Lettre datée du 11 octobre 2024, adressée à la Présidente du Conseil de sécurité par le Groupe d'experts sur le Yémen

Les membres du Groupe d'experts sur le Yémen ont l'honneur de vous faire tenir ci-joint le rapport final qu'ils ont établi en application du paragraphe 3 de la résolution [2707 \(2023\)](#).

Ce rapport a été soumis le 6 septembre 2024 au Comité du Conseil de sécurité créé par la résolution [2140 \(2014\)](#), qui l'a examiné le 19 septembre 2024.

Nous vous serions reconnaissants de bien vouloir porter le texte de la présente lettre et du rapport à l'attention des membres du Conseil de sécurité et de le faire distribuer comme document du Conseil.

Rapport final du Groupe d'experts sur le Yémen créé en application de la résolution 2140 (2014) du Conseil de sécurité

Résumé

À l'origine un conflit armé interne, le conflit au Yémen, qui a débuté il y a dix ans, a évolué en confrontation régionale pour prendre maintenant les proportions d'une crise internationale majeure. La guerre à Gaza a marqué un tournant dans la dynamique régionale et s'est répercutee sur le processus de paix au Yémen, auquel elle a porté un coup d'arrêt. L'accord relatif à une feuille de route ne pourra être signé que lorsque la situation régionale s'y prêtera et que les houthistes auront cessé de s'en prendre aux navires en mer Rouge.

Les houthistes ont exploité la situation régionale et renforcé leur coopération avec « l'axe de la résistance », en violation du régime de sanctions prévu par la résolution 2140 (2014) du Conseil de sécurité. Selon les informations recueillies par le Groupe d'experts, ils reçoivent une assistance technique, des formations, des armes et un soutien financier de la République islamique d'Iran, de groupes armés iraquiens et du Hezbollah. Des centres opérationnels conjoints ont aussi été mis en place en Iraq et au Liban avec une représentation houthiste, dans le but de coordonner les actions militaires conjointes de l'axe de la résistance.

La collaboration accrue entre les houthistes et des groupes terroristes tels qu'Al-Qaida dans la péninsule arabique est aussi préoccupante. Les deux groupes sont convenus de renoncer à l'affrontement interne, de transférer des armes et de coordonner leurs attaques contre les forces du Gouvernement yéménite. On observe également une augmentation des activités de contrebande d'armes légères et de petit calibre entre les houthistes et les Chabab, certains éléments indiquant le partage de matériel militaire ou le recours à un fournisseur commun. Les sanctions imposées aux houthistes n'auront qu'un impact limité tant que des mesures appropriées n'auront pas été prises contre l'ensemble des responsables de violations du régime des sanctions.

L'ampleur, la nature et le volume des transferts par des sources extérieures de matériel et de technologies militaires divers aux houthistes, y compris le soutien financier et la formation des combattants, sont sans précédent.

Lors du défilé militaire organisé à Sanaa en septembre 2023, les houthistes ont présenté plusieurs missiles balistiques, missiles de croisière, missiles antinavires, missiles sol-air, drones, drones d'attaque unidirectionnels, patrouilleurs d'attaque rapide, drones de surface, systèmes de surveillance électro-optiques, mines terrestres et mines marines. Sans aide extérieure, ils ne peuvent développer et produire la plupart des équipements susmentionnés. Depuis janvier 2023, le Gouvernement yéménite a intercepté de nombreux articles militaires et à double usage. En janvier 2024, les États-Unis d'Amérique ont intercepté dans les eaux internationales deux navires transportant du matériel létal, notamment des composants de missiles et d'engins sous-marins sans pilote, qui s'acheminaient apparemment vers des zones contrôlées par les houthistes.

Les houthistes ont adopté une stratégie d'escalade progressive en ciblant les navires marchands et les navires militaires en mer Rouge. Le détournement du navire *Galaxy Leader* a eu lieu le 19 novembre 2023 et, à ce jour, les 25 membres d'équipage, de nationalités différentes, sont toujours détenus. En réponse, différentes forces de la coalition navale internationale ont été formées afin de dissuader les houthistes et de protéger la liberté de navigation. Les houthistes ne se laissent pas décourager pour autant et continuent d'attaquer les navires. Au moins 134 attaques

ont été lancées depuis des zones contrôlées par les houthistes contre des navires, notamment des navires militaires des États-Unis et du Royaume-Uni de Grande-Bretagne et d'Irlande du Nord, au moyen de nouveaux modèles de missiles.

Sur le plan intérieur, les houthistes ont intensifié leurs opérations contre le Gouvernement yéménite, voulant ainsi réaliser des avancées sur plusieurs fronts. Ils ont également recruté un grand nombre de jeunes et d'enfants yéménites, de migrants en situation irrégulière et de mercenaires venus de tribus éthiopiennes. Sur le plan interne, la situation militaire est fragile et tout événement interne ou externe pourrait déclencher la reprise des affrontements militaires.

Pour financer leurs activités militaires, les houthistes continuent d'adopter diverses mesures illégales afin de générer d'importantes ressources à des fins militaires. Ils usent de leur contrôle sur le secteur des télécommunications afin de solliciter des fonds publics pour la « force aérienne » des drones et les « forces de défense côtière » en envoyant des millions de messages aux abonnés. Les houthistes utilisent divers réseaux opérant depuis différentes juridictions, notamment des sociétés écrans et des sociétés de change, pour financer leurs activités, en particulier dans le secteur du pétrole et du gaz de pétrole liquéfié. Les réseaux houthistes utilisent de faux documents tels que les certificats d'origine, ont recours aux transferts de navire à navire et déplacent des navires qui désactivent régulièrement le système d'identification automatique pendant les traversées afin que les ports visités et les itinéraires empruntés ne soient pas détectés, ou afin d'éviter les inspections par le Mécanisme de vérification et d'inspection des Nations Unies. Les houthistes continuent également d'utiliser de manière généralisée et illégale du personnel armé pour geler ou confisquer les biens de particuliers et d'entités, prendre le contrôle de sociétés, se livrer à une vaste contrebande d'armes, de drogues, de matériel de télécommunication à double usage, de pesticides, de médicaments et d'objets culturels yéménites.

Les personnes visées dans le cadre du régime de sanctions prévu par la résolution 2140 (2014), celles qui agissent en leur nom ou sur leurs instructions et les entités qu'elles possèdent ou contrôlent continuent de recevoir, de posséder ou de contrôler, directement ou indirectement, des fonds, d'autres avoirs financiers et des ressources économiques. Les sanctions financières ont été d'une efficacité limitée. Cela s'explique d'une part par l'approche adoptée par la communauté internationale pour éviter que les sanctions financières n'entraînent des conséquences humanitaires néfastes, et d'autre part par l'incapacité du Gouvernement yéménite de geler les avoirs soumis au contrôle effectif des autorités désignées par les houthistes et se trouvant dans les zones contrôlées par ces derniers.

Les houthistes ont tenté à plusieurs reprises d'imprimer des billets de banque à l'étranger. Les rivalités se sont intensifiées, lorsque le 30 mars 2024, la Banque centrale du Yémen sise à Sanaa a émis une nouvelle pièce de 100 rials, qui a ensuite été déclarée comme fausse monnaie par la Banque centrale du Yémen sise à Aden. Plus récemment, cette dernière a révoqué les licences de six grandes banques basées à Sanaa et menacé de les retirer de la Société de télécommunications interbancaires mondiales (SWIFT). Ces banques réalisent un grand nombre de transferts de fonds internationaux, notamment pour le compte de plusieurs entités contrôlées par les houthistes. L'interdiction a donc porté atteinte aux intérêts économiques des houthistes, qui ont alors menacé de reprendre la guerre et de lancer des attaques transfrontalières contre des infrastructures économiques vitales du Royaume d'Arabie saoudite. Le gouverneur de la Banque centrale du Yémen sise à Aden a vu sa maison de Sanaa attaquée et ses biens saisis par un tribunal constitué par les houthistes.

Toutefois, grâce aux efforts de médiation sérieux déployés rapidement par les parties prenantes, la Banque centrale du Yémen sise à Aden serait revenue sur sa décision de révocation émise contre lesdites banques. Le conflit a été désamorcé et la guerre évitée. Quant au Gouvernement yéménite et au Conseil de transition du Sud, la réponse de la communauté internationale leur a fortement déplu. Cela souligne le risque qu'un problème économique dégénère en véritable guerre, d'où l'importance et l'urgence de remédier aux difficultés économiques qui menacent depuis longtemps la paix, la sécurité et la stabilité du Yémen. Les liens entre intérêts économiques, luttes de pouvoir politiques et actions militaires font apparaître la complexité de la situation au Yémen. Les attaques houthis contre les navires marchands en mer Rouge ont eu un effet d'entraînement, le Yémen étant le premier touché. L'augmentation considérable des coûts de transport et d'assurance a entraîné une hausse des prix des biens essentiels au niveau mondial. L'interdiction persistante imposée par les houthis sur les exportations de pétrole brut, qui a asséché les réserves en devises et entraîné la dévaluation du rial yéménite, a eu de graves répercussions sur la prestation de services publics dans les zones contrôlées par le Gouvernement yéménite. Cette situation a entraîné des manifestations régulières, des troubles publics et des querelles entre le Conseil de transition du Sud et le Gouvernement yéménite, ce qui menace la stabilité politique et économique du pays.

Les violations du droit international humanitaire et du droit des droits humains, en particulier par les houthis, se poursuivent. Il s'agit notamment d'attaques indiscriminées contre des civils et des biens de caractère civil, de violences sexuelles liées au conflit et de violence fondée sur le genre, notamment de violence fondée sur l'orientation sexuelle et l'identité de genre, ainsi que de torture et d'autres peines ou traitements cruels, inhumains ou dégradants. Les cas de détentions arbitraires, de disparitions forcées et d'entrave à l'accès à l'aide humanitaire, à l'acheminement et à la distribution de celle-ci sont nombreux. Des informations font état de plusieurs violations graves du droit à une procédure régulière, qui bien souvent entraînent des condamnations à mort, apparemment pour réprimer toute opposition.

La détention arbitraire de membres de personnel humanitaire et leur mise au secret par les houthis ainsi que la saisie de biens appartenant à des acteurs humanitaires sont particulièrement alarmantes. Ces actes empêchent l'accomplissement des mandats humanitaires et entravent les efforts déployés par l'Organisation des Nations Unies pour promouvoir la paix et la sécurité au Yémen. En outre, le recrutement et l'utilisation d'enfants dans le conflit menacent la stabilité future de la société yéménite et les perspectives de paix et de sécurité durables.

Les camps d'été sont utilisés par les houthis pour propager la haine, la violence et la discrimination. Les professionnels de l'éducation qui s'opposent à la politisation du système éducatif s'exposent à de graves représailles, notamment des détentions arbitraires et des disparitions forcées. Autre constat préoccupant, les houthis produisent localement des mines terrestres, en plaçant certains mécanismes de déclenchement destinés à accroître les préjudices causés aux humains. La neutralisation des mines terrestres est devenue plus dangereuse pour les démineurs, notamment parce que les houthis ne suivent pas de plan de pose de mines.

Toutes ces violations politiques, économiques, humanitaires et de sécurité, qui sont inextricablement liées, doivent faire l'objet d'une réponse globale.

I. Introduction

1. Le présent rapport, soumis au Conseil de sécurité en application du paragraphe 3 de la résolution [2707 \(2023\)](#), couvre la période du 1^{er} septembre 2023 au 31 juillet 2024¹ et comprend des conclusions actualisées à partir des enquêtes qui avaient été citées dans le cadre du rapport final du Groupe d'experts sur le Yémen daté du 2 novembre 2023 ([S/2023/833](#)).

2. Le mandat du Groupe d'experts a été prorogé le 14 novembre 2023 par le Conseil de sécurité dans sa résolution [2707 \(2023\)](#) jusqu'au 15 décembre 2024. Sur les cinq membres du Groupe d'experts désignés par le Secrétaire général ([S/2024/50](#) et [S/2024/418](#)), les contrats de l'expert en armements, de l'expert en questions financières et de l'expert en affaires régionales ont débuté le 19 janvier 2024 et les contrats de l'experte en groupes armés et de l'experte en droit international humanitaire ont débuté le 5 juin 2024 et le 15 juillet 2024, respectivement. Par conséquent, les enquêtes sur les violations du droit international humanitaire et des droits humains commises pendant la période considérée n'en sont qu'à leurs débuts.

3. Le Groupe d'experts a adopté les meilleures pratiques et méthodes recommandées par le Groupe de travail informel du Conseil de sécurité sur les questions générales relatives aux sanctions (voir [S/2006/997](#)). Il a mis l'accent en particulier sur le respect des normes relatives à la transparence, à l'objectivité et aux sources, preuves documentaires et allégations corroborées par des sources indépendantes et vérifiables, et donné à ses interlocuteurs la possibilité de répondre². Le Groupe d'experts a maintenu également une coopération avec l'Équipe d'appui analytique et de surveillance des sanctions créée par la résolution [1526 \(2004\)](#) et coopéré étroitement avec le Groupe d'experts créé par la résolution [2713 \(2023\)](#).

4. En 2024, les membres du Groupe d'experts se sont rendus en France, en Israël, en Arabie saoudite, aux Émirats arabes unis, au Royaume-Uni de Grande-Bretagne et d'Irlande du Nord, aux États-Unis d'Amérique et au Yémen (Aden et Moukalla)³. Dans une demande adressée à la République islamique d'Iran, le Groupe d'experts a sollicité la possibilité de se rendre à Téhéran du 28 au 30 juillet 2024. Toutefois, la République islamique d'Iran a indiqué ne pas être en mesure d'accueillir la délégation à la période proposée en raison de l'élection présidentielle qui s'y déroulait. Le Groupe d'experts a alors proposé la date du 24 août 2024 pour la tenue d'une réunion à Téhéran, mais n'a toujours pas reçu de réponse. Il a procédé à des inspections physiques de matériel, notamment des composants de missiles et des munitions saisis par l'Arabie saoudite, les États-Unis et le Gouvernement yéménite. Il a tenu des réunions en présentiel et s'est entretenu à distance avec un large éventail d'interlocuteurs, dont plusieurs États Membres. Le Groupe d'experts a également rencontré le Premier Ministre, le Ministre des affaires étrangères et d'autres responsables du Gouvernement yéménite lors de ses visites à Aden et à Riyad en mars et en juillet 2024.

¹ La période couverte dans le rapport final du Groupe d'experts ([S/2023/833](#)) s'est achevée le 31 août 2023 ; le présent rapport final couvre donc la période du 1^{er} septembre 2023 au 31 juillet 2024. La date limite d'examen des réponses des États Membres et des entités aux questions du Groupe d'experts était fixée au 15 août 2024.

² On trouvera un complément d'information sur la méthode de travail du Groupe d'experts et la possibilité de répondre à l'annexe 1.

³ Les principaux lieux au Yémen sont épelés selon les transcriptions utilisées par le Système d'information géographique des Nations Unies sur la carte figurant à l'annexe 2.

5. Le Groupe d'experts a adressé 204 lettres officielles, dont 161 à 46 États Membres et 43 à des organisations, entités et sociétés ; il attendait encore 128 réponses au 15 août 2024 (voir annexe 3). En tout, 62 % des lettres envoyées sont restées sans réponse.

II. Actes entravant la paix, la sécurité et la stabilité au Yémen

A. Dynamique régionale

6. La complexité et l'évolution rapide de la situation régionale pendant la période considérée ont éclipsé les progrès réalisés en 2023 dans le cadre du processus de paix au Yémen⁴. La guerre à Gaza a marqué un tournant dans la politique régionale et s'est répercutee sur le conflit au Yémen du fait de la participation des houthistes à la guerre⁵, des attaques en mer Rouge⁶ et des frappes aériennes lancées par les États-Unis et le Royaume-Uni contre le groupe⁷.

7. Les houthistes ont exploité la situation régionale pour consolider leur régime, en particulier dans un contexte de dégradation des conditions économiques et de mécontentement généralisé dans les zones qu'ils contrôlent. Ils ont également cherché à renforcer leur statut au sein de l'axe de la résistance⁸ et à gagner en popularité dans la région.

8. La tentative de l'Envoyé spécial du Secrétaire général pour le Yémen de faire avancer le processus de paix par l'annonce d'une feuille de route pour la paix au Yémen en décembre 2023 s'est heurtée aux répercussions des événements régionaux. En outre, l'escalade militaire entre la République islamique d'Iran et Israël en avril et l'attaque israélienne contre le port de Hodeïda en juillet 2024, à la suite d'une frappe de drone houthiste visant Tel-Aviv (Israël), ont soulevé de sérieux doutes quant à la reprise du processus de paix.

9. Les récentes mesures prises par la Banque centrale du Yémen sise à Aden contre six banques basées à Sanaa ont été considérées par les houthistes comme une guerre économique lancée contre eux. Poussant la situation au bord de la guerre, le chef des houthistes, Abdulmalik al-Houthi (YEI.004), a accusé l'Arabie saoudite d'être à l'origine de ces mesures et menacé d'attaquer les aéroports, les ports maritimes, les installations pétrolières et les banques du Royaume si les choses perduraient⁹.

⁴ La visite des houthistes à Riyad en septembre 2023 a été le signe de progrès tangibles dans le processus de paix au Yémen.

⁵ En tant que membre de l'axe de la résistance, le mouvement houthiste a menacé d'attaquer Israël en riposte à ses frappes aériennes sur Gaza. Depuis le 19 octobre 2023, les houthistes ont lancé plusieurs missiles et drones d'attaque unidirectionnels contre Israël et attaqué des navires marchands en mer Rouge, « appartenant ou destinés à Israël ».

⁶ Le 10 janvier 2024, le Conseil de sécurité a adopté la résolution 2722 (2024), dans laquelle il a exigé que « les houthistes mettent fin immédiatement à [toutes les] attaques » contre des navires marchands et des navires de commerce et pris note « du droit qu'ont les États Membres, conformément au droit international, de défendre leurs navires contre les attaques, notamment celles qui portent atteinte aux droits et libertés de navigation ».

⁷ Les États-Unis et l'Union européenne ont formé des coalitions navales pour sécuriser les routes de navigation en mer Rouge, et les États-Unis ont pris des mesures d'escalade progressives contre les houthistes.

⁸ L'expression « axe de la résistance » désigne une alliance géopolitique au Moyen-Orient opposée à l'influence dite occidentale et reposant sur l'entraide dans divers conflits et luttes contre des ennemis considérés comme communs. L'idée d'« action collective et d'unité des fronts » partagée par les parties à l'axe de la résistance indique que les houthistes participeraient à tout conflit régional futur.

⁹ Les médias affiliés aux houthistes ont publié des images aériennes de sites saoudiens importants (voir annexe 4).

Toutefois, grâce aux efforts de médiation déployés rapidement par les parties prenantes, les tensions sont actuellement désamorcées (voir par. 42).

10. L'accord relatif à la feuille de route¹⁰ ne pourra être signé que lorsque le contexte régional sera favorable et que les houthistes auront cessé de s'en prendre aux navires en mer Rouge. Cependant, les houthistes ne se laissent pas dissuader et le processus de paix piétine.

11. Pendant ce temps, les houthistes ont renforcé leur coopération avec d'autres membres de l'axe de la résistance et reçu le soutien de groupes armés présents en Iraq, au Liban, en République arabe syrienne et à Gaza. Le Groupe d'experts a analysé, dans le cadre d'études de cas, les relations entre les houthistes et les groupes armés iraquiens et libanais, les activités conjointes entre ces groupes s'étant récemment intensifiées. Il note que tant que la question du réseau qu'entretient le mouvement avec les groupes armés régionaux n'aura pas été réglée, les sanctions imposées aux houthistes n'auront qu'un impact limité.

Étude de cas n° 1 : coopération des houthistes avec les groupes armés iraquiens

12. Les enquêtes menées par le Groupe d'experts ont révélé une présence croissante des houthistes en Iraq ces dernières années. La guerre à Gaza a renforcé les liens politiques et militaires entre les houthistes et les groupes armés iraquiens. Le chef du mouvement, Abdulmalik al-Houthi, a confirmé en juin 2024 que les houthistes coordonnaient leurs activités militaires avec la « Résistance islamique en Iraq¹¹ », dont l'un des principaux groupes, Kataëb Hezbollah, a publié une déclaration commune avec les houthistes concernant leur rôle dans l'axe de la résistance¹². Le groupe Kataëb Hezbollah, a affirmé qu'il attaquerait des cibles américaines et britanniques avec tous les moyens dont il disposait, si le Yémen venait à être attaqué (voir annexes 5 et 6).

13. Différentes sources ont indiqué que des campagnes de collecte de fonds avaient été lancées en Iraq pour soutenir les houthistes, en particulier par le groupe Kataëb Hezbollah¹³. En janvier 2022, l'opération de collecte de fonds qu'il a organisée a été dirigée par Amir al-Musawi, porte-parole du Tajammu Chabab al-Charia (« Sharia Youth Gathering »), une organisation-cadre relevant du contrôle du groupe (voir annexe 7). Le Groupe d'experts n'a pas pu estimer le montant du soutien financier apporté aux houthistes. D'autres sources confidentielles ont indiqué que les houthistes recevaient également un soutien financier de l'Iraq sous forme de livraisons de pétrole.

14. Selon les renseignements obtenus par le Groupe d'experts, les groupes armés iraquiens envoient des experts et des combattants au Yémen depuis 2015 pour superviser les formations des houthistes, transférer des technologies militaires et combattre aux côtés des houthistes. Selon des sources confidentielles, les Forces de mobilisation populaire en Iraq, intégrées aux forces armées iraquiennes depuis 2019¹⁴, ont récemment formé environ 80 combattants houthistes dans le centre de

¹⁰ Des responsables de haut niveau ont exprimé la crainte que les houthistes ne mettent en œuvre que la première phase de la feuille de route afin d'en retirer des avantages financiers.

¹¹ Selon certaines sources, la Résistance islamique en Iraq se compose des groupes suivants : Kataëb Hezbollah, Kataëb Sayyid el-Chouhada, Harakat Ansar Allah el-Awfiya et Harakat Hezbollah el-Noujaba.

¹² Le secrétaire général du groupe Kataëb Hezbollah, Hajj Abu Hussein Al-Hamidawi, s'est entretenu avec Abdulmalik al-Houthi, soulignant l'importance de se maintenir en état de préparation et d'assurer un niveau élevé de coordination entre les forces de l'axe (voir annexe 6).

¹³ D'autres groupes armés chiites, tels que Harakat Hezbollah el-Noujaba, Kataëb Sayyid el-Chouhada, Asaëb Ahl el-Haq et l'organisation Badr, ont déclaré leur soutien aux houthistes.

¹⁴ Voir <https://x.com/IraqiPMO/status/1145735482518724608>.

formation Bahbahani¹⁵, dans la région de Jourf el-Sakhr¹⁶. Parmi les combattants figuraient des chefs des brigades el-Nasr (« de la victoire »), déployées dans les provinces côtières telles que Hajja et Hodeïda et affiliées aux houthistes. Des sources indiquent que les combattants se sont rendus en Iraq munis de faux passeports et que ces visites se sont multipliées après l'ouverture de l'aéroport de Sanaa en avril 2022 (voir annexe 9). Toujours selon elles, les formations les plus récentes visaient à renforcer les capacités des houthistes à cibler avec précision les navires en mer Rouge.

15. Au cours des derniers mois, les houthistes ont aussi coordonné des opérations militaires conjointes contre Israël avec des groupes armés iraquiens. En juin 2024, la Résistance islamique en Iraq et le porte-parole des houthistes ont confirmé avoir lancé des attaques conjointes contre des villes israéliennes comme Haïfa et Ashdod (voir annexe 10)¹⁷. Abdulmalik al-Houthi a également affirmé dans une déclaration télévisée diffusée en juin 2024 que son groupe prévoyait de lancer, conjointement avec la Résistance islamique en Iraq, des attaques contre Israël depuis le plateau du Golan (voir annexe 11). D'après certaines sources, un centre opérationnel stratégique a été mis en place en Iraq à cette fin, réunissant des représentants de plusieurs groupes armés, dont les houthistes.

16. Les activités des houthistes en Iraq sont menées par Ahmed Al-Sharafi, également connu sous le nom d'Abu Idris, fondateur en 2010 de la première usine militaire houthiste à Saada. Plusieurs sources confidentielles ont confirmé qu'il supervisait également l'achat de matériel pour le mouvement houthiste, qu'il organisait des formations pour les combattants houthistes auprès de groupes armés, ainsi que les visites des dirigeants houthistes à Bagdad (voir annexe 12).

17. Al-Sharafi a participé à des rencontres avec différents chefs de groupes armés, chefs tribaux et responsables officiels, afin d'accroître l'influence des houthistes en Iraq (voir annexe 13). Le Groupe d'experts note qu'il a dernièrement tenu ses premières rencontres avec des responsables iraquiens de haut rang. En juin, Al-Sharafi s'est ainsi réuni avec le conseiller iraquien pour la sécurité nationale, Qasim al-Araji ; il s'agit de la première rencontre déclarée avec un responsable iraquier de haut rang (voir annexe 14). Selon des sources confidentielles, Al-Sharafi a également transféré les activités du groupe des bureaux clandestins situés dans les districts de Jadriyé et d'Arasat el-Hindiya à Bagdad vers un bureau de représentation officiellement reconnu. Toujours selon des sources confidentielles, les houthistes disposent d'un autre bureau dans la ville de Najaf.

18. Les hauts fonctionnaires du Gouvernement yéménite ont fait savoir au Groupe d'experts que le Ministre de l'intérieur devait discuter des activités des houthistes en Iraq avec son homologue iraquier.

19. Les formations, l'aide militaire et le soutien financier fournis par les groupes armés iraquiens aux houthistes constituent une violation de l'embargo sur les armes et des sanctions financières imposées. Le Groupe d'experts attend encore la réponse du Gouvernement iraquier à la demande d'information qu'il lui a adressée.

¹⁵ Des sources ont indiqué que les houthistes avaient également reçu des formations dans un autre camp iraquier situé à proximité de la frontière saoudienne.

¹⁶ Plusieurs combattants houthistes, dont un officier de haut rang, ont été tués lors de la frappe aérienne lancée par les États-Unis sur cette zone en août 2024 (voir annexe 8).

¹⁷ Le général de brigade Yahya Saree, porte-parole militaire des houthistes, a déclaré : « La première opération conjointe a visé deux navires qui transportaient du matériel militaire dans le port de Haïfa. La seconde opération a visé un navire qui avait enfreint l'interdiction de pénétrer le port de Haïfa en Palestine occupée ». Il a ajouté que « les deux opérations conjointes ont été menées à l'aide de plusieurs drones et les frappes ont été précises ».

Étude de cas n° 2 : coopération des houthistes avec le Hezbollah

20. Le Groupe d’experts considère que le Hezbollah est l’un des principaux soutiens des houthistes et qu’il est impliqué dans ce qui suit :

- a) La structure décisionnelle des houthistes (voir par. 72) ;
- b) Le soutien opérationnel, au moyen de formations militaires (soit en techniques d’infanterie soit en systèmes d’armes) dispensées au Yémen et dans le sud du Liban (voir annexe 15) ;
- c) Le soutien technique, notamment à l’assemblage de systèmes d’armes ;
- d) Le soutien financier, notamment la mobilisation et l’utilisation des ressources à des fins militaires (voir par. 108) ;
- e) L’orientation idéologique, en particulier l’endoctrinement des jeunes lors des prétdendus camps d’été (voir par. 149) ;
- f) Le soutien en matière de gestion de la propagande médiatique, y compris la création de contenu en vue des campagnes militaires¹⁸.

21. Entre octobre 2023 et avril 2024, des représentants et des porte-parole houthistes ont fait de nombreuses déclarations par l’intermédiaire de médias basés au Liban et en République islamique d’Iran, où ils évoquaient l’existence d’un dispositif de coordination conjoint entre tous les groupes armés membres de l’axe de la résistance. L’analyse des déclarations par le Groupe d’experts ainsi que des vidéos diffusées suggère une alliance de ces groupes au niveau politique et militaire, répondant à un certain degré de coordination opérationnelle et placée sous un commandement conjoint, et laisse supposer l’existence d’un centre dit de commandement et de contrôle ou d’un dispositif de coordination conjointe des opérations (voir annexes 16 à 22)¹⁹.

22. Selon des sources confidentielles, ce centre de commandement et de contrôle est basé à Beyrouth, et dirigé par Mohammad Said Izadi, chef de la branche des affaires palestiniennes de la Force Al-Qods relevant du Corps des gardiens de la révolution islamique.

Étude de cas n° 3 : présence des houthistes dans d’autres pays

23. Selon des sources confidentielles, depuis au moins 2018, les houthistes disposent de « bureaux de liaison » dans plusieurs pays pour permettre le renforcement de leurs capacités, grâce aux formations et au soutien matériel et financier, en violation de la résolution 2216 (2015). Ils disposaient d’un bureau de liaison en République arabe syrienne, lequel aurait été fermé en 2023 (voir annexes 23 et 24).

¹⁸ Les locaux d’Al-Masirah, l’organe de communication houthiste, et d’Al-Manar, l’organe de communication du Hezbollah, sont situés à proximité l’un de l’autre.

¹⁹ L’attaque de grande envergure menée contre Israël le 14 avril 2024 au moyen de missiles et de drones tirés simultanément depuis l’Iran (République islamique d’), l’Irak, le Liban, la République arabe syrienne et le Yémen semble confirmer l’existence d’un tel dispositif.

B. Dynamique nationale

1. Actes de groupes armés menaçant la paix et la sécurité au Yémen

a) L'escalade militaire houthiste

24. Rompt avec la situation proche de l'accalmie qui régnait depuis avril 2022, les houthis ont renforcé leurs capacités sur les lignes de front en transférant des armes et des équipements et en recrutant de nouveaux combattants. Ils ont intensifié leurs opérations militaires contre les forces gouvernementales yéménites et ont tenté de réaliser des avancées sur plusieurs fronts, tels que Hajja, Chaboua, Dalea, Mareb, Kourch, Jaouf, Taëz, Saada et Hodeïda. Au cours de ces opérations, ils ont utilisé des missiles, des drones, des pièces d'artillerie, des fusils de tireurs d'élite, des engins explosifs improvisés et des mines terrestres. Selon les sources du Groupe d'experts, le Gouvernement yéménite a perdu 329 soldats et 883 de ses hommes ont été blessés au premier semestre 2024 (voir annexe 25).

25. Selon certaines sources, les houthis ont utilisé les nouvelles routes pour renforcer leurs effectifs militaires, transférer des armes et des équipements et fortifier leurs positions. Récemment, ils ont construit des tunnels sur la route Houban-Taëz mais aussi de nouvelles routes le long des lignes de front à Mareb, Chaboua, Beïda, Moukeïras, Yafeh, Dalea, Kourch et Taëz (voir annexe 25, figure 25.1).

26. En juin, le Gouvernement yéménite a reçu des informations selon lesquelles les houthis prévoient d'attaquer plusieurs lignes de front, à savoir Kourch, Mareb et Taëz. Il a donc pris de nombreuses mesures de précaution pour mobiliser ses forces.

27. D'après une circulaire obtenue par le Groupe d'experts, les forces armées du Gouvernement yéménite ont reçu pour instruction de se préparer à d'éventuelles attaques surprises des houthis sur plusieurs fronts et de prendre les précautions nécessaires à cet égard (voir annexe 25, figure 25.2).

28. Le Gouvernement yéménite estime que la communauté internationale devrait le soutenir politiquement et militairement afin de faire contrepoids aux capacités des houthis et de sécuriser les routes de navigation en mer Rouge.

29. Le Groupe d'experts juge la situation militaire interne fragile, notamment en raison des tentatives continues des houthis de s'emparer de nouvelles positions. Tout événement interne ou externe pourrait potentiellement déclencher la reprise des hostilités.

b) Recrutement massif de nouveaux combattants

30. Le discours houthiste pendant la guerre à Gaza a permis le recrutement d'un grand nombre de nouveaux combattants pour « libérer la Palestine des ennemis ». La plupart des interlocuteurs yéménites doutent que ces nouvelles recrues se rendent un jour à Gaza, estimant qu'elles pourraient en revanche être poussées à combattre le Gouvernement yéménite.

31. Les houthis ont activement recruté et formé des personnes dans la plupart des provinces qui sont sous leur contrôle. Ils ont lancé une vaste campagne de recrutement et de formation sous le nom de « Déluge d'Al-Aqsa ». Les représentants du Gouvernement yéménite ont informé le Groupe d'experts que plusieurs milliers de personnes, dont des enfants, ont été recrutées par les houthis depuis novembre 2023. Les estimations varient de 220 000 en 2022 à 350 000 combattants au moment de l'élaboration du présent rapport, contre 30 000 en 2015. Si le Groupe d'experts n'a pas été en mesure de confirmer lui-même le nombre de nouveaux combattants, une mobilisation massive serait source de préoccupation (voir annexe 26).

c) Recrutement de migrants et mercenaires éthiopiens

32. Le Groupe d'experts a été informé que les houthistes exploitaient les migrants éthiopiens en situation irrégulière, les obligeant à rejoindre leurs rangs, à se battre contre le Gouvernement yéménite et à se livrer au trafic de stupéfiants. Selon des sources confidentielles, 92 000 migrants en situation irrégulière se trouvent dans les provinces du sud. D'autres sources ont indiqué au Groupe d'experts que les houthistes avaient également recruté des mercenaires venus des tribus éthiopiennes du Tigré et des Oromo, pour des salaires allant de 80 à 100 dollars. Le Groupe d'experts n'a pas été en mesure de confirmer ces allégations et continue d'enquêter.

d) Relations des houthistes avec les organisations terroristes d'Al-Qaida dans la péninsule arabique et des Chabab

Les houthistes et Al-Qaida dans la péninsule arabique

33. Des sources confidentielles ont exprimé leur inquiétude quant à la résurgence potentielle d'Al-Qaida dans la péninsule arabique (AQPA) (QDe.129) avec l'aide des houthistes (voir par. 36). À la suite du décès de Khaled Saeed Batarfi, également connu sous le nom d'Abū al-Miqdād al-Kindī ([S/2019/83](#), par. 71), le 9 mars 2024, AQPA a désigné un nouveau chef, Sa'd bin 'Atef al-Awlaki²⁰. Originaire de la province de Chaboua ([S/2018/594](#), annexe 30), il est considéré comme un commandant militaire puissant. AQPA a réactivé ses canaux médiatiques, apparemment pour encourager le recrutement et inciter à la commission d'attaques.

34. Ainsi, cette alliance opportuniste²¹ repose sur une coopération en matière de sécurité et de renseignement. Les deux groupes offrent des zones de sécurité à leurs membres respectifs, consolident leurs bastions et se concertent lorsqu'il s'agit de s'en prendre aux forces du Gouvernement yéménite.

35. Des sources ont informé le Groupe d'experts que les deux groupes ont accepté de cesser les hostilités et de procéder à un échange de prisonniers. Le Groupe d'experts a reçu des informations du Gouvernement yéménite selon lesquelles l'ancien chef d'AQPA, Sami Dayan²², condamné en 2014 à 15 ans d'emprisonnement, avait été libéré à Sanaa par les houthistes. Cet incident et la dissolution du front d'AQPA contre les houthistes dans la province de Beïda sont les signes d'une collaboration entre les deux groupes.

36. Depuis le début de 2024, les deux groupes coordonnent directement leurs opérations. Ils sont convenus que les houthistes transféreraient quatre drones, des roquettes thermiques et des engins explosifs et qu'ils dispenseront des formations à des combattants d'AQPA. Ils ont d'autre part discuté du soutien qu'AQPA pourrait éventuellement apporter aux attaques contre les cibles maritimes. Selon des sources du Gouvernement yéménite, les stocks d'armes d'AQPA comprennent des armes légères et de petit calibre et les munitions correspondantes, des grenades, des engins explosifs improvisés, des mines terrestres ainsi que des roquettes thermobariques et des systèmes portables de défense antiaérienne.

37. Récemment, AQPA a utilisé des drones et des engins explosifs improvisés dans des attaques menées contre les forces gouvernementales à Abiyan et à Chaboua²³.

²⁰ Voir https://x.com/Dr_E_Kendall/status/1767231710322655630.

²¹ Voir www.telegraph.co.uk/world-news/2024/05/04/houthi-team-up-feared-al-qaeda-branch-new-threat-yemen/. Bien qu'ayant critiqué les houthistes pour leur attaque contre Radaa, à Beïda, en mars 2024, AQPA n'a pas pris les houthistes pour cible récemment (voir annexe 27).

²² Il aurait été un dirigeant important d'AQPA, second d'Ayman al-Zawahiri.

