

General Assembly

Distr.: General
6 October 2015

Sixty-ninth session
Agenda item 12

Resolution adopted by the General Assembly on 11 September 2015

[without reference to a Main Committee (A/69/L.91 and Add.1)]

69/325. Consolidating gains and accelerating efforts to control and eliminate malaria in developing countries, particularly in Africa, by 2015 and beyond

The General Assembly,

Recalling that the period 2001–2010 was proclaimed by the General Assembly as the Decade to Roll Back Malaria in Developing Countries, Particularly in Africa,¹ and that combating HIV/AIDS, malaria, tuberculosis and other diseases is included in the internationally agreed development goals, including the Millennium Development Goals,

Recalling also the malaria-related goals and commitments in the outcome document of the high-level plenary meeting of the General Assembly on the Millennium Development Goals,²

Recalling further its resolution 68/308 of 10 September 2014 and all previous resolutions concerning the struggle against malaria in developing countries, particularly in Africa,

Recalling World Health Assembly resolutions 60.18 of 23 May 2007 and 64.17 of 24 May 2011, urging a broad range of national and international actions to scale up malaria control programmes,³ resolution 61.18 of 24 May 2008 on monitoring the achievement of health-related Millennium Development Goals⁴ and resolution 68.2 of 22 May 2015 on the global technical strategy and targets for malaria 2016–2030,

Recalling also the commitment made by African leaders to end the epidemic of malaria by ensuring universal and equitable access to quality health care and by improving health systems and health financing, contained in the African Common Position on the post-2015 development agenda,

¹ Resolution 55/284.

² Resolution 65/1.

³ See World Health Organization, documents WHASS1/2006-WHA60/2007/REC/1 and WHA64/2011/REC/1.

⁴ See World Health Organization, document WHA61/2008/REC/1.

Bearing in mind the relevant resolutions of the Economic and Social Council relating to the struggle against malaria and diarrhoeal diseases, in particular resolution 1998/36 of 30 July 1998,

Taking note of all declarations and decisions on health issues, in particular those related to malaria, adopted by the Organization of African Unity and the African Union, including the Abuja Declaration on HIV/AIDS, Tuberculosis and Other Related Infectious Diseases, containing the pledge to allocate at least 15 per cent of national budgets to the health sector, the Abuja call for accelerated action towards universal access to HIV and AIDS, tuberculosis and malaria services in Africa, issued by the Heads of State and Government of the African Union at the special summit of the African Union on HIV and AIDS, tuberculosis and malaria, held in Abuja from 2 to 4 May 2006, the decision of the Assembly of the African Union at its fifteenth ordinary session, held in Kampala from 25 to 27 July 2010, to extend the Abuja call to 2015 to coincide with the Millennium Development Goals, and the declaration of the special summit of the African Union on HIV/AIDS, tuberculosis and malaria, held in Abuja from 12 to 16 July 2013,

Recognizing the leadership provided by the African Leaders Malaria Alliance and the continued commitment to help to achieve the 2015 targets, and encouraging the members of the Alliance to continue to provide political leadership at the highest level in the fight against malaria in Africa,

Welcoming the leadership and commitment of the Asia Pacific Leaders Malaria Alliance to eliminate malaria in the Asia-Pacific region by 2030, and encouraging the members of the Alliance to continue to provide political leadership at the highest level in the fight against malaria in the region,

Welcoming also the Global Technical Strategy for Malaria 2016–2030 of the World Health Organization, adopted by the World Health Assembly in May 2015, and the Action and Investment to Defeat Malaria 2016–2030 plan of the Roll Back Malaria Partnership, launched at the third International Conference on Financing for Development, held in Addis Ababa from 13 to 16 July 2015, which together provide the framework for achieving a reduction in global malaria incidence and mortality rates by at least 90 per cent by 2030, in line with the sustainable development goals,⁵

Taking note of the World Health Organization framework for action for an emergency response to artemisinin resistance in the Greater Mekong subregion of South-East Asia, launched in April 2013,

Reaffirming the Declaration of Alma-Ata, adopted at the International Conference on Primary Health Care, held in Alma-Ata from 6 to 12 September 1978, and its central role in launching the vision of the World Health Organization on health for all,

Welcoming the selection by the Secretary-General of malaria as one of the top priorities of his second mandate and his commitment to develop new partnerships and improve existing ones and to scale up high-impact interventions aimed at significantly reducing the number of deaths from malaria,

⁵ The sustainable development goals are expected to be adopted at the United Nations summit for the adoption of the post-2015 development agenda, to be held in New York from 25 to 27 September 2015.

