus promoting their implementation, and of challenges faced at the national level, especially by legislative bodies and the media; enhancing the compilation and analysis of data through the adoption of internationally recognized methodologies, for reporting on the advancement and empowerment of women in ESCWA member countries, particularly, the Convention, the 10-year review of the Beijing Platform for Action and the Beirut Declaration on Arab Women 10 Years after Beijing: Call for Peace. The capacity-building workshops planned for 2008-2009 will promote partnerships between Governments and grass-roots organizations and the media to increase outreach and to sustain follow-up action, evaluation and promotion of issues relating to the empowerment of women, women's rights and gender mainstreaming.</p>

		Total	546.1	542.0	188.0
<i>Expected accomplishments</i>	<i>Indicators of achievement</i>	<i>Main activities</i>			
(a) Increased knowledge among stakeholders of the impact of conflict on socio-economic development and the issues to be taken into consideration for conflict recovery and management (b) Increased knowledge and improved skills of officials to identify and address socio-economic needs and political challenges posed by conflict and instability	(a) Percentage of member countries that have accepted and applied ESCWA policy recommendations and technical advice (b) Percentage of participants in workshops that have gained knowledge and used the tools and techniques recommended by ESCWA	<ul style="list-style-type: none">• Provision of policy advice and technical support to ESCWA member countries, at their request, to strengthen their capacity to identify and respond to the root causes of conflict; to strengthen their capacity to address socio-economic development issues related to responding to challenges resulting from conflict and instability; to develop their understanding and capabilities to identify, assess and respond to socio-economic needs and political challenges presented by conflict and instability in the region; and to promote and support regional initiatives and programmes for conflict mitigation and development• Organization of workshops on the management of sustainable development in politically unstable or conflict-afflicted areas and on methodology to identify and assess root causes of conflict and instability• Pilot project on tools for enhancing the competitiveness of the agro-food sector in the ESCWA region, particularly in countries emerging from crisis			

<i>Activity summary</i>				<i>Impact summary</i>
	<i>Actual 2004-2005^a</i>	<i>Estimate 2006-2007</i>	<i>Estimate 2008-2009</i>	The subprogramme will contribute to reducing the impact of conflict and political instability on the process of achieving the development needs of countries afflicted by crisis by building the capacity of public and civic entities to identify and assess the root causes of conflict through the development of specific tools and techniques. The subprogramme will also build the capacity of public and civic decision-makers and policymakers to improve the management and implementation of their socio-economic development programmes, despite political turmoil and conflict. It will continue, in 2008-2009, the work initiated by ESCWA on socio-economic development in response to conflict and political instability in 2006-2007, in particular the recommendations arising from the expert group meeting for managers from public and civic entities that work on socio-economic development projects/activities under unfavourable political and security conditions. Furthermore, ESCWA prepared a conceptual framework that addresses development under crisis conditions, which will guide future ESCWA activities in meeting the challenges posed by conflict or political instability. The proposal also builds on the recommendations of the field projects implemented jointly with UNDP and Habitat, since 2004, on supporting public administration development in Iraq. The subprogramme will have an impact on regional initiatives for conflict mitigation and development and acquire and disseminate knowledge from across regions.