²³ Des sources ont mentionné environ cinq attaques de ce type, commises à l'aide de drones et d'autres matières explosives.

L'utilisation croissante de drones par le groupe, en particulier de drones à longue portée, est source de préoccupation.

38. Dans ses affrontements contre les forces du Gouvernement yéménite, AQPA emploie des tactiques de guérilla et utilise des enfants dans ses activités de reconnaissance afin d'obtenir des informations sur les positions du Gouvernement. Selon le Gouvernement yéménite, entre 2023 et la mi-juillet 2024, 84 soldats ont été tués (66 en 2023 et 18 en 2024) et 133 blessés (89 en 2023 et 44 en 2024) par des engins explosifs improvisés, utilisés à 49 reprises.

Les houthistes et les Chabab

39. Selon des sources confidentielles, afin d'étendre leur zone d'opération, les houthistes étudient les possibilités de mener des attaques en mer depuis la côte somalienne. C'est dans cette optique qu'ils renforcent leurs liens avec le groupe terroriste Harakat el-Chabab el-Moujahidin (les Chabab) (SOe.001).

40. Selon le Gouvernement yéménite, les activités de contrebande, surtout d'armes légères et de petit calibre, entre les houthistes et les Chabab se sont intensifiées²⁴. Le fait que les deux groupes possèdent les mêmes modèles d'armes, qui portent des numéros de série provenant des mêmes lots (voir annexes 126 à 151), indique soit la fourniture et le transfert illicite d'armes entre les deux groupes, soit le recours à un fournisseur commun, ou les deux. Le Groupe d'experts continue d'enquêter sur la question, avec la coopération du Groupe d'experts sur la Somalie.

41. La collaboration croissante entre les houthistes et les Chabab en matière de transfert illicite et de contrebande d'armes menacent la paix et la sécurité au Yémen et dans la région.

2. Incidences des sanctions économiques

42. Les actions économiques, politiques et militaires continuent ensemble de représenter une menace sérieuse contre la paix, la sécurité et la stabilité au Yémen. Les activités des houthistes visant l'économie dans les zones dirigées par le Gouvernement yéménite ont des conséquences qui vont au-delà du seul domaine économique. Ainsi, la poursuite des attaques contre les navires en mer Rouge et dans le golfe d'Aden, l'interdiction d'exporter du pétrole brut, les restrictions au commerce intérieur, l'ingérence dans les activités des banques et des institutions financières (voir annexe 28), l'émission de pièces de monnaie (voir par. 103), la saisie d'avions de la compagnie aérienne Yemenia Airways et le gel de ses avoirs (voir annexes 178 à 180) ont de profondes conséquences sur les plans politique et de la sécurité. Les tensions économiques persistantes, en particulier après que la Banque centrale du Yémen sise à Aden a révoqué les licences de six banques basées à Sanaa et menacé de leur interdire d'utiliser la Société de télécommunications interbancaires mondiales (SWIFT)²⁵, exposent le Yémen à un conflit majeur, les houthistes ayant menacé de reprendre la guerre pour cette raison (voir annexe 29).

43. Les actions politiques et militaires ont également des incidences directes sur l'économie, exacerbant le cycle d'instabilité au Yémen. Les menaces et les attaques régulièrement lancées par les houthistes contre les navires traversant la mer Rouge, en particulier depuis la mi-novembre 2023, ont perturbé le commerce international et l'économie yéménite, ce qui a fait augmenter les coûts de fret et les primes d'assurance et retardé l'arrivée des marchandises au Yémen. Les prix de plusieurs produits de base, notamment des biens de première nécessité, ont par conséquent

²⁴ Le Groupe d'experts tente de confirmer les noms reçus par le Gouvernement yéménite.

²⁵ SWIFT est un réseau mondial de messagerie utilisé par les banques et les institutions financières pour échanger de manière sûre et fiable des données sur les transactions financières.

augmenté. De même, le maintien de l'interdiction d'exporter du pétrole brut a entraîné une perte de 43 % des recettes et, par voie de conséquence, des pertes de devises, une dévaluation du rial yéménite et une montée en flèche des taux d'inflation. Le cours du rial a franchi le seuil record de 1 900 rials pour 1 dollar en juillet 2024, contre 1 452 en septembre 2023. Tous ces éléments ont empêché le Gouvernement de fournir des services de base à la population, tels que le paiement des traitements, l'approvisionnement en électricité et en eau et la fourniture de services éducatifs. La détérioration des conditions économiques a souvent déclenché des troubles publics et des conflits.

44. Les partis politiques ont exploité la dégradation de la situation économique. Cela a suscité des affrontements politiques au Conseil de direction présidentiel, menaçant ainsi la stabilité politique du pays (voir par. 46). L'absence de perspectives économiques continue d'inciter les individus à se livrer à des activités illicites, notamment en rejoignant des groupes armés ou des réseaux criminels organisés, ce qui déstabilise encore plus la région.

3. Situation interne

a) Divergence de vues au sein du Gouvernement yéménite

45. La composition du Gouvernement yéménite reste incohérente. Le Conseil de transition du Sud critique le Gouvernement sur plusieurs sujets, et affirme qu'il finira par proclamer un État indépendant dans le sud. Toutefois, selon certaines sources, le Conseil de transition n'est pas certain qu'il pourra obtenir la reconnaissance de la communauté internationale et répondre aux exigences économiques et politiques liées à la création d'un État indépendant.

46. Selon certaines sources, le Conseil de transition du Sud est mécontent du bilan du Gouvernement²⁶ en raison des problèmes économiques²⁷ et de l'absence de services publics. En tant que partenaire du Gouvernement et principale force dans le sud du pays, il estime que le « bilan médiocre » du Gouvernement nuira à la popularité du Conseil dans le sud, en particulier à Aden. Des sources ont révélé qu'Aidarous Al-Zubaidi, le chef du Conseil de transition du Sud, avait récemment déclaré que le Conseil de transition se retirerait du Conseil de direction présidentiel et du Gouvernement si la situation économique restait inchangée.

47. Sur le plan politique, le Conseil de transition du Sud a refusé que le Parlement (chambre des représentants) se réunisse à Aden, car il serait un vestige de l'ancien régime. Selon certaines sources, il plaide pour son remplacement par la Commission de consultation et de réconciliation²⁸.

48. En outre, comme l'a décidé son chef²⁹, le Conseil de transition du Sud ne souhaite toujours pas faire partie des forces unifiées placées sous un commandement unique³⁰, et préfère rester indépendant. Des sources ont informé le Groupe d'experts

²⁶ Le nouveau Premier Ministre yéménite, Ahmed Binmubarak, a pris de nombreuses initiatives pour améliorer les services publics et lutter contre la corruption. Il ne fait aucun doute que le Gouvernement yéménite a besoin d'un plus grand soutien financier pour instaurer la stabilité.

²⁷ Le Conseil de transition du Sud a également insisté pour que les décisions économiques prises dernièrement par la Banque centrale du Yémen sise à Aden soient mises en œuvre.

²⁸ La Commission de consultation et de réconciliation est une entité yéménite créée par l'ancien Président Abdrabuh Mansour Hadi et rassemblant diverses composantes afin de soutenir le Conseil de direction présidentiel et d'unifier les forces nationales.

²⁹ Le processus de réunification, dans le cadre d'un commandement des forces conjointes et d'un centre d'opérations conjointes, a enregistré quelques progrès, selon des sources gouvernementales. Le manque de ressources a néanmoins ralenti ce processus.

³⁰ Le président du Conseil de direction présidentiel et le commandant suprême des forces armées ont adopté la décision n° 40 de 2023 portant création de l'Autorité des opérations conjointes en 2024.

que le Ministère de la défense avait demandé au Conseil de transition de lui communiquer une liste des soldats affiliés au groupe afin d'unifier les salaires de tous les hommes appartenant aux différentes factions, ce que le Conseil n'a toujours pas fait. Elles ont ajouté que les salaires des soldats variaient grandement et que les listes de certains groupes affiliés au Gouvernement yéménite devaient être complètement révisées. Pour percevoir un plus grand nombre de salaires, certains groupes gonflent le nombre de leurs soldats en ajoutant des noms fictifs ou les noms d'employés qui travaillent dans d'autres ministères.

b) Atteintes à la sécurité

49. En raison de la lutte d'influence dans le sud, un incident s'est produit dans le Hadramout entre deux groupes armés du Gouvernement yéménite. Les forces d'élite, soutenues par le Conseil de transition du Sud, ont empêché les Forces du bouclier national d'entrer dans la ville de Moukalla et le Conseil de transition a indiqué, dans une déclaration, qu'il serait préférable que les Forces du bouclier protègent la vallée et le désert et que les forces d'élite conservent le soin de protéger les zones côtières, comme elles l'ont toujours fait jusqu'alors. Le Groupe d'experts a été informé par des responsables du Gouvernement yéménite que cette question avait été facilement réglée et que le nouveau commandement conjoint, qui réunit des représentants de toutes les forces, ne permettrait pas que de tels incidents se reproduisent.

50. Plus récemment, un grave incident a provoqué une crise interne qui a mis en péril le statut du Conseil de transition dans le sud. Un officier de l'armée yéménite, le lieutenant-colonel Ali Ashal al-Jaadani, a été enlevé sur fond de litiges fonciers personnels. Yusran al-Maqtari, chef du bureau d'Aden de l'Unité de lutte contre le terrorisme soutenue par le Conseil de transition du Sud, a été mis en accusation dans cette affaire. Le Comité suprême de sécurité, dirigé par le Ministre de la défense, a décidé de suspendre et d'arrêter Al-Maqtari pour son implication dans l'enlèvement. Malgré l'arrestation de nombreux suspects, l'affaire est toujours en cours et le principal suspect n'a pas encore été appréhendé.

51. L'incident a déclenché des manifestations et des émeutes à Aden et Abiyan, où est installée la tribu de l'officier kidnappé. D'après des sources confidentielles, plusieurs membres de cellules houthistes qui tentaient de profiter de la situation ont été arrêtés à Aden, à Dalea et à Abiyan. Les personnes arrêtées voulaient dresser les foules contre le Gouvernement, le Conseil de transition du Sud et l'Unité de lutte contre le terrorisme. Toujours d'après ces mêmes sources, la situation demeure précaire et le président du Conseil de direction présidentiel n'est pas retourné à Aden depuis la mi-août, en raison des tensions qui règnent dans la ville.

III. Sécurité maritime

A. Attaques houthistes contre des navires marchands et des navires militaires

52. Le conflit au Yémen, à l'origine terrestre, s'est étendu à la mer Rouge et au golfe d'Aden, compromettant considérablement la sécurité maritime. L'intensification des

Le Conseil de direction a également émis une directive visant à fusionner, en six mois, plusieurs agences de sécurité et de renseignement sous une même entité, appelée « Agence centrale pour la sécurité de l'État ». Des sources ont indiqué au Groupe d'experts que cette opération se heurtait toutefois à des difficultés. Conformément à cette directive, une agence spécialisée, appelée « Unité de lutte contre le terrorisme », a également été créée à Aden, avec à sa tête un dirigeant de premier plan du Conseil de transition du Sud.

attaques houthistes³¹ contre les navires marchands et les navires militaires en mer Rouge, dans le golfe d'Aden et dans l'océan Indien a perturbé le transport maritime international dans cette zone géopolitique clé. En déplaçant ses actions vers la mer, le groupe a renforcé son influence dans la région. Jamais, depuis la Seconde Guerre mondiale, n'ont été commises contre des navires des attaques de cette ampleur à l'aide de systèmes d'armes.

53. L'enquête du Groupe d'experts a révélé que bien qu'ayant affirmé qu'ils viseraient les navires « liés à Israël », les houthistes ciblaient les navires naviguant en mer Rouge et dans le golfe d'Aden sans distinction (voir annexe 100).

54. L'analyse par le Groupe d'experts des données communiquées par l'Organisation maritime internationale (OMI), le Bureau des opérations commerciales maritimes du Royaume-Uni et le Commandement central des États-Unis révèle qu'entre le 15 novembre 2023 et le 31 juillet 2024, au moins 134 attaques ont été menées depuis des zones contrôlées par les houthistes contre des navires marchands ou commerciaux et contre des navires de guerre américains et britanniques en mer Rouge et dans le golfe d'Aden. Le Groupe d'experts note que pour attaquer les navires, les houthistes ont utilisé un nouveau missile balistique dont l'existence n'avait jusqu'alors jamais été révélée, le Hatem-2 (voir par. 71). Parmi les navires marchands visés, 31 étaient des pétroliers, des transporteurs de gaz de pétrole liquéfié ou des navires-citernes pour produits chimiques. Sept d'entre eux ont été touchés mais ont pu continuer à naviguer. Ces attaques ont entraîné la mort d'au moins quatre marins (voir annexe 30).

55. Le 19 novembre 2023, le navire *Galaxy Leader* a été attaqué et détourné (voir annexe 31). Le navire et les 25 membres d'équipage, de nationalités différentes, sont toujours détenus par les houthistes. Selon des experts en aéronautique, l'équipage de l'hélicoptère devait avoir une formation spécialisée pour pouvoir atterrir sur le navire *Galaxy Leader* en mouvement. Les manœuvres des commandos sur le navire suggèrent l'utilisation de techniques qui n'étaient pas auparavant associées aux pratiques des houthistes. Le Groupe d'experts n'écarte pas la possibilité que l'équipage de l'hélicoptère et les commandos impliqués dans l'opération aient reçu une formation spécialisée par des formateurs étrangers.

56. Le lendemain, Hazam al-Assad, membre du conseil politique du mouvement houthiste, a déclaré que si l'axe de la résistance s'est bien concerté avec la République islamique d'Iran et a été guidé par elle, la décision d'attaquer le navire avait été prise par les dirigeants houthistes. Il a également déclaré que leurs opérations navales ne faisaient que commencer (voir annexe 32)³².

57. Après avoir été frappé par les houthistes, le 18 février 2024, le vraquier *Rubymar* a coulé avec à son bord 22 000 tonnes de phosphate d'ammonium, laissant derrière lui une nappe de carburant. Cela pose un risque pour l'environnement et la sécurité

³¹ À partir du 14 novembre 2023, les houthistes ont intensifié leurs attaques contre les navires, plus particulièrement contre ceux qui se dirigent vers Israël ou qui y sont liés (première et deuxième phases). Le 9 décembre 2023, lors de la troisième phase, les houthistes ont promis de s'en prendre à tout navire en route vers des ports israéliens. Depuis le 24 mai 2024, lors de la quatrième phase, en réponse à l'offensive israélienne à Rafah dans le sud de Gaza, les houthistes continuent d'attaquer les navires de toutes les compagnies liées à Israël ou transportant des marchandises pour Israël. Une déclaration des houthistes à cet égard peut être visionnée à l'adresse suivante : <https://youtu.be/pBfd4W808zk>.

³² Déclarations faites dans un entretien accordé à Al-Araby al-Jadeed, un organe de presse qatarien, daté du 20 novembre 2023.

maritime car le Gouvernement yéménite n'a pas la capacité de contenir les éventuelles fuites³³.

58. Le Groupe d'experts observe également qu'environ un tiers de ces attaques contre des navires ont eu lieu dans le golfe d'Aden, loin des lignes de front, hors de toute couverture radar et sans visibilité directe des houthistes (voir annexe 30). En outre, de nombreux navires attaqués désactivent leur système d'identification automatique avant d'entrer dans cette zone, ce qui porte à croire que les houthistes ont reçu une aide extérieure pour identifier, localiser et prendre pour cible les navires. La plupart de ces attaques ont été revendiquées par les houthistes. Le Groupe d'experts continue d'enquêter.

59. Selon l'analyse du Groupe d'experts, la coalition américano-britannique a intercepté ou détruit plus de 800 missiles, drones, drones de surface, engins sous-marins sans pilote et missiles sol-air. Elle a également neutralisé des postes de commandement, des radars et de multiples installations de stockage. Ces frappes auraient réduit les moyens stratégiques des houthistes, affaiblissant considérablement leur capacité à mener des attaques de grande envergure. Cependant, le Groupe d'experts n'a pas été en mesure de confirmer les effets réels de ces frappes (voir annexe 33).

B. Menaces adressées par les houthistes contre les compagnies maritimes

60. Le Groupe d'experts a obtenu les copies de trois messages envoyés aux compagnies maritimes par le Centre de coordination des opérations humanitaires, créé le 17 février 2024 au sein du cabinet du président du Conseil politique supérieur houthiste, Mahdi al-Mashat. Les messages interdisaient à ces compagnies de transiter par la mer Rouge, le détroit de Bab el-Mandab, le golfe d'Aden, la mer d'Arabie et l'océan Indien, sous peine de voir leurs navires pris pour cible (voir annexes 34 et 36).

Unité flottante de stockage et de déchargement *Safer*

61. Le navire *Safer*, unité flottante de stockage et de déchargement, est toujours amarré au port de Ras Issa, en mer Rouge, aux côtés du navire *MOST Yemen* (S/2023/833, par. 51 à 54). Environ 1,1 million de barils de pétrole brut ont été transférés depuis l'unité *Safer* vers le navire *MOST Yemen* entre le 25 juillet et le 25 août 2023. Ce dernier était enregistré au Libéria sous le nom de *Nautica* et battait pavillon libérien. Cependant, après l'expiration de l'enregistrement, le navire n'a pas été enregistré sous pavillon yéménite. La situation en mer Rouge aurait entraîné le report des opérations restantes. Il s'agit notamment de l'enlèvement du navire *Safer* du Yémen pour recyclage et élimination, ainsi que l'acquisition de la barge et de l'équipement connexe nécessaires pour mener à bien l'assistance au navire. Aucune décision n'a encore été prise concernant l'utilisation de la valeur de récupération de l'unité *Safer* et le produit de la vente du pétrole stocké dans le navire *MOST Yemen*. Selon les informations communiquées au Groupe d'experts par le Gouvernement yéménite, les houthistes ont pris le contrôle total de la zone opérationnelle où se trouvaient les deux navires et ont nommé une équipe chargée de superviser les

³³ Les plans de remorquage du navire ont échoué après que les autorités portuaires d'Aden, de Djibouti et de l'Arabie saoudite ont refusé de l'accueillir, selon l'opérateur libanais du navire. Jusque-là, trois navires ont coulé, ce qui menace l'environnement et la sécurité de la navigation. Voir wwwcdn.imo.org/localresources/en/MediaCentre/Documents/Circular%20Letter%20No.4890%20-%20Mv%20Rubymar%20-%20Call%20For%20Contributions%20Of%20Oil%20Pollution.pdf et www.lloydslist.com/LL1148431/Houthis-claim-first-casualty-as-Rubymar-sinks-two-weeks-after-attack.

opérations sur le nouveau navire *MOST Yemen*. Le représentant de la SAFER Exploration and Production Operations Company, société propriétaire de l'unité *Safer*, a informé le Groupe d'experts que la société ne contribuait pas à la formation et à la supervision de l'équipe affiliée aux houthistes, soulignant qu'elle n'assumerait aucune responsabilité pour les conséquences éventuelles de cette situation.

62. Compte tenu de la détérioration de la situation dans la région de la mer Rouge et étant donné que le site est contrôlé par les houthistes, le risque de dégâts causés à l'environnement suscite de vives inquiétudes. Tout dommage causé aux deux navires entraînerait des fuites de pétrole, ce qui aurait de graves conséquences pour l'environnement marin et les populations côtières, qui dépendent en grande partie de la pêche pour vivre.

IV. Armes et application de l'embargo ciblé sur les armes

Violations de l'embargo sur les armes d'une ampleur sans précédent

63. Conformément aux paragraphes 14 à 17 de la résolution [2216 \(2015\)](#) du Conseil de sécurité, le Groupe d'experts a porté son attention sur une série d'activités de surveillance et d'investigation pour répertorier les violations de l'embargo ciblé sur les armes, comprenant la fourniture, la vente et le transfert directs ou indirects au profit des personnes et entités désignées par le Conseil et le Comité créé par la résolution [2140 \(2014\)](#), ainsi que de celles agissant pour leur compte. Conformément au paragraphe 16 de la résolution [2624 \(2022\)](#), le Groupe d'experts a porté son attention sur les composants disponibles dans le commerce qui ont été utilisés par des personnes ou une entité désignées par le Comité pour assembler toutes sortes de missiles, drones, vecteurs offensifs maritimes, certains systèmes d'armes (tels que les missiles antichars guidés et les systèmes portables de défense antiaérienne, les systèmes de surveillance électro-optiques), et leurs pièces détachées, ainsi que sur l'assistance technique, la formation ou toute autre assistance, en rapport avec les activités militaires ou la fourniture, l'entretien ou l'utilisation de tous armements et matériels connexes.

1. Systèmes d'armes acquis, assemblés et utilisés par les houthistes avec un soutien étranger

64. Les multiples témoignages recueillis par le Groupe d'experts auprès d'experts militaires, de responsables yéménites et même d'individus proches des houthistes, indiquent que, sans soutien étranger, le mouvement n'a pas la capacité de développer et de produire des systèmes d'armes complexes tels que les missiles balistiques à courte portée, les missiles balistiques à moyenne portée, les missiles de croisière d'attaque au sol, les missiles balistiques antinavires, les missiles de croisière antinavires, les missiles sol-air, les drones de surveillance, les drones d'attaque unidirectionnels (et leurs plateformes de lancement et postes de commandement), les systèmes portables de défense antiaérienne, les engins sous-marins sans pilote, les missiles antichars guidés, les systèmes de surveillance électro-optiques, les radars maritimes, les viseurs thermiques et les lunettes de visée pour fusils de tireur d'élite. Les interceptions de matériel réalisées par divers États Membres et organismes chargés de l'application de la loi depuis 2018 ont mis en évidence ce soutien étranger (voir annexe 37).

65. Le Groupe d'experts a constaté des similitudes entre les différents équipements utilisés par les houthistes et ceux produits et utilisés par la République islamique d'Iran ou les groupes armés de l'axe de la résistance. Cela indique que le matériel n'a

peut-être pas été développé par les houthistes eux-mêmes. Les similitudes constatées suggèrent également que les schémas et le savoir-faire technique nécessaires à la fabrication ou à l'assemblage de ces systèmes d'armes en toute indépendance pourraient avoir été transférés aux houthistes par la République islamique d'Iran³⁴ ou par des groupes étrangers. En outre, le transfert de composants spécifiques, en particulier ceux qui présentent des caractéristiques techniques complexes, se poursuit. C'est ce qu'a permis de montrer l'inspection par le Groupe d'experts des composants interceptés aux frontières maritimes et terrestres, ainsi que des débris de matériel utilisé par les houthistes, où l'on voit clairement que la marque, les modèles, les marquages, les numéros de série et les vignettes de contrôle de la qualité sont semblables à ceux d'équipements produits en dehors du Yémen, en particulier en République islamique d'Iran.

66. Depuis le 19 octobre 2023, en réponse à la guerre à Gaza et à la frappe israélienne contre l'ambassade d'Iran à Damas, les houthistes (voir annexe 99), la République islamique d'Iran et plusieurs groupes armés de l'axe de la résistance prennent pour cible le territoire israélien. L'opération est menée au moyen de missiles balistiques à moyenne portée, de missiles de croisière d'attaque au sol et de drones d'attaque unidirectionnels, dont la plupart ont été interceptés ou se sont écrasés en route. Dans une lettre du 6 novembre 2023 adressée au Conseil de sécurité, Israël a indiqué que le 19 octobre, les houthistes avaient lancé cinq missiles de croisière d'attaque au sol et 30 drones d'attaque unidirectionnels Samad-3 en direction de son territoire, suivis d'un premier missile à moyenne portée le 27 octobre, puis d'un deuxième ainsi que de deux missiles de croisière d'attaque au sol le 31 octobre.

67. Dans la nuit du 13 au 14 avril 2024, le territoire israélien a été la cible d'une attaque massive : plus de 300 missiles balistiques à moyenne portée, missiles de croisière d'attaque au sol et drones d'attaque unidirectionnels ont été lancés depuis des zones contrôlées par les houthistes, ainsi que depuis l'Iran (République islamique d'), l'Iraq et le Liban³⁵. Cette attaque, baptisée « Promesse sincère » par la République islamique d'Iran, illustre le niveau de coordination entre les houthistes, la République islamique d'Iran et les autres acteurs non étatiques impliqués (voir annexe 101).

68. Le 5 juin 2024, les houthistes ont publié une vidéo montrant le tir d'un missile appelé « Palestine » qui correspond au missile balistique à moyenne portée tiré contre la ville d'Eilat (Israël) (voir annexe 102). Le Groupe d'experts note que ce missile balistique, dont la présence dans l'arsenal houthiste n'avait pas été établie auparavant, présente des similitudes avec le Kheibar Shekan, un missile balistique hypersonique à moyenne portée qui fait partie de l'arsenal avancé de la République islamique d'Iran et qui a été présenté pour la première fois le 11 février 2022 lors du défilé militaire organisé à Téhéran (voir annexe 46).

69. Le 19 juillet 2024, les houthistes ont lancé une attaque contre la ville de Tel-Aviv au moyen d'un drone d'attaque unidirectionnel baptisé « Jaffa ». Selon les informations dont dispose le Groupe d'experts, ce drone est similaire au drone houthiste Samad-3, doté d'un moteur plus récent, voire d'une avionique améliorée. Le moteur dont est équipé ce drone d'attaque unidirectionnel est semblable à celui du MADO MD275 iranien (voir annexe 103).

70. Le Groupe d'experts constate de grandes similitudes entre le matériel répertorié et celui développé ou exploité par la République islamique d'Iran (53 articles). Des articles semblables sont également utilisés par des groupes armés au Liban (11), dans

³⁴ Le 29 mai 2024, Tasnim News, un organe de presse iranien, a rapporté que les houthistes disposaient désormais de la technologie iranienne de missiles antinavires (voir annexes 38 et 39).

³⁵ Au total, 220 des missiles et drones lancés l'ont été depuis des zones contrôlées par les houthistes.

le territoire palestinien occupé (5), en Iraq (20), au Bahreïn (1) et en Somalie (1) (voir annexes 40 à 83).

Étude de cas n° 4 : Présentation à grande échelle de matériel militaire par les houthistes

La présentation à grande échelle de matériel militaire par les houthistes à Sanaa le 21 septembre 2023 montre la présence de nouveau matériel, depuis le dernier défilé du 21 septembre 2022 ([S/2023/833](#), par. 101 à 103). Le nouveau matériel, qui présente des caractéristiques similaires à celles du matériel fabriqué ou produit en République islamique d'Iran, comprend deux modèles de missiles balistiques à moyenne portée, un modèle de missile de croisière d'attaque au sol, un modèle de missile de croisière antinavire, deux modèles de missiles balistiques antinavires, un modèle de roquette guidée à longue portée, un modèle de drone d'attaque unidirectionnel, deux modèles modifiés de drones d'attaque unidirectionnels, trois modèles de missiles sol-air et trois modèles de systèmes de surveillance électro-optiques. Le Groupe d'experts a également constaté la présence d'un modèle de patrouilleur d'attaque rapide, de deux modèles de navires de surface sans équipage^a (tous deux équipés de radars navals) et de deux modèles de véhicules blindés (voir annexes 84 à 94).

^a Patrouilleur d'attaque rapide télécommandé transportant des explosifs.

Étude de cas n° 5 : déclarations de responsables iraniens

Dans un entretien accordé le 21 avril 2021 à Russia Today, un organe de presse russe, le général Rostam Qasemi, Commandant adjoint de la Force Al-Qods du Corps des gardiens de la révolution islamique, a annoncé la présence de conseillers militaires iraniens au Yémen et la fourniture de technologies iraniennes de fabrication d'armes. Le même entretien a été diffusé par Memri TV, un organe de presse iranien.

Le 22 septembre 2020, Noor News, un autre organe de presse iranien, a rapporté que le général de brigade Abolfazl Shakarji, porte-parole en chef de l'état-major général des forces armées iraniennes, a annoncé à la télévision le transfert d'expertise technique dans le domaine de la défense et le partage d'expérience et de connaissances avec le peuple du Yémen.

Le 1^{er} octobre 2019, Tasnim News a rapporté que, lors d'une visite à Beijing, le général de division Mohammad Bagheri, chef d'état-major des forces armées iraniennes, avait déclaré à la chaîne chinoise Phoenix TV ce qui suit : « Nous fournissons à l'armée populaire du Yémen une assistance consultative et intellectuelle, et le Corps des gardiens de la révolution islamique en est responsable » (voir annexes 95 à 98)

2. Missile d'un nouveau modèle utilisé pour attaquer un navire marchand

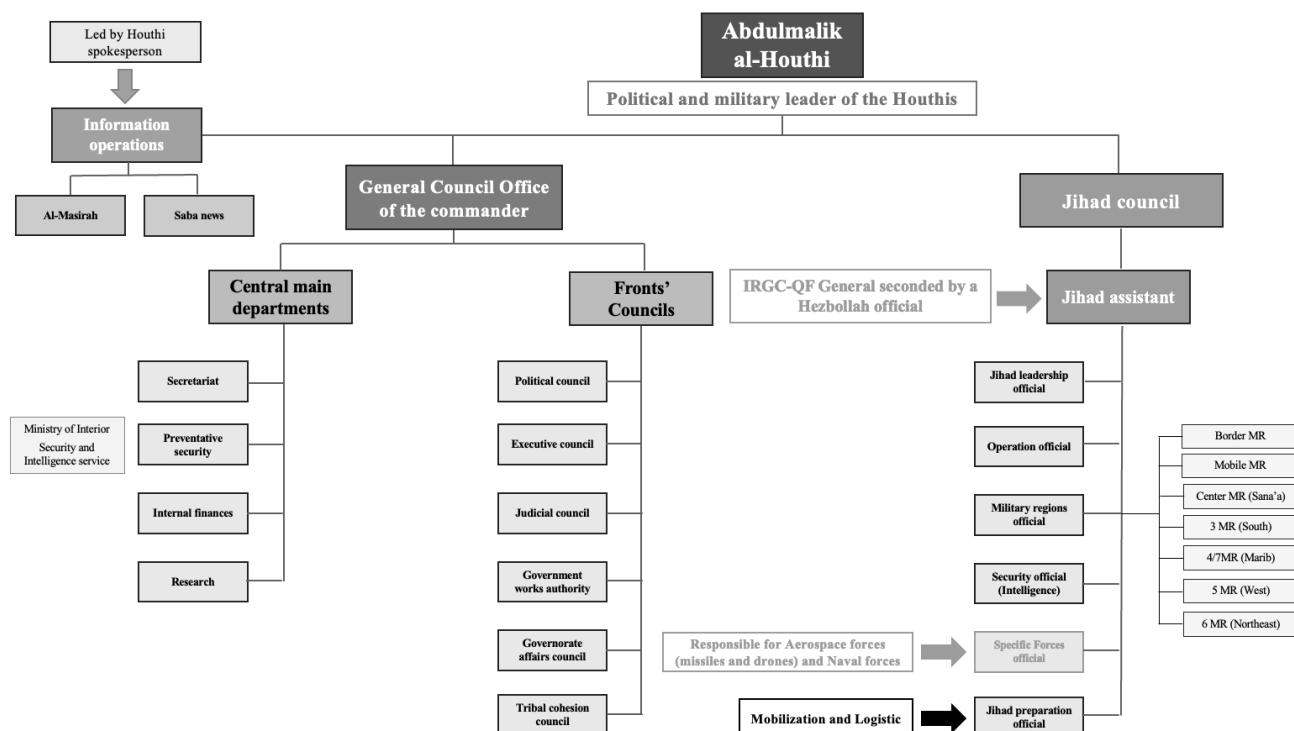

71. Le 25 juin 2024, les houthistes ont affirmé avoir attaqué le navire MSC Sarah V en mer d'Arabie au moyen d'un nouveau missile dont l'existence n'avait pas encore été révélée (voir annexe 104). Le lendemain, ils ont diffusé une vidéo du lancement du missile, en précisant qu'il s'agissait d'un Hatem-2, un missile balistique

hypersonique qui aurait été fabriqué au Yémen. Le Groupe d'experts observe que ce missile est également semblable en apparence au Kheibar Shekan iranien (voir par. 68).

3. Rôle du Corps des gardiens de la révolution islamique et du Hezbollah dans la prise de décisions par les houthistes

72. Plusieurs sources confidentielles ont évoqué le rôle prédominant que jouent le général Abdulreza Shalai de la Force Al-Qods du Corps des gardiens de la révolution islamique et son second, un cadre supérieur du Hezbollah, dans la structure de commandement et de contrôle des houthistes. Le général Shalai, agissant sous le titre d'« adjoint au jihad »³⁶, a pour rôle de conseiller et d'assister Abdulmalik al-Houthi (YEI.004) dans les affaires stratégiques, jihadistes et militaires. Il supervise les forces aérospatiales (missiles et drones), les forces navales et toutes les régions militaires, ainsi que la mobilisation et la logistique.

Figure I
Organigramme des houthistes

Source : confidentielle.

Abréviation : MR, military regions (régions militaires).

4. Assistance et formation fournies aux houthistes par des spécialistes et des techniciens étrangers

73. Le Groupe d'experts fait observer que le mouvement houthiste est passé d'un groupe armé local aux capacités limitées à une puissante organisation militaire, qui a étendu ses capacités opérationnelles bien au-delà des territoires qu'il contrôle. Les houthistes doivent cette transformation au transfert de matériel (voir par. 64 à 66) et

³⁶ L'officier de liaison principal de la Force Al-Qods du Corps des gardiens de la révolution islamique détaché auprès des Kataëb Hezbollah porte également le titre d'« adjoint au jihad » et a pour second un cadre du Hezbollah.

à l'assistance et à la formation fournies par la Force Al-Qods du Corps des gardiens de la révolution islamique, le Hezbollah et des spécialistes et techniciens iraquiens. Cela a été confirmé au Groupe d'experts par de multiples sources, souligné dans divers médias, et communiqué dans des déclarations de responsables iraniens.

74. Des sources ont informé le Groupe d'experts que cela faisait plusieurs années que les combattants houthistes recevaient une formation tactique et technique en dehors du Yémen. Selon elles, les combattants se sont rendus de Sanaa dans les pays suivants munis de faux passeports (par. 14 et annexe 9) :

- a) République islamique d'Iran : début 2020, 200 combattants ont été formés à l'Université Imam Khamenei des sciences et technologies marines, centre de formation du Corps des gardiens de la révolution islamique situé à Ziba Kenar, sur la mer Caspienne. Fin 2022, 54 combattants ont été formés dans la caserne Imam Ali du Corps des gardiens de la révolution islamique, située à Bagh-e Bakhshi, à l'ouest de Téhéran ;
- b) Liban : depuis au moins 2020, des combattants ont été formés dans les terrains d'entraînement du Hezbollah à Qalaat Jabbour, dans le sud du Liban³⁷ ;
- c) Iraq : plusieurs formations ont été organisées par les Forces de mobilisation populaire (voir par. 12 à 19)

5. Acquisition de matériel et assistance par l'intermédiaire des représentants houthistes en République islamique d'Iran

75. En 2019, Ibrahim Mohammed al-Dailami a été nommé par décret houthiste³⁸ ambassadeur extraordinaire et plénipotentiaire du Yémen en République islamique d'Iran³⁹, ce qui représente un geste de reconnaissance par l'État iranien du pouvoir des houthistes (voir annexes 105 et 106 ; voir aussi [S/2020/326](#), par. 42).

76. Selon une source confidentielle, jusqu'à la fin de 2022, Adnan Qasim Ali Qaflah, l'actuel directeur général des ressources humaines du ministère de l'intérieur constitué par les houthistes, occupait un poste élevé au bureau des houthistes à Téhéran, où il a reçu une formation au renseignement dispensée par la Force Al-Qods du Corps des gardiens de la révolution islamique.

77. Des sources ont informé le Groupe d'experts que le général de division Muhammad Ahmad al-Talibi ([S/2021/79](#), annexe 27), directeur des achats au ministère de la défense constitué par les houthistes et rattaché au bureau du mouvement à Téhéran, était chargé de l'envoi illicite de matériel aux houthistes à l'aide d'un réseau d'individus et d'entités. Il organise également la formation de combattants houthistes en République islamique d'Iran (voir par. 79 et études de cas 6 et 11).

³⁷ Le 21 mai 2023, trois journalistes houthistes travaillant pour l'organe de presse houthiste Al-Masirah ont assisté à une simulation d'attaque par le Hezbollah contre une colonie de peuplement israélienne (voir annexe 15). Le Groupe d'experts note que les combattants houthistes suivent souvent ce type d'entraînements (voir annexe 16).

³⁸ Voir <https://en.ypagency.net/125613>.

³⁹ En 2011, le Hezbollah a aidé les houthistes à établir Al-Masirah, dans la banlieue sud de Beyrouth.