Recognizing the linkages among efforts being made to reach the targets set at the Extraordinary Summit of Heads of State and Government of the Organization of African Unity, held in Abuja on 24 and 25 April 2000, as necessary and important for the attainment of the “Roll Back Malaria” goal⁶ and the targets of the Millennium Development Goals by 2010 and 2015, respectively, and welcoming in this regard the commitment of Member States to respond to the specific needs of Africa,

Recognizing also that malaria-related ill health and deaths throughout the world have been substantially reduced with political commitment and commensurate resources, helping to decrease global malaria mortality by 58 per cent and to avert more than 6 million malaria-related deaths since 2000, as a result of greater public education and sensitization about malaria and increased availability of health services, particularly in countries where the disease is endemic,

Recognizing further that malaria control interventions have a positive impact on overall child and maternal mortality rates, with a documented 69 per cent reduction of malaria mortality in children under the age of 5 in Africa alone since 2000, and have helped malaria-endemic countries to reach Millennium Development Goals 4 and 5 of reducing child mortality and improving maternal health, respectively, by 2015,

Acknowledging the progress made in Latin America in reducing the incidence of malaria, with 15 out of 21 countries on track to reduce incidence by 75 per cent by 2015, and in significantly decreasing the number of malaria deaths by 79 per cent since 2000, owing to the commitment of countries to improve access to medicines and health services and to sustained efforts in prevention programmes,

Acknowledging also the progress made in parts of Africa in reversing the high burden of malaria through political engagement and sustainable national malaria control programmes, as well as the success achieved in respect of the 2015 goals concerning malaria control set by the World Health Assembly, the Roll Back Malaria Partnership and the Abuja Declaration on Roll Back Malaria in Africa,⁶ as well as Millennium Development Goal 6, target 6.C, to have halted by 2015 and begun to reverse the incidence of malaria and other diseases,

Recognizing that, despite the fact that increased global and national investments in malaria control have yielded significant results in decreasing the burden of malaria in many countries and that some countries are moving towards the elimination of malaria, many countries continue to have unacceptably high burdens of malaria and in order to reach internationally agreed development goals, including the sustainable development goals, must rapidly increase malaria prevention and control efforts, which rely heavily on medicines and insecticides whose utility is continuously threatened by the development of resistance in humans to antimalarial agents, as well as resistance of mosquitoes to insecticides and their shift to outdoor biting and resting,

Aware that recent successes in prevention and control are fragile and can be maintained only with sufficient and sustained national and international investment to fund global malaria control efforts fully,

Regretting the high number of people still without access to medicines, and underscoring that improving access to medicines could save millions of lives every year,

⁶ A/55/240/Add.1, annex.

Recognizing the serious challenges relating to substandard, falsified and counterfeit drugs, poor malaria diagnostics and poor quality of vector control products,

Expressing concern about the continued morbidity, mortality and debility attributed to malaria, and recalling that more efforts are needed as countries transition from the Millennium Development Goals to the sustainable development goals and focus on targets set out in the Global Technical Strategy for Malaria 2016–2030 and the Action and Investment to Defeat Malaria 2016–2030 plan to reduce malaria mortality rates by 90 per cent by 2030,

Gravely concerned about the health burden of malaria worldwide, with 214 million cases and 472,000 deaths projected in 2015, in particular in sub-Saharan Africa, where an estimated 90 per cent of the deaths occur, affecting mostly young children,

