5. *Recalls* the importance of a timely implementation of the 2030 Agenda, and urges Governments to address the structural and procedural weaknesses in institutions at all levels that may be hindering the implementation of the Sustainable Development Goals and targets and pursue bold policy reforms to accelerate achievement of the decade of action and delivery for sustainable development;

6. *Recognizes* that achieving sustainable development and strengthening resilience require a long-term perspective in public policymaking, together with institution-building at all levels, based on effective governance for sustainable development, as well as a steadfast commitment to promoting peaceful, just and inclusive societies;

7. *Also recognizes* that public administration entities are essential partners in developing adequate institutional mechanisms and ensuring that competences, skills and behaviours in the workforce are directed to the effective implementation of mission-oriented objectives based on the Sustainable Development Goals, and encourages Governments to incorporate their work on building effective, accountable and inclusive institutions at all levels into national planning processes, policies and strategies;

8. *Reaffirms* the need for pragmatic ongoing improvements in national and local governance capabilities to achieve the 2030 Agenda and other international agreements, and encourages Governments at all levels to apply the principles of effective governance for sustainable development,⁵ endorsed by the Council in its resolution [2018/12](#) of 2 July 2018, to all public institutions and in support of the implementation of all Sustainable Development Goals, taking into account different governance structures, national realities, capacities and levels of development and respecting national policies and priorities;

12. *Recalls* that building effective, accountable and inclusive institutions at all levels calls for a comprehensive understanding of the scope and capabilities of the public sector workforce, recognizes that new modalities of work are emerging in many countries, and encourages Governments to develop appropriate schemes for managing flexible work and contract work in the public sector, review public sector labour laws to reflect flexible work arrangements, develop protocols and guidelines for performance assessment in flexible work regimes, and accelerate efforts to enhance digital skills in the context of public sector workforce planning at both the national and subnational levels;