Étude de cas n° 6 : mécanisme d'approvisionnement dirigé par le général de division Al-Talibi

Selon des sources confidentielles, en 2022, Al-Talibi a ordonné le transfert à Djibouti d'un courtier yéménite en douane qui facilitait le dédouanement de matériel de contrebande destiné aux houthistes.

La saisie par la douane yéménite de 52 missiles antichars Dehlavieh, le 10 mars 2022, au poste frontière de Chihan ([S/2023/130](#), par. 54 à 56) a permis l'identification du courtier. Il aurait été arrêté en février 2024 à Djibouti.

6. Contrebande maritime d'armes légères et de petit calibre depuis des bases de la marine iranienne

78. Des sources confidentielles ont informé le Groupe d'experts de la contrebande, par voie maritime depuis la République islamique d'Iran, de trois cargaisons importantes d'armes légères et de petit calibre destinées aux houthistes, entre juillet et septembre 2022. Ces armes ont été transférées dans un boute, fourni à un équipage yéménite par les autorités iraniennes. Le premier transfert comprenait 9 000 fusils d'assaut, les deuxième et troisième des fusils d'assaut et des mitrailleuses légères et lourdes. Les armes étaient emballées dans des sacs verts, comme dans le cas des précédentes interceptions ([S/2019/83](#), annexe 16 ; [S/2021/79](#), annexe 14, figure 14.6 ; [S/2022/50](#), figure XI et annexe 20 ; [S/2023/130](#), figure IV). Le premier transfert a été fait depuis le port de la marine iranienne de Sarkhour Tahrouyi, dans la province d'Hormozgan, tandis que les deux suivants l'ont été depuis le port de Chabahar, d'où des transferts d'armes avaient déjà été signalés par le Groupe d'experts ([S/2017/924](#), par. 112 à 114 ; [S/2018/193](#), par. 70). L'équipage était logé dans un appartement situé au port. Lors de ces transferts, les armes ont été déchargées dans des bateaux plus petits, à 12 milles marins de la côte, près de la frontière entre le Yémen et Oman.

79. Cette opération aurait été planifiée par un responsable houthiste, Abdullah Yahya al Hakim, également connu sous le nom d'Abu Ali (YEI.002). En République islamique d'Iran, Al-Talibi (voir par. 77) et Abu Laith ont supervisé les transferts. Ces deux officiers feraient partie de la cellule de liaison chargée de coordonner et de superviser les transferts de matériel vers les zones contrôlées par les houthistes.

80. Les fusils d'assaut, identifiés comme étant des fusils de type 56-1, se sont révélés être similaires à ceux interceptés entre 2018 et 2023 ([S/2023/833](#), annexes 24 à 27).

7. Contrebande maritime de composants de missiles et d'équipements de surveillance

81. Le 11 janvier 2024, un boute apatriote transportant des composants de missiles destinés aux houthistes a été intercepté par les États-Unis près des côtes somaliennes. Les articles saisis comprenaient des systèmes de propulsion et de guidage et des têtes de missiles de croisière antinavires, cinq systèmes de propulsion à propergols liquides, quatre ensembles de turbopompes, divers composants de missiles balistiques à courte portée et 14 caméras thermiques (voir annexes 107 à 109). Les composants des missiles de croisière antinavires présentent des caractéristiques similaires à celles du Ghadir iranien et du missile balistique à courte portée « 351 » (voir annexe 110).

82. D'après les États-Unis, le capitaine, qui résidait en République islamique d'Iran depuis environ deux ans, ainsi que le propriétaire du boute et son frère, ressortissants

iraniens, travaillaient pour le Corps des gardiens de la révolution islamique. Après avoir été inspecté par la marine iranienne, le boutre aurait quitté Konarak (République islamique d'Iran) et se serait rendu à la base de la marine à Chabahar (voir par. 78 ; voir aussi [S/2017/924](#), par. 112 à 114 ; [S/2018/193](#), par. 70) pour se ravitailler, avant d'être intercepté après environ six jours en mer.

8. Contrebande maritime de matériel létal et d'appareils électroniques

83. Le 28 janvier 2024, un boutre apatride a été intercepté par les États-Unis en mer d'Arabie. Les articles saisis comprenaient 200 sacs chargés d'explosifs, 17 pieux lance-fusées de missiles antichars guidés iraniens Dehlavieh, des composants d'un engin sous-marin sans pilote, des composants de trois systèmes de surveillance électro-optiques ([S/2023/833](#), annexes 29 et 63), et des outils d'usinage pour la fabrication locale des mortiers de mortiers de canons sans recul portables sur trépied (SPG) et de mortiers de 120 et de 81 mm (voir annexe 111).

84. Le Groupe d'experts observe ce qui suit :

a) Une partie du matériel saisi était dissimulée dans des emballages similaires à ceux interceptés en mer par les États-Unis le 6 mai 2021⁴⁰ ([S/2022/50](#), par. 65 et figure XII) ;

b) Certains de ces composants sont semblables à ceux du missile balistique à courte portée Borkan-3 lancé par les houthistes contre Dammam (Arabie saoudite), le 7 mars 2021 ([S/2023/833](#), annexe 36, figure 36.5) ;

c) Les systèmes de déviation de jet, les composants de guidage et de contrôle et les vignettes apposées sont similaires à ceux du missile balistique à courte portée Qiam-2 lancé le 8 janvier 2021 par la République islamique d'Iran contre une base américaine à Erbil (Irak)⁴¹, tir revendiqué par la République islamique d'Iran ([S/2023/833](#), par. 75 et annexes 30 à 37) ;

d) Les marquages et les vignettes figurant sur plusieurs équipements correspondent à ceux figurant sur les équipements susmentionnés interceptés le 11 janvier 2024 (par. 83, et annexes 112 à 114), et sur certains des équipements interceptés par le Royaume-Uni le 25 février 2023 à bord d'un navire en provenance de la République islamique d'Iran ([S/2023/833](#), par. 74 à 76, et annexes 30 à 37) ;

e) La pointe de fusée de l'engin sous-marin sans pilote est semblable à celle des nouveaux équipements présentés au début de 2022 par la marine du Corps des gardiens de la révolution islamique (voir annexe 114, figures 114.23 à 114.26) ;

f) Il existe des similitudes avec plusieurs équipements produits par la République islamique d'Iran (annexe 114).

85. La saisie de composants d'engins sous-marins sans pilote par les États-Unis et la destruction récente de deux engins sous-marins sans pilote qui auraient été utilisés par les houthistes ont été signalées par le Commandement central des États-Unis (voir figure II). Cela semble indiquer que les houthistes disposent de ces systèmes d'armes, les utilisent et ont la capacité de s'en servir, ce qui présente une nouvelle menace sérieuse contre la sécurité maritime, ces armes pouvant gravement endommager les navires visés.

⁴⁰ Le Groupe d'experts a obtenu des coordonnées, à partir d'un dispositif de navigation qui aurait été trouvé à bord, selon lesquelles deux jours avant son interception, le boutre s'était trouvé à proximité du port de Jask (République islamique d'Iran) ([S/2022/50](#), annexe 20, figure 20.44).

Activités en mer Rouge, 17 février 2024

 U.S. Central Command @CENTCOM ...

Feb. 17 Summary of Red Sea activities

TAMPA, Fla. – Between the hours of 3:00 p.m. to 8:00 p.m. (Sanaa time), Feb. 17, CENTCOM successfully conducted five self-defense strikes against three mobile anti-ship cruise missiles, one unmanned underwater vessel (UUV), and one unmanned surface vessel (USV) in Iranian-backed Houthi-controlled areas of Yemen. This is the first observed Houthi employment of a UUV since attacks began in Oct. 23.

CENTCOM identified the anti-ship cruise missiles, unmanned underwater vessel, and the unmanned surface vessel in Houthi-controlled areas of Yemen and determined they presented an imminent threat to U.S. Navy ships and merchant vessels in the region. These actions will protect freedom of navigation and make international waters safer and more secure for U.S. Navy and merchant vessels.

Source : Commandement central des États-Unis

9. Matériel militaire et à double usage saisi par le Gouvernement du Royaume-Uni

86. Depuis janvier 2023, d'importantes quantités de matériel ont été saisies au poste frontière de Chihan par la douane yéménite et à Aden par l'Unité de lutte contre le terrorisme, alors qu'ils étaient apparemment en voie d'acheminement vers des zones contrôlées par les houthis (voir annexes 115 à 121).

10. Vente de matériel dans les zones contrôlées par les houthis

a) Armes légères et de petit calibre et matériel connexe

87. Le Groupe d'experts note que de nombreuses armes faisant l'objet d'un trafic dans les zones contrôlées par les houthis sont semblables à celles utilisées par le mouvement et à celles saisies en mer depuis 2018.

88. Le Groupe d'experts observe également que 26 modèles différents d'armes légères et de petit calibre, dont la présence avait été confirmée en Somalie, portent des numéros de série qui correspondent aux lots d'armes mises en vente dans des zones contrôlées par les houthis ou interceptées depuis 2018 en voie d'acheminement vers les houthis. Cela indique soit le recours à un fournisseur commun, soit le transfert d'une partie des armes légères et de petit calibre aux houthis via la Somalie ou son transfert du Yémen vers la Somalie (voir annexes 126 à 144, et 147 à 151)⁴². Le Groupe d'experts a également répertorié un modèle d'armes légères et de petit calibre et un modèle de dispositif de vision thermique portant des numéros de série correspondant à ceux répertoriés en Afghanistan (voir annexes 146 et 152).

89. Selon certaines sources, ce sont les houthis qui organisent et supervisent l'achat et la vente illégaux d'armes dans les zones qu'ils contrôlent, opérations qui pourraient constituer une violation de l'embargo sur les armes et du gel des avoirs. Plusieurs dirigeants houthis collaborent avec des marchands d'armes ou exploitent des commerces d'armes et en tirent des revenus importants, y compris des taxes. Le

⁴² Certaines des armes légères et de petit calibre répertoriées ont également été observées dans plusieurs autres pays.

Groupe d'experts a identifié des centaines de vendeurs, opérant principalement à Sanaa, Saada et Hodeïda, et note qu'en février 2024, des armes légères et de petit calibre de fabrication récente ont été présentées à l'occasion d'une exposition d'armes tenue à Sanaa (voir annexes 122 à 125).

90. Parmi ces armes proposées à la vente sur le marché noir, le Groupe d'experts en a recensé plus de 11 000⁴³ ([S/2023/833](#), par. 104), dont plusieurs centaines portent des marquages suggérant une fabrication récente et par conséquent, un transfert récent. Le volume important et la variété du matériel montrent la facilité avec laquelle les houthistes ont pu contourner l'embargo sur les armes.

91. Parmi les armes légères et de petit calibre susmentionnées, 31 présentent des caractéristiques et des marquages semblables à ceux d'armes de production iranienne. Toutefois, la République islamique d'Iran a fait savoir au Groupe d'experts que ces caractéristiques étaient différentes de celles des armes qu'elle produisait (voir annexes 144, 145 et 151).

92. Les enquêtes du Groupe d'experts ont révélé que sur les 73 pistolets produits au Brésil et proposés à la vente dans des zones contrôlées par les houthistes, 2 ont été légalement transférés entre 2021 et 2023 vers l'Arabie saoudite, 37 étaient couverts par un certificat d'utilisateur final délivré en décembre 2022 par les autorités tanzaniennes, et 20 ont été légalement transférés en 2015 à Djibouti. Ces armes ont pu faire partie de la cargaison détournée en 2015 par Fares Mohammed Mana'a (SOi.008) et illégalement transférée par la suite vers une zone contrôlée par les houthistes (voir annexes 153 à 157).

93. En outre, sur les 255 pistolets produits en Turquie, le Groupe d'experts a confirmé le transfert de 2 pistolets aux autorités irakiennes en 2015 et de 184 pistolets entre 2022 et 2023 comme suit : 1 pistolet à un vendeur d'armes en Tchéquie, 2 pistolets à deux vendeurs d'armes en Arabie saoudite, 180 pistolets à deux vendeurs d'armes au Soudan et 1 pistolet à un vendeur d'armes aux États-Unis (voir annexes 158 à 164).

94. Le Groupe d'experts a confirmé le transfert, entre 2022 et 2023, d'un pistolet produit en Tchéquie et d'un pistolet produit en Slovaquie à l'un des vendeurs susmentionnés en Arabie saoudite (voir annexes 165 et 166).

95. Le Groupe d'experts a demandé aux États Membres concernés des informations concernant le transfert ultérieur de ces articles vers des zones contrôlées par les houthistes. Il attend les réponses de l'Arabie saoudite, du Soudan et de la Tanzanie.

11. Activités navales suspectes

96. Le Groupe d'experts a obtenu d'une source confidentielle des informations selon lesquelles les installations portuaires de Hodeïda et de Salif sont utilisées pour décharger d'importantes quantités de matériel militaire. Ses enquêtes ont révélé que six navires ont gagné des ports contrôlés par les houthistes sans avoir obtenu l'autorisation du Mécanisme de vérification et d'inspection des Nations Unies. Le Groupe d'experts continue d'enquêter sur l'implication éventuelle des navires identifiés dans le transfert illégal de marchandises interdites aux houthistes.

97. Les navires à destination des ports contrôlés par les houthistes sont inspectés par le Mécanisme de vérification et d'inspection des Nations Unies à Djibouti. Le Mécanisme n'est pas responsable de l'octroi de l'autorisation finale aux navires se rendant dans les ports de la mer Rouge. Depuis février 2023, toutes les restrictions à

⁴³ Le Groupe d'experts a analysé les comptes des vendeurs sur les médias sociaux et cherché à déterminer la correspondance des modèles et des numéros de série du matériel présenté.

l'importation de marchandises, à l'exception de celles qui sont interdites, via les ports contrôlés par les houthistes ont été levées. En outre, les navires à destination de ces ports sont de plus en plus nombreux et les cargaisons de marchandises de plus en plus variées. Toutefois, depuis les dernières années, le Mécanisme de vérification et d'inspection des Nations Unies fait face à de grandes difficultés en matière de disponibilité et de durabilité des financements.

98. Les enquêtes du Groupe d'experts concernant les six navires susmentionnés ont révélé ce qui suit :

a) *Almas* (IMO-8864957), pavillon comorien : avant d'arriver le 18 octobre 2023 à la zone de mouillage de Ras Kathib, dans la province de Hodeïda, contrôlée par les houthistes, le navire était amarré à Bandar Abbas (République islamique d'Iran), entre le 20 septembre et début octobre 2023 (voir annexe 167).

b) *Kasra-3* (IMO-9109184), pavillon tanzanien : avant d'arriver à la zone de mouillage de Salif contrôlée par les houthistes le 6 octobre 2023, le navire était amarré à Bandar Abbas (République islamique d'Iran) le 25 septembre 2023. Il s'est ensuite rendu en Iran et est revenu à la zone de mouillage de Salif le 22 novembre 2023, où il est resté jusqu'au 30 novembre 2023 (voir annexe 168).

c) *AH-Union* (IMO-9109005), pavillon panaméen : le navire a gagné le port de Salif le 5 décembre 2023.

d) *Dubaï-1* : le navire est arrivé au port de Salif le 9 décembre 2023 puis le 23 mars 2024, battant apparemment pavillon sri-lankais. Les autorités sri-lankaises ont cependant nié l'existence de cet enregistrement et ont indiqué que le numéro OMI (988850) était erroné. Le Groupe d'experts note que depuis 2020, le *Dubaï-1* navigue entre Djibouti, l'Iran (République islamique d'), Oman, la Somalie et le Yémen, et que son système d'identification automatique est fréquemment désactivé, ce qui laisse supposer des activités suspectes (voir annexe 169).

e) *Alakh Shakti* (IMO-419956818), pavillon indien : le navire est arrivé au port de Salif le 27 septembre 2023.

f) *Mahdar* (IMO-417898786) : le navire est arrivé au port de Salif le 25 avril 2024, et battait apparemment pavillon sri-lankais. Les autorités sri-lankaises ont cependant nié tout enregistrement de ce navire.

99. Les enquêtes du Groupe d'experts ont révélé que de faux documents d'enregistrement à Sri Lanka sont utilisés par différents navires transportant des marchandises interdites ou restreintes.

100. Les autorités comoriennes, indiennes, iraniennes et tanzaniennes n'ont pas encore répondu aux lettres du Groupe d'experts.

Étude de cas n° 7 : utilisation de faux documents d'enregistrement de navires sri-lankais

Le 18 janvier 2022, les États-Unis ont intercepté un boutre apatride dans le golfe d'Oman et saisi 40 tonnes d'engrais d'urée. Il s'agissait du même navire qui avait été saisi le 11 février 2021 avec une cargaison d'armes légères et de petit calibre au large des côtes somaliennes ([S/2022/50](#), par. 62 et 63, et annexe 19). D'après les documents trouvés à bord, dont un faux certificat d'enregistrement du navire à Sri Lanka, le boutre est dénommé Al-Etiad. ([S/2023/130](#), par. 44, annexe 15 et figure 15.8).

Le Groupe d'experts a enquêté sur le document d'enregistrement du navire *Bari-2*, intercepté en mer par l'Arabie saoudite le 24 juin 2020, chargé

d'une importante cargaison d'armes légères et de petit calibre dont les modèles sont semblables à ceux des armes interceptées alors qu'elles étaient en voie d'acheminement vers les houthistes. Bien que le navire ait été prétendument enregistré à Sri Lanka, le Groupe d'experts a conclu que le document d'enregistrement était falsifié ([S/2021/79](#), par. 74 et annexe 15, figure 15.9.).

En 2017, le Groupe de contrôle pour la Somalie et l'Érythrée a également fait état d'informations concernant un navire impliqué dans le trafic illégal de charbon de bois. Là aussi, le Groupe avait découvert que les trafiquants utilisaient des documents d'enregistrement de navires sri-lankais falsifiés ([S/2017/924](#), par. 208, annexes 12.2.1 et 12.2.3).

V. Application des sanctions financières

Violations des dispositions relatives au gel des avoirs

101. Les personnes visées dans le cadre du régime de sanctions prévu par la résolution [2140 \(2014\)](#), celles qui agissent en leur nom ou sur leurs instructions et les entités qu'elles possèdent ou contrôlent continuent de recevoir, de posséder ou de contrôler, directement ou indirectement, des fonds, d'autres avoirs financiers et des ressources économiques, comme exposé ci-après, en violation dudit régime de sanctions.

102. Une interprétation plus stricte de la résolution susmentionnée porterait à englober, dans l'application des dispositions relatives au gel des avoirs, toutes les formes de fonds, d'avoirs financiers et de ressources économiques des autorités instituées par les houthistes. Il semblerait que les recettes douanières et fiscales, les redevances des services de télécommunications et le produit des ventes de carburant et de gaz soient partiellement détournés par les houthistes à des fins militaires ; cependant, les autorités établies à Sanaa ont besoin d'en utiliser une partie pour fournir des services essentiels à la population. Les sanctions financières ont été d'une efficacité limitée. Cela tient, d'une part, à l'approche adoptée par la communauté internationale pour éviter que les sanctions financières n'aient des conséquences humanitaires néfastes et, d'autre part, à l'incapacité de l'État yéménite de geler les avoirs qui sont sous le contrôle effectif des autorités instituées par les houthistes, dans les zones contrôlées par ces derniers. De ce fait, le Groupe d'experts concentre son enquête sur les avantages financiers obtenus ou contrôlés illégalement, à des fins militaires, par les houthistes.

1. Frappe de monnaie et impression présumée de devises par les houthistes

103. En prenant cette mesure, les houthistes avaient pour objectif, outre celui d'envoyer un message fort quant à leur revendication du droit pécuniaire souverain d'émettre leur propre monnaie, celui de générer des fonds sans dépendre de sources extérieures. Ils peuvent facilement utiliser cet argent à des fins militaires sans craindre d'être découverts.

Étude de cas n° 8 : contrefaçon de billets et de passeports

Le Groupe d'experts a observé que les houthistes avaient tenté à trois reprises d'introduire illégalement des billets de banque et des passeports imprimés à l'étranger :

- Le Groupe d'experts a fait état précédemment de la saisie de faux billets à ordre, d'une valeur de 35 milliards de rials yéménites, et de faux passeports, imprimés illégalement à l'étranger et introduits clandestinement au Yémen ([S/2018/594](#), par. 142 à 144 ainsi qu'annexe 53, [S/2019/83](#), par. 125, et [S/2020/50](#), par. 90 et 91).
- Dans son rapport précédent, le Groupe d'experts a indiqué qu'en août 2023, les houthistes avaient tenté de faire produire de faux billets de banque par une imprimerie en Chine ([S/2023/833](#), par. 175 et 176). La suite de l'enquête lui a permis de découvrir que Mahmood Saeed Hezam Al-Ameri, l'homme ayant contacté ladite imprimerie, ne représentait pas l'État yéménite et que le passeport (n° 07865754) établi à son nom avait été délivré à Sanaa par les houthistes (voir annexes 170 et 171).
- Récemment, le Groupe d'experts a reçu des informations selon lesquelles des représentants des autorités instituées par les houthistes auraient contacté une entreprise en Indonésie afin de se procurer des fonds de sécurité, de l'encre et d'autres accessoires servant à imprimer des billets de banque, des billets à ordre, des timbres fiscaux et des passeports. Il a demandé à la l'Indonésie d'enquêter, et écrit à l'entreprise concernée pour obtenir des renseignements. Cependant, dans le premier cas comme dans le second, il n'a pas encore reçu de réponse. L'enquête qu'il a menée a révélé que ni la Banque centrale du Yémen sise à Aden ni l'État yéménite n'avaient passé de commande de ce type auprès de l'entreprise en question. Par ailleurs, ses sources l'ont informé qu'en 2016, les houthistes auraient acquis des passeports vierges imprimés par ladite entreprise. Le Groupe d'experts n'a pas été en mesure de confirmer ces allégations. Toutefois, dans le cadre de son enquête, il a établi que des personnes s'étaient rendues à l'étranger, munies de faux passeports délivrés par les houthistes, pour suivre une formation militaire (voir annexe 9). L'enquête se poursuit.

Étude de cas n° 9 : émission d'une pièce de monnaie par les houthistes

Le 30 mars 2024, la Banque centrale du Yémen sise à Sanaa a annoncé qu'elle avait émis des pièces de 100 rials, sous prétexte de remplacer des billets de banque endommagés. Après enquête, le Groupe d'experts a déterminé que d'anciens billets de 100 rials, représentant une valeur totale de 12 milliards de rials, étaient en circulation. Des sources l'ont informé qu'étant dans l'incapacité de faire imprimer des billets de banque au Yémen, faute de pouvoir se procurer le nécessaire (fond de sécurité, fil et encre spéciale, entre autres) à l'étranger, les houthistes avaient fait frapper des pièces sur place. D'après ces sources, les houthistes allaient continuer d'émettre ainsi des pièces ou des billets afin de financer leurs activités de guerre et de se présenter comme constituant l'autorité centrale d'une économie indépendante.

La Banque centrale du Yémen sise à Aden, qui représente l'administration reconnue sur le plan international, se considère comme la seule entité juridique habilitée à émettre la monnaie yéménite. De tels agissements de la part des houthistes portent atteinte à sa légitimité. La Banque centrale du Yémen sise à Aden tient pour faux les billets ainsi émis. De ce fait, elle a publié sans tarder un communiqué de presse dans lequel elle déclarait que les pièces émises par les houthistes constituaient des faux (voir annexe 172).

2. Collecte de fonds pour les « forces aériennes de drones » et les « forces de défense côtière »

104. Le secteur des télécommunications demeure une importante source de revenus pour les houthistes. Grâce à la mise en place de services 4G, les entreprises de télécommunications contrôlées par les houthistes ont augmenté considérablement leurs recettes. Des sources ont informé le Groupe d'experts qu'une grande partie des recettes était utilisée à des fins militaires, notamment pour l'achat de matériel de télécommunication à double usage.

105. Exploitant les possibilités offertes par le secteur des télécommunications, les houthistes sollicitent avec succès, notamment au moyen de millions de messages, des fonds publics destinés à leurs activités militaires (voir annexe 173).

Étude de cas n° 10 : messages en faveur des « forces aériennes »

Après enquête, le Groupe d'experts a établi que les houthistes avaient lancé une vaste campagne de collecte de fonds, par SMS, en faveur de leurs « forces aériennes de drones ». Y étaient indiquées les coordonnées de comptes domiciliés auprès de la Banque centrale du Yémen sise à Sanaa, destinés à recevoir des dons en rials yéménites et en dollars des États-Unis (comptes n° 10262-1128 et n° 10262-1019-01) (voir illustration).

Support the Air Force
via the following accounts:
Central Bank No.
1128 - 10262 (riyals)
01-1019 - 10262 (dollars)

Source : Groupe d'experts.

D'après les sources du Groupe d'experts, l'un des derniers messages sollicitait une contribution en faveur des « forces de défense côtière ».

3. Collecte de fonds pour des drones aériens menée auprès du ministère de l'éducation

106. Le Groupe d'experts a appris de ses sources que l'office de l'éducation constitué par les houthistes à Sanaa contraignait régulièrement les établissements scolaires des zones contrôlées par ces derniers à verser des fonds pour des drones aériens. Il a

obtenu une copie du reçu attestant de l'encaissement d'un montant de 20 956 250 rials yéménites par les houthistes (voir annexe 174). L'enquête sur cette affaire est en cours.

4. Soutien financier apporté aux houthistes depuis l'extérieur du Yémen

107. Après enquête, le Groupe d'experts a établi que les houthistes utilisaient divers réseaux de personnes et d'entités opérant à partir de plusieurs juridictions, notamment Djibouti, l'Iran (République islamique d'), l'Iraq, la Türkiye et le Yémen, pour financer leurs activités. Ils ont ainsi recours à des banques, à des sociétés écrans, à des sociétés de change, à des sociétés de transport maritime et à des facilitateurs financiers. Le Groupe d'experts a interrogé les responsables d'un petit nombre de sociétés de change et de transport maritime et de banques, qui, sous le couvert de l'anonymat, ont confirmé ce modus operandi.

108. Le Groupe d'experts a été informé qu'un comité spécial a été récemment mis en place pour accroître les revenus des houthistes et pour planifier les dépenses militaires, notamment en matière d'armes, sous la direction présumée d'un expert de haut niveau, alias Abu Radwan, lié à la Force Radwan du Hezbollah. L'homme donnerait des conseils sur l'augmentation des droits de douane, des taxes ainsi que des prélèvements, notamment dans le secteur des télécommunications. Récemment, les houthistes ont alourdi les droits de douane relatifs à des produits de base, appliqué de nouvelles taxes et augmenté de près de 35 % les prélèvements effectués auprès des sociétés de télécommunications (voir annexe 175).

109. Selon les mêmes sources, des sommes considérables sont transférées illégalement sous la direction de Sa'id al-Jamal, dont il semblerait qu'il soit affilié à la Force Al-Qods du Corps des gardiens de la révolution islamique, au profit des houthistes. Sous le couvert de l'anonymat, des sources confidentielles ont mentionné l'implication présumée de plusieurs personnes, y compris de hauts dirigeants houthistes, et d'entités qui ont facilité l'apport d'un soutien financier aux houthistes, à savoir Nabil Ali Ahmed al-Hadha, Abdallah Najib Ahmad al-Jamal, parent de Sa'id al-Jamal installé au Yémen, Abdi Nasir Ali Mahamud, associé de Sa'id al-Jamal affilié aux houthistes, et Ibrahim al-Nashiri, houthiste, ainsi que certaines des principales sociétés détenues ou contrôlées par Mohamed Salah Falitah et Mohammed Abdulsalam. L'apport aux entreprises affiliées aux houthistes des devises nécessaires pour les importations aurait été facilité par le comité économique houtiste chargé des paiements.

110. Au cours de l'enquête, le Groupe d'experts a reçu des signalements concernant l'implication présumée des entités suivantes dans le transfert illégal de fonds au profit des houthistes, tant au Yémen qu'à l'étranger :

- a) Al Aman Kargo İthalat Ihracat Ve Nakliyat Limited Sirketi ;
- b) Al Alamiyah Express Company for Exchange and Remittance ;
- c) Nabco Money Exchange and Remittance Co ;
- d) Al-Rawda Exchange and Money Transfers Company ;
- e) Al Radwan for Exchange Co.

111. Le Groupe d'experts n'a pas pu vérifier de manière indépendante l'implication présumée des personnes et entités susmentionnées. Il a reçu plusieurs documents. L'enquête est en cours.

Étude de cas n° 11 : homme d'affaires yéménite impliqué dans des achats et des paiements au profit des houthistes

Le Groupe d'experts enquête sur un dossier dans lequel un homme d'affaires yéménite lié à de hauts responsables houthistes serait impliqué dans l'achat d'armes, pour les houthistes, à l'aide de fonds acheminés via plusieurs sociétés de change. Il a été informé que cet homme travaillait comme agent en douane et qu'il avait tenté de faire dédouaner une cargaison comportant 52 pièces de missile ou missiles antichars Dehlavieh destinés aux houthistes, laquelle avait été saisie par les douanes yéménites au poste frontière de Chihan le 10 mars 2022 (voir étude de cas n° 6).

L'homme serait impliqué dans l'achat et le paiement de diverses pièces de matériel militaire acquises par les houthistes. Il a créé une société à Djibouti, où il vivait sous un autre nom, muni d'un faux passeport, dont une copie a été remise au Groupe d'experts. Par ailleurs, le Groupe d'experts a examiné des copies de plusieurs documents faisant état de dépôts d'espèces et de transferts de fonds au nom de trois sociétés de change à Djibouti et au Yémen (voir annexe 176).

a) **Soutien financier présumé de la République islamique d'Iran pour la contrebande d'armes**

Étude de cas n° 12 : financement de la contrebande d'armes

Au cours de son enquête, le Groupe d'experts a examiné plusieurs documents. Le général Rostam Qasemi, commandant adjoint de la Force Al-Qods du Corps des gardiens de la révolution islamique, a déclaré aux médias : « Toutes les armes détenues par les Yéménites sont le fruit de notre aide » (voir étude de cas n° 5 et annexe 95). Un acte d'accusation daté du 7 août 2024^a, déposé par les autorités américaines auprès de la cour de district de Virginie, contient des renseignements concernant des paiements qui auraient été effectués par deux ressortissants iraniens, Mir'Kazei, alias Shahab Regi, et son frère Yunus Mir'Kazei, au capitaine du boutre *Yunus*. Les deux frères, propriétaires du *Yunus* et travaillant pour le Corps des gardiens de la révolution islamique, auraient eu recours aux services du capitaine pour faire passer du matériel militaire de la République islamique d'Iran, où ce dernier résidait, à plusieurs destinataires, dont les houthistes. Entre août 2023 et janvier 2024, le capitaine aurait effectué plusieurs voyages de contrebande, coordonnés et financés par les deux frères, Shahab et Yunus. Les opérations financières sont décrites ci-après.

- Août 2023 : depuis son compte bancaire, Shahab verse environ 100 millions de rials iraniens au capitaine.
- De septembre à octobre 2023 : le capitaine reçoit des paiements de Shahab et de Yunus via le réseau parabancaire *hawala*^b et distribue l'argent à sa famille et à des tiers.
- 26 octobre 2023 : depuis son compte bancaire, Yunus verse, via le *hawala*, environ 800 millions de rials iraniens au capitaine.
- 26 novembre 2023 : depuis son compte bancaire, Shahab verse, via le *hawala*, environ 300 millions de rials iraniens au capitaine.

- *3 janvier 2024* : depuis son compte bancaire, Yunus verse, via le *hawala*, environ 800 millions de rials iraniens au capitaine. Par la suite, le capitaine a distribué, via plusieurs opérateurs utilisant le système *hawala*, une partie de l'argent aux familles des membres de l'équipage qu'il employait sur le *Yunus*. Par ailleurs, il a évoqué avec sa famille l'achat d'un bien immobilier et la construction d'une nouvelle maison.

^a Voir www.justice.gov/d9/2024-08/mirkazei_superseding_indictment.pdf.

^b Système informel de transfert de fonds hors systèmes bancaires traditionnels.

b) Soutien financier de l'Iraq

112. Le Groupe d'experts a reçu des informations de diverses sources sur le soutien financier fourni aux houthistes par l'Iraq. Des jeunes iraquiens lancent régulièrement des campagnes pour solliciter un soutien financier en faveur des houthistes du Yémen (voir par. 13).

5. Perception présumée de droits de transit illégaux destinés à garantir un passage maritime sûr

113. Les sources du Groupe d'experts ont indiqué que les houthistes auraient perçu auprès de quelques agences maritimes des droits illégaux permettant aux navires de celles-ci de naviguer dans les eaux de la mer Rouge et du golfe d'Aden sans être attaqués. Elles lui ont indiqué également que ces agences maritimes travaillaient en coordination avec une société affiliée à un dirigeant houthiste de haut rang, que les droits versés étaient déposés sur divers comptes dans plusieurs juridictions au moyen de transferts via le réseau *hawala* et d'opérations de blanchiment sous couvert de transactions commerciales. Elles estiment à environ 180 millions de dollars le profit mensuel que les houthistes tirent de ces droits illégaux de sécurisation du transit. Le Groupe d'experts n'a pas pu vérifier de manière indépendante ces informations.

6. Confiscation d'avoirs

114. Le système de la « tutelle judiciaire », mis en place par les houthistes en 2017 pour gérer les fonds et les biens des opposants accusés de trahison, continue de permettre l'appropriation généralisée et illégale d'avoirs, avec l'aide des forces armées. Auparavant, Saleh Mesfer Saleh al-Shaer (YEI.007) était le « tuteur judiciaire » dans ce système. Les houthistes continuent de s'en prendre aux entreprises et aux personnes qui leur sont opposées, en gelant, confisquant et accaparant les avoirs des personnes, notamment la maison du Gouverneur de la Banque centrale du Yémen sise à Aden, et en prenant la direction des entreprises, au mépris total de l'état de droit (voir annexes 177 à 180).

a) Prise de contrôle des fonds, des avoirs et de la gestion de la compagnie aérienne Yemenia

115. L'enquête du Groupe d'experts a révélé que, suivant les instructions du ministère des finances constitué par les houthistes, la Banque centrale du Yémen sise à Sanaa avait demandé à toutes les banques commerciales de suspendre le décaissement des fonds de tous les comptes bancaires de Yemenia, dans toutes les devises (voir annexes 178 à 180). Un montant de 100 millions de dollars est sous le contrôle des houthistes depuis plus d'un an.

116. En outre, les 25 et 26 juin 2024, les houthistes ont immobilisé à l'aéroport de Sanaa des avions de Yemenia (voir tableau ci-dessous), qui revenaient de Djedda avec des pèlerins à leur bord.

<i>Avion</i>	<i>Numéro de vol</i>	<i>Ligne</i>	<i>Date d'arrivée</i>
A320-A-70AFC	IY 5555	Djedda-Sanaa	25 juin 2024
A320-C-70AFC	IY5547	Djedda-Sanaa	26 juin 2024
A320-F-70AFF	IY5559	Djedda-Sanaa	26 juin 2024

117. Un autre avion, un Airbus A330-3-F70AFE, a été retenu à Sanaa. Yemenia a l'interdiction d'utiliser les pièces détachées se trouvant dans son hangar d'entretien à Sanaa.

118. L'enquête du Groupe d'experts a révélé que les houthistes voulaient que Yemenia exploite trois vols hebdomadaires internationaux au départ de Sanaa et à destination, entre autres, d'Amman. En outre, la compagnie aérienne s'est vu interdire d'utiliser des comptes bancaires dans les zones contrôlées par l'État yéménite. Lorsqu'elle s'est déclarée incapable de satisfaire aux demandes des houthistes, étant donné qu'elle ne pouvait accéder aux fonds nécessaires, les houthistes se sont emparés de l'avion mentionné plus haut. En outre, ils ont pris le contrôle de la gestion des opérations de la compagnie à Sanaa, par l'intermédiaire de complices, et refusé de reconnaître la légitimité du conseil d'administration qui intervenait depuis Aden⁴⁴. Par conséquent, il s'agit d'un cas où les houthistes ont pris par la force le contrôle des avoirs, des fonds et de la gestion d'une compagnie aérienne publique afin d'accroître leurs avantages financiers en augmentant la fréquence des vols internationaux et le nombre de destinations desservies, aux dépens de Yemenia.