Emphasizing the importance of strengthening health systems to effectively sustain malaria control and elimination efforts and enable appropriate responses to other health issues and emergencies, including investment in entomology and vector control for human resources and infrastructures,

Commending the efforts of the World Health Organization, the United Nations Children's Fund, the Roll Back Malaria Partnership, the Global Fund to Fight AIDS, Tuberculosis and Malaria, the World Bank and other partners to fight malaria over the years,

1. *Welcomes* the report prepared by the World Health Organization,⁷ and calls for support for the implementation of the recommendations contained therein;

2. *Calls for* increased support for the implementation of international commitments and goals pertaining to the fight to eliminate malaria as stipulated in the internationally agreed development goals, including the Millennium Development Goals and the sustainable development goals, as well as the related targets outlined in the Global Technical Strategy for Malaria 2016–2030 of the World Health Organization and the Action and Investment to Defeat Malaria 2016–2030 plan of the Roll Back Malaria Partnership;

3. *Encourages* Member States, relevant organizations of the United Nations system, international institutions, non-governmental organizations, the private sector and civil society to continue to observe World Malaria Day on 25 April, in order to raise public awareness of and knowledge about the prevention, control and treatment of malaria as well as the importance of meeting the sustainable development goals, and stresses the importance of engaging local communities in this regard;

4. *Encourages* the Special Envoy of the Secretary-General for Malaria to continue raising issues relating to malaria in collaboration with other United Nations organizations already working on those issues in the context of the international political and development agendas and to work with national and global leaders to intensify efforts to secure the political commitment, partnerships and funds to drastically reduce malaria deaths by at least 90 per cent by 2030 through increased access to prevention, diagnosis and treatment, especially in Africa;

⁷ A/68/854.

5. *Welcomes* the increased funding, while recognizing the need for additional funding to achieve malaria elimination targets, for malaria interventions and for research and development of preventive, diagnostic and control tools from the international community, through funding from multilateral and bilateral sources and from the private sector, as well as by making predictable financing available through appropriate and effective aid modalities and in-country health financing mechanisms aligned with national priorities, which are key to strengthening health systems, including malaria surveillance, and promoting universal and equitable access to high-quality malaria prevention, diagnostic and treatment services, and noting in this regard that a high level of external assistance per person at risk for malaria is associated with a decrease in the incidence of the disease;

6. *Urges* the international community, United Nations agencies and private organizations and foundations to support the implementation of the Global Technical Strategy for Malaria 2016–2030, including through support for the complementary Action and Investment to Defeat Malaria 2016–2030 plan and for programmes and activities at the country level in order to achieve internationally agreed targets on malaria;

7. *Calls upon* the international community to continue to support the Roll Back Malaria Partnership and partner organizations, including the World Health Organization, the World Bank and the United Nations Children’s Fund, as vital complementary sources of support for the efforts of malaria-endemic countries to combat the disease;

8. *Urges* the international community to work in a spirit of cooperation towards effective, increased, harmonized, predictable and sustained bilateral and multilateral assistance and research to combat malaria, including support for the Global Fund to Fight AIDS, Tuberculosis and Malaria, in order to assist States, in particular malaria-endemic countries, to implement sound national plans, in particular health plans and sanitation plans, including malaria control and elimination strategies which may include evidence-based, cost-effective and context-appropriate environmental management solutions, and integrated management of childhood illnesses, in a sustained and equitable way that, inter alia, contributes to strengthening health system development approaches at the district level;

9. *Appeals* to the malaria partners to resolve the financial, supply chain and delivery bottlenecks that are responsible for stock-outs of long-lasting insecticide-treated nets, insecticides for indoor and outdoor residual spraying, rapid diagnostic tests and artemisinin-based combination therapies at the national level, whenever they occur, including through the strengthening of malaria programme management at the country level;

10. *Welcomes* the contribution to the mobilization of additional and predictable resources for development by voluntary innovative financing initiatives taken by groups of Member States, and in this regard notes the International Drug Purchase Facility, UNITAID, the International Finance Facility for Immunization, the advance market commitments for vaccines, the Gavi Alliance and the Affordable Medicines Facility for Malaria pilot, and expresses support for the work of the Leading Group on Innovative Financing for Development and its special task force on innovative financing for health;