119. Bien que les autorités de l'État yéménite et les houthistes soient parvenus à un accord pour régler ce problème, les fonds demeurent sous le contrôle de ces derniers.

b) Confiscation des avoirs de compagnies pharmaceutiques

120. Le 10 juin 2024, le tribunal pénal spécialisé de Sanaa, d'obédience houthiste, a publié une communication adressée à la Banque centrale du Yémen sise à Sanaa, dans laquelle ordre était donné à l'ensemble des banques et des sociétés de change de saisir et de geler tous les soldes, comptes et transferts de deux des plus grandes compagnies pharmaceutiques en activité au Yémen, à savoir la Modern Pharmaceutical Company et l'International Pharmaceutical Manufacturing Company, ainsi que des membres de leur direction et de leur personnel (voir annexe 181).

⁴⁴ Voir <https://www.saba.ye/en/news3346352.htm>

Figure III
Copie de la communication du 10 juin 2024 publiée par le tribunal pénal spécialisé de Sanaa, d'obédience houthiste

Source : confidentielle.

7. Contrebande

121. Les houthistes ont amassé d'importantes ressources illégales grâce à la contrebande organisée de diverses sortes : armes, drogues, matériel de télécommunication (voir annexe 182), biens proscrits tels que des pesticides interdits (voir annexe 183), des médicaments non autorisés (voir annexe 184) et des biens du patrimoine culturel (voir par. 123 et annexe 185).

a) Contrebande et trafic de stupéfiants

122. La contrebande et le trafic de stupéfiants ont pris de l'ampleur au Yémen, les autorités du pays faisant état de saisies de cargaisons de drogue et de l'interception par les forces navales internationales de boutres transportant ce type de cargaison. Par ailleurs, les houthistes perçoivent des taxes et des droits illégaux auprès des cultivateurs de khat (*Catha edulis*). Récemment, ils ont imposé aux cultivateurs de khat de la province d'Ibb de nouvelles taxes, supérieures à 300 %.

Étude de cas n° 13 : saisie dans le port d'Aden de drogue découverte dans des conteneurs destinés au transport de sucre

L'Unité de lutte contre le terrorisme a informé le Groupe d'experts qu'avait été saisie dans le port d'Aden une quantité importante de drogue découverte dans un conteneur (n° 536854) faisant partie d'une cargaison de sucre transportée par le navire *Vanesa MSC* en provenance du Brésil. L'affaire s'est soldée par la condamnation de Muhammad Ibrahim Ahmed al-Matari à 25 ans d'emprisonnement, peine qui a été ramenée à 12 ans en appel. En examinant les dossiers et en interrogeant les fonctionnaires de l'Unité de lutte contre le terrorisme à Aden, en mars et juillet 2024, le

Groupe d'experts a établi que les houthistes étaient impliqués dans la contrebande de la drogue saisie.

b) Fonds issus de la contrebande et du trafic d'objets culturels

123. Diverses sources ont informé le Groupe d'experts que les houthistes se livraient à la contrebande et au trafic d'antiquités du patrimoine culturel yéménite et qu'ils les vendaient à l'étranger.

124. Le 26 octobre 2023, les douaniers yéménites ont saisi un livre ancien comportant 19 pages de cuir écrites en lettres d'or, en hébreu (voir figure IV).

Figure IV
Livre ancien en hébreu saisi par les douanes yéménites

Source : douanes yéménites.

8. Importation, à l'aide de faux documents, de pétrole et de gaz de pétrole liquéfié

125. Le Groupe d'experts a reçu des informations de plusieurs sources selon lesquelles des entreprises contrôlées par les houthistes importaient, au moyen de faux certificats de pays d'origine, du pétrole et du gaz de pétrole liquéfié, via les ports de Hodeïda et de Ras Issa, en contournant parfois les inspections du Mécanisme de vérification et d'inspection des Nations Unies. Les navires utilisés procèdent de deux manières : certains se rendent dans le pays concerné en ayant désactivé leur transpondeur d'identification automatique pour éviter d'être détectés, tandis que d'autres effectuent en mer des transferts de navire à navire sans se rendre dans les ports désignés sur les certificats de pays d'origine.

126. L'enquête en cours du Groupe d'experts a révélé qu'entre le 1^{er} janvier 2023 et le mois de juillet 2024, le Mécanisme de vérification et d'inspection des Nations Unies avait reçu 44 demandes d'inspection de navires transportant du gaz de pétrole liquéfié et que l'une de ces demandes avait été rejetée. L'enquête a également révélé que Port Khalid (Émirats arabes unis) était indiqué comme port d'origine de l'expédition effectuée le 18 octobre 2023 sur le *LPG OM* et de celle effectuée le 8 juin 2024 sur le *Raha Gas*⁴⁵.

⁴⁵ Ces deux navires et leurs propriétaires, à savoir Arafat Shipping Company et KDS Shipping Limited, ont été sanctionnés par le Bureau du contrôle des avoirs étrangers du Département du Trésor des États-Unis (voir annexe 186). Voir également <https://ofac.treasury.gov/recent-actions/20240815>.

127. Le Groupe d'experts enquête sur les navires liés au Hezbollah et aux dirigeants houthistes de haut rang. Il a recueilli des informations sur plusieurs personnes, entités et itinéraires. Cependant, étant donné l'insuffisance d'éléments permettant de déterminer l'ensemble de la chaîne d'approvisionnement et les risques potentiels encourus par certaines sources confidentielles, il n'a pas divulgué ces informations à ce stade.

128. Les enquêtes du Groupe d'experts ont révélé qu'entre le 1^{er} avril 2022 et le 30 juin 2024, les autorités instituées par les houthistes ont perçu, au titre de droits de douane concernant les importations de carburant via les ports qu'elles contrôlaient, environ 994 milliards de rials yéménites, selon le taux de change en vigueur dans les zones contrôlées par l'État yéménite. Si l'on tient compte des autres redevances illégales et de la marge bénéficiaire correspondante, le revenu total retiré de ce seul secteur par les houthistes au cours de la même période est estimé à 1 340 milliards de rials yéménites. Le Groupe d'experts a été informé par ses sources qu'une part importante de ce montant avait été détournée à des fins militaires. Cependant, il n'a pas pu vérifier de manière indépendante le montant des fonds ainsi détournés.

9. Collecte d'argent contre de faux achats de matériel de télécommunication

129. Des sources du Groupe d'experts ont indiqué que les entités contrôlées par les houthistes avaient adopté un autre mode opératoire et qu'elles avaient transféré environ 132 millions de dollars destinés à l'achat d'appareils et de matériel de télécommunication et à la construction de tours afin d'agrandir le réseau de télécommunications. Une part importante de ces fonds serait parvenue aux hauts dirigeants houthistes via divers comptes. Les entreprises de télécommunications passent ces montants en pertes, en affirmant que le matériel a été saisi aux frontières par les autorités yéménites, sans qu'aucune opération d'achat ou de construction n'ait été effectuée.

130. Le Groupe d'experts a reçu des informations selon lesquelles dans un autre cas, les houthistes ont vendu aux abonnés, au prix de 75 dollars, des modems achetés à 56 dollars (le coût réel étant de 8 dollars) auprès d'une société liée au dirigeant houthiste Ahmed Hamed. Sous le couvert de l'anonymat, une source confidentielle issue du secteur des télécommunications a indiqué que parmi les destinataires présumés figuraient les principaux dirigeants houthistes ou leurs associés, à savoir Mohammed Ali al-Houthi, Abdullah Yahya al-Hakim, Ahmed Hamed, Mesfer al-Numair et Ismail Hamid al-Din. Le Groupe d'experts n'a pas pu vérifier de manière indépendante ces allégations. L'enquête sur cette affaire est en cours.

VI. Actes contraires au droit international humanitaire et au droit international des droits humains

131. L'enquête menée, qui repose notamment sur le recueil d'informations auprès de sources et l'analyse de documents⁴⁶, révèle des violations généralisées du droit international humanitaire et du droit des droits humains : attaques indiscriminées visant des civils, détentions arbitraires, disparitions forcées, actes de torture, actes de violence sexuelle liée aux conflits ou de violence fondée sur le genre, violations du droit à un procès équitable. En outre, le recrutement et l'utilisation d'enfants dans le conflit au Yémen, ainsi que les obstacles à l'accès humanitaire et à l'acheminement de l'aide, suscitent l'inquiétude.

⁴⁶ L'experte en droit international humanitaire n'a pas encore participé à des missions au Yémen et dans la région (voir par. 2).

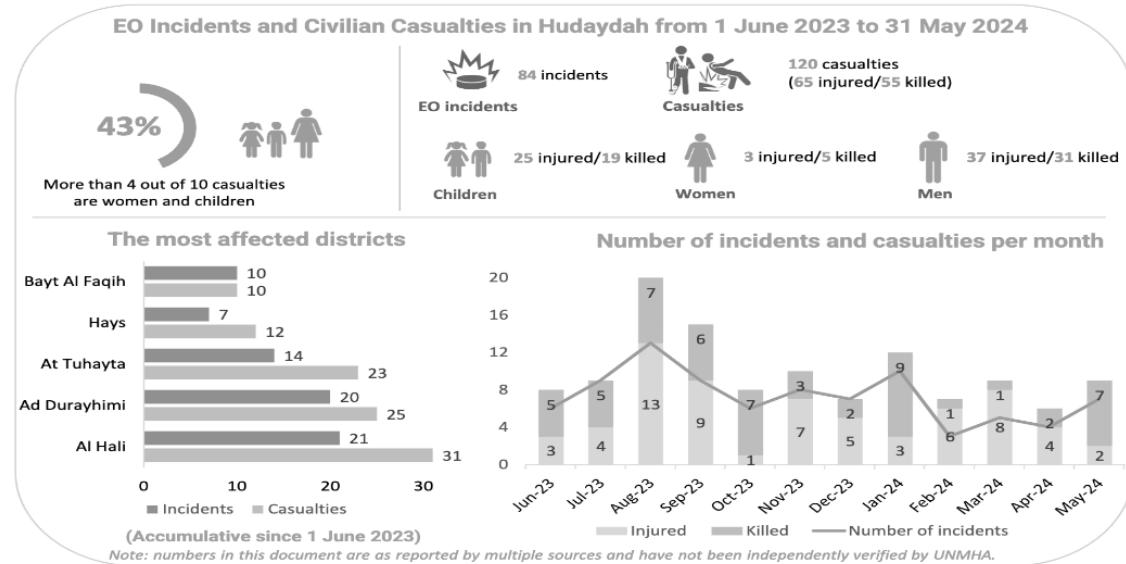

A. Attaques indiscriminées contre des civils et des biens de caractère civil

132. Pour la période du 1^{er} janvier au 30 juin 2024, des sources gouvernementales font état de 128 civils tués (dont 33 enfants et 6 femmes) et de 93 civils blessés (dont 35 enfants et 8 femmes). La province la plus touchée a été Beïda, suivie d'Amran, de Jaouf et de Taëz⁴⁷. En outre, 101 attaques ont été perpétrées contre des biens de caractère civil, notamment des lieux de culte, des établissements scolaires, des installations médicales et des propriétés privées. Ces attaques ont entravé l'accès aux services essentiels et porté atteinte aux droits à la santé, à l'éducation, à un niveau de vie correct et à la liberté de religion (voir par. 136, 137 et 139). Des sources confidentielles ont informé le Groupe d'experts qu'au moins 13 civils avaient péri et 26 avaient été blessés lors de deux frappes aériennes menées par la coalition américano-britannique, les 8 avril et 30 mai 2024, dans la province de Hodeïda. L'attaque israélienne du 20 juillet 2024 contre le port de Hodeïda a fait au moins 9 morts et 83 blessés parmi les civils. Le Groupe d'experts continuera d'enquêter sur les répercussions des frappes aériennes internationales sur les civils.

1. Victimes civiles de mines terrestres, d'engins explosifs improvisés et de munitions non explosées

133. Les mines terrestres, les engins explosifs improvisés et les munitions non explosées continuent de faire de nombreuses victimes civiles, notamment parmi les femmes et les enfants.

Figure V
Cas d'engins explosifs ayant fait des victimes civiles à Hodeïda entre le 1^{er} juin 2023 et le 31 mai 2024

Note : les chiffres figurant dans cette illustration proviennent de sources multiples et n'ont pas été vérifiés de manière indépendante par la MINUAH.

Abréviations : EO : engin explosif ; UNMHA : Mission des Nations Unies en appui à l'Accord sur Hodeïda.

⁴⁷ Des informations issues de sources publiques font état d'au moins 393 attaques ayant visé des civils entre septembre 2023 et mars 2024, avec un bilan présumé de 367 morts et 44 blessés. Voir <https://civilianimpactmonitoring.org/>.

134. Entre le 17 septembre 2023 et le 28 juillet 2024, dans les zones contrôlées par l'État yéménite, le projet Massam a neutralisé 37 804 pièces, dont 232 mines antipersonnel, 3 097 mines antichar, 33 488 munitions non explosées et 177 engins explosifs improvisés⁴⁸. Durant le seul mois de juillet, les équipes en ont éliminé 4 230⁴⁹. Des représentants de l'État ont informé le Groupe d'experts qu'au cours du premier semestre de 2024, au moins 61 civils avaient été tués, et 119 blessés, par des mines terrestres, des mines marines et d'autres restes de guerre. L'enquête indique que les houthistes produisent sur place des mines terrestres, qu'ils dotent de mécanismes de déclenchement afin d'en accroître les préjudices humains. En outre, la neutralisation des mines terrestres est devenue plus dangereuse pour les démineurs (voir annexe 187 ; voir également S/2023/833, par. 84).

2. Attaques contre des civils et des biens de caractère civil

135. Le Groupe d'experts a recueilli des informations sur les cas où des civils, notamment des femmes ou des enfants, avaient été tués ou blessés (voir annexe 188). Les houthistes auraient lancé des attaques aveugles contre des quartiers résidentiels à l'aide de lance-roquettes, de pièces d'artillerie, de drones aériens et de tireurs embusqués. On dénombre au moins 153 morts et 180 blessés (dont des femmes, des enfants et des personnes âgées) au cours de la période considérée dans le présent rapport. Les provinces de Taëz, Dalea, Mareb, Hodeïda et Beïda ont été particulièrement touchées au cours du premier semestre de 2024.

136. Le Groupe d'experts enquête sur des attaques menées contre des biens de caractère civil, notamment des établissements scolaires, des installations médicales et des édifices religieux. À la fin du mois de juillet 2024, au moins 35 établissements scolaires ou installations médicales auraient été occupés par des forces ou groupes armés. Au cours de la période considérée dans le présent rapport, quatre établissements scolaires ont été occupés et trois édifices religieux ont été attaqués⁵⁰. Des sources gouvernementales ont fait état d'attaques systématiques (pillages, fermetures de locaux et confiscation de matériel) perpétrées contre des organes d'information au cours du premier semestre de 2024, en violation de la liberté d'expression. Les houthistes auraient placé des explosifs dans des zones agricoles et des pâturages ainsi qu'à proximité de puits d'eau, de terrains de jeux et d'habitations abandonnées. En perturbant le trafic sur des voies de transport essentielles, ils ont entravé la circulation des personnes et des marchandises dans tout le Yémen, ce qui a eu pour effet d'allonger la durée des trajets et d'alourdir les coûts de transport des marchandises (voir annexe 189).

137. Les houthistes continuent de saisir ou confisquer systématiquement des biens privés, sans procédure régulière, afin de réprimer la dissidence et de financer leurs activités de guerre (voir par. 114 à 120). Par exemple, au cours du premier semestre de 2024, au moins 108 résidences auraient été pillées et saisies. Le fait de déposséder des personnes de leurs avoirs contribue à accroître le nombre de déplacés et accentue les besoins d'aide humanitaire alors que l'accès et la distribution sont très difficiles (voir annexe 189, par. 2).

⁴⁸ Le projet Massam contribue à l'élimination des mines terrestres et d'autres engins explosifs au Yémen. Voir www.projectmasam.com/eng/news/.

⁴⁹ Voir www.projectmasam.com/eng/project-masam-clears-4230-landmines-unexploded-ordnance-and-improvised-explosive-devices/.

⁵⁰ Selon des sources confidentielles, les houthistes ont mené au moins 20 attaques sur des sites de culte, 10 sur des établissements d'enseignement, 5 sur des installations médicales et 80 sur des zones résidentielles.

138. En outre, le Groupe d'experts enquête sur des attaques qui auraient été perpétrées contre des biens culturels au Yémen (voir par. 123 et 124, ainsi qu'annexe 185 et annexe 189, par. 3).

139. Les opérations menées depuis novembre 2023 par les houthistes contre des navires commerciaux en mer Rouge constituent des attaques illégales de biens de caractère civil (voir par. 52 à 59). De même la détention arbitraire d'équipages de navires, comme celui du *Galaxy Leader*, est proscrite par le droit international humanitaire et le droit des droits humains (voir par. 55 et 56). Les navires attaqués transportant souvent des cargaisons à haut risque, telles que du pétrole, cela engendre un risque d'atteinte grave à l'environnement, qui constitue une violation du droit à un environnement sain (voir par. 54 et 57).

B. Détentions arbitraires et disparitions forcées

140. Le Groupe d'experts a eu accès à des informations concernant des détentions arbitraires perpétrées par certaines parties au conflit. Les personnes perçues comme des opposants au régime houthiste, notamment les membres des communautés bahaïe et ismaïlienne, les personnes qui défendent les droits humains, les journalistes, les juges ainsi que les femmes et hommes d'affaires, seraient systématiquement pris pour cible. La situation se serait détériorée à la suite des attaques perpétrées par les houthistes en mer Rouge, celles-ci ayant provoqué des tensions avec certains États occidentaux. Le régime houthiste a durci la répression de la dissidence à mesure que s'amplifiaient les critiques à l'égard de ses politiques. Les personnes ayant ainsi exprimé leur opinion ont été accusées d'espionnage et d'atteinte à la sécurité de l'État (voir annexe 190). Des familles entières, y compris des enfants, auraient été détenues et gardées au secret, et, dans certains cas, des aveux télévisés auraient été obtenus sous la contrainte.

141. Des représentants de l'État yéménite ont informé le Groupe d'experts que les enseignants et les spécialistes du domaine de l'éducation étaient systématiquement pris pour cible, principalement à Sanaa. Les victimes, qui s'étaient opposées à des révisions de programmes scolaires visant à politiser le système éducatif, auraient été détenues arbitrairement, soumises à des actes de torture ou à d'autres peines ou traitements cruels, inhumains ou dégradants, ou gardées au secret. Au moins sept membres du corps éducatif auraient été détenus depuis septembre 2023 et l'un d'entre eux serait mort en détention ; selon les informations disponibles, sa dépouille présentait des traces de blessures au visage. Cinq de ces sept personnes collaboraient avec des organisations internationales sur des initiatives ayant trait à l'éducation (voir annexe 191).

142. En juin 2024, 13 membres du personnel de l'ONU et plusieurs personnes travaillant pour des organisations non gouvernementales ou des organisations de la société civile, dont 8 femmes, ont été détenus arbitrairement par les houthistes⁵¹. Malgré les appels de la communauté internationale à leur libération immédiate et inconditionnelle, toutes ces personnes restent gardées au secret, sans procédure régulière ni accès à leur famille ou à l'organisation qui les emploie. Elles sont accusées d'espionnage pour le compte des services de renseignement américains et israéliens, entre autres. Les aveux présumés de certaines d'entre elles ont été diffusés⁵² de telle sorte que les houthistes y apparaissaient comme étant contraints

⁵¹ Des sources ont indiqué qu'au total, 67 personnes, dont des proches et des enfants, qui ont été libérés par la suite, ont été détenues arbitrairement au cours de l'opération.

⁵² Voir www.middleeastmonitor.com/20240613-houthis-publish-confessions-of-us-israel-spy-network/.

d'entrer en conflit avec les États-Unis et Israël, ce qui justifiait l'adoption de politiques et de lois répressives (voir par. 156).

1. Torture et autres peines ou traitements cruels, inhumains ou dégradants

143. Les houthistes continuent de soumettre les personnes détenues à des actes de torture et à d'autres peines ou traitements cruels, inhumains ou dégradants (S/2023/833, par. 124 à 131) : arrachage des ongles, chocs électriques, pendaison par les pieds, simulacres d'exécution, passages à tabac, privation de nourriture ou d'utilisation des toilettes, d'après les informations disponibles. Les personnes détenues sont placées pendant de longues périodes dans des cellules d'isolement sombres, ce qui provoque de graves séquelles physiques et psychologiques, telles que la paralysie, l'amnésie, des déficiences physiques permanentes et la cécité. L'accès aux soins médicaux est souvent refusé, ce qui entraîne parfois la mort. L'enquête menée indique que des femmes ont subi des agressions sexuelles comme forme de torture. Le Groupe d'experts a reçu des informations sur l'identité de cinq personnes qui seraient décédées au cours de la période considérée dans le présent rapport, du fait des tortures subies pendant des années de disparition forcée. Un mannequin yéménite, arrêté en novembre 2021, est toujours en détention. Cette personne aurait été torturée afin qu'elle signe des aveux prérédigés, et soumise à des tests de virginité ; les violences sexuelles seraient incessantes.

2. Violations du droit à un procès équitable

144. Des représentants de l'État yéménite ont informé le Groupe d'experts que le tribunal pénal spécialisé de Sanaa, dirigé par les houthistes, avait prononcé de nombreuses condamnations à mort, en violation des droits de la défense. L'indépendance et l'impartialité du tribunal suscitent des inquiétudes, étant donné que des juges auraient été nommés en raison de leur allégeance aux houthistes. Selon les informations recueillies, les victimes sont détenues pendant des années sans inculpation, privées d'accès à un avocat et à leur famille, et maintenues à l'isolement pendant des mois. Lorsque les avocats sont autorisés, l'accès aux preuves leur est souvent refusé. La présomption d'innocence n'est pas respectée. Le tribunal aurait prononcé des condamnations à mort par lapidation et crucifixion. Le Groupe d'experts a été informé que le tribunal pénal spécialisé avait prononcé au moins 67 condamnations à mort au cours du premier semestre de 2024 (voir annexe 192). Le 1^{er} juin 2024, le tribunal a condamné à la peine de mort 44 personnes, la plupart pour espionnage. Les victimes ont été détenues en avril et mai 2020, principalement dans les provinces de Sanaa, Dhamar et Amran, et gardées au secret. En décembre 2023, une militante des droits humains et ancienne responsable de la branche yéménite de l'Union des femmes d'influence de la Ligue des États arabes a été condamnée à mort. Elle n'aurait pas été autorisée à voir sa famille ni à se faire représenter par un avocat. Le 14 octobre 2023, les forces houthistes auraient rassemblé 30 condamnés pour les exécuter par lapidation. L'exécution de ces hommes a été interrompue par crainte d'une réaction négative de l'opinion publique (voir par. 148)⁵³.

C. Violences sexuelles liées au conflit et violences fondées sur le genre

145. D'après les informations communiquées au Groupe d'experts, les violences sexuelles liées au conflit et les violences fondées sur le genre demeurent

⁵³ Voir également https://x.com/mashhadymeni/status/1757656074801332480?ref_src=twsr%5Etfw%7Ctwcamp%5Eembeddedtimeline%7Ctwterm%5Escreen-name%3Amashhadymeni%7Ctwcon%5Es1.

omniprésentes. De nombreux signalements font état de violences sexuelles, y compris en tant que formes de torture, perpétrées en détention contre des femmes, des enfants et des hommes.

146. Selon des sources gouvernementales, les Zeïnabiyat⁵⁴ ont été impliquées dans l'enlèvement, la disparition forcée et l'extorsion de femmes et de jeunes filles, notamment lors de manifestations et d'autres rassemblements publics. De nombreuses militantes auraient été battues et détenues arbitrairement, leur libération étant souvent subordonnée à la présentation d'une garantie de la part d'un tuteur masculin (*mahram*).

147. La violence sexuelle à l'égard des femmes est particulièrement dévastatrice dans la société yéménite, où la pureté sexuelle des femmes revêt une grande importance, notamment pour la réputation de familles entières. Le Groupe d'experts continue d'enquêter pour déterminer si les houthistes utilisent la violence sexuelle comme outil stratégique de guerre contre les personnes dissidentes.

148. D'après les informations auxquelles le Groupe d'experts a eu accès, il semble que le tribunal pénal spécialisé d'obéissance houthiste discrimine des personnes sur la base de l'orientation sexuelle et de l'identité de genre. Par exemple, le 23 juin 2024, à Sanaa, les houthistes ont condamné 9 hommes à la mort par lapidation et crucifixion, et 23 à une peine d'emprisonnement, parfois d'une durée de dix ans, pour avoir eu des relations homosexuelles. Trois hommes ont été condamnés à la flagellation publique. Les victimes auraient été soumises à un procès de masse et privées des garanties d'une procédure régulière⁵⁵. En février 2024, à Ibb, 13 hommes ont été condamnés à mort et 3 à des peines d'emprisonnement, tandis que 35 ont été placés en détention pour des motifs liés à l'homosexualité. La stigmatisation associée à de telles accusations, même infondées, est très préjudiciable dans la société yéménite. Bien souvent, les familles des accusés fuient leur ville d'origine.

D. Violations des droits des enfants

149. Les informations reçues par le Groupe d'experts font état de violations continues des droits des enfants. Les houthistes ont adopté des mesures qui portent atteinte au droit à l'éducation, notamment en modifiant les programmes scolaires (S/2023/833, annexe 85), en imposant la ségrégation, en gelant les salaires des enseignants et en appliquant au ministère de l'éducation des taxes pour financer l'achat de matériel à des fins militaires (voir par. 106). Des établissements scolaires ont été détruits, endommagés ou occupés. Des enseignants et des spécialistes du domaine de l'éducation ont été détenus arbitrairement. Dans le cadre de prétendus camps d'été, les houthistes continuent de promouvoir la haine, la violence et la discrimination, ce qui compromet l'avenir de la société yéménite et les perspectives de paix et de sécurité internationales (S/2023/833, annexe 86). Certaines sources ont indiqué que des conseillers du Hezbollahaidaient les houthistes à remanier les programmes scolaires et à gérer les camps d'été (voir annexe 193).

Recrutement et utilisation d'enfants

150. Le recrutement et l'utilisation d'enfants par les houthistes auraient augmenté après le déclenchement de la guerre de Gaza et les frappes américano-britanniques au

⁵⁴ Les Zeïnabiyat constituent la branche féminine houthiste chargée de la sécurité, s'agissant notamment de recueillir des renseignements, de participer aux combats et de veiller au respect de l'interprétation houthiste de la loi islamique (par exemple, en ce qui concerne les codes vestimentaires et les comportements sociaux acceptables).

⁵⁵ Voir <https://x.com/mashhadymeni/status/1749604938630521164>.

Yémen. Lesdits événements, en particulier le premier, ont servi à promouvoir les activités de recrutement. Les houthistes ont employé un discours religieux extrémiste dans les médias, les mosquées et d'autres espaces publics (voir annexe 194). Exploitant les taux élevés d'analphabétisme, en particulier dans les zones tribales, ils auraient mobilisé des garçons de 10 ou 11 ans, souvent contre l'avis des parents. Des sermons de recrutement et des cours hebdomadaires sur le jihad seraient dispensés dans les établissements scolaires.

151. Certains enfants s'inscrivent à des « camps d'été » pour obtenir des avantages pécuniaires ou des rations alimentaires, qui sont très attractifs en période d'extrême pauvreté. D'autres sont enlevés, menacés ou contraints. Selon des témoignages, dans les camps d'été « fermés » les enfants sont isolés de leur famille et du monde extérieur pendant deux semaines. Ils sont endoctrinés afin d'adhérer à l'idéologie du jihad, et formés aux techniques de combat. Des signalements font état d'enfants abattus par les forces houthistes dans les camps d'été ou à proximité, ou soumis à des violences sexuelles, y compris des viols, dans ces camps. Les mariages d'enfant, les mariages précoces et les mariages forcés seraient encouragés pour renforcer l'adhésion à la cause houthiste. L'État yéménite a informé le Groupe d'experts que le 4 avril 2024, les autorités houthistes de la province d'Amran avaient émis, à l'intention de tous les ministères de l'éducation, une directive imposant la mise en place rapide de camps d'été supplémentaires. Selon certaines informations, en juin 2024, cette province comptait au moins 696 camps d'été ouverts et 5 camps d'été fermés, totalisant 15 000 élèves inscrits.

152. Des sources confidentielles ont informé le Groupe d'experts d'une intensification du recrutement de filles par les Zeïnabiyat ou pour le compte de ces dernières, souvent au moyen d'enlèvements et de menaces. Certaines filles qui ont été enlevées seraient exploitées pour des travaux domestiques forcés, tandis que d'autres seraient victimes de violences sexuelles.

153. L'État yéménite a informé le Groupe d'experts qu'avaient été signalés 3 298 cas de recrutement d'enfants par les houthistes au cours du premier semestre de 2024. Ces enfants auraient servi de boucliers humains, d'espions, ou encore de main d'œuvre pour poser des mines terrestres et d'autres engins explosifs, effectuer des opérations de reconnaissance, faire la cuisine et livrer des combats. Pour la période du 15 septembre 2023 au 31 juillet 2024, des sources confidentielles ont fait état de : a) 142 cas avérés de recrutement et d'utilisation d'enfants, b) 75 morts et de 1 blessé parmi les enfants mobilisés.

E. Entrave à l'accès humanitaire ainsi qu'à l'acheminement et à la distribution de l'aide

154. La situation humanitaire au Yémen reste très préoccupante, plusieurs facteurs entravant l'accès humanitaire et la distribution de l'aide.

155. L'intégrité physique des membres du personnel humanitaire est préoccupante, tant dans les zones contrôlées par l'État yéménite que dans celles contrôlées par les houthistes. Dans le premier cas, les enlèvements par des groupes armés et le contrôle fragmenté de l'utilisation de la force créent de l'incertitude et de la peur, ce qui a des répercussions sur les services humanitaires.

156. La détention arbitraire et la disparition forcée que les houthistes ont fait subir à des membres du personnel humanitaire (voir par. 142) ont compromis les services fournis par ces derniers. Les organisations qui fournissent des services humanitaires ont informé le Groupe d'experts que, pour des raisons de sécurité, certains membres de leur personnel évitaient les zones contrôlées par les houthistes. Ceux-ci auraient

contraint des membres du personnel humanitaire placés en détention à faire des « aveux » impliquant leurs collègues. La menace de condamnation à mort et le gel des comptes bancaires ont également contraint le personnel humanitaire à partir. En outre, au début du mois d'août 2024, les houthistes ont pris le contrôle des locaux du Haut-Commissariat des Nations Unies aux droits de l'homme à Sanaa et saisi des biens, notamment des documents. Lorsque les membres du personnel et les biens de l'ONU sont ciblés, cela compromet la capacité de l'Organisation à remplir sa mission humanitaire. Cela compromet également son action politique en faveur de la paix et de la sécurité internationales. Le 17 juillet 2024, les houthistes ont exigé que les organisations internationales obtiennent une autorisation avant d'embaucher du personnel et qu'elles détaillent la structure organisationnelle, en précisant les titres fonctionnels des personnes y figurant (voir annexe 195). Grâce à cette mesure, les houthistes pourraient exercer un plus grand contrôle sur les acteurs humanitaires, notamment en ce qui concerne les bénéficiaires de l'aide humanitaire.

157. Selon les organisations qui fournissent des services humanitaires, 260 incidents ont eu des répercussions sur l'accès humanitaire et l'acheminement de l'aide au cours du deuxième trimestre de 2024, contre 140 au cours du premier trimestre. Il s'agit notamment de retards administratifs dans l'approbation des agréments permettant aux organisations non gouvernementales d'exercer leurs activités. Les organisations non gouvernementales jouant un rôle essentiel dans l'amélioration de la situation humanitaire, la longueur de la procédure d'approbation reste une préoccupation majeure dans tout le Yémen⁵⁶. Les autorités, en particulier dans les zones contrôlées par les houthistes, s'opposent fréquemment aux activités comportant la collecte de données, telles que les évaluations et les enquêtes, et les intervenants concernés sont souvent pris pour cible. Il a été rapporté que la mésinformation sur les activités de l'ONU et des organisations non gouvernementales, de même que la sous-efficacité perçue du processus d'acheminement de l'aide, alimentait la méfiance des autorités et du public. Les restrictions imposées par les houthistes en matière de liberté de circulation des femmes entravent les services qui ne peuvent traditionnellement pas être assurés par des hommes, tels que les soins prénataux. Les travailleuses humanitaires auraient réduit leurs opérations sur le terrain. La situation à Sanaa est particulièrement préoccupante par rapport à d'autres endroits, comme Ibb.

158. Des sources ont informé le Groupe d'experts que le bombardement par Israël, en juillet 2024, de réservoirs de pétrole et d'une centrale électrique près du port de Hodeïda avait détruit les réserves de carburant des acteurs humanitaires, dont une partie était destinée à des installations médicales. L'évaluation des répercussions de l'attaque est en cours. Pour éviter une nouvelle détérioration de la situation humanitaire, en particulier dans les zones contrôlées par les houthistes, il est essentiel que le port de Hodeïda continue de fonctionner.

159. Les attaques houthistes de navires commerciaux en mer Rouge (voir par. 43) ont fait augmenter les prix des marchandises et retardé l'acheminement de l'aide humanitaire.

160. Les attaques houthistes de voies de communication essentielles ont compromis encore davantage l'accès des Yéménites à l'aide humanitaire (voir par. 136, ainsi qu'annexe 189, par. 4).

⁵⁶ Les autorités de l'État yéménite et les autorités instituées par les houthistes ont approuvé 19 agréments d'organisations non gouvernementales au deuxième trimestre de 2024, contre 42 au premier trimestre.

Utilisation de plateformes de médias sociaux par les houthistes

161. Le Groupe d'experts a observé que les houthistes utilisaient des plateformes de médias sociaux, en violation du régime de sanctions prévu par la résolution [2140 \(2014\)](#), pour vendre des armes, solliciter un soutien financier et idéologique, et faire l'apologie de la haine nationale, raciale ou religieuse qui constitue une incitation à la discrimination, à l'hostilité ou à la violence (voir par. 13, 90 et 112, ainsi qu'annexes 194 et 196 à 201).

VII. Recommandations

162. Le Groupe d'experts recommande que le Conseil de sécurité :

- a) Condamne l'utilisation par les houthistes de plateformes de médias sociaux en violation du régime de sanctions prévu par la résolution [2140 \(2014\)](#) (voir par. 150 et 161) ;
- b) Demande aux médias sociaux concernés de prendre des mesures urgentes et appropriées afin que leurs plateformes ne soient pas utilisées par des personnes ou des entités en violation du régime de sanctions prévu par la résolution [2140 \(2014\)](#) (voir par. 150 et 161) ;
- c) Demande aux houthistes qu'ils s'abstiennent de geler et de confisquer, arbitrairement et par la force, les biens de personnes et d'entités et qu'ils libèrent sans délai les biens saisis ou confisqués et en indemnisent les propriétaires légitimes pour les pertes subies (voir par. 114 et 137) ;
- d) Demande aux groupes armés régionaux de s'abstenir de fournir une assistance militaire ou financière aux houthistes en violation du régime de sanctions, et exprime son intention d'appliquer des sanctions à ceux qui se livrent à de tels agissements (voir par. 11 à 22) ;
- e) Envisage d'élargir le Groupe d'experts sur le Yémen en lui adjoignant un membre supplémentaire, chargé de surveiller les activités maritimes, notamment la contrebande, qui menacent la paix et la sécurité au Yémen ;
- f) Engage tous les États Membres à fournir des ressources suffisantes pour renforcer la capacité du Mécanisme de vérification et d'inspection des Nations Unies, et faciliter ainsi le dédouanement des cargaisons commerciales ainsi que la surveillance des violations potentielles de l'embargo sur les armes et des mesures de sanction financière (voir par. 97) ;
- g) Exhorte tous les États Membres à fournir des ressources suffisantes pour renforcer la capacité de l'État yéménite à prévenir les marées noires en mer Rouge et à y faire face (voir par. 57) ;
- h) Invite les États Membres à contribuer à la coopération internationale pour renforcer la lutte antimines au Yémen et à fournir un soutien financier durable aux organisations non gouvernementales opérant dans le domaine du déminage (voir par. 134) ;
- i) Encourage les États Membres ainsi que les organisations internationales, régionales et sous-régionales à renforcer la collaboration afin d'enrayer l'intensification du recrutement et de l'utilisation d'enfants dans les zones contrôlées par les houthistes (voir par. 150 à 153), notamment :
 - i) en promouvant les interventions communautaires axées sur les conséquences à moyen et long termes de l'implication des enfants dans le conflit

armé, et en favorisant ainsi un changement social mené par les populations locales ;

ii) en élaborant des stratégies durables de génération de revenus pour les familles dont les enfants sont particulièrement vulnérables ;

iii) en mettant en œuvre des stratégies efficaces de réintégration des enfants démobilisés, en particulier en ce qui concerne la prévention de la remobilisation.

j) Exhorte la communauté internationale à aider, le cas échéant (voir par. 144), les autorités yéménites à :

i) intensifier leurs activités de surveillance et d'enquête afin d'examiner en détail et de recenser les violations du droit à un procès équitable qui sont perpétrées dans les zones contrôlées par les houthistes, où ces violations aboutissent souvent à des condamnations à mort ;

ii) renforcer leurs moyens d'enquête, leurs infrastructures judiciaires, ainsi que leurs ressources humaines et matérielles.

163. Le Groupe d'experts recommande que le Comité envisage de publier un communiqué de presse dans lequel il condamne le recours à la mésinformation et à la propagande visant à permettre que soient commises au Yémen des violations du droit international humanitaire et du droit des droits humains, notamment la détention arbitraire de membres du personnel humanitaire et de dissidents politiques, et dans lequel il exhorte toutes les parties prenantes à mener activement et à soutenir la lutte contre la mésinformation (voir par. 142 et 150).

Annex 201: "X" accounts identified by the Panel as used by the Houthis to indoctrinate the youth	528
List of Acronyms	529

Annex 1: Methodology

1. The Panel uses satellite imagery of Yemen procured by the United Nations from private providers to support investigations. It also uses commercial databases recording maritime and aviation data and mobile phone records. Public statements by officials through their official media channels are accepted as factual unless contrary facts are established. While it has been as transparent as possible, in situations in which identifying sources would expose these sources or others to unacceptable safety risks, the Panel does not include identifying information.
2. The Panel reviews social media, but no information gathered is used as evidence unless it could be corroborated using multiple independent or technical sources, including eyewitnesses, to appropriately meet the highest achievable standard of proof.
3. The spelling of toponyms within Yemen often depends on the ethnicity of the source or the quality of transliteration. The Panel has adopted a consistent approach in the present update.
4. The Panel places importance on the rule of consensus among the Panel members and agrees that, if differences and/or reservations arise during the development of reports, it would only adopt the text, conclusions, and recommendations by a majority of the members. In the event of a recommendation for designation of an individual or a group, such recommendation would be done based on unanimity.
5. The Panel has offered the opportunity to reply to Member States, entities and individuals involved in most incidents that are covered in this report. Their response has been taken into consideration in the Panel's findings. The methodology for this is provided in appendix A.

Appendix A ‘The opportunity to reply’ methodology used by the Panel

1. Although sanctions are meant to be preventative not punitive, it should be recognized that the mere naming of an individual or entity⁵⁷ in a Panel’s public report, could have adverse effects on the individual. As such, where possible, individuals concerned should be provided with an opportunity to provide their account of events and to provide concrete and specific information/material in support. Through this interaction, the individual is given the opportunity to demonstrate that their alleged conduct does not fall within the relevant listing criteria. This is called the ‘opportunity to reply’.

2. The Panel’s methodology on the opportunity to reply is as follows:

- (a) Providing an individual with an ‘opportunity to reply’ should be the norm;
- (b) The Panel may decide not to offer an opportunity of reply if there is credible evidence that it would unduly prejudice its investigations, including if it would:
 - (i) Result in the individual moving assets if they get warning of a possible recommendation for designation;
 - (ii) Restrict further access of the Panel to vital sources;
 - (iii) Endanger Panel sources or their relatives or Panel members;
 - (iv) Adversely and gravely impact humanitarian access for humanitarian actors in the field;
 - (v) For any other reason that can be clearly demonstrated as reasonable and justifiable in the prevailing circumstances.

3. If the circumstances set forth in 2 (b) do not apply, then the Panel should be able to provide an individual an opportunity to reply.

4. The individual should be able to communicate directly with the Panel to convey their personal determination as to the level and nature of their interaction with the Panel.

5. Interactions between the Panel and the individual should be direct, unless in exceptional circumstances.

6. In no circumstances the third parties, without the knowledge of the individual, can determine for the individual its level of interaction with the Panel.

7. The individuals, on the other hand, in making their determination of the level and nature of interaction with the Panel, may consult third parties or allow third parties (for example, legal representative or their government) to communicate on their behalf on subsequent interactions with the Panel.

⁵⁷ Hereinafter, the term individual will be used to reflect both individuals and entities.

Appendix B: Investigations methodology on violations relating to IHL, IHRL, and acts that constitute human rights abuses

1. The Panel adopts the following stringent methodology to ensure that its investigations meet the highest possible evidentiary standards, despite it being prevented from visiting places in Yemen. In doing so it pays particular attention to the “Informal Working Group on General Issues of Sanctions Reports”, ([S/2006/997](#)), on best practices and methods, including paragraphs 21, 22 and 23, as per paragraph 14 of resolution 2564 (2021).

2. The Panel’s methodology, in relation to its investigations concerning alleged IHL, IHRL and human rights abuses, is as set out below:

(a) All Panel investigations are initiated based on verifiable information being made available to the Panel, either directly from sources or from media reports.

(b) In carrying out its investigations on the use of explosive ordnance, the Panel relies on at least three or more of the following sources of information:

- (i) At least two eyewitnesses or victims;
- (ii) At least one individual or organization (either local or international) that has also independently investigated the incident;
- (iii) If there are casualties associated with the incident, and if the casualties are less than ten in number, the Panel will endeavour to obtain copies of death certificates and medical certificates. In incidents relating to mass casualties, the Panel relies on published information from the United Nations and other organizations;
- (iv) Technical evidence, which includes imagery of the impact damage, blast effects, and recovered fragmentation. In all cases, the Panel collects imagery from at least two different and unrelated sources. In the rare cases where the Panel has had to rely on open source imagery, the Panel verifies that imagery by referring it to eyewitnesses or by checking for pixilation distortion:

a. In relation to air strikes, the Panel often identifies the responsible party through crater analysis or by the identification of components from imagery of fragmentation; and

b. The Panel also analyses imagery of the ground splatter pattern at the point of impact from mortar, artillery, or free flight rocket fire to identify the direction from which the incoming ordnance originated. This is one indicator to assist in the identification of the perpetrator for ground fire when combined with other sources of information.

(v) The utilization of open source or purchased satellite imagery, wherever possible, to identify the exact location of an incident, and to support analysis of the type and extent of destruction. Such imagery may also assist in the confirmation of timelines of the incident;

(vi) Access to investigation reports and other documentation of local and international organizations that have independently investigated the incident;

(vii) Other documentation that supports the narrative of sources, for example, factory manuals that may prove that the said factory is technically incapable of producing weapons of the type it is alleged to have produced;

(viii) In rare instances where the Panel has doubt as to the veracity of available facts from other sources, local sources are relied on to collect specific and verifiable information from the ground, for example, if the Panel wished to confirm the presence of an armed group in a particular area;

(ix) Statements issued by or on behalf of a party to the conflict responsible for the incident;

(x) Open source information to identify other collaborative or contradictory information regarding the Panel's findings.

(c) In carrying out its investigations on deprivation of liberty and associated violations, the Panel relies on the following sources of information:

- (i) The victims, where they are able and willing to speak to the Panel, and where medical and security conditions are conducive to such an interview;
- (ii) The relatives of victims and others who had access to the victims while in custody. This is particularly relevant in instances where the victim dies in custody;
- (iii) Interviews with at least one individual or organization (either local or international) that has also independently investigated the incident;
- (iv) Medical documentation and, where applicable, death certificates;
- (v) Documentation issued by prison authorities;
- (vi) Interviews with medical personnel who treated the victim, wherever possible;
- (vii) Investigation and other documentation from local and international organizations that have independently investigated the incident. The Panel may also seek access to court documents if the detainee is on trial or other documentation that proves or disproves the narrative of the victim;
- (viii) Where relevant, the Panel uses local sources to collect specific and verifiable information from the ground, for example, medical certificates;
- (ix) Statements issued by the party to the conflict responsible for the incident;
- (x) Open-source information to identify other collaborative or contradictory information regarding the Panel's findings;
- (xi) Detainees do not always have access to medical care, nor is it always possible to obtain medical reports, especially in cases of prolonged detention. Therefore, the Panel accepts testimonies received from detainees alleging that violence was used against them during detention by the detaining parties as *prima facie* evidence of torture;
- (xii) For the same reasons, medical and police reports are not required by the Panel to conclude that rape or sexual violence took place.

(d) In carrying out its investigations on other violations, including forced displacement human rights violations and abuses against migrants, or threats against medical workers, the Panel relies on information that includes:

- (i) Interviews with victims, eyewitnesses, and direct reports where they are able and willing to speak to the Panel, and where conditions are conducive to such an interview;
- (ii) Interviews with at least one individual or organization (either local or international) that has also independently investigated the incident;
- (iii) Documentation relevant to verify information obtained;
- (iv) Statements issued by the party to the conflict responsible for the incident;
- (v) Open-source information to identify other collaborative or contradictory information regarding the Panel's findings.

(e) In carrying out its investigation in respect to the recruitment of children by parties to the conflict, the Panel is particularly mindful of the risk pose by its investigations for the children and their family. The Panel also refrains from interviewing directly the victim, unless it is sure that this will not have a negative impact on them. Therefore, the Panel often relies on sources such as:

- (i) Investigations and other documentation from local and international organizations that have independently investigated the incident;
- (ii) Interviews with people and organizations providing assistance to these children;

(iii) Interviews with other people with knowledge of the violations such as family members, community leaders, teachers, and social workers.

(f) The standard of proof is met when the Panel has reasonable grounds to believe that the incidents had occurred as described and, based on multiple corroboratory sources, that the responsibility for the incident lies with the identified perpetrator. The standard of proof is “beyond a reasonable doubt”.

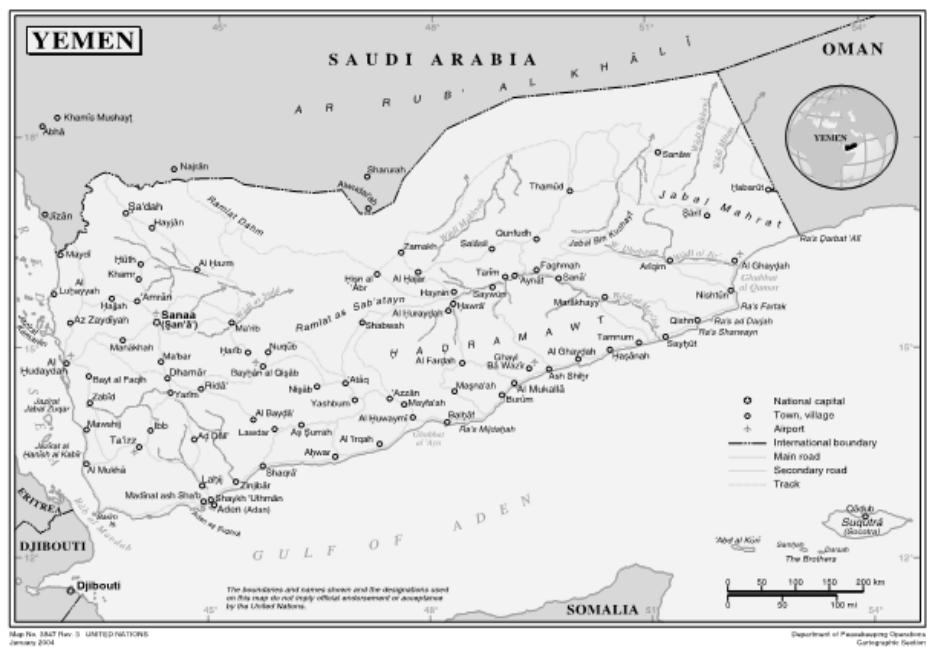

(g) Upon completion of its investigation, wherever possible, the Panel provides those responsible with an opportunity to respond to the Panel’s findings in so far as it relates to the attribution of responsibility. This is undertaken in accordance with the Panel’s standard methodology on the opportunity to reply. Generally, the Panel would provide detailed information in any opportunity to respond, including geo-locations. However, detailed information on incidents are not provided when there is a credible threat that it would threaten Panel’s sources, for example, in violations related to deprivation of liberty, violations associated with ground strikes on a civilian home, or in violations associated with children.

(h) If a party does not provide the Panel with the information requested, the Panel will consider whether this is of sufficient gravity to be considered as non-compliance with paragraph 18 of resolution 2624 (2022) and thus consideration for reporting to the Committee.

3. The Panel does not include information in its reports that may identify or endanger its sources. Where it is necessary to bring such information to the attention of the Council or the Committee, the Panel deposits such information in the custody of the Secretariat for viewing by members of the Committee.

4. The Panel does not divulge any information that may lead to the identification of victims, witnesses, and other particularly vulnerable sources, except: 1) with the specific permission of the sources; and 2) where the Panel is, based on its own assessment, certain that these individuals would not suffer any danger as a result of such disclosure of information. The Panel stands ready to provide the Council or the Committee, on request, with any additional imagery and documentation to support the Panel’s findings beyond that included in its reports. Appropriate precautions will, however, be taken to protect the anonymity of its sources.

Annex 4: the Houthi threats to KSA

On 7 July 2024, the Houthis released video footage showing Aramco oil facilities located in Jizan, KSA. The content of the message accompanying these videos is unambiguously a threat to these installations (“*The coordinates are ready, the missile force, and the unmanned air force are ready to deliver a fatal blow to the Saudi enemy*”).

Figure 4.1

Houthis affiliated media threatening to target Saudi refineries in Jizan

Disclaimer: The boundaries and names shown and the designations used on this map do not imply official endorsement or acceptance by the United Nations.

On 25 March 2024, in an interview with the Houthi-run Al-Masirah television channel, ahead of the ninth anniversary of the Saudi-led military campaign against Yemen, Mohammed Ali al-Houthi, a member of the group's Supreme Political Council warned KSA that the country “*would be a target for us if they provided aid and support to the US-British aggression against Yemen*”.⁵⁸

Following the Houthi leader's threats to escalate military action against KSA, the Houthi-affiliated Yemeni military media has started posting posters of key Saudi sea and airports with a hashtag “Try it”.

Figure 4.2:
Photos of vital Saudi installations

Source: <https://x.com/zy08fv82LGn4dH3/status/1810016373877494252>

Saudi Aramco installations have already been targeted by the Houthis in June 2021 (S/2022/50, paras. 47, 59, and annex 16), in September 2019 (S/2020/326, para. 54., and annex 14), and in December 2015 (S/2018/193, table 42.1). In the immediate aftermath of the September 2019 attack, Saudi Aramco's daily oil production fell from 9.8 million barrels to about 4.1 million barrels, which is a production loss of almost 60 percent overnight. This reduction represents about five percent of global oil production.

Al-Houthi, al-Hamidawi stress coordination between 'Axis of Resistance'**

24 May 2024

Houthi leader and Kata'ib Hizballah chief discuss during a phone call on the 'Axis of Resistance' operations in support of Gaza.

The leader of the Yemeni Ansar Allah movement in Yemen, Sayyed Abdul Malik al-Houthi, emphasized on Friday that **coordination among members of the 'Axis of Resistance' in the region will increase the impact of their operations against the Israeli occupation entity**.

His remarks came during a phone call with the Secretary-General of the Islamic Resistance, Kataib Hezbollah in Iraq, Abu Hussein al-Hamidawi.

For his part, al-Hamidawi praised the military operations of the Yemeni forces, which "have significantly contributed to imposing a blockade on Israeli maritime navigation." He also stressed the need to maintain high readiness and coordination among the Axis of Resistance forces, especially between Iraq and Yemen, to support the Palestinian people.

Since the Israeli genocidal war on Gaza began last October, the Axis of Resistance factions initiated support fronts against the occupation entity, which included over 1,500 operations combined.

Iraq's Kata'ib Hizballah vows resolute support for Yemen after US-British aggression

Press TV (Iran), Saturday, 01 June 2024 4:02 PM

Iraq's anti-terror group Kata'ib Hizballah has assured Yemeni people and fellow Ansarullah resistance movement that it will continue to give its unwavering support for the Arab nation in the struggle against the US-British maritime coalition.

In a statement, the group highlighted the failure of colonial powers in preventing Yemeni strikes from continuing military operations against Israeli-owned merchant vessels or commercial ships affiliated to the Tel Aviv regime in support of Palestine.

"The latest US-British aggression against the Yemeni nation came in light of the arrogant powers' disappointment at breaking the maritime blockade of Israel [in the Red Sea and the Arab Sea].

"We reiterate that enemies will receive many blows from us. We will not hesitate to give unwavering support to our Yemeni brethren in the battle between the truth and falsehood," Kata'ib Hezbollah pointed out.

The spokesman for the Yemeni Armed Forces announced on Friday that the country's naval units had launched a missile attack on a United States aircraft carrier in the Red Sea in response to deadly US and British strikes on Yemen.

Brigadier General Yahya Sarea said in a statement that the attack was "in response to last night's multiple airstrikes launched by the US-British coalition" against positions in the Yemeni Red Sea port city of Hudaydah, the capital Sana'a, and the southwestern province of Ta'izz.

He added that Yemeni forces "will not hesitate to respond directly and immediately to every new aggression on Yemeni territory by targeting all sources of threat and all hostile American and British targets in the Red Sea and Arabian Sea."

Abu Ali Alaskari, Kata'ib Hizballah, launches fundraising campaign for Houthis

Appendix A

Unofficial translation for Abu Ali Alaskari's Tweet

Abu Ali Al-Askari

In His name Almighty

The victories achieved by the axis of goodness and faith over the axis of evil and tyranny, especially over the rivals of Saudi Arabia and the Emirates, is a matter of pride and pride. As we see the cracking of these evil states, and the clear signs of their imminent disintegration and collapse, we must be fully prepared in anticipation of any emergency or surprise in the region, and from here we emphasize the following:

First: The policy of mixing the cards adopted by the election riggers and the corrupt will not work, the latest of which is targeting Baghdad Airport with missiles, which requires the loyal leaders of the security services, and the security services of the Popular Mobilization Forces. Reveal these mercenaries and who standing behind them.

Second: The hostile actions that have begun to be repeated in the western provinces, and which target most of the Iraqi security services, are behind senior leaders in the current government, and the loyal ones must expose them to public opinion and bring them to justice.

Third: In fulfilment of the legitimate duty and in support of the oppressed, the Islamic Resistance/Hezbollah Brigades donated an amount of one billion Iraqi dinars in support of the “Your Money” campaign, marches against Al Zayed and Al Salul, which is led by a group of zealous Iraqi youth. An invitation to all honorable people to contribute by donating to this blessed campaign in order to clear their conscience and support the oppressed Yemeni people.

28 January 2022

Source: <https://justpaste.it/b11p9>

Article published on 1 February 2022 by the Washington Institute stating that Kata'ib Hizballah (KH) launched a fundraising campaign purporting to help the Yemeni Houthi movement acquire more drones

The Iran-backed militia tried to make its solo effort to boost the Houthi drone arsenal look like a widely coordinated and highly popular campaign, whereas it was anything but

On January 23, **Kataib Hezbollah (KH) launched a fundraising campaign purporting to help the Yemeni Houthi movement acquire more drones** intended for attacks against the United Arab Emirates. The campaign was advertised as a "grassroots" initiative and named hamlat shabab al-Iraq (Iraqi youth campaign). But clear and convincing evidence suggests it was in fact a KH-organized initiative and not that successful.

The campaign was launched by Amir al-Musawi, the spokesman for Sharia Youth Gathering (Tajamma Shabab al-Sharia, or TSS), an umbrella organization controlled by KH. In a video clip circulated on Iraqi muqawama (resistance) social media, Musawi stated: "After a series of continuous assaults by those who made the Zionist dream come true [referring to the Emiratis] against the oppressed and victorious Yemeni people, the honorable sons of Iraq had to...support their Yemeni brothers. Therefore, we will launch a big campaign under the slogan amwalokum mosayarat [your money will turn to drones]...to gather money for the Yemeni people to buy drones—drones that will be Ababil and whips to punish...al-Salul and the House of Zayed [the UAE ruling family]." ("Al-Salul" is a derogatory term used to describe the rulers of Saudi Arabia. "Ababil" refers to the miraculous flock of birds described in the Quran as protecting the Kaaba by dropping stones on an army invading Mecca. The Musawi clip was posted with two mobile numbers for people to donate money.

Source: <https://www.washingtoninstitute.org/policy-analysis/kataib-hezbollah-behind-grassroots-iraqi-fundraising-yemen>

Figure 7.2

#Iraq_Youth_Campaign

#Your _ money _ marches

Source: <https://t.me/qodsana/6201>

Although TSS social media accounts did not post the clip itself, the organization's Telegram channel was the most active in the campaign. TSS also produced video clips showing young men erecting stands in the street with boxes for people to donate (Figure 7.3).

Figure 7.3
TSS video clips promoting the fundraising campaign, 27 January 2022

Other KH social media channels actively advertised the campaign as well. Tahalof Thawrat al-Ishrin al-Thaniyah (Alliance of the Second Revolt of 1920) — a tribal group that appears to be tied to KH based on the content of its material) — was among the small number of Telegram channels posting video clips promoting the fundraising campaign. Some of these clips were reposted by TSS (Figure 7.4).

Figure 7.4
TSS reposts Tahalof Thorat al-Ishrin al-Thaniya video clip, 30 January 2022

Source: <https://t.me/sayhgg/228>

Additionally, some of the graphics used in the campaign clearly indicate that KH was the organizer. Mido, the tag name for one of the main *muqawama* graphic designers, posted an image featuring a fighter wearing a uniform that resembles KH's signature attire: a boonie hat and a military chest name tape showing the "313" nomenclature, a practice that is closely and almost exclusively associated with KH personnel (Figure 7.5).

Annex 8: List of Houthi combatants who were killed in the US airstrike in Iraq

An Iraqi journalist revealed a list of 11 dead people who were killed in the US raid that targeted a building in the Jurf al-Sakhr area south of the Iraqi capital, Baghdad.

Figure 8.1 (left), and 8.2 (right)

List of names of Houthi soldiers who were allegedly killed in the US airstrike

The list published by Iraqi journalist Othman al-Mukhtar includes the names of four of the dead who are Iraqi nationals, while seven are members of the Houthi militia who were sent to Iraq as militia delegates in the joint operations room between the Shiite militias affiliated with Iran.

While sources had revealed a few days ago the killing of the Houthi leader (Brigadier General) Hussein Abdullah Mastour al-Shaabab, the list includes six other militia members alongside him.

According to the Iraqi journalist "al-Mukhtar", who is interested in tracking the movements of the armed Shiite militias, the seven Houthi members "died with the Hezbollah Brigades militia affiliated with Iran, which occupies Jurf al-Sakhr and displaced about 200,000 Sunni Iraqis from its people."

Al-Mukhtar quoted his sources as saying that the dead were buried in the "Wadi al-Salam" cemetery in Najaf the day before yesterday, Monday. Most of the Houthi dead are from Saada Governorate/Haydan District. He pointed out that the dead were in the coordination room between several Iraqi militias, most notably "Kata'ib Hezbollah", "Al-Nujaba", and "Ansar Allah Al-Awfiya", and the Houthi militia.

In more details he mentioned about the nature of the group that the Houthi militia delegated to Iraq, he stated that the Houthi group that was killed in the American strike works in the field of fixed-wing suicide drones (operation and location determination) GPS.

He pointed out that they do not reside in the targeted location, but in the Al-Jadriya neighborhood, but the strike was timed shortly after they arrived at the building. The names of the Houthi militia members who were killed in the "Jurf Al-Sakhr" raid according to the document published by Othman Al-Mukhtar, which is a handwritten list:

Hussein Abdullah Mastour Al-Shaabab
 Ahmed Bashir Kazem Al-Shaabab
 Ali Al-Muathra Al-Houthi
 Hassan Mohsen Al-Youssef
 Ali Sayyah Alaa Al-Din
 Abdullah Hussein Al-Astar
 Abdulmalik Ismail

The Iranian Tasnim News Agency confirmed that Houthi commander (Brigadier general) Hussein Mastoor was killed while on a mission outside Yemen. The agency reported that Mastoor died during the recent U.S. airstrikes in Iraq.

He was initially announced killed while fighting alongside Hezbollah in Southern Lebanon.

Annex 9: Issuance of passports by the Houthis

The Panel's investigations revealed that the Houthis issue counterfeit⁵⁹ passports to people who act on their behalf, for their support or under their control. These people are tasked with the procurement and/or transfer of illicit goods or weapons or they travel abroad to participate in military training (para. 103 and para. 111). Foreign trainers and advisors travelling to Yemen are purportedly also provided with Yemeni passports (para. 14).

According to GoY sources, the opening of the Sana'a airport in connection with Houthis' issuing of passports is a factor aggravating the security situation in Yemen. According to GoY sources, the passports issued by the Houthis are not printed in accordance with standards adopted by the GoY.

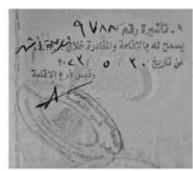

The Panel received information from relevant GoY sources that ten Yemeni nationals allegedly belonging to the Houthis were arrested on 3 August 2023 at Shehen border post. According to confidential sources, these detainees are on the list of Houthis' prisoners list, and negotiations on a possible prisoner swap are underway. The verification of the passports, in connection with investigations carried out by the relevant GoY authorities, indicates that the passports were issued by the Houthis in Sana'a, and fake identities were mentioned in the passports. According to the analysis carried out by the Panel from the passports and visa stamps, they travelled purportedly from Yemen to Jordan, then to Oman, from where they returned and then were arrested by the GoY border authorities on 3 August 2023.

However, Yemeni authorities consider that these individuals received military trainings in Iran. The detainees, however, stated that the purpose of their travel to Iran was to receive a 40-day long training on aviation safety and regulations, such as passengers and inspection procedures, while admitting to travelling with fake, Houthi-issued passports. Notably, two passports seized from two detained persons also had visa stamps indicating their travel to Syria, and surprisingly, both had the same visa number. Further, there were entry and exit stamps of Omani and Jordanian authorities. The Panel sent a letter to the Syrian Arab Republic, requesting verification of the discrepancies noticed by the Panel, including the authenticity of the visas, and related travel dates.

Islamic resistance in Iraq

2024-6-12

In the name of God, the most gracious, the most merciful

[Indeed, God loves those who fight in His cause in array, as if they were a solid building.]

In continuation of our approach to resisting the occupation and supporting our people in Palestine, and in response to the massacres committed by the usurping entity against civilians, including children, women and the elderly, the Islamic Resistance in Iraq carried out two joint military operations with the Yemeni armed

forces. The first targeted a vital target in the city of Ashdod with missiles, and the second targeted an important target in the city of Haifa by drone. The Islamic Resistance confirms that operations are continuing to destroy enemy strongholds at an increasing pace.

(And victory is only from God. Indeed, God is Mighty, All-Wise)

Meeting held on 17 May 2023 with the Secretary-General of the Sayyid Martyrs Brigades (PMF), Hajj Abu Alaa al-Wala'i, the envoy of Mr. Abdul Malik Badr al-Din al-Houthi and the representative of the Houthis in Iraq, Mr. Ahmed al-Sharafi.

Al-Sharafi conveyed the greetings of the Commander-in-Chief of the Yemeni Ansar Allah movement, Mr. Abdul-Malik Al-Houthi, and expressed his interest in the issues in the region, and the two parties discussed the latest developments related to the Syrian and Sudanese events. Iraqis on social media welcomed Al-Sharafi's visit to Iraq, and the importance of strengthening ties between the parties of the axis of resistance in the region and the world.

Annex 15: Training provided to the Houthis in southern Lebanon by Hezbollah

Confidential sources also informed the Panel about military training provided to the Houthi combatants by Hezbollah in their training ground located in Qalaat Jabour, southern Lebanon. The Panel notes that on 21 May 2023, three Houthi journalists, allegedly working with the Houthi media Al-Masirah, were present during the demonstration of an exercise simulating an attack against an Israeli settlement conducted by the Hezbollah. The Panel notes that Houthi combatants often conduct similar trainings.

Trainings, as well as other support provided by the Hezbollah, are supervised by the Houthis' liaison office, located in Beirut. Ammar al-Hamzi, who is the general manager of the Beirut-based Houthi media *al-Masirah* and who works as the Houthi representative in Lebanon. He is reportedly in direct contact with Hezbollah's political and military leadership.

Annex 18: Article published on 9 June 2024 by the Iranian media Mehr News Agency, in which the Houthi Brigadier-General Hamid Abdul Qader Antar, advisor to the Houthi Prime Minister, mentions about the coordination with the ‘Axis of Resistance’

وكالة مهر للأنباء—وردة سعد: يواجه اليمن معارك مستمرة مع قوى الاستكبار العالمي، ضمن إطار المساندة للمقاومة الفلسطينية ودعاً لاهالي غزة، فحقق اليمن انجازات وبطولات ادشت العالم بالتنسيق مع محور المقاومة، والمملفت في الآونة الأخيرة تنفيذ عملية مشتركة مع المقاومة العراقية ضد اهداف في كيان العدو.

حول هذه العناوين، أجرت مراسلة وكالة مهر للأنباء، الأستاذة وردة سعد، حواراً صحيفياً مع مستشار رئاسة الوزراء ورئيس

الحملة الدولية لكسر الحصار عن مطار صنعاء الدولي العميد "محمد عبد القادر عتبر"، وجاء من الحوار على النحو التالي:

منذ أشهر عديدة يواصل الجيش اليمني عمليات الاستدلال للمقاومة الفلسطينية وهالي غزة بالضغط على الاحتلال ومحاصرهه اقتصادياً.. ولا يزال الجدل قائما حول الانحراف الفاعلي لهذا الجهد العسكري المميز.. فبتقديركم كيف أثرت هذه العمليات ضد السفن المتوجهة لموانئ الاحتلال على الكيان الإسرائيلي ؟

اليمن أعلن التدخل العسكري مناصرة واستناداً لعملية طوفان الأقصى، فمنذ اندلاع معركة طوفان الأقصى تم التدخل العسكري باليمن وتم اطلاق عدد من الصواريخ البالستية والمسيرات الى فلسطين المحتلة وفرض الجيش اليمني والقوة الصاروخية حصار خانق على الكيان الصهيوني في البحر الاحمر والبحر العربي والمحيط الهندي وتوسعت خارطة بذلك الهدف الى البحر الابيض المتوسط وتم استهداف السفن الصهيونية والأمريكية والبريطانية في البحر الاحمر والمحيط الهندي المساندة للكيان اللقيط ومن خلال الحصار الخانق في البحر الاحمر تم افراج السفن في ميناء ايلات وتم محاصرة الكيان اقتصادياً.

إلى جانب القرار اليمني يمنع مرور السفن المتوجهة إلى موانئ الاحتلال رداً على العدوان الوحشي على غزة، يواصل الشعب اليمني مظاهراته المليوية، لإبداء الدعم والتثبيت والتضامن مع الشعب الفلسطيني، كيف فهم هذا الحراك الذي ليس له مثيل عند الشعوب العربية الأخرى؟ ولماذا الشعب اليمني تحدده؟

بالاضافة الى التدخل العسكري من خلال جبهة الاستدلال في اليمن لفلسطين المحتلة هناك حراك سياسي وجمهوري يخرج ابناء الشعب اليمني ملائين في كل مجتمع في كافة المحافظات رافعين اعلام فلسطين وشعار الصرخة في وجه قوى الاستكبار هذا الحراك الجماهيري اعطى زخم ثوري لشعوب واحرار العالم وانتفض الملائين في كافة شعوب واحرار العالم لمناصرة فلسطينيين الذين اتخذوا من اليمن مصدر الهم.

في خطوة جريئة اضافية اعلنت القيادة اليمنية الشجاعة عن توسيع مدى عملياتها لحصر الموانئ الصهيونية الى البحر المتوسط.. بينما يفتح بعض العرب والمسلمين الابواب الخلفية للتوعويض على الاحتلال وتزويده بحاجاته الاقتصادية.. هل وصلت الامة الى هذا الحد من الانقسام؟ ولماذا برأيك؟

نعم اليمن وسع من خارطة بنك الاهداف من خلال عمليات العسكرية في البحر الاحمر والمحيط الهندي والبحر الابيض المتوسط واعلن حرب كبرى شاملة على الكيان الصهيوني وقوى الاستكبار حتى يتم وقف العدوان على غزة ودخول المساعدات الى قطاع غزة، هذا التحرك الكبير لليمن هو من واجب وطني واخلاقي وقومي وديني لمناصرة فلسطين خصوصا عندما نشاهد الجرائم الذي يرتكها الكيان بحق المدنيين والاطفال والنساء وهدم المنازل على ساكنيها وتدمير البنية التحتية في ظل صمت عربي ودولي واممي مطبق من المجتمع الدولي والعالم فكان من واجب اليمن التحرك واسناد ومناصرة شعب فلسطين.

في اخر انجازاته الثورية والعملية لتشديد الخناق على كيان الاحتلال اعلن اليمن عن عمليات مشتركة مع المقاومة العراقية لغزو موقع داخل كيان الاحتلال.. كيف تنظرون الى هذه الخطوة المتقدمة من تنسيق بين قوى محور المقاومة؟ وكيف يمكن ان تؤثر هذه الخطوة على كيان الاحتلال؟

نعم هناك تنسيق بين اليمن ودول المحور وتم تشكيل غرف عمليات مشتركة من اجل ان تكون الضربات العسكرية في وقت واحد للكيان الصهيوني تسبب له شلل وارباك وهذا يشكل ضغط على الكيان الصهيوني مما يجعله على وقف العدوان على غزة وتم تغيير قواعد الاشتباك من اجل فرض واقع جديد ومعادله عسكرية جديدة.

بعض اليمنيين في المناطق المحشلة والخاضعين لادارة المخابرات الاجنبية، يخرجون بين الحين والآخر للتثبيش على ما يقوم به الجيش اليمني والموقف القومي والاسلامي المتقدم لقيادة السيد عبد الملك الحكيمية.. كيف تنظرون الى استجابة الشعب اليمني في كل المناطق لمواقف صنعاء؟ وما الذي يخشاه اولئك المعارضون من نصرة شعب فلسطين؟

بالنسبة للمرتزقة هم ادوات لصالح قوى العدوان واتخذت منهم دول العدوان مطيه من اجل شرعنه واحتلال اليمن وكي لا تتم ملاحقة قوى العدوان واعتبارهم مجرمي حرب امام المحاكم الدولية ، كذلك دول العدوان هم ادوات لقوى الاستكبار وهم من ينفذ المشاريع الامريكية في دول المنطقة، لذلك ليس غريب عليهم التشويش والتقليل من القدرات العسكرية اليمنية التي فرضت واقع جديد ومعادله عسكرية جديد سبب للعدو شلل وارباك.

اليمن بموقفه المتقدمة لنصرة الشعب الفلسطيني ومساندة مقاومته، يضع نفسه في مواجهة القوة البحرية الاميركية وحلفائها الغربيين، فهل تعتقدون ان الامر قد يعرض اليمن وشعبه لمخاطر اضافية؟ وهل يمكن للجيش اليمني وانصار الله ان يواجهوا قوة بحجم القوة الاميركية؟

اليمن يواجه معركة عسكرية مباشر مع قوى الاستكبار العالمي، لكن اليمن استطاع ان يكسر شوكة قوى الاستكبار في البحر الاحمر والمحيط الهندي والبحر المتوسط وكسر هيمنة وغطرسة قوى الاستكبار، لا تستطيع اي قوة في العالم ان تكسر شوكة اليمن او تأي ذرائعه لأن ثورة اليمن هي امتداد ثورة ابا الاحرار ابي عبد الله الحسين الذي قاد اعظم ثورة في تاريخ الحياه البشرية واسقط عروش الطفاة والظالمين والمستكبارين وانتصر الدم على السيف من اليمن سبتم تغير وجه المنطقة والعالم، ومن اليمن ستخرج راية اليمني، ومن يتخد من الامام الحسين عليه السلام مصدر الهام لا يعرف الهزيمة اطلاقا.

Appendix A

Unofficial translation of the article published on 9 June 2024 by the Iranian media Mehr News Agency, in which the Houthi Brigadier-General Hamid Abdul Qader Antar, advisor to the Houthi Prime Minister, mentions about the coordination with the ‘Axis of Resistance’

Yemeni Brigadier-General Hamid Abdul Qader Antar told, “No force in the world can break the power of Yemen... we coordinate with the axis of resistance and the rules of engagement have been changed”

The advisor to the Prime Minister, Yemeni Brigadier General Hamid Abdul Qadir Antar, confirmed that “there is coordination between Yemen and the Axis countries and joint operations rooms have been formed in order for military strikes to be carried out simultaneously against the Zionist entity, forcing it to stop the aggression against Gaza, and the rules of engagement have been changed.” In order to impose a new reality and a new military equation.”