11. *Urges* malaria-endemic countries to work towards financial sustainability, to increase, to the extent possible, national resources allocated to malaria control and to create favourable conditions for working with the private sector in order to improve access to good-quality malaria services;

12. *Urges* Member States to assess and respond to the needs for integrated human resources at all levels of the health system in order to achieve the internationally agreed development goals, including the Millennium Development Goals and the sustainable development goals, to take action, as appropriate, to effectively govern the recruitment, training and retention of skilled health personnel, and to give particular focus to the availability of skilled personnel at all levels to meet technical and operational needs as increased funding for malaria control programmes becomes available;

13. *Stresses* the importance of improved community-based systems to control malaria, bearing in mind that families are often the starting point for effective health care for a child with a fever and that improved home management of malaria will therefore have a positive impact on treatment and control;

14. *Calls upon* Member States to promote access to medicines, and emphasizes that access to affordable and quality medicines and medical care in the event of sickness, as well as in the prevention, treatment and control of diseases, is central to the realization of the right to the enjoyment of the highest attainable standard of physical and mental health;

15. *Urges* the international community, inter alia, to support the Global Fund to Fight AIDS, Tuberculosis and Malaria to enable it to meet its financial needs and, through country-led initiatives with adequate international support, to intensify access to affordable, safe and effective antimalarial treatments, including artemisinin-based combination therapies, intermittent preventive therapies for pregnant women, children under 5 and infants, adequate diagnostic facilities, long-lasting insecticide-treated mosquito nets, including, where appropriate through the free distribution of such nets and, where appropriate, to insecticides for indoor residual spraying for malaria control, taking into account relevant international rules, including the Stockholm Convention on Persistent Organic Pollutants⁸ standards and guidelines;

16. *Urges* relevant international organizations, in particular the World Health Organization and the United Nations Children's Fund, to enhance the assistance efforts of national Governments to provide universal access to malaria control interventions to address all at-risk populations, in particular young children and pregnant women, in malaria-endemic countries, particularly in Africa, as rapidly as possible, with due regard to ensuring the proper use of those interventions, including long-lasting insecticide-treated nets, and sustainability through full community participation and implementation through the health system;

17. *Calls upon* Member States, in particular malaria-endemic countries, with the support of the international community, to establish and/or strengthen national policies, operational plans and research, with a view to scaling up efforts to achieve internationally agreed malaria targets, in accordance with the technical recommendations of the World Health Organization;

18. *Commends* those African countries that have implemented the recommendations of the Abuja Summit in 2000 to reduce or waive taxes and tariffs for nets and other products needed for malaria control,⁶ and encourages other countries to do the same;

⁸ United Nations, *Treaty Series*, vol. 2256, No. 40214.

19. *Calls upon* United Nations agencies and their partners to continue to provide the technical support necessary to build and enhance the capacity of Member States to implement the Global Technical Strategy for Malaria 2016–2030, together with the Action and Investment to Defeat Malaria 2016–2030 plan, to meet the internationally agreed goals;

20. *Expresses deep concern* about emerging drug and insecticide resistance in several regions of the world, calls upon Member States, with support from the World Health Organization and other partners, to implement the Global Plan for Artemisinin Resistance Containment and the Global Plan for Insecticide Resistance Management in Malaria Vectors and to strengthen and implement surveillance systems for monitoring and assessing changing patterns of drug and insecticide resistance, calls upon the World Health Organization to support Member States in the development of their national insecticide resistance management strategies and to coordinate support at the international level for countries to ensure that drug efficacy and insecticide resistance testing is fully operational in order to enhance the use of artemisinin-based combination therapies and insecticides, and stresses that the data gathered should be utilized to inform local decisions and for further research and development of safe and effective therapies and new vector control tools;

21. *Urges* all Member States to prohibit the marketing and use of oral artemisinin-based monotherapies and to replace them with oral artemisinin-based combination therapies, as recommended by the World Health Organization, and to develop the financial, legislative and regulatory mechanisms necessary to introduce artemisinin combination therapies at affordable prices in both public and private facilities;