Mehr News Agency - Warda Saad: Yemen faces ongoing battles with the forces of global arrogance, within the framework of support for the Palestinian resistance and in support of the people of Gaza. Yemen achieved achievements and heroism that astonished the world in coordination with the axis of resistance, and what is striking recently is the implementation of a joint operation with the Iraqi resistance against targets in the enemy entity. .

Regarding these headlines, Mehr News Agency correspondent, Ms. Warda Saad, conducted a press interview with the advisor to the Prime Minister and head of the international campaign to break the siege of Sana'a International Airport, Brigadier General Hamid Qadir Antar. The text of the interview was as follows:

For many months, the Yemeni army has continued its support operations for the Palestinian resistance and the people of Gaza by pressuring the occupation and besieging it economically. Controversy still exists about the actual impact of this distinguished military effort. In your estimation, how did these operations against ships heading to the occupation’s ports affect the Israeli entity?

Yemen announced military intervention in support of and support for the Al-Aqsa Flood Operation. Since the outbreak of the Al-Aqsa Flood Battle, there has been military intervention with Palestine, and a number of ballistic missiles and marches were launched into occupied Palestine. The Yemeni army and missile force imposed a stifling siege on the Zionist entity in the Red Sea, the Arabian Sea, and the Indian Ocean, and the bank's map expanded. The targets reached the Mediterranean Sea, and Zionist, American, and British ships were targeted in the Red Sea and Indian Ocean, which supported the bastard entity. Through the stifling siege in the Red Sea, the ships were emptied in the port of Eilat, and the entity was besieged economically.

In addition to the Yemeni decision to prevent the passage of ships heading to the occupation ports in response to the brutal aggression against Gaza, the Yemeni people continue their million-man demonstrations, to express support, support and solidarity with the Palestinian people. How do we understand this movement that has no parallel among other Arab peoples? Why the Yemeni people specifically?

In addition to the military intervention through the Support Front in Yemen for occupied Palestine, there is a political and mass movement that brings out millions of Yemeni people every Friday in all governorates, raising the flags of Palestine and the slogan of screaming in the face of the forces of arrogance. This mass movement gave revolutionary momentum to the peoples and free people of the world, and millions rose up in all peoples. And the free people of the world to support Palestine, who took Yemen as a source of inspiration.

In an additional bold step, the courageous Yemeni leadership announced the expansion of the scope of its operations to blockade Zionist ports to the Mediterranean. While some Arabs and Muslims are opening the back doors to compensate the occupation and provide it with its economic needs. Has the nation reached this point of division? Why do you think?

Yes, Yemen has expanded its map of the target bank through military operations in the Red Sea, the Indian Ocean, and the Mediterranean Sea, and has declared a major comprehensive war against the Zionist entity and the forces of arrogance until the aggression against Gaza is stopped and aid enters the Gaza Strip. This major move by Yemen is a national, moral, and national duty. My religion is to support Palestine, especially when we see the crimes committed by the entity against civilians, children, and women, the demolition of homes for their residents, and the destruction of infrastructure, in light of the deafening Arab, international, and international silence of the international community and the world. It was Yemen's duty to move, support, and advocate for the people of Palestine.

In its latest revolutionary and practical achievements to tighten the noose on the occupying entity, Yemen announced joint operations with the Iraqi resistance to strike sites within the occupying entity. How do you view this advanced step of coordination between the forces of the axis of resistance? How might this step affect the occupation entity?

Yes, there is coordination between Yemen and the Axis countries, and joint operations rooms were formed in order for simultaneous military strikes on the Zionist entity to cause it paralysis and confusion. This puts pressure on the Zionist entity, forcing it to stop the aggression against Gaza, and the rules of engagement were changed in order to impose a new reality and its equation. New military.

Some Yemenis in the occupied areas, who are under the administration of foreign intelligence, come out from time to time to confuse what the Yemeni army is doing and the advanced national and Islamic position of the wise leadership of Mr. Abdul Malik. How do you view the response of the Yemeni people in all regions to Sana'a's positions? What do those who oppose supporting the people of Palestine fear?

As for the mercenaries, they are tools for the forces of aggression, and the aggression countries took them as a vehicle in order to legitimize and occupy Yemen, so that the forces of aggression would not be pursued and considered war criminals before international courts. Likewise, the aggression countries are tools for the forces of arrogance, and they are the ones who implement American projects in the countries of the region, so it is not strange for them to cause confusion. Reducing the Yemeni military capabilities imposed a new reality and a new military equation that caused the enemy paralysis and confusion.

Yemen, with its advanced positions to support the Palestinian people and support their resistance, is putting itself in the face of the American naval force and its Western allies. Do you think that the matter might expose Yemen and its people to additional risks? Can the Yemeni army and Ansar Allah confront a force the size of the American force?

Yemen is facing a direct military battle with the forces of global arrogance, but Yemen was able to break the strength of the forces of arrogance in the Red Sea, the Indian Ocean and the Mediterranean and break the dominance and arrogance of the forces of arrogance. No force in the world can break the strength of Yemen or bend its arm because the Yemen revolution is an extension of the revolution. The father of the free, Abu Abdullah Al-Hussein, who led the greatest revolution in the history of human life and brought down the thrones of tyrants, oppressors, tyrants and arrogant people, and blood triumphed over the sword. From Yemen, the face of the region and the world will be changed, and from Yemen the banner of Yamani will emerge, and whoever takes Imam Hussein, peace be upon him, as a source of inspiration will never know defeat. .

The Yemeni flag is the foundation for the establishment of a state of divine justice under which the world will enjoy peace.

Annex 19: Interview conducted on 20 June 2024 by Al Mayadeen with Muhammad Abdulsalam, official spokesman for the Houthis, during which he acknowledged operational coordination with the Iraqi factions, Hezbollah and other parties

Source: <https://www.youtube.com/watch?v=jBjWmJ79yxo>

Appendix A

Unofficial translation of a segment of the interview

Presenter: Also, there is a new topic brother Mohamed about the joint operations between the Yemeni Armed Forces and the Islamic resistance in Iraq. Two statements were issued about joint operations. What is the goal of this statements and will be there any horizon for this cooperation? Shall we see any joint operation between the Yemeni Armed Forces and Hizbullah or with Alqassam Brigades? Will these operations have a goal and what is the aim? Why do you have operation on two frontlines at the same time?

Mohamed Abdul Salam: The joint operations are already taking place as you mentioned between the Yemeni Armed Forces and Iraqi factions and other groups. The main aim of these operations is to cooperate in righteousness and piety and in that right and just project that is important to all. The enemy is making this kind of alliances and cooperation. The US, the UK, Germany, and France are cooperating to target Yemen. Also, the US, Israel, the UK, France, and some regional countries cooperated to obstruct the drones and the missiles launched from Iran. They are allying and cooperating...isn't it more important for us to cooperate and we believe that we defend our cause, aggrievance, children and women. The aim of this cooperation is to exert more pressure on the Israeli entity. First because of the geographical nature in Iraq and the proximity to the Israeli entity and to cause more disturbance and distraction to Israel so as not to know from where the strikes will come. It is not excluded that there will be joint operations and today we have already a joint situation room that is coordinating the operation coming from Iraq, Lebanon. It is true that each party in the 'Axis of Resistance' has its own conditions, nature and assessments as a result of its conditions and capabilities but overall, there arrangements that could be done directly as happened with Iraqis or in indirect way that harmonizes with the general spirit with which the Axis is acting today, and the Axis started to shape in a more powerful and tough manner. We think the Axis today, despite all the challenges, is in a more developed and shaped stage which will make it a strong and effective Axis. We think that these operations are honorable and do not target any regional countries or any Arab or Islamic countries, but it targets the Israeli entity only. So, it is likely yes that this situation room might coordinate joint operations with Hizbullah and Iraqi brothers and with all liberals and in the fore with our brothers in Palestine including Alqassam Brigades, Saraya Alquds and all other Palestinian factions.

Annex 20: Article published on 29 October 2024 in the Iranian media ABNA news, in which Mahdi Al-Mashat, President of the Houthis' Supreme Political Council, was quoted discussing about the "joint operations rooms"

**صنعاء: لدينا غرف عمليات مشتركة
وسنواجه أي حمامة إسرائيلية باقتحام غزة**

الخبرة العربية | ٢٩ أكتوبر ٢٠٢٤ | ١٤٥٦٤٤٧ | أقسام | المدون | المدون

قال رئيس المجلس السياسي الأعلى في اليمن، مهدي المشاط، إنَّ الطرف الأميركي يهدد بعودة الحرب في اليمن، لمنع الشعب اليمني من القيام بمسؤولياته تجاه شعب الفلسطيني.

وفقاً لما أفادته وكالة أهل البيت (ع) الدولية - أبنا - رئيس المجلس السياسي الأعلى في اليمن، مهدي المشاط يكشف أنَّ هناك غرف عمليات تراقب عن كثب في حال ارتكبت إسرائيل "حافة واقتحمت غزة برياً.

قال رئيس المجلس السياسي الأعلى في اليمن، مهدي المشاط، إنَّ الطرف الأميركي يهدد بعودة الحرب في اليمن، لمنع الشعب اليمني من القيام بمسؤولياته تجاه شعب الفلسطيني.

وأكَّدَ المشاط أنَّ موقف الجمهورية اليمنية واضح وهو إقامة الدولة الفلسطينية كاملة السيادة، على كامل التراب الوطني الفلسطيني، مشيراً إلى أنه لا يوجد لدينا شيء اسمه أراضي 48 أو 67.

ويكشف أنَّ هناك غرف عمليات مشتركة وجهاً تراقب وتعمل مواجهة أي حمامة صهيونية إذا اقتحمت برياً غزة، ونحن نراقب الموضوع عن كثب.

وأشار إلى أنَّ ما يقوم به الشعب اليمني هو أقل واجب إيماني ودينبي وأخلاقي وإنساني، مشدداً على أنَّ "المسؤولية الدينية والأخلاقية والإنسانية تحتم على الجميع التحرك".

وأكَّدَ المشاط أنَّ "الحرب في فلسطين أضحت حرباً على الإسلام، يتحشَّد فيها الغرب والولايات المتحدة إلى جانب العدو الصهيوني"، مستهجناً في الوقت نفسه "من يقف موقف العربي والإسلامي دون المستوى المطلوب في هذه المواجهة والوحدة الشرسة".

وقال إنَّ "معركة طوفان الأقصى انطلقت وستدمر كل ما بنته قوى الاحتلال والإمبريالية العالمية". مشدداً على أنه لا يوجد في المنطقة العربية شيء اسمه إسرائيل.

ونوجه المشاط إلى الفلسطينيين قائلاً: "الكل معكم، الشعوب وحركات المقاومة معكم. حتى تنهزم هذه الهجمة الشرسة". مشيراً إلى أنَّ "مع العدو لسفوفه مجرد عنبريات فارقة".

وأشار رئيس المجلس السياسي الأعلى في اليمن إلى أنَّ "الغرب هرب من مشاكله وجره به تتصدير اليهود إلى الوطن العربي، وأوجد كياناً لهم خارج طبوغرافية المنطقة".

ويواصل اليمنيون التظاهرات المؤيدة لفلسطين. وشاركت أمس الجمعة، حشود يمنية في "جمعة الغضب" في ميدان السبعين في صنعاء، وفي المحافظات تضامناً مع فلسطين وتنديناً بالمجازر الإسرائيلي في غزة.

وقيل أيام أگد المجلس السياسي الأعلى في اليمن، في بيان، أنَّ "صنعاء تراقب الوضع عن كثب، ولن تقف مكتوفة الأيدي تجاه حرب الإبادة الجماعية ضد أهلنا في غزة". مشدداً على أنَّ "تجاوز الخطوط الحمر يحتم على صنعاء القيام بواجبها الديني والميداني تجاه ذلك".

وقال عضو المجلس السياسي الأعلى في اليمن، محمد علي الحوثي، إنَّ "المعركة ضد العدو الإسرائيلي قائمة"، مؤكداً أنَّ حركة "أنصار الله" على تنسيق دائم مع كل جهات محور المقاومة.

وكانت وسائل إعلام إسرائيلية، تحدثت عن صواريخ بروموس حرية تزن ما "مجموعه 1.6 طن" أطلقتها حركة "أنصار الله" على ما يبدو نحو منطقة الفنادق في "إيلات".

وقيل أيام، أفاد مسؤول عسكري أمريكي، لشبكة "سي إن إن"، بأنَّ السفينة البحرية الأمريكية "يو إس كارني". اعترضت 4 صواريخ "دروز" و15 طائرة مسيرة، قبالة سواحل اليمن، مضيفاً أنَّ عملية الاعتراض هذه استغرقت 9 ساعات.

وكان رئيس الوزراء في حكومة تصريف الأعمال في صنعاء، عبد العزيز بن حبتور، قد هدد، بأنَّ سفن الاحتلال ستتعذر من الاستهداف في البحر الأحمر في حال استئمر العدوان الإسرائيلي على غزة.

Appendix A

Unofficial translation of the article published on 29 October 2024 by the Iranian media ABNA news, in which Mahdi Al-Mashat, President of the Houthis' Supreme Political Council, was quoted discussing about the "joint operations rooms"

Sanaa: We have joint operations rooms and we will confront any Israeli foolishness by storming Gaza

The head of the Supreme Political Council in Yemen, Mahdi Al-Mashat, said, "The American side threatens the return of war in Yemen, to prevent the Yemeni people from carrying out their responsibilities towards the Palestinian people."

According to what was reported by Ahl al-Bayt (peace be upon him) International News Agency - ABNNA - the head of the Supreme Political Council in Yemen, Mahdi Al-Mashat, reveals that there are operations rooms that are closely monitored in case "Israel" commits foolishness and storms Gaza by land.

The head of the Supreme Political Council in Yemen, Mahdi Al-Mashat, said, "The American side threatens the return of war in Yemen, to prevent the Yemeni people from carrying out their responsibilities towards the Palestinian people."

Al-Mashat stressed that the position of the Republic of Yemen is clear, which is to establish a Palestinian state with full sovereignty, over the entire Palestinian national territory, noting that "we do not have such a thing as the lands of 48 or 67." He revealed, "There are joint operations rooms and efforts that monitor and work to confront any Zionist foolishness if it invades Gaza by land, and we are monitoring the situation closely."

He pointed out that "what the Yemeni people are doing is the minimum duty of faith, religion, morals and humanity," stressing that "religious, moral and humanitarian responsibility requires everyone to take action."

Al-Mashat stressed that "the war in Palestine has become a war against Islam, in which the West and the United States are mobilizing alongside the Zionist enemy," deplored at the same time "that the Arab and Islamic position remains below the required level in this confrontation and fierce attack."

He said, "The Battle of Al-Aqsa Flood has begun and will destroy everything that the occupation forces and global imperialism have built," stressing that "there is no such thing in the Arab region as Israel."

Al-Mashat addressed the Palestinians, saying: "Everyone is with you...the peoples and the resistance movements are with you...until this fierce attack is defeated," noting that "the enemy raising its roofs is just empty ramblings."

The head of the Supreme Political Council in Yemen pointed out that "the West escaped from its problems and wars by exporting the Jews to the Arab world, and created an entity for them outside the topography of the region."

Yemenis continue demonstrations in support of Palestine. Yesterday, Friday, Yemeni crowds participated in the “Friday of Anger” in Sabeen Square in Sanaa, and in the governorates, in solidarity with Palestine and denouncing the Israeli massacres in Gaza.

A few days ago, the Supreme Political Council in Yemen confirmed, in a statement, that “Sanaa is closely monitoring the situation, and will not stand idly by in the genocidal war against our people in Gaza,” stressing that “crossing the red lines requires Sanaa to carry out its religious and principled duty regarding this matter.” ”.

A member of the Supreme Political Council in Yemen, Muhammad Ali Al-Houthi, said, “The battle against the Israeli enemy is ongoing,” stressing that the “Ansar Allah” movement is in constant coordination with all sides of the axis of resistance. Israeli media reported about missiles with warheads weighing “a total of 1.6 tons,” apparently launched by the “Ansar Allah” movement towards the hotel area in “Eilat.”

A few days ago, an American military official told CNN that the US Navy ship USS Carney intercepted 4 cruise missiles and 15 drones off the coast of Yemen, adding that this interception took 9 hours.

The Prime Minister of the caretaker government in Sanaa, Abdul Aziz bin Habtoor, had threatened that the occupation ships would be targeted in the Red Sea if the Israeli aggression against Gaza continued.

Annex 21: Article published on 9 November 2023 by the Iranian media PressTV in which Abdulaziz bin Habtour, Houthi Prime Minister is quoted as saying that “It is one axis and there is coordination taking place, a joint operations room, and a joint command for all these operations”

Yemen's Ansarullah resistance movement has vowed to continue operations in support of the innocent people of the Gaza Strip until Israel ends its bloody onslaught on the besieged Palestinian territory.

Ansarullah spokesman Mohammed Abdul-Salam made the pledge in a post shared on social media on Wednesday, after Yemen's Armed Forces shot down an American MQ-9 Reaper drone which was conducting a “hostile espionage” operation in support of the Israeli regime.

“The downing of the American drone shows that our armed forces will continue their operations in support of Gaza until the Israeli acts of aggression stop,” he said.

Abdul-Salam also noted that the Yemeni armed forces had reaffirmed their readiness to counter all hostile manoeuvres against Yemen's national sovereignty by bringing down the American UAV over the country's territorial waters.

Over the past month, the Yemeni Army has carried out several missile and drone strikes against Israeli targets in response to the occupying regime's war crimes in Gaza.

The prime minister of Yemen's National Salvation Government announced recently that Ansarullah fighters are “part of the Axis of Resistance” against Israel.

“It is one axis and there is coordination taking place, a joint operations room, and a joint command for all these operations,” Abdulaziz bin Habtour said. “We cannot allow this arrogant Zionist enemy to kill our people.”

Israel waged the war on Gaza on October 7 after the Palestinian Hamas resistance group conducted Operation Al-Aqsa Storm against the occupying entity in retaliation for its intensified atrocities against the Palestinian people.

Since the start of the aggression, the Tel Aviv regime has killed at least 10,569 Palestinians, mostly women and children, and injured 26,475 others.

It has also imposed a “complete siege” on the coastal sliver, cutting off fuel, electricity, food and water to the more than two million Palestinians living there.

Yemen prioritizes confronting Israel over peace talks: PM

In an interview with Iran's Arabic-language news channel Al-Alam on Wednesday, bin Habtour said that confronting the Israeli aggression is a major issue for Yemen even if it causes a setback in the peace process with the Saudi-led coalition.

“This is a sacred duty for us and all Muslims and Arabs. However, it is primarily the task of the Arab countries,” he added.

The Yemeni premier further said that millions of Yemenis participated in nationwide rallies in a show of solidarity with Ansarullah leader Abdul-Malik al-Houthi who called for using all capabilities to counter the Israeli regime.

Annexes 24: Press article dated 18 October 2021 in the Syrian media North Press Agency, related to a meeting between Colonel Sharaf al-Mawri, Houthi military attaché at the Yemeni “embassy” in Damascus, Syria, and the head of the Military Intelligence Division of the Syrian Ministry of Defence

Oct 18, 2021

The military attaché of the Houthis meets head of the Syrian Military Intelligence in Damascus.

QAMISHLI, Syria (North Press) – Military attaché of Houthi Movement in Damascus, met with the head of the Military Intelligence Division of the Syrian Ministry of Defense, embassy of the Movement in Damascus said on Monday.

“During the meeting that brought together Colonel Sharaf al-Mawri and Major-General Kifah al-Milhem, they discussed cooperation with Syria in relevant fields,” Embassy of the Houthi Movement said in a statement.

“Colonel Sharaf al-Mawri conveyed greetings of the head of the Yemeni Military Intelligence Authority (affiliated with the Houthis), Major General Abdullah al-Hakim to his Syrian counterpart, military commands, and all officials of the Ministry of Defense,” the statement added.

The meeting “addressed the latest field development and military confrontations in Yemen,” according to the same sources.

Major-General Milhem stressed, “the importance of cooperation between Yemen and Syria in fighting organizations (al-Qaeda and ISIS) and exchanging information and experiences that can reduce the practices of Takfiri groups in the two countries.”

In 2016, Houthis appointed the leader of National Arab Socialist Ba’ath Party – Yemen Region, the Syrian wing, Nayef Ahmed al-Qans, as their ambassador to Damascus.

Annex 28: Rivalry between central banks: Economic stability under threat

Punitive measures taken by CBY, Aden, against banks and exchange companies.

The Panel was informed by its sources that some of the leading banks were under pressure by the Houthis not to comply with the instructions of CBY, Aden, and out of fear of reprisal, many of them did not comply. Getting irked by this non-compliance, CBY, Aden, tightened its grip on violating banks and issued a circular Ref. No 159/CBY/2024 dated 19 March 2024 addressed to all banks, exchange companies and facilities, and remittance agents, informing them of suspension of dealings with the following banks that violated its instructions:

- i. Tadhamon Bank
- ii. Bank of Yemen and Kuwait
- iii. Al-Amal Microfinance Bank
- iv. Shamil Bank of Yemen and Bahrain
- v. Al-Kuraimi Islamic Microfinance Bank

Figure 28.1

Appendix A

Unofficial translation of the Circular Ref. No 159/CBY/2024 dated 19 March 2024 issued by CBY, Aden

Republic of Yemen

CENTRAL BANK OF YEMEN

Head Office, Aden

Ref. No 159/CBY/2024

Date: 19 March 2024

A circular addressed to all exchange companies, establishments, and remittance agents

Brothers/companies, exchange facilities and remittance agents, best regards

Subject: Stop dealing with banks that violate the instructions of the Central Bank

With reference to the above topic, all dealings with the banks listed below, including their affiliated networks, are suspended:

- 1 Tadhamon Bank
- 2 Bank of Yemen and Kuwait
- 3 Al-Amal Microfinance Bank
- 4 Shamil Bank of Yemen and Bahrain
- 5 Al-Kuraими Islamic Microfinance Bank

This is due to their violations of the instructions issued by the Central Bank of Yemen, and deterrent measures will be taken regarding those who violate this circular.

Governor

However, on 26 March 2024, CBY, Sana'a issued the Circular No. 14 resuming dealings with the following two exchange companies, which were banned earlier vide Circular No. 13 dated 14 March 2024:

- i. Al-Qutaybi Exchange Company
- ii. Al-Bassiri Exchange Company

In response to this, on the very next day on 27 March 2024, CBY, Aden issued another Circular Ref. No. 179/CBY/2024 lifting the ban imposed on 19 March 2024, and resuming dealings with the aforesaid five banks.

The CBY, Aden also issued directions to stop dealings with 13 exchange companies in the Ma'rib Governorate for violating its instructions. The CBY, Aden informed the Panel that it will conduct intensive inspection campaigns to ensure compliance, and penal measures would be taken against those who violated the provisions of its circulars.

During the period from January to December 2023 and from January to February 2024, CBY, Aden took punitive measures against 156 and 29 exchange companies and institutions respectively. These measures were taken for not providing the required data or for violating its instructions and included imposition of financial penalties, temporary suspension of licenses, and freezing of assets.

The table 2 below shows the total amount of fines and penalties imposed by CBY, Aden on banks and money exchange companies during the period from January to December 2023 and from January to February 2024.

**Table 1
Fines and penalties imposed by CBY, Aden**

Period	Total amount of Fines imposed on banks (in YR)	Total amount of Fines imposed on exchange companies (in YR)
January – December 2023	337,386,000	921,000,000
January – June 2024	294,093,125	174,940,000

Such actions of the central banks underscore the politically driven and volatile regulatory policies in Yemen, highlighting how banking institutions have become casualties in this rivalry. By instructing banking and financial institutions not to comply with directives of the central bank operating in GoY-controlled areas, the Houthis impede the effectiveness of monetary and banking regulatory policies aimed at stabilizing Yemen's economy. Such interference undermines investor confidence, leading to economic instability.

Circular Ref. No 159/CBY/2024 dated 19 March 2024 issued by CBY, Aden

Control over financial transfers mechanism

The confrontation to exercise control over the financial transactions between the GoY-controlled areas and the Houthi-controlled areas reached a critical juncture when CBY, Aden established a unified network for such transfers. The Unified Money Network (UMN) is a closed joint stock company, established in 2021 with 47 shareholder members, who represent exchange companies licensed by the CBY, Aden. The network obtained the final license from the CBY, Aden in January 2024 as a payment service provider and operator. UMN obliges the exchange companies to stop transfers through other companies, and transfer only through this network. The aim of the UMN is to merge the internal transfer networks owned by exchange companies, which number more than 40, into one network.

In response, based on directives from CBY, Sana'a, the Yemeni Exchange Association, affiliated with the Houthis, issued a circular on 4 March 2024 prohibiting the exchange companies and local financial transfer networks, from dealing with:

- i. The UMN set up by CBY, Aden,
- ii. The Al Basiri Exchange Company,
- iii. The Al Qutaibi Exchange Company, and
- iv. any banks not licensed by the CBY, Sana'a.

The CBY, Sana'a issued an order disallowing the acceptance of external transfers in USDs or YRs.

Banking sources reveal that customers encounter significant challenges in sending remittances to areas under Houthi control, or receiving remittances sent from those regions to areas governed by the GoY. These measures have already exacerbated the severity of the financial divide enforced by the Houthis in 2021,

when they banned the circulation of the new edition of the currency notes issued by CBY, Aden, and imposed hefty fees on transfers from GoY-controlled regions to other areas.

Circular No 14 dated 26 March 2024 issued by CBY, Sana'a

Head Office Aden

Ref: 179/CBY/2024

Date: 27/3/2024

Brothers/General Manager/Regional Manager of the Bank.
After Greetings

Topic: Resuming dealings with suspended banks

Respected people

A reference to the above topic, and to the circular issued on 3/19/2024 No. (2024 C160 C) regarding stopping dealings with a number of banks due to their violation of the instructions of the Central Bank. Given the disappearance of the violation and the pledge not to repeat it, it was decided to lift the ban and resume dealing With the following banks:

- 1 Tadhamon Bank
- 2 Bank of Yemen and Kuwait
- 3 Al-Amal Microfinance Bank
- 4 Shamil Bank of Yemen and Bahrain
- 5 Al-Kuraimi Islamic Microfinance Bank

Sent for implementation as of today, 3/27/2024.

Governor

Annex 29: Recent conflict between the CBY, Aden and the Houthis

So far, the conflict involving the control over the banking system in Yemen was witnessed between the two central banks - CBY, Sana'a, and CBY, Aden. However, the developments in the last two months not only shook the entire banking sector in Yemen, but it escalated the conflict to a different level. It became a war between the CBY, Aden and the Houthis.

On 30 May 2024, the CBY, Aden issued its circular no. 20 threatening to stop dealings with the following six banks for not complying with its instructions:

- 1- Tadhamon Bank
- 2- International Bank of Yemen
- 3- Yemen and Kuwait Bank
- 4- Shamil Bank of Yemen and Bahrain
- 5- AlAmal Microfinance Bank
- 6- Alkuraimi Islamic Microfinance Bank

Figure 29:1

Circular No. 20 dated 30 May 2024 of CBY, Aden

Source: Panel

However, since, these banks did not comply with the directions of the CBY, Aden, the bank issued circular no.30, on 8 July 2024, communicating its intention to revoke the licenses of the above-mentioned six banks. The CBY, Aden also decided to get these six banks delinked from the society for worldwide interbank financial telecommunications (SWIFT) system. SWIFT is an international messaging network used by the financial institutions to quickly, accurately, and securely send and receive information, such as money transfer instructions.

Since the aforesaid six banks are the leading banks in Yemen and engage in significant amount of international funds transfers, including for the Houthi-controlled entities, cancellation of the SWIFT facility would have seriously impacted the interests of the Houthis and also of the banking system in the Houthi-controlled areas. Taking this action of the CBY, Aden as an act of economic war launched by the GoY against it, the Houthis threatened to attack the assets in the KSA and to return to war, if the CBY, Aden did not revoke its decision. The house of the Governor of the CBY, Aden in Sana'a was allegedly attacked by the Houthis and they have seized the house.

Figure 29.2

House of the Governor of the CBY, Aden, in Sana'a which has been seized by the Houthis. The writings on the boundary wall of the house says, "The house is seized by the court".

Source: Panel

This led to serious mediation efforts by the stakeholders to de-escalate the situation. Consequently, the CBY, Aden issued circular no. 35 dated 22 July 2024, cancelling the circular nos. 20 and 30, withdrawing the revocation orders against the aforesaid six banks. Although, the conflict was deescalated, and the war averted, it left the CBY management, the GoY, and the STC highly dissatisfied with the developments. The Governor and the Deputy Governor of the CBY, Aden reportedly sent their letters of resignation to the GoY.

This incident highlights how an economic issue could spiral into a full-blown war, underlining importance and urgency of addressing the long-standing economic challenges that threaten Yemen's peace, security, and stability.

Annex 30: Information on Houthi attacks and suspicious activities towards merchant and military vessels from 19 November 2023 to 1 August 2024

Nature/impact	Number
Attack on merchant vessels	118
Attack on military vessels	16
Attack on oil/chemical tankers	31
Vessels hit	30
Tankers hit	7
Vessels abandoned	3
Vessels sunken	3
Seafarer killed	4

Reported date of attack	Targeted merchant and military vessel	Information on the attack	Gulf of Aden
			Red sea
			Indian ocean
20/07/24	<i>MV Pumba</i> , container ship with Liberia flag	UAV attack followed by USV attack, minor damages reported. Later, the explosion of a missile at close vicinity of the vessel was reported	
19/07/24	<i>Lobivia</i> , container ship with Singapore flag	Direct hit by unidentified projectile	
15/07/24	<i>MT Chios Lion</i> , oil tanker with Liberia flag	Attack by USV, damage reported	
15/07/24	<i>MT Bentley</i> , oil tanker with Panama flag	Attack with two small boats and one USV followed by three ASBMs	
11/07/24	Name of the targeted vessel not mentioned by UKMTO	Two explosions at close vicinity of the vessel	
10/07/24	Name of the targeted vessel not mentioned by UKMTO	Explosion at close vicinity of the vessel	
09/07/24	Name of the targeted vessel not mentioned by UKMTO	Explosion at close vicinity of the vessel	
30/06/24	<i>Summer Lady</i> , bulk carrier with Marshal Islands flag	Suspicious approach by 12 crafts, included some uncrewed.	
28/06/24	Name of the targeted vessel not mentioned by UKMTO (probably <i>Delonix</i> , chemical tanker with Liberia flag)	Five missiles hit the water near the vessel	
27/06/24	Name of the targeted vessel not mentioned by UKMTO (probably <i>Seajoy</i> , bulk carrier with Liberia flag)	Attack with WBIED	
26/06/24	<i>MSC Sarah V</i> , container ship with Liberia flag	A missile hit the water near the vessel	
25/06/24	<i>Lila Lisbon</i> , bulk carrier with Kitts and Navis flag	A missile hit the water near the vessel	
23/06/24	<i>MV Transworld Navigator</i> , bulk carrier with Liberia flag	Direct hit by OWA-UAV. Vessel suffered minor damage. Several seafarers suffered minor injuries.	
23/06/24	Name of the targeted vessel not mentioned by UKMTO	Hit by OWA-UAV. Vessel suffered flooding that could not be contained, and vessel was abandoned	
21/06/24	Name of the targeted vessel not mentioned by UKMTO (probably <i>MV Transworld Navigator</i> , bulk carrier with Liberia flag which has been attacked twice)	Explosions at the vicinity of the vessel	
16/06/24	<i>Captain Paris</i> , oil tanker with Malta flag	Two explosions in close proximity of the vessel	
13/06/24	<i>MV Verbena</i> , general cargo ship with Palau flag	Targeted with three ASCMs, fire on board. One seafarer heavily wounded.	
13/06/24	<i>MV Seaguardian</i> , bulk carrier with Malta flag	Explosion at close vicinity of the vessel, no damage	

12/06/24	MV Tutor , bulk carrier with Liberia flag	Targeted by one WBIED impact under the stern. Later in the day, the vessel was hit by an OWA-UAV. One seafarer killed. Vessel was abandoned by the crew, and sunk on 18/06/24.
09/06/24	MV Tavvishi , bulk carrier with Liberia flag	Targeted by one ASBM and one ASCM, one direct hit
08/06/24	MV Norderney , bulk carrier with Antigua and Barbados flag	Targeted by two ASBMs, one direct hit, one intercepted
06/06/24	AAL Genoa , bulk carrier with Cyprus flag	Two explosions at close distance of the vessel
01/06/24	US Navy USS Gravely (DDG107)	Targeted by one ASBM, intercepted by US Navy
01/06/24	Al Salam , LNG tanker with Liberia flag	Explosion at distance from the vessel
28/05/24	MV Laax , bulk carrier with Marshall Islands flag	Targeted by five ASBMs, one direct hit
23/05/24	MV Yannis , bulk carrier with Malta flag	Impact of a missile at close vicinity, no damage
17/05/24	Wind , oil tanker with Panama flag	Targeted with one ASBM, one direct hit
07/05/24	MSC Gina , container ship, with Panama flag	Two explosions at close vicinity of the vessels, no damage
07/05/24	MSC Diego , container ship with Panama flag	
29/04/24	Cyclades , bulk carrier with Malta flag	Targeted with three ASBMs and three OWA-UAVs, minor damage reported
29/04/24	US Navy USS Laboon (DDG58) or USS Philippine sea (CG58)	Targeted with one OWA-UAV, intercepted by US Navy
26/04/24	MV Maisha , oil tanker with Antigua and Barbuda flag	No precision
26/04/24	MV Andromeda Star , oil tanker with Panama flag	Targeted with three ASBMs, minor damage reported
24/04/24	MSC Darwin VI , container ship with Liberia flag	One explosion ahead of the vessel, no damage
24/04/24	MV Yorktown , container ship with US flag	Targeted by one ASBM, intercepted by US Navy
09/04/24	MV Yorktown , container ship with US flag	Targeted by one missile, intercepted by US Navy
07/04/24	Hope Island , container ship with Marshall Islands flag	Targeted by one missile, no direct hit
06/04/24	Hope Island , container ship with Marshall Islands flag	Targeted by two missiles. The first was intercepted by the coalition and the second hit the water
03/04/24	US Navy USS Gravely (DDG 107)	Targeted by one ASBM and two UWA-OAVs, no direct hit
01/04/24	Crystal Symphony , cruise ship with Bahamas flag	Suspicious approach followed by gun shots
28/03/24	Names of the targeted US and Coalition warships not mentioned by CENTCOM	Targeted by four OWA-UAVs, no direct hit
27/03/24	Name of the targeted US warship not mentioned by CENTCOM	Targeted by four OWA-UAVs, no direct hit
23/03/24	MV Huang Pu , oil tanker with Panama flag	Targeted by five ASBMs, one direct hit
17/03/24	MV Mado , LPG tanker with Marshall Islands flag	Targeted by a missile, no direct hit
15/03/24	MV Mado , LPG tanker with Marshall Islands flag	One explosion ahead of the vessel, no damage
15/03/24	Pacific-01 , oil tanker with Panama flag	Targeted by a missile, no direct hit
14/03/24	Fuxing V , bulk carrier with Liberia flag	Targeted by two missiles, no direct hit
12/03/24	US Navy USS Laboon (DDG58)	Targeted by one SRBM, no direct hit

19/02/24	<i>Navis Fortuna</i> , bulk carrier with Marshall Islands flag	Hit by missile
19/02/24	<i>Sea Champion</i> , grain carrier with Greek flag	Targeted by one OWA-UAV, one direct hit , minor damage
18/02/24	<i>Rubymar</i> , bulk carrier with Belize flag	Targeted by two ASBM, one direct hit , crew abandoned the vessel. The vessel sunk.
17/02/24	<i>MT Pollux</i> , oil tanker with Panama flag	Targeted by three ASBMs, one direct hit
15/02/24	<i>MV Lycavitos</i> , bulk carrier with Barbados flag	Targeted by one ASBM, one direct hit
12/02/24	<i>MV Star Iris</i> , bulk carrier with Marshall Islands flag	Targeted by two missiles
06/02/24	<i>MV Star Nasia</i> , bulk carrier with Marshall Islands flag	Targeted by three ASBMs, no direct hit, minor damage. One ASBM intercepted by US Navy
06/02/24	<i>MV Morning Star</i> , cargo ship with undetermined flag	Targeted by three ASBMs, no direct hit
06/02/24	<i>Morning Tide</i> , cargo ship with Barbados flag	Explosion in close vicinity of a merchant vessel, no damage
06/02/24	Name of the targeted vessel not mentioned by UKMTO	Rounds fired from a small craft, slight damage on the merchant vessel
02/02/24	<i>Daffodil</i> , oil tanker with Saudi Arabia flag	UAV attack, no direct hit
02/02/24	Name of the targeted vessel not mentioned by CENTCOM	Seven suspicious UAVs intercepted by US Navy
01/02/24	Name of the targeted vessel not mentioned by CENTCOM	One suspicious UAV intercepted by US Navy
01/02/24	Name of the targeted vessel not mentioned by CENTCOM	One suspicious USV intercepted by US Navy
01/02/24	<i>MV Koi</i> , cargo ship with Liberia flag	Targeted by two ASBMs, no direct hit. ASBMs intercepted by US Navy
01/02/24	Name of the targeted vessel not mentioned by UKMTO	Explosion at distance of a merchant vessel, no damage
31/01/24	Name of the targeted vessel not mentioned by CENTCOM	One ASBM intercepted by US Navy
31/01/24	US Navy <i>USS Carney</i> (DDG64)	Three UAVs intercepted by US Navy
30/01/24	Name of the targeted vessel not mentioned by CENTCOM	One ASBM intercepted by US Navy
30/01/24	Name of the targeted vessel not mentioned by CENTCOM	Approached by three small crafts, one of these crafts has a front mounted weapon