22. *Recognizes* the importance of the development of safe, affordable and cost-effective vaccines and new medicines to prevent and treat malaria and the need for further and accelerated research, including into safe, effective and high-quality therapies, using rigorous standards, including by providing support to the Special Programme for Research and Training in Tropical Diseases,⁹ through effective global partnerships, such as the various malaria vaccine initiatives and the Medicines for Malaria Venture, where necessary stimulated by new incentives to secure their development, and through effective and timely support for the pre-qualification of new antimalarials and their combinations;

23. *Recognizes* the importance of innovation in addressing the challenges to eliminating malaria, including the role of the World Intellectual Property Organization, in particular its Re:Search platform;

24. *Calls upon* the international community, including through existing partnerships, to increase investment in and efforts towards research to optimize current tools, develop and validate new, safe and affordable malaria-related medicines, products and technologies, such as vaccines, rapid diagnostic tests, insecticides and their delivery modes, to prevent and treat malaria, especially for at-risk children and pregnant women, and test opportunities for integration in order to enhance effectiveness and delay the onset of resistance;

25. *Calls upon* malaria-endemic countries to assure favourable conditions for research institutions, including the allocation of adequate resources and the

⁹ A joint programme of the United Nations Children's Fund, the United Nations Development Programme, the World Bank and the World Health Organization.

development of national policies and legal frameworks, where appropriate, with a view to, inter alia, informing policy formulation and strategic interventions on malaria;

26. *Reaffirms* the right to use, to the fullest extent, the provisions contained in the World Trade Organization Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS Agreement), the Doha Declaration on the TRIPS Agreement and Public Health, the decision of the General Council of the World Trade Organization of 30 August 2003 on the implementation of paragraph 6 of the Doha Declaration on the TRIPS Agreement and Public Health, and, when formal acceptance procedures are completed, the amendment to article 31 of the Agreement, which provide flexibilities for the protection of public health, and in particular to promote access to medicines for all and to encourage the provision of assistance to developing countries in this regard, and calls for the broad and timely acceptance of the amendment to article 31 of the Agreement, as proposed by the General Council of the World Trade Organization in its decision of 6 December 2005;

27. *Recognizes* the importance in the struggle against malaria of the World Health Organization Global Strategy and Plan of Action on Public Health, Innovation and Intellectual Property, adopted by the World Health Assembly on 24 May 2008;⁴

28. *Calls upon* malaria-endemic countries, development partners and the international community to support the timely replacement of long-lasting insecticide-treated nets in accordance with the recommendations of the World Health Organization on the service lives of the nets, in order to prevent the risk of malaria resurgence and a reversal of the gains made to date;

29. *Calls upon* the international community to support ways to expand access to affordable, effective and safe products and treatments, such as vector control measures, including indoor residual spraying, long-lasting insecticide-treated nets, including through the free distribution of such nets, adequate diagnostic facilities, intermittent preventive therapies for pregnant women, children under 5 and infants, and artemisinin-based combination therapy for populations at risk of falciparum malaria infection in endemic countries, particularly in Africa, including through additional funds and innovative mechanisms, inter alia, for the financing and scaling up of artemisinin production and procurement, as appropriate, to meet the increased need;

30. *Recognizes* the impact of the Roll Back Malaria Partnership, and welcomes the increased level of public-private partnerships for malaria control and prevention, including the financial and in-kind contributions of private sector partners and companies operating in Africa, as well as the increased engagement of non-governmental service providers;

31. *Encourages* the producers of long-lasting insecticide-treated nets and insecticides to accelerate technology transfer to developing countries, and invites the World Bank and regional development funds to consider supporting malaria-endemic countries in establishing factories to scale up production of long-lasting insecticide-treated nets and insecticides, where appropriate;