27/01/24	Royal British Navy HMS Diamond	One UAV intercepted
26/01/24	Marlin Luanda , oil tanker with Marshall Islands flag	One ASBM, direct hit
26/01/24	Achilles , oil tanker with Panama flag	Explosion at close vicinity
26/01/24	US Navy USS Carney (DDG64)	One ASBM intercepted by US Navy
24/01/24	Maersk Chesapeake , container ship with USA flag	Two ASMBs intercepted by US Navy, one impacted the sea
24/01/24	Maersk Detroit , container ship with USA flag	Missile attack, no direct hit
24/01/24	Tomahawk , bulk carrier with Liberia flag	UAV attack, no direct hit
18/01/24	Chem Ranger , chemical tanker with Marshall Islands flag	Two ASMBs impacted the sea near the ship
17/01/24	MV Genco Picardy , bulk carrier with Marshall Islands flag	One UAV, direct hit
16/01/24	MV Zografia , bulk carrier with Malta flag	One ASBM, direct hit
16/01/24	Panda , bulk carrier with Marshall Islands flag	Suspicious approach
15/01/24	MV Gibraltar Eagle , bulk carrier with	Possible missile attack
14/01/24	US Navy USS Laboon (DDG 58)	One ASBM intercepted by US Navy
14/01/24	Khalissa , oil tanker with Panama flag	One ASBM, impacted the sea
14/01/24	Orchid Rising , bulk carrier with Panama flag	Suspicious approach
12/01/24	Khalissa , oil tanker with Panama flag	Kinetic attack, vector not identified
11/01/24	Name of the targeted vessel not mentioned by CENTCOM	One ASBM, impacted the sea
09/01/24	Federal Masamune , bulk carrier with Singapore flag	Approached by three small crafts which opened fire with two missiles
09/01/24	Caravos Harmony , bulk carrier with Marshall Islands flag	Two UAVs dropped each one bomb, impacted the sea
06/01/24	Name of the targeted vessel not mentioned by UKMTO	Six small crafts approached a merchant vessel
06/01/24	US Navy USS Laboon (DDG 58)	One UAV intercepted
02/01/24	CMA CGM Tage , container ship with Malta flag	Two ASBMs, impacted the sea
01/01/24	Advantage Life , oil tanker with Marshall Islands flag	Threat over radio
31/12/23	Maersk Hangzhou , container ship with Singapore flag	Boarding attempt by four small crafts. Attack repelled by US Navy
31/12/23	Maersk Hangzhou , container ship with Singapore flag	Three ASBMs, one direct hit and two intercepted by US Navy
25/12/23	MSC United VIII , container ship with Liberian flag	One way attack UAV, attack missed
25/12/23	Navig8 Montel , oil tanker with Liberian flag	One way attack UAV, attack missed
25/12/23	MV Mariona , livestock carrier with Tanzanian flag	Threat over radio
23/12/23	Sai Baba , oil tanker with Gabonese flag	One way attack UAV, one direct hit
23/12/23	Blaamanen , oil/chemical tanker with Norwegian flag	One way attack UAV, attack missed
23/12/23	Fassa , bulk carrier with Cayman Islands flag	One way attack UAV attack missed

18/12/23	<i>MSC Clara</i> , container ship with Panama flag	One way attack UAV, attack missed
18/12/23	<i>Swan Atlantic</i> , oil/chemical tanker with Cayman Islands flag	One way attack UAV, one direct hit
18/12/23	<i>Magic Vela</i> , bulk carrier with Marshall Islands flag	Attempted hijack
18/12/23	<i>Green Trader</i> , oil/chemical tanker with Marshall Islands flag	Suspicious approach
15/12/23	<i>Palatium III</i> , container ship with Liberia flag	Explosion onboard
15/12/23	<i>Al Jasrah</i> , container ship with Liberia flag	Direct hit
15/12/23	<i>MSC Alanya</i> , container ship with Liberian flag	Threat over radio
14/12/23	<i>Maersk Gibraltar</i> , container ship with Hong Kong flag	Targeted by ASBM
13/12/23	<i>Lady Tramp</i> , bulk carrier with Malta flag	Suspicious approach
13/12/23	US Navy <i>USS Mason</i> (DDG 87)	UAV attack
12/12/23	<i>Ardmore Encounter</i> , oil/chemical tanker with Marshall Islands flag	Boarding attempt
11/12/23	<i>Strinda</i> , oil/chemical tanker with Norwegian flag	Missile attack, one direct hit
11/12/23	<i>Icarius</i> , cargo ship with Vanuatu flag	UAV attack
10/12/23	<i>Centaurus Leader</i> , vehicle carrier with Singapore flag	Two missed UAV attacks
09/12/23	Name of the targeted vessel not mentioned by UKMTO	Threat over radio
06/12/23	<i>Dianella</i> , oil/chemical tanker with Liberian flag	UAV incident
03/12/23	<i>AOM Sophie II</i> , bulk carrier with Panama flag	Missile attack, one direct hit
03/12/23	<i>Number 9</i> , container ship with Panama flag	Threat over radio
03/12/23	<i>Unity Explorer</i> , bulk carrier with Bahamas flag	Missile attack, one direct hit
03/12/23	<i>CGenuine</i> , oil tanker with Liberian flag	Missed UAV attack
27/11/23	US Navy <i>USS Mason</i> (DDG 87)	Two ASBMs intercepted
29/11/23	US Navy <i>USS Carney</i> (DDG 64)	UAV intercepted

Annex 31: Hijacking by the Houthis of the *Galaxy Leader* on 19 November 2023

Video of the attack presented by the Houthis: <https://gcaptain.com/watch-houthis-release-video-of-galaxy-leader-seizure/>

On 19 November 2023 Houthi commandos were dropped by a Mi-171Sh helicopter onto the deck of the *Galaxy Leader*, a vehicle carrier with Bahamas flag sailing in the Red Sea.

An analysis of the weaponry carried by some commandos dropped on the ship shows that they were armed with AK-103 assault rifles, observed for the first time in 2022 with Houthi marine commandos, alongside at least one anti-material rifle (AMR) and a Glock pistol.⁶⁰ Similar pistols have been documented as presented for sale on the black market in Houthi-controlled areas.

Annex 32: Interview conducted on 20 November 2023 by the Qatari media al Araby al-Jadeed with Hazam al-Assad, member of the Houthis political council

قال عضو المكتب السياسي لجماعة الحوثيين (أنصار الله) حزام الأسد، في تصريحات لبرنامج "مواكب" على "العربي الجديد - بودكاست"، إن السفينة الإسرائيلية، التي أعلنت الجماعة، أمس الأحد، احتجازها في البحر الأحمر قرب اليمن: "ليست إلا باكورة لعمليات بحرية قادمة سواء في استهداف القطع البحرية والبواخر الإسرائيلية أو السفن التجارية"، لافتاً إلى أن المواجهة مع إسرائيل "لم تؤثر على مجريات المحادثات

Source: al Araby al-Jadeed

Appendix A

Summary of the interview

Hazam al-Assad, a member of the Houthi political council, responding to accusations of Iranian involvement in the hijacking of the ship, said the 'Axis of Resistance' had coordinated with and been guided by Iran, but that the decision to attack had been made by the Houthi forces. He also stated that it was just the beginning of their naval operations.

Subject: Violation of the ship CYCLADES of the ships ban criteria – URGENT. To: EASTERN MEDITERRANEAN MARITIME, ARMAR SHIPPING LTD

Sent: 25/04/2024.

Importance: High.

Good day, This email is sent to you from the Humanitarian Operations Coordination Center (HOCC) which is located in the Republic of Yemen - Sana'a. It is a center affiliated to the Office of the Supreme Commander of the Armed Forces of the Republic of Yemen, which was established with the aim of alleviating the humanitarian effects and repercussions in the theater of military operations, by neutralizing civilians and civilian objects and other humanitarian aspects.

According to the information, we would like to inform you that the ship CYCLADES IMO: 9799616, which is considered to be owned/managed/operated by your company, violated the ships ban criteria: (C) Ships heading to Israel ports. By arriving at the port of Eilat, Israel in 21 Apr. 2024.

Therefore, the mentioned ship will be included in the list of ships that are banned from crossing the Red Sea, Bab al-Mandab and the Gulf of Aden, Arabian Sea and Indian Ocean, unless you respond to this email.

Therefore, as a part of the safety of ships and their crews, the Yemeni Armed Forces warn the ship owned/managed/operated by your company of continuing to violate the ships ban criteria (C) again.

We will consider stopping your ships' voyages to Israeli ports as the first step in your cooperation, and this is a serious matter that requires your immediate attention. If you do not comply and respond, we confirm that you will bear full responsibility.

We strongly urge you to respond to this email without delay.

Best Regards,

Director of HOCC

Annex 35: Threatening messages sent on 22 May 2024 by HOCC (Houthis) to the bulk carrier Alexandria, sailing under Liberia flag

Urgent: Inclusion of the vessel ALEXANDRIA IMO (9448889) in the ban list.

To: Island Oil Holdings Ltd, Petronav Ship Management Ltd,

Sending Date: 22/05/2024. Importance: High

This email is sent to you from the Humanitarian Operations Coordination Center (HOCC) which is located in the Republic of Yemen - Sana'a.

It is a center affiliated to the Office of the Supreme Commander of the Armed Forces of the Republic of Yemen, which was established with the aim of alleviating the humanitarian effects and repercussions in the theater of military operations, by neutralizing civilians, civilian objects and other humanitarian aspects.

As the vessel ALEXANDRIA IMO:9448889 which is considered to be owned, managed and operated by your company, has violated the ban criteria: (C) Vessels heading to the usurping Israeli entity ports, and entered the port of Haifa on 5/21/2024.

Therefore, we inform you that the vessel ALEXANDRIA has been included in the ban list within "Sanctions program linked to vessels entering the usurping Israeli entity ports", starting from the date of 03/05/2024.

As a result, the vessel is prohibited from transiting the Red Sea, Bab al-Mandab, the Gulf of Aden, the Arabian Sea and the Indian Ocean, and will be directly targeted by the Yemeni Armed Forces in any area they deem appropriate.

The targeting of Israeli vessels by the Yemeni Armed Forces and preventing the entry of other vessels into the ports of the usurping Israeli entity is based on the religious, humanitarian and moral responsibility towards the oppressed Palestinian people and the unjust siege and the continuation of horrific and heinous massacres by the usurping Israeli entity, and within the framework of the sanctions imposed on it as a result of its aggression, siege, and starvation of the Gaza Strip, the crimes of genocide against the Palestinian people, the killing of children and women, and the prevention of medicine and food entry for more than 8 months.

Therefore, you bear the responsibility and consequences of including the vessel in the ban list, and if your vessels continue to violate the ban criteria and enter the ports of the usurping Israeli entity, sanctions will be imposed on your company and the entire fleet of vessels associated with it.

HOCC Director

About President

President of Political Council issues decree to establish HOCC
[17/February/2024]

SANA'A February 17, 2024 (Saba) - Decree No. (95) of the year 1445 AH was issued today, Saturday, by the President of the Supreme Political Council establishing the Humanitarian Operations Coordination Center (HOCC).

The decree included four articles. The first article stipulated the establishment of a center called the Humanitarian Operations Coordination Center (HOCC), affiliated with the Office of the Supreme Commander of the Armed Forces, subject to his supervision, and enjoying legal personality, with its main center in the capital, Sana'a.

The second article stipulates that "the Center contributes to mitigating the humanitarian effects and repercussions (on civilians and civilian objects) in the theater of military operations (land, sea and air) through adherence to Islamic teachings , compliance with international humanitarian law , other relevant international laws and conventions in a manner that does not conflict with the interests of the Republic." Yemen or harm it.

Article Three stipulates that the Center has the right to carry out its tasks:

- A- Communication and coordination internally and externally with all parties, governmental and non-governmental agencies and relevant international organizations.
- B- Including representatives from the relevant competent authorities as needed.

Article Four stipulates that this decision shall be effective from the date of its issuance and shall be published in the Official Gazette.

Annex 38: Article published on 29 May 2024 by the Iranian media Tasnim News stating that the achievement of Shahid Tehrani Moghadam is today in the hands of the Yemeni Mujahideen as an anti-ship weapon

29 May 2024 by Tasnim News (Iranian media)

Modeling Yemeni fighters from Iran's missile technology

Iran's first maritime ballistic missile named "Qadr" was built by Shahid Hassan Tehrani Moghadam, and now, after several years, the same technology is available to the Yemeni Mujahideen.

Defense Group of Tasnim News Agency Seyed Mohammad Taheri: Without a doubt, the missile capability of the Islamic Revolutionary Guard Corps Aerospace Force is one of the most important aspects of the Islamic Republic of Iran's deterrence capability, and the achievement of this capability is due to the efforts and efforts of unknown generals and scientists, among them the martyred general Hassan Tehrani Moghadam Nakhshi. It has played an irreplaceable role.

Many of the country's defense products and achievements in the field of missiles were founded by this honorable martyr and today it has become a powerful tool for defense against any threat.

But in the meantime, the achievement of anti-ship ballistic missile technology can be considered a turning point in the country's missile capabilities, which was followed from idea to product by Shahid Tehrani Moghadam.

The sensitive and strategic area of the Persian Gulf and the Strait of Hormuz, together with the Oman Sea, all of whose northern shores are part of our country's territory, is one of the most important economic bottlenecks in the world, especially in the field of energy, which has caused all the powers of the world to have a desire for many years. With the presence of the military in this region, they use their power to secure their sometimes-illegitimate interests. On the other hand, the economic beating heart of our country is also located in this region.

These features have caused extra-regional forces to always threaten the Islamic Republic of Iran with the presence of their military fleet in this region, so that they can impose their policies on Iran and the countries of the region.

The easy movement of extra-regional military vessels in the Persian Gulf continued until our country did not have a suitable weapon to deal with American vessels to drive them away from its shores. The attack of the American forces on Afghanistan and Iraq also caused an increase in the presence of the American fleet and extra-regional forces in the Persian Gulf, and this led to a struggle at the level of senior commanders to obtain a weapon that could keep the American forces away from the shores of Iran.

At this time, Shahid Tehrani Moghadam comes into action without having direct responsibility in the field of naval weapons. Shahid Tehrani Moghadam's idea was to build a naval ballistic missile, even though there was no such weapon in the country's armed forces until then.

Thunder 69

At that time, the IRGC's most accurate operational missile was the Thunder 69 missile. Thunder 69 was actually the Chinese B610 missile that was purchased by the IRGC from China in 1369 (1990). The Chinese missile was actually a surface-to-surface SAM-2 air defense missile and had a range of 150 km.

Shahid Tehrani Moghadam's idea was based on this axis to design an anti-ship ballistic missile by changing the use of Thunder 69 missile. Based on this, a project named "Qadr" is keyed in the self-sufficiency jihad of the IRGC Air Force.

But this project has faced many issues. Anti-ship missiles in that period were mainly cruise missiles that have a straight trajectory, but the ground-to-ground ballistic missile has a curved trajectory and is designed to target fixed targets, and building a ballistic missile that can target moving targets is difficult. It was very difficult. At the same time, the specialists of the Ministry of Defense had also started the construction of the anti-ship cruise missile in the form of the "Yaali" project.

Finally, with the support of Sardar Shahid Ahmed Kazemi, who was in command of the IRGC Air Force at that time, the Tander surface-to-surface missile became an anti-floating missile.

A lot of tests are done for the Qadr anti-submarine missile to be operational, but the final test is done when Shahid Tehrani Moghadam is no longer responsible for the air force's jihad, but he will be present at Lake Urmia for the final test.

On the day of the missile test, the weather in Lake Urmia will be cloudy, and this makes the success of the work doubtful. But by the grace of God, an opening is opened in the clouds and the order to fire is issued. The missile is fired and by passing through the opening between the clouds and locking onto the predetermined target, it hits and destroys it precisely. Later, the achievements of this missile will be used in the design and construction of "Persian Gulf" and "Hormoz" missiles.

In this way, the "Qadr" missile becomes the first Iranian anti-ship ballistic missile. Now years have passed since then, and the achievement of Shahid Tehrani Moghadam is today in the hands of the Yemeni Mujahideen as an anti-ship weapon.

The "Environment" missile of the Yemeni armed forces is actually designed with the exact model of the Iranian Qadr anti-ship missile. The Yemeni army also had a significant number of SAM-2 defense missiles for years. With the start of the Saudi invasion of Yemen, these defense missiles became Qahir 2 and Qahir 2 ground-to-ground missiles, which carried out successful operations against the Saudi army and its allies.

However, during the parade of Ansar Allah's forces, the anti-submarine model of Qahir missiles, which was now equipped with an optical seeker to target enemy ships, like the Iranian Qadr, was displayed under the name "Environment".

This issue indicates that the Islamic Republic of Iran has been able to pursue the level of support for the resistance front higher than before in recent years, and in addition to all-round support for this front, it has put the transfer of technology in order to make the resistance groups more powerful. An issue that has led to the formation of an integrated command and control network in the region, especially in the fields of drones and missiles.

Now, the missile that was once able to keep the Americans away from Iran's shores has turned into a weapon that has been able to face serious challenges to the interests of the United States and its main ally in the region, the Zionist regime.

Annex 39: Article published on 29 May 2024 by the Iranian media Tasnim News stating that Iranian naval ballistic missile's technology is at disposal of Yemen

29 May 2024 by Tasnim News (Iranian media)

Inspired by Iran, the Yemeni military forces have obtained the technology to manufacture anti-ship ballistic missiles.

Iran's first homegrown naval ballistic missile, called 'Qadr', was developed by late Iranian commander Brigadier General Hassan Tehrani-Moqaddam more than a decade ago.

Iran's technical know-how to produce such anti-ship missiles is now at the disposal of the Yemeni military forces.

Patterned after the Iranian missile, Yemen's 'Muhit' (Ocean) missile is capable of detonating naval targets.

The Yemeni Army has been in possession of surface-to-air missiles for many years. After the invasion of Yemen by a Saudi-led coalition in March 2015, the Yemeni forces converted the SAMs into surface-to-surface missiles, known as Qaher-2 and Qaher-2M, which carried out many successful operations against hostile targets.

كما شارك في العرض عدة أنواع من عائلة صدد (Stopper) الإيرانية المركبة على المركبات لأنظمة المراقبة الكهروضوئية ، لتشمل طرازي 103 و 202- و Sadad بـ RU-1000 يوم / كاميرا حرارية مبردة ليلاً مسلحة على نطاق واسع من قبل فريق الدرس الثوري الإسلامي (IRGC) جنباً إلى جنب مع أنظمة الدفاع الجوي على ارتفاعات منخفضة . يتم تسويق هذه الأنظمة البصرية على أنها قادرة على اكتشاف البشر من مسافة تصل إلى 10 كم والمركبات من مسافة تزيد عن 20 كم أثناء النهار أو الليل

Unofficial translation:

Several variants of Iran's vehicle-mounted *Saadad* (Stopper) family of electro-optical surveillance systems also participated in the display, to include the *Saadad-103* and -202 models, some of which are equipped with the RU-1000 day/night-cooled thermal camera widely used by the IRG combined with low-altitude air defence systems. These optical systems are marketed as being able to detect humans from up to 10 km away and vehicles from over 20 km away during the day or night.

**Figure 75.3.2
I-103 EOSS produced by Iran**

The EOSS-I 103 is an ideal system for long range surveillance, observation and monitoring of land, air and sea related operations. The system is designed in a modular construction for conversion and adapting system performance to mission parameters. A variety of sensors and control equipment have been integrated, including precise high speed payload, infrared and visible cameras with variable focal length lenses and a laser range finder.

Ministry of Defense and Support for the Armed Forces of I.R. of Iran
DEFENCE INDUSTRIES ORGANIZATION
www.dio.mil.ir DIO
120 MM STANDARD MORTAR LAUNCHER HM 16

□ General Specifications:
This mortar launcher is a kind of smooth-bore and barrel-loading weapon with a 360° firing field. Due to its high elevation angle, it can be fired from behind the shelter. To make it easy for infantry to carry the weapon in difficult terrain, it can be disassembled and taken into small pieces. Its simple structure enables the erection and rapid deployment by two or three crews. It must be noted that the barrel warms slowly, so it does not produce an effect on the rate of fire. Because of its relatively small dimensions, it can be easily fired in a dug hole on the ground, which protects the mortar launcher as well as the crews.

□ Technical Specifications:

Dimensions	QDR
Barrel	120 mm
Carriage

www.diomil.it | **60 mm STANDARD MORTAR LAUNCHER | HM 14**

General Specifications:
This mortar launcher is a kind of smooth-bore and barrel-loading weapon and has a high elevation angle with a 360° firing field. It is usually operated by two crews, but it can be operated by one crew in emergency. Its sight device is simple and accurate and remains in a steady state during firing. This mortar launcher is able to fire with high accuracy.

Technical Specifications:

DESCRIPTION	DATA
Model	HM14
Caliber	60 mm
Length of barrel and breech	720 mm
Rate of fire	1200 rpm
Min. range of mortars (M14 model M1)	200 m
Max. range of mortars (M14 model M1)	4000 m
Elevation range	60° – 80°
Rate of fire	25 in the first minute then 7 continuously
Weight in firing position	17.5 kg

Announcement of 2,000 kilometre-range *Quds-4 LACM*

 **Pataramesh**
@Pataramesh ...

The claim is bold:
— Qods-4 cruise-missile improved its range to 2000km

From ~1400km Qods-1 to 1650km Pavah and now Qods-4

Two new weapons after the Shahed-136, shown today: Both reach Tel Aviv from — Sanaa
- Qods-4
- Ghadr-F/Tufan
- Shahed-136
➡ Geostrategic message —

Quds Force Official Rostam Ghasemi: Iran's Friends In The Region Have Retaliated Against Israel And Will Continue To Do So; We Have A Few Military Advisors In Yemen And Have Provided Weapon-Manufacturing Technology To The Yemenis

Source: Russia Today TV (Russia)

Former Iranian Minister of Oil General Rostam Ghasemi, Assistant Commander of the IRGC-QF said that Israel is behind every sabotage operation around the world and in Iran and that Israel's actions will not go unanswered. He made these remarks in an interview with Russia Today TV that aired on April 21, 2021. General Ghasemi said that while Iran has "espoused a policy of patience and restraint," it has retaliated against Israel with the help of its "many friends in the region" and it will continue to do so. He added that the Yemenis participated in retaliation against Israeli ships. General Ghasemi continued to say that "all the weapons the Yemenis possess are a result of our aid." For more information about General Ghasemi, see MEMRI TV clip no. 7080.

Rostam Ghasemi: "We believe that Israel plays a role in every sabotage operation around the world, and in Iran as well. The Zionist entity plays a role in every act of sabotage that is carried out in Iran. The Israelis know, as well they should, that any act will be met with retaliation. So far, Iran has espoused a policy of patience and restraint. Nevertheless, Iran has retaliated, and Israel will be met with more responses. If this entity carries out any action against Iran anywhere in the world, it will be met with retaliation at the appropriate time, and in a manner that will make it regret what it did. Israel should not think that we are necessarily the ones attacking its ships. We have many friends in the region, and they are the ones retaliating against Israel. They retaliated for those attacks. We have many friends in the region. They will not allow the Israeli actions to go unanswered."

Interviewer: "Are they retaliating on behalf of Iran?"

Ghasemi: "We have many friends in the region and the world. Israel knows, as well it should, that its actions will not go unanswered."

Interviewer: "Have the Yemenis retaliated on behalf of Iran in the Gulf of Oman, for example?"

Ghasemi: "The Yemenis are our friends, and they can easily retaliate, and this is what they are doing."

Interviewer: "Have they retaliated so far? And where?"

Ghasemi: "Yes, they have retaliated, and some of it was published in the media.
[...]

"We are providing advisory aid to the Yemenis on a very small scale."

Interviewer: "Military advice?"

Ghasemi: "Limited military advice. All the weapons that the Yemenis possess are the result of our aid. We helped them with weapon-manufacturing technology, but the actual production of the weapons is done in Yemen. They produce the weapons themselves. These drones and missiles are made in Yemen."

Interviewer: "Are there military advisors in Yemen now?"

Ghasemi: "There is a small number. You can count them on the fingers of one hand."

Interviewer: "What is their mission?"

Ghasemi: "To give advice."

Interviewer: "Are you sending weapons to Yemen now?"

Ghasemi: "There is no need to send weapons.

[...]

"We do not feel threatened by some countries' normalization of relations with Israel. We are a strong country with enormous defensive capabilities. Therefore, this does not pose a direct threat to Iran. But we ask these Muslim and other countries to honour the rights and aspirations of the Palestinian people. The Palestinians are still suffering from the Israeli persecution and occupation, and they are not happy about this normalization."

Annex 96: Statement by the Iranian forces' spokesman Abolfazl Shakarji published by the Iranian media Noor News on 22 September 2020 announcing the transfer of experiences in technology in the defence sphere, and sharing their experience and knowledge with the people of Yemen

Iran Has Supplied Yemen with Defence Knowhow

Publication Date: 9/22/2020 9:32:20 PM

NOURNEWS - A senior spokesman for the General Staff of the Iranian Armed Forces said the Islamic Republic has provided Yemenis with the experience and know-how in the defense sector.

Speaking at a televised program on Tuesday, Brigadier General Abolfazl Shekarchi dismissed the claims that Iran has supplied missiles to Yemen.

"We provided them (Yemenis) with the experiences in technology in the defense sphere, as they have learned how to produce missiles, drones and weapons in Yemen by themselves," he underlined. **"We have shared our experience and knowledge with the people of Yemen,"** the general added.

Unlike what the enemy is trying to portray, the people of Yemen are smart and sophisticated, as they have managed to manufacture missiles and advanced drones and make great headways in the electronic warfare, Shekarchi noted. The spokesman reiterated that Iran's assistance for the regional countries is restricted to "spiritual presence and advisory help".

"The resistance front countries have armies and forces themselves. **We provide them with advisory help. In order to share our experiences with the people of Syria, Iraq, Lebanon and Yemen, our experienced forces go there and give them intellectual assistance,** but this is the people and armies of those countries who stand against the enemies in practice," he noted. The general finally emphasized that Iran would provide whatever help it can for any country standing against the Zionist regime and the US.

Due to the economic problems, Iran would not give anything to the others for free, he noted, saying the foreigners would make purchases.

In comments in October 2019, Chief of Staff of the Iranian Armed Forces Major General Mohammad Hossein Baqeri had underlined that Iran's military officers only offer advisory assistance to popular forces in Yemen, rejecting reports that Tehran has supplied missiles to the impoverished Arab country.

قال المتحدث باسم القوات الإيرانية، أبو الفضل شكارجي، إن إيران نقلت تجربتها التكنولوجية في المجال الدفاعي إلى اليمن ليتمكن اليمنيون من صناعة الصواريخ والطائرات المسيرة بأنفسهم.

وأكَّدَ المتحدث باسم القوات الإيرانية: "نحن لا نرسل الصواريخ إلى اليمن لكنهم يأتُونا ويسُنْعُونَها بأنفسهم ليطلقوها على رؤوس أعدائهم".

وأضاف أن إيران تدعم الشعب اليمني والشعب الفلسطيني وكل من يصفق في مواجهة أمريكا وإسرائيل.

وأوضح أن الأوضاع الاقتصادية لاتسمح لنا بمنع كل شيء لحلفائنا مجاناً وهم يشترون منا بعض الأشياء أحياناً، مثبِّراً إلى أن "الشعب اليمني ذكي ويمتلك خبراء كبار تمكّنوا من صناعة طائرات مسيرة متقدمة في زمان قياسي ولم تتمكن جبهة الاستكبار من إخماد صوتها".

Iran announces transfer of military technology to Yemen to make missiles and drones

Russia Today

22 September 2020

Iran has transferred its technological experience in the defense field to Yemen so that Yemenis can make their own missiles and drones, said Iranian forces spokesman Abolfazl Shakarji.

"We do not send missiles to Yemen, but they are now making them themselves to launch them on the heads of their enemies," the Iranian forces spokesman emphasized.

He added that Iran supports the Yemeni people, the Palestinian people and all those who stand against America and Israel.

"The economic situation does not allow us to give everything to our allies for free and they buy some things from us sometimes," he said, noting that "the Yemeni people are smart and have great experts who were able to make advanced drones in record time and the front of the oppression has not been able to silence their voice."

Unofficial translation of the statement by the Iranian Chief of Staff General Mohammad Bagheri published by the Tehran office of the Qatari media Al Jazeera on 2 October 2019 announcing the advisory support of Iran to the Houthis

Iran admits for the first time to supporting the Houthis

General Bagheri threatens those who intend to threaten the security of the region (Agencies-Archive)

2/10/2019 by Al Jazeera Net-Tehran

For the first time since the outbreak of the war on Yemen in 2015, Iran has acknowledged that its Revolutionary Guards have provided "advisory and intellectual support" to its Houthi ally.

Iranian Chief of Staff General Mohammad Bagheri revealed his country's support for the Houthis in an interview with the Chinese TV station Phoenix, which was reported by the Iranian press. He emphasized that the situation in Yemen is somewhat different from the Iraqi and Syrian arenas.

"We went to Iraq and Syria at the request of their governments, and we provided advisory support, weapons and equipment, and the Revolutionary Guards were of course responsible for that mission," Bagheri said. He made no secret of the Iranian military's assistance to IRGC forces there.

Bagheri explained that Yemen today is under a blockade and all of its ports are closed, and that for some time there has been no possibility of even sending medicine to the country. He denied that his country had sent missiles to Yemen, asking, "How can large, meter-long missiles be sent to Yemen when medicine cannot be sent to Yemen?"

He emphasized that Iran's assistance to the Houthis is limited to advisory and intellectual aspects, revealing for the first time that the Revolutionary Guards have taken on this task, and stressed that the Islamic Republic will stand by the Yemeni people until they are able to remove this aggression from their country.

Tehran has always denied arming the Houthi group in Yemen, but the United States and Saudi Arabia accuse it of providing military support to the group, which General Bagheri has denied.

Ready for war

Asked about recent developments in Gulf waters and the possibility of a war in the region, the Iranian military commander said that Tehran has not and will not want to start wars in the region, and that it seeks more than others for peace and stability in the region.

He added that the Islamic Republic has not started a war for the past 300 years, and the Iranian people have not attacked any other country. He added that his country's interests in the Gulf region and the Strait of Hormuz are closely linked to the region's security, describing Iran as the most important and strongest country responsible for providing security in the region.

Bagheri said that his country wants security in the Gulf waters more than any other regional country, and that it does not want to participate in any war, but at the same time it will stand strong against anyone who intends to threaten the security of the region, stressing that Iran's enemies will not dare to launch a war against it because they know very well that their losses will outweigh the benefits, he said.

In another matter, the general stressed that his country's military relations with China are developing after the implementation of "strategic consensus" between them, revealing Tehran's intention to hold joint naval military exercises with Russia and China in the northern Indian Ocean and the southern Sea of Oman in December.

Last month, Bagheri paid an official visit to the Chinese capital Beijing at the head of a high-level military delegation at the invitation of his Chinese counterpart, which Iran announced at the time that his visit "comes within the framework of the strategy of defense and military diplomacy, to provide a platform to open a new page in cooperation and relations between the two countries."

Annex 99: Statement of the Houthis' military spokesman issued on 31 October 2023 claiming the attacks on Israel

**Spokesman of Yemeni armed forces
Yahya Sare'e**

Statement of Yemeni armed forces

With the help of God Almighty, our armed forces launched a large number of ballistic and winged missiles, as well as drones at various targets of the #Israeli enemy in the occupied territories.

2-The Yemeni Armed Forces confirm that this is the third operation in support of our oppressed brothers in #Palestine, and that the armed Forces will continue to carry out more qualitative missile and drone attacks until #Israel ceases its aggression.

3-The Yemeni Armed Forces confirm that this is the third operation in support of our oppressed brothers in #Palestine, and that the armed Forces will continue to carry out more qualitative missile and drone attacks until #Israel ceases its aggression.

4-We affirm that our Yemeni people's attitude on the Palestinian issue is firm and ethical, and that the #Palestinian people have the full right to self-defense and legitimate rights.

5-The #Zionist enemy entity's ongoing execution of crimes and killings against the people of #Gaza Strip and all of occupied Palestine destabilizes the region and extends the circle of conflict.

"The victory comes only from Allah"

Annex 100: Media reports/Messages by the Houthis preventing ships linked to, or heading to Israel from crossing the Indian Ocean

Figure 100.1

“X” message: Preventing ships linked to Israel from crossing the Indian Ocean

God Almighty said: (Indeed, God loves those who are killed in His cause in rows, as if they were children closely packed together) God Almighty has spoken the truth.

A victory for the oppression of the Palestinian people and a response to the American-British aggression against our country

The naval forces of the Yemeni Armed Forces, with the help of God Almighty, carried out an operation to target the Israeli ship (Pacific-01) in the Red Sea with a number of suitable naval missiles.

Meanwhile, the Air Force carried out an operation to target an American destroyer in the Red Sea with a number of drones, and the operation successfully achieved its goals, thanks to God.

In implementation of the directives of Commander Abdul-Malik Badr al-Din al-Houthi, "may God protect him," to triumph over the oppression of the Palestinian people who are subjected to aggression and siege in the Gaza Strip, and in response to the calls of the people of the Yemeni people and all the free people of the nation.

The Yemeni Armed Forces, with the help of God Almighty, have begun to expand the scope of their operations against Israeli ships, those linked to Israel, or those heading to the ports of occupied Palestine, to include the Indian Ocean Cape of Good Hope Road.

Accordingly, the Yemeni armed forces warn all Israeli ships heading to or coming from the ports of occupied Palestine not to pass through the Cape of Good Hope, unless they will be a target.

A project for our armed forces.

The Yemeni Armed Forces, within the framework of implementing these directives to achieve victory for the Palestinian people in Gaza, carried out, with the help of God Almighty, three operations against three Israeli and American ships in the Indian Ocean, using a number of suitable naval missiles and drones.

The three operations successfully achieved their goals.

The Yemeni armed forces confirm that they will not stop preventing navigation Israeli or destined for the ports of occupied Palestine in the Red and Arab Seas, as well as the Indian Ocean, except when the aggression is stopped, and the siege imposed on our brothers in the Gaza Strip.

God is sufficient for us, and He is the best disposer of affairs, the best protector, and the best helper

Media report: Preventing ships linked to Israel from crossing the Indian Ocean

سَابَا
SABA NET
Yemen News Agency (SABA)

Yemen imposes new equation by escalating its operations against enemy ships in Indian Ocean

[17/March/2024]

SANA'A March 17 2024 (Saba) - With the announcement by the leader of the nation and the man of words and deeds, al-Sayeed Abdul-Malik Badr al-Din al-Houthi, preventing ships linked to the Zionist enemy from crossing the Indian Ocean, in the direction adjacent to South Africa and the Good Hope Road, Yemen enters a new phase of confrontation with the American-British-Zionist enemy, which has crossed all borders with what it is committing of horrific crimes against the Palestinian people.

Yemen's entry into the battle of the "Al-Aqsa Flood", since its launch last October, was not a luxury or absurdity, but imposed by the current stage in order to support and assist the Palestinian people, which subjected to an unprecedented war of annihilation in contemporary history by the forces of hegemony and arrogance led by America, Britain and the Zionist entity.

The Yemeni escalation of preventing the passage of ships linked to the Zionist enemy, even through the Indian Ocean, was previously prefaced by the Commander a few days ago when he affirmed that "there are surprises and the expansion of the circle of operations in places that the enemies do not expect, in an effective manner," and here the surprises being realized today and being translated into In fact, through the operations announced by the armed forces regarding targeting enemy ships in the Indian Ocean.