32. *Calls upon* Member States and the international community, especially malaria-endemic countries, in accordance with existing guidelines and recommendations of the World Health Organization and the requirements of the Stockholm Convention related to the use of DDT, to become fully knowledgeable about the technical policies and strategies of the World Health Organization and the

provisions of the Stockholm Convention, including for indoor residual spraying, long-lasting insecticide-treated nets and case management, intermittent preventive therapies for pregnant women, children under 5 and infants, monitoring of in vivo resistance studies to artemisinin-based combination therapies and monitoring and managing insecticide resistance and outdoor malaria transmission, as well as to increase capacity for the registration and uptake of new vector control tools, the safe, effective and judicious use of indoor residual spraying and other forms of vector control, including quality control measures, in accordance with international rules, standards and guidelines;

33. *Requests* the World Health Organization, the United Nations Children's Fund and donor agencies to provide support to those countries that choose to use DDT for indoor residual spraying so as to ensure that it is implemented in accordance with international rules, standards and guidelines, and to provide all possible support to malaria-endemic countries to manage the intervention effectively and prevent the contamination, in particular, of agricultural products with DDT and other insecticides used for indoor residual spraying;

34. *Encourages* the World Health Organization and its member States, with the support of the parties to the Stockholm Convention, to continue to explore possible alternatives to DDT as a vector control agent;

35. *Recognizes* the importance of a multisectoral strategy to advance global control efforts, invites malaria-endemic countries to consider adopting and implementing the Multisectoral Action Framework for Malaria, developed by the Roll Back Malaria Partnership and the United Nations Development Programme, and encourages regional and intersectoral collaboration, both public and private, at all levels, especially in education, health, agriculture, economic development and the environment, to advance malaria control objectives;

36. *Also recognizes* the need to strengthen malaria surveillance and data quality in all endemic regions, a key pillar of the Global Technical Strategy for Malaria 2016–2030, to enable Member States to direct financial resources to populations most in need and to respond effectively to disease outbreaks;

37. *Calls upon* Member States and the international community to strengthen mechanisms for country-based coordination of technical assistance to achieve alignment of the best approaches to implement World Health Organization technical guidance and to mobilize support for the sharing and analysis of best practices to address urgent programmatic challenges, to improve monitoring and evaluation and to conduct regular financial planning and gap analysis;

38. *Encourages* sharing, across regions, of knowledge, experience and lessons learned with regard to the control and elimination of malaria, particularly between the Africa, Asia-Pacific and Latin America regions;

39. *Calls upon* the international community to support the strengthening of health systems, national pesticide and/or pharmaceutical policies and national drug and pesticide regulatory authorities, to monitor and fight against the trade in counterfeit and substandard antimalarial medicines, pesticides and/or nets, and prevent their distribution and use, and to support coordinated efforts, inter alia, by providing technical assistance for compliance with existing commitments and international regulations on the use of pesticides and to improve surveillance, monitoring and evaluation systems and their alignment with national plans and systems so as to better track and report changes in coverage, the need for scaling up recommended interventions and the subsequent reductions in the burden of malaria;

40. *Encourages* Member States, the international community and all relevant actors, including the private sector, to promote the coordinated implementation and enhance the quality of malaria-related activities, in accordance with national policies and operational plans that are consistent with the technical recommendations of the World Health Organization and recent efforts and initiatives, including, where appropriate, the Paris Declaration on Aid Effectiveness, the Accra Agenda for Action, adopted at the Third High-level Forum on Aid Effectiveness, held in Accra from 2 to 4 September 2008,¹⁰ the Busan Partnership for Effective Development Cooperation and the Nairobi outcome document of the High-level United Nations Conference on South-South Cooperation;¹¹

41. *Recognizes* the need for political commitment and financial support beyond 2015 to sustain and expand the achievements in the struggle against malaria and to meet the international malaria targets through prevention and malaria control efforts to end the epidemic, while acknowledging the remarkable progress in combating malaria to date;

42. *Requests* the Secretary-General, in close collaboration with the Director General of the World Health Organization and in consultation with Member States, to report to the General Assembly at its seventieth session on the implementation of the present resolution.

*103rd plenary meeting
11 September 2015*