Based on the religious, moral and humanitarian principle of the Yemeni people, to come to the rescue of the oppressed and to support the nation's issues, foremost among which is the Palestinian issue, it necessary for Yemen to fight the battle of "the promised conquest and holy jihad" launched by the Leader through a progressive strategy to deter the arrogance of the American-British-Zionist enemy and its persistence in committing bloody massacres in Gaza.

As long as the Zionist enemy continues to unjustly shed the blood of children, women and civilians in Gaza, the Yemenis will be more enthusiastic and jealous in revenge and victory for the blood of the Palestinians, which what the leader of the revolution confirmed in his speech on Thursday evening by saying: "Our human conscience, our religion, our morals, our dignity, our pride." Our affiliation to Islam prohibits us from watching the oppression of Palestine or remaining silent about it, the siege and starvation of the people of Gaza must be stopped, and the tragedy of children dying of starvation in the Strip must be stopped."

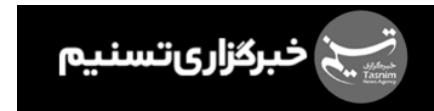

Al-Sayeed Commander sent clear messages and warnings to the American and British enemy that "Washington and London have no choice but to stop their support for the Zionist entity, end the aggression and starvation of the people of Gaza, and bring medicine and food to the residents of the Gaza Strip, who have been dying of murder and starvation for 160 days."

With the honorable and supportive Yemeni position for the Palestinian people and their just cause, Yemen charts a new history for the region away from guardianship, subordination, and dependence on the forces of hegemony and global arrogance, marking the beginning of a new era in which Yemen becomes an effective regional force on the international scene, unlike what it in previous stages.

Iran's four-pronged and complex attack on Israel (Iranian media Tasnim news, 14 April 2024)

The extensive operation of the Islamic Revolutionary Guard Corps against Israel is a complex, multifaceted and intelligent response to Israel's recent crimes.

According to the political group of Tasnim News Agency, today's attack on Israel, which was carried out in response to the aggression of this regime in Syria and the martyrdom of several Iranian military commanders, is very complicated in its kind.

In this attack, a combination of hundreds of UAVs and a large number of missiles of various types were used, more importantly, this attack was not carried out only from Iran, and this regime is being punished from four directions.

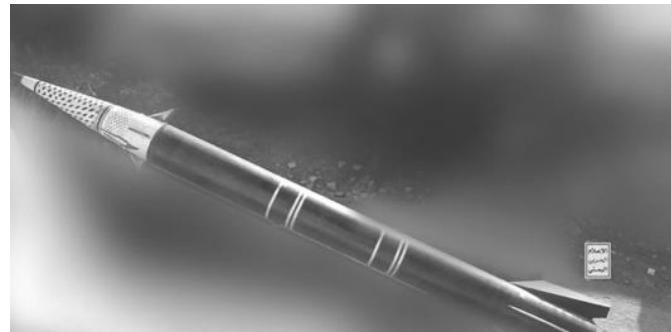

Apart from Iran, Yemen from the south, Hezbollah of Lebanon from the north and the Iraqi resistance from the east of the occupied territories have also fired a combination of their war tools towards the occupied territories.

Western media admit that the defense systems of the Zionist regime are not able to neutralize this complex attack. Punishment of the aggressor is ongoing, and if Israel makes an unreasonable move, the punishment will be intensified

Unofficial translation

Today, the Yemeni Ambassador to Tehran, Ibrahim Al-Dailami, discussed with the Iranian Minister of Defence, Brigadier-General Amir Hatami, ways to enhance joint cooperation between the two countries in the military fields.

In the meeting, the Yemeni ambassador conveyed the greetings of the Minister of Defense, Major General Mohammed Al-Atefi and the Chief of Staff, Major General Mohammed Al-Ghamari, to the Iranian Minister of Defense, praising the cooperation relations that bind the two countries at various levels and the Iranian position towards the aggression against Yemen.

In turn, Brigadier General Hatami asked Ambassador Al-Dailami to convey his greetings to the Minister of Defense and the Chief of the General Staff, pointing out the necessity of strengthening the relationship between the Iranian and Yemeni armies.

The Iranian Defense Minister affirmed Iran's support for a political solution in Yemen and that it would be left to the Yemenis to determine the future of their country.

Ultra Series | DH-TPC-PT8620A-B

DH-TPC-PT8620A-B
 Thermal Network Hybrid Pan & Tilt Camera

- 640x512 VOx uncooled thermal sensor technology
- Athermalized Lens(thermal), Focus-free
- 1/1.9" 2Megapixel progressive scan Sony CMOS
- Powerful 30x optical zoom
- Support fire detection & alarm
- Max 160°/s pan speed, 360° endless pan rotation
- Up to 300 presets, 5 auto scan, 8 tour, 5 pattern
- 7/2 alarm in/out
- Micro SD memory, IP67

Ultra Series
40mK
Fire Detection
Analysis
AC 24V
IP67

The Panel notes that among the materiel intercepted, the presence of AM-50 anti-material rifles and the RPG-7 launchers have technical characteristics and markings consistent with those produced in the Islamic Republic of Iran, and POSP sights produced in Belarus. Belarus informed the Panel that they had been exported to the Islamic Republic of Iran between June 2016 and April 2018 and that that country had provided an end-user certificate stating that they would be used exclusively for the needs of the Ministry of Defence and Armed Forces Logistics.

جلوک ستور للمهمات العسكرية

@GlocStore

تعتبر شركة جلوک ستور متجر رائد في توفير الاسلحة الشخصية والفردية في الجمهورية اليمنية وهي
شركة مرخصة بشكل رسمي كأول
شركة متخصصة 777-754-232

Translated from Arabic by Google

Glock Store is a leading store in the provision of personal and individual weapons in
the Republic of Yemen, and it is an officially licensed company as the first
Specialized Inc. 232-754-777

جلوک ستور للمهمات العسكرية
@GlocStore

...

يعتبر السلاح في كثير من الدول خصوصاً بلادنا جزءاً لا يتجزأ من الثقافة والعادات والتقاليد
اليمنية فهناك انواع للسلاح أو مايسماً بـ السلاح الأبيض و السلاح الشخصي والذي يرتبط
بعراقة تاريخنا منذ القدم و الشخصية اليمنية

صور من معرض جلوک ستور اليمن صنعاء شارع الزبيري

Translated from Arabic by Google

Weapons are considered in many countries, especially our country, as
an integral part of the Yemeni culture, customs and traditions. There
are types of weapons or what is called white weapons and personal
weapons, which are linked to the ancient history of our history and the
Yemeni character.

Annex 131: NP-34 pistols with technical characteristics and markings consistent with those commercialized by Norconia GmbH presented for sale in Houthi-controlled areas

According to the German authorities, conveying the comments of Norconia GmbH, the sole importer for Europe of Chinese arms manufacturer North Industries Corporation (Norinco), the documented NP-34 pistols are not counterfeits. After comparing with the files, Norconia GmbH informed that all of the 16 NP-34 pistols documented cannot be found in their weapons books and that they were not imported by them. They said, “The fact that the pistols still bear the ‘DE NORCONIA’ marking is due to the following fact: back in 2016, Norinco as a supplier pre-produced 200 NP-34 pistols with this marking. From that point until today, however, due to declining demand, Norconia GmbH has only ordered five NP-34 pistols, but marked with totally different serial numbers.” Norconia GmbH assumed that the 16 NP-34 pistols documented, which were originally intended for them, were exported directly from China via other channels.

The following features are some of the characteristic of the KL assault rifles manufactured in Iran, and which are visible on those documented by the Panel:

- A seven-digit serial number on the left side of the weapon, usually just above the magazine well;
- “0” digit (often covered by a bar);
- Weapon selector markings are on the right side of the receiver to the right of the selector lever. Markings are as follows: « L » (full automatic fire) and « D » (semi-automatic fire);
- Pistol grip, hand guard, and stock made of red-brown plastic furniture;
- Absence of compensator on the muzzle;
- Enclosed front sight.

Annex 145: TK-9 Tondar sub-machine gun (SMG) with technical characteristics and markings, consistent with those produced in Iran, presented for sale in Houthi-controlled areas

The Iranian authorities stated to the Panel that none of the documented serial numbers correspond to Iranian products. Iranian authorities also stated that at least similar SMGs manufactured in three countries are very similar to Iranian products.

Figures 167.1

Almas to the Port of Hudaydah (around 18 October 2023)

The *Almas* was visible on satellite imagery on 19, 20 and 21 October (the image of 18 October had 100 percent cloud cover) – it was not visible anymore on 22 October imagery, so *Almas* left Hudaydah on 21 or 22 October 2023.

Source: Planet satellite imagery

Table 2

Almas to the Port of Hudaydah on 18 October 2023

According to S&P Global MIRS, the position of the ship on 18 October was 14.91335 N / 42.887875 E, which is almost exactly the location of where the ship is docked, as visible on figure 167.2

Table 3

Presence of *Almas* in the civilian port,⁷² near the Bandar Abbas Military Harbor, Iran, between 20-26 September 2023

Source: MIRS

Based on Planet SkySat 0.5-meter resolution satellite imagery, it could be assessed that the *Almas* arrived in the Bandar Abbas Military Harbor (exact location from MIRS: 27.08.47N / 56.12.12E) on 19 or 20 September (not visible on 19 September image, but present on 20 September image) and left the Harbor on 25 or 26 September (still visible on 25 September image but gone on 26 September image).

Table 4

Presence of *Almas* near the Bandar Abbas Military Harbor, Iran, on 3 October 2023, before sailing directly to the Port of Hudaydah

Source: MIRS

On 27 September, the *Almas* is visible on PlanetScope 3-meter resolution satellite imagery at the Shahid Rajaee Eastern Anchorage location (exact location from MIRS: 27.08.17N / 56.14.39E). The *Almas* is also visible on 29 September, 1 and 3 October but gone on 5 October. So, Almas left for Yemen on 3, 4 or 5 October 2023.

Part 1: Whereabouts of *Kasra-3* in September/October 2023

The *Kasra-3* spends,

According to MIRS, the *Kasra-3* spent sometime in the Port of Shahid Rajae and then waited in the Shahid Rajae Eastern Anchorage for a while. The *Kasra-3* was visible on 24 September 2023 in the Shahid Rajae Eastern Anchorage. On the next available satellite imagery on 29 September, she had left.

Source: MIRS

According to the table above, the *Kasra-3* then sails to the Port of Saleef in Yemen, arriving there on 6 October at 15:50:58 hrs. On satellite imagery of 6 October 07.31 UTC, she is not visible, but she is visible on satellite imagery from 7 October 06:50 UTC and continues to be visible till 15 October 2023 07.49 UTC. On the next available satellite imagery (17 October 06.50 UTC) she is gone. According to MIRS, she went back to Iran.

Part 2: Whereabouts of *Kasra-3* in October/November 2023

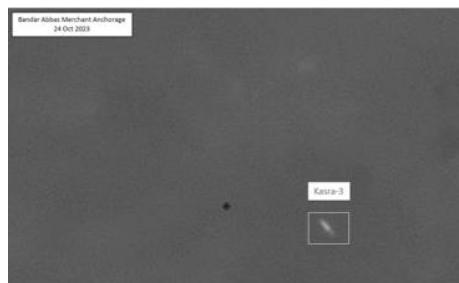

For a long period of time from the second half of October 2023 and the first half of November 2023, there is no AIS location data available for *Kasra-3*. According to MIRS, she was at the Bandar Abbas Merchant Anchorage on 24 October. On satellite imagery of this location on 24 October, *Kasra-3* is possibly visible. On the next available image of 25 October, she had left.

Figures 168.6 (up) and 168.7 (down)

***Kasra-3* at Bandar Abbas Merchant Anchorage on 24 October 2023**

Source: Planet satellite imagery

Disclaimer: The boundaries and names shown and the designations used on this map do not imply official endorsement or acceptance by the United Nations.

According to MIRS, *Kasra-3* arrives on 22 November at the Saleef anchorage point and stays there till 30 November.

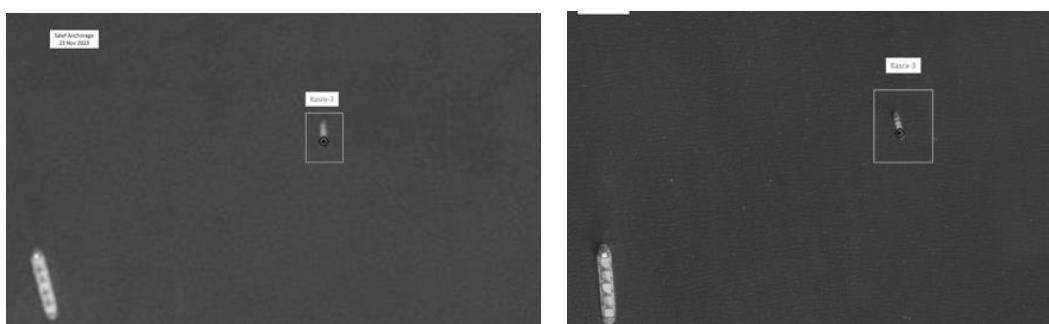

Figures 168.8 (up), 168.9 (lower left), and 168.10 (lower right)
Kasra-3 at Saleef anchorage, on 23 and 24 November 2023

Source: MIRS

Disclaimer: The boundaries and names shown and the designations used on this map do not imply official endorsement or acceptance by the United Nations.

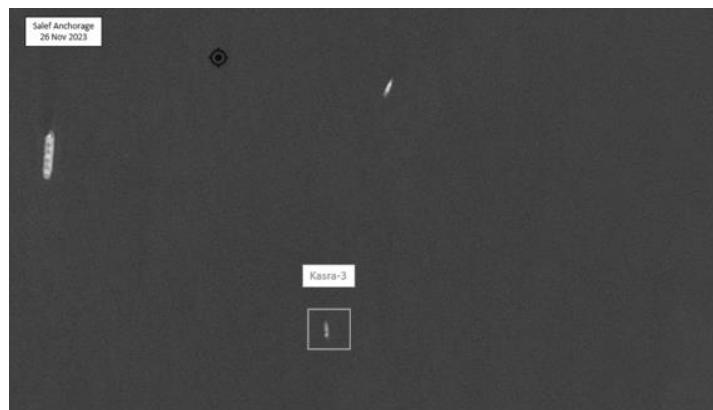

As per the satellite imagery of the Saleef anchorage point of 21 November *Kasra-3* is no visible but on 23 November she is present (NB: no imagery available for 22 November) and on 24 November she is also visible (even on 0.5-meter resolution image).

Source: Planet satellite imagery

On the next available satellite image (26 November 2023), it looks like *Kasra-3* was heading south. As per the satellite image of 27 November, there are some clouds, but it looks like a ship is docked in the Port of Saleef (same location where *Kasra-3* was docked in October 2023). It is hard to say whether the ship was there on 28 and 30 November, but on 1 December she had, most likely, gone. Although this hypothesis cannot be 100 percent confirmed, based on the available satellite imagery, it is the most likely analysis. It would be unrealistic to say that that *Kasra-3* would have sailed from Iran to the Saleef anchorage point and then would have sailed back without visiting a port in Yemen. There is also no evidence of ship-to-ship transfer.

Table 1
Suspicious maritime activities by *Dubai-1*.

In and out, suspicious movements between Somalia, Oman, Djibouti, Iran, and Yemen are highlighted

Repeatedly turning off and turning on the Automatic Identification System (AIS) of the aforementioned ship prevented it from being able to be followed accurately, and its sailing along the Yemeni coast raises suspicion of that ship. The above-mentioned activities may enhance the possibility of the ship transporting prohibited materiel for the Houthis, and the possibility of transferring materials from one ship to another is not excluded, as the ship's entry was monitored twice, and it docked in the port of Saleef.

29 March to 04 April 2024	Yemen with its AIS switched off for 6 days

*Appendix A***Unofficial translation of the Press Release by CBY, Aden****Press Release**

The Central Bank of Yemen followed up on the terrorist Houthi militia's announcement of responsibility on the branch of the Central Bank in Sana'a, announcing the issuance of a one-hundred- riyal coin and announcing that it would be put into circulation instead of the legal one-hundred- riyal paper currency. The Central Bank of Yemen rejects this dangerous and illegal escalatory act that does not take it into consideration. In any way, in the interests of citizens, the Central Bank affirms the above and clearly warned of it by preventing all parties, institutions and individuals from accepting or trading any counterfeit currency issued by an illegal entity in violation of all financial and banking laws and customs, and that it reserves its legal right to take precautionary legal measures. To protect the financial assets of citizens and financial and banking institutions.

The militias bear the consequences of this irresponsible escalation and the resulting complexity and confusion in the dealings of citizens and financial and banking institutions internally and externally.

Annex 175: Houthi revenue from customs, taxes, fees, and other illegal fees

The Panel received information that the amount of revenue collected and controlled by the Houthis during 2023 was approximately YR3.392 trillion. By illegally collecting fees in the name of customs and other taxes from the traders sending their goods from the GoY area to the Houthi-controlled area, the Houthis have been treating the GoY area as a separate country. Panel's sources estimate the Houthis' revenues from these illegal land collection points to be approximately YR300 billion in 2023. Sources affirm that these illegal collections go to the top Houthi leaders and used for payment of salaries to its combatants and for other military purposes.

The Houthi-appointed authority in Sana'a, collects illegal fees from airlines flying over Yemen, estimated at approximately \$32,850,000. When contacted, some airlines officials informed the Panel of their reluctance to stop paying to the Houthis to avoid any possible attacks on their aircrafts.

'khums' tax

The revenue from the 'khums' tax ("one-fifth", or 20 percent), imposed a few years ago by the Houthis by a Decree signed by Mehdi al-Mashat, president of the Houthi-appointed Supreme Political Council (SPC), benefit the Al-Houthi family and a large number of Houthi loyalists. This tax, on natural resources and economic activities carried out in areas under the control of the Houthis, is estimated to be a few billion YRs, is a clear violation of the financial sanctions regime.

Collections from the merchants in Ibb in the name of those killed by the Houthis

The Panel was informed that the Houthis recently had imposed new levies by force on the merchants in the Ibb Governorate. The Panel interviewed a few of these merchants, who requested anonymity. Purportedly, these new levies are intended to assist families of individuals who have been killed by the Houthis, obligating merchants to contribute food baskets. Merchants were presented with the choice of providing specific quantities of food baskets or paying an equivalent amount of money for them, while threatening violators with penalties. These taxes are part of a larger set of levies imposed by the Houthis, taking advantage of the month of Ramadan as a significant period for tax collection by the Houthis.

Water Tax

Recently, the Houthis resorted to another method of collecting money by levying water tax in the name of "Teacher support and education Fund". The Panel's sources in the education department, who requested to remain anonymous, informed that the Houthi authorities are collecting money in the name of education but the same is mostly used for their military purposes. The authorities are not paying any salaries to the teachers because of which the teachers association announced an open strike until payment of their salaries pending since 2016. On 8 October 2024, Houthis arrested Abu Zaid al-Kumaim, head of the Yemeni Teachers Club, for organizing protests demanding the payment of teachers' salaries.

Arbitrary cancellation and transfer of Intellectual Property Rights (IPRs)

To enhance their financial gains, the Houthis have adopted an arbitrary and illegal policy of withdrawing trademarks from legitimate commercial entities and transferring them to entities

under their control. There have been several reports concerning violations of IPRs, especially commercial trademarks of companies and merchants in Sana'a. The Panel has received information that several lawsuits have been filed in the Commercial Court of First Instance, Sana'a against the Houthi-appointed Ministry of Industry and Trade for alleged violations of IPRs and the revocation of trademarks registered under their names. There have been reports of cancellations of the registrations of specific commercial entities, some of which have been subsequently transferred to others, affiliated to the Houthis. The Panel is in possession of some documents and is investigating the matter.

Collection of illegal fees from civil aviation sector

Exploiting the ongoing presence of the air traffic control centre at Sana'a airport, the Houthi-appointed authority in Sana'a, collects illegal fees from airlines flying over Yemen. Following the relocation of the General Authority for Civil Aviation and Meteorology to Aden, several airlines were notified by the GoY to redirect their overflight fees to the authority in Aden. Panel's investigation revealed that approximately 150 aircrafts traverse Yemen's airspace daily, each paying approximately \$600 as an overflight fee. The annual collection of overflight fees by the Houthis, deemed unlawful by the GoY, is estimated at approximately \$32,850,000. When contacted, some airlines officials informed the Panel of their reluctance to stop paying to the Houthis to avoid any possible attacks on their aircrafts. In addition to overflight fees, the Houthi-appointed authority also collects various airport service charges, including those for landing and take-off, passenger fees, airfreight fees, ground services, and all other airport-related fees.

Annex 176: Financing the purchase of military materiel

1. The Panel is investigating a case involving procurement of weapons by the Houthis using a Yemeni businessman. For the sake of the safety of the concerned person and his family members, his name and other details are not being disclosed. He was in the profession of doing customs clearance work in Yemen for the importers/traders for over 10 years.
2. Investigations revealed that in the past he had travelled to various countries including China, Djibouti, India, Iran, Lebanon, Oman, Somalia, Syria, and the UAE. His last foreign visit was reportedly in March 2023, after a shipment of missile components, which he was trying to clear, was intercepted by the Yemeni customs. He had also reportedly met the officials of the Houthi-controlled telecom company 'Tele Yemen', some whose telecom consignments were allegedly seized by Yemeni customs a few years ago.
3. Confidential sources informed the Panel that he is being investigated by the authorities for his alleged role in procuring/clearing missiles and missile components, weapons and other military materiel, including dual-use items for the Houthis by smuggling these weapons into Houthi-controlled areas. One such consignment was seized by the Yemeni customs, in which the components of missiles were concealed inside commercial cargo. He allegedly received funds arranged by the Houthis, both by cash and through transfers from various exchange companies in Yemen and Djibouti. The authorities reportedly seized cash amounting to \$198,000 from him, when he was arrested in February 2024 in Djibouti.
4. The Panel learnt that after the seizure of the aforesaid consignment, on the instructions of Major-General Muhammad Ahmad Al-Talibi, a Yemeni national operating from Iran, he went to Djibouti in August 2023 to start a business of importing military materiel from Iran and other countries. He changed his name and got a new passport to avoid any identification as a Houthi. He also set up a company in Djibouti. (para. 77 and case study 6).
5. The Panel's sources informed that, while in Djibouti, he received payments from various sources, arranged by the Houthis, including from exchange companies in Yemen and made payments to various suppliers of military materiel procured through Djibouti, before transferring these materiel to Houthi-controlled areas.
6. Investigations by the Panel, including scrutiny of some of the documents made available, revealed that he maintained accounts in Sana'a, Yemen in:
 - Al-Radwan Exchange and Transfers Co. Sana'a, and
 - Al-Hazmi Exchange Co. Sa'ana, Yemen.
7. He also maintained accounts in Djibouti in:
 - Djibouti Exp. Exchange Co
 - Al-Khaleel Exchange Co
 - CAC Bank

The Panel's investigation relating to his accounts revealed the following:

1. Djibouti Express Exchange Co. Djibouti

Sl. No	Date of transaction	Amount	Remarks
i	26 September 2023	\$ 6,490	Amount deposited
ii	8 October 2023	\$ 27,300	Amount deposited
iii	8 October 2023	\$33,000	Amount deposited
iv	11 October 2023	\$50,000	Amount deposited
v	14 October 2023	\$217,533	Amount deposited

vi	14 October 2023	\$ 50,000	Amount received from Al Dhya Co.
vii	14 October 2023	\$ 60,720	Amount received from Nabil Ahmed Ali Ali
viii	17 October 2023	\$ 60,720	Amount transferred to Mohammed bin Mohammed Abdo Hassan
ix	19 October 2023	\$2000	deposited Djiboutian Franc 354,000 (DJF) and purchased \$2000
x	12 November 2023	\$ 50,000	deposited DJF 8,850,000 and purchased \$ 50,000
xii	No date	\$ 28,259	received from Radwan Co.

2. Al Mohel Exchange Co. Hqrs in Demt in Yemen

i. 16 October 2023 - \$30,431 received from Nabil Ahmed Ali Ali

3. Société Africaine Express Co.

i. 19 November 2023 - transferred by Radwan Express Co. to Ahmed Mahmud Hazza Al Diya Co. - \$55,000

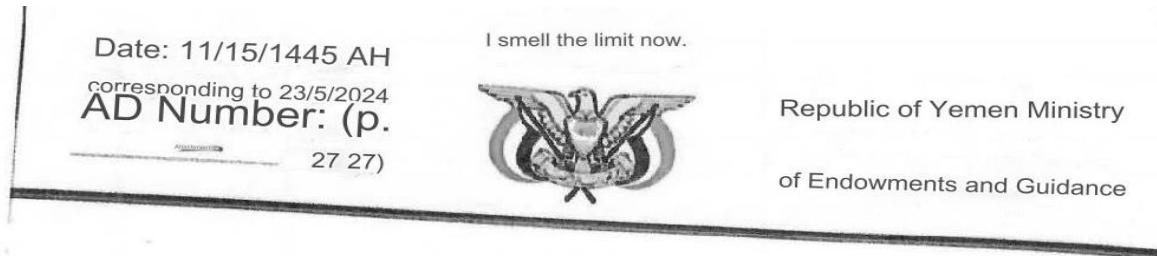

- Further, sources revealed that amount in DJF, equivalent to \$130,000, lying in his account in Al-Khaleel Exchange Co. in Djibouti was reportedly frozen by the authorities.

The matter is under investigation by the Panel.

Annex 177: Misappropriation of the assets of Amran cement factory

The Panel received information from sources indicating that the Houthis have taken control of the management and assets of the largest cement production company of Yemen, Amran. Abdul Fattah Ismail Al-Ashmouri, the newly appointed director of the factory, appointed by the Houthis, allegedly dismissed 30 employees from the factory in July 2023, and appointed Houthi loyalists. The Houthi leaders are accused of engaging in financial misconduct, obtaining large loans from banks in the company's name and embezzling substantial funds. Moreover, it is alleged that cement, disguised as humanitarian aid, was provided free of charge to the Ministry of Defence and other Houthi-affiliated entities for construction projects. Bricks were also reportedly taken by the Houthis in the name of initiatives undertaken by select charitable organizations. The company reportedly borrowed YR40 billion with high interest rate, leading to a debt exceeding YR60 billion and bankruptcy, halting production. These funds have been allegedly misappropriated by the Houthis. The Panel is investigating the matter.

Annex 178: Ministry of Endowment regarding threats from the Houthis not to deposit ticket amount for Hajj pilgrims in other accounts

Respected His Excellency Dr. Ahmed Awad bin

Mubarak, Prime Minister

Peace be upon you and God's mercy and blessings be upon you ..

Topic: This year's transfer of pilgrims from Sana'a International Airport and the abuse of the Houthi terrorist group

We offer you our best regards and wish you continued success in your duties.

With reference to the above topic, we would like to clarify that we have completed all necessary procedures to send pilgrims to the Holy House of God for this year 1445 AH from all of our country's international airports, including Sana'a International Airport, for the purpose of alleviating the burden of travel between Sana'a and other Yemeni international airports.

Accordingly, Hajj and Umrah agencies were notified to deposit the value of tickets for all pilgrims from all governorates

of the Republic, without exception, into the company's accounts at the Qatiba Bank or the Saudi Fransi Bank.

However, the Houthi rebel and terrorist group took arbitrary measures by preventing Hajj agencies

The decision to supply the value of tickets for pilgrims traveling by air through Sana'a International Airport to the bank accounts of the company, Yemen Airways, and this problem raised the concerns of the leadership of the Ministry of Endowments and Guidance and the Ministry of Transport in The temporary capital, Aden, highlights the danger of these criminal practices by these rebel militias, which do not take into account any...

illegal procedures regarding Hajj agents who were arrested and threatened with imprisonment and confiscation of their money if they deposited the value of pilgrims' tickets in the company's account outside our country. As a result, Yemeni pilgrims traveling through Sana'a International Airport, who number more than eight thousand pilgrims, are at risk of obstructing the performance of the religious obligation and losing their services for which they paid hundreds of millions in Saudi riyals.

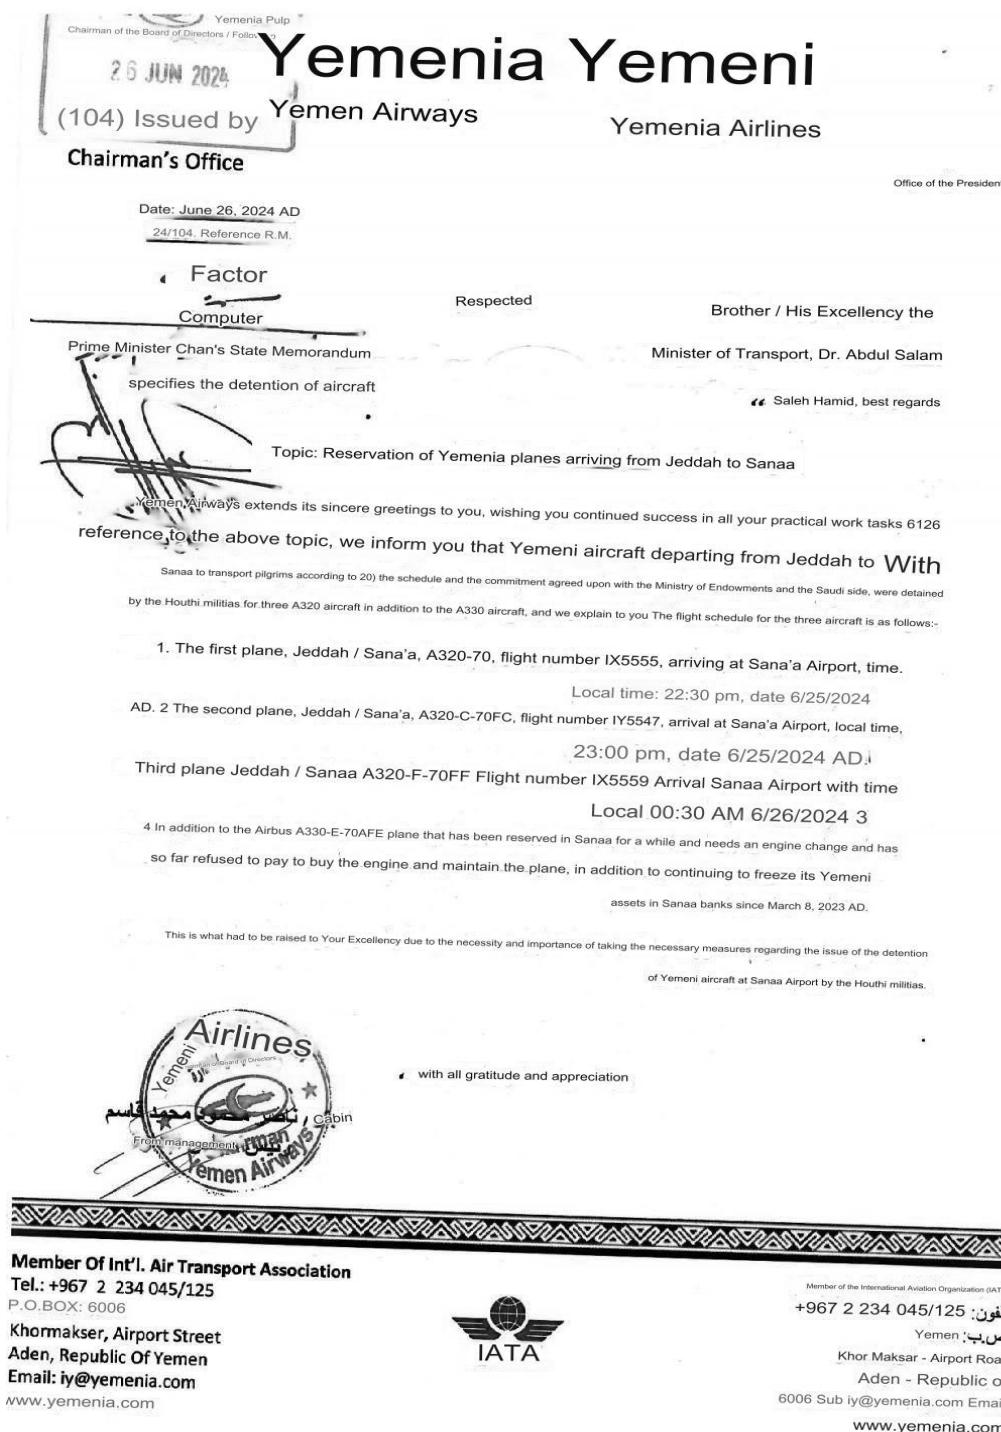

You will forward this to your state, which will kindly inform you and provide guidance on what you deem appropriate to deal with this situation as it is a problem. It is an emergency that requires an urgent solution and cannot tolerate delay, especially since there are only 72 hours remaining until

the first of the pilgrims' flights by air.

Source: Panel

Annex 179: Yemenia Chairman's letter to the PM regarding seizure of aircrafts

Source: Panel

Annex 180: Yemenia's excess war liability for flying in Houthi-areas

The Panel was informed that, on 23 January 2024, Yemenia received the notice of cancellation of coverage, from its insurance company in respect of excess war liability, 'Extended Coverage Endorsement (Aviation Liabilities - AVN52E' in relation to the geographical location of Yemen (only in respect of Houthi-occupied airports and Houthi-controlled airspace)).

This notice expired on 30 January 2024, after which excess war liability coverage of Yemenia in Houthi-occupied airports and Houthi-controlled airspace has reduced to 81.02581 percent. As a result, Yemenia is obligated to pay up 19 per cent of the compensation amount, which would be in the range of \$35-65 million, in the event their aircraft meets any accident within the Houthi-controlled area or airspace.

This had placed Yemenia in a challenging predicament. If the company complied with the directives, it would have severely impacted the air services in Yemen and invited the wrath of the Houthis. Since Yemenia continues to operate in Houthi-controlled airports and airspace, in the event of any untoward incident, it could incur hefty penalties, leading to significant financial strain, damage to its reputation, legal battles, and even potential closure or bankruptcy. This will also hinder the future plans of Yemenia to expand air services from Sana'a to other destinations, including for humanitarian purposes.

Annex 181: Freezing of the assets of pharmaceutical companies

According to the Panel's sources, armed forces, under the direction of the Houthi leader, Saleh Dabish, raided office and factory premises, kidnapped some employees, and confiscated the funds and assets of these companies and the personal accounts of their directors and employees, mostly in Al-Kuraimi Bank. They also took away, \$240,000, 13% of the company's total profits, in the name of two shareholders, who were subject to court rulings and made additional demands for others. Earlier, responding to the threats, CBY, Aden had issued a circular dated 7 April 2024 to all banks and financial institutions not to comply with the illegal order of the Houthis.

CENTRAL BANK OF YEMEN Head Office-Aden

Date: 7/4/2024, No: CBY/A/289/2024

Banking Supervision Sector Office

A circular addressed to all banks and banks operating in the Republic

Brother/General Manager/Regional Director of the Bank

Respected

May the peace, blessings, and mercy of God be upon you

Topic // The Modern Pharmaceutical Company and the International Pharmaceutical Manufacturing Company

With reference to the above topic, and to the memorandums submitted by the Modern Pharmaceutical Company and the International Pharmaceutical Industry Company, regarding the seizure of the two companies' headquarters in Sana'a by the Al-Houthi militia, and the militia's naming of people by them to illegally impersonate the management of the two companies, and seeking to seize the assets and funds of the two companies, Accordingly, and based on the applicable laws and regulatory instructions.

You must commit to the following:

(1) Any financial and banking transactions related to the two companies referred to above shall be dealt with the legal department of the concerned company authorized to do so, represented by the following:

1 Walid Muhammad Saeed Al Shatfa - General Manager

2 Anwar Hamid Abdel Salam - Financial Director

(2) It is not permissible to seize or dispose of any account balances of the two aforementioned companies based on any orders or requests you receive from any illegal party.

The above will be adhered to, and you will bear responsibility for any violation.

Please accept our greeting

Figure 181.2

Source: Confidential

*Appendix A***Unofficial translation of the memorandum dated 10 June 2024 issued by the Specialized Criminal Prosecution of the Houthis in Sana'a regarding freezing of the assets of pharmaceutical companies**

Based on a memorandum of the committee for inventorying and receiving traitors' property No. (243/39838) dated 9 June 2024, which includes a request to seize the balances and accounts of:

- 1- Modern Pharmaceutical Company
- 2- International Pharmaceutical Manufacturing Company
- 3- Walid Muhammad Saeed Al-Shattafa - General Manager of the two companies
- 4- Fahim Qasim Abdullah Al-Khalidi - Deputy Director for Commercial Affairs
- 5- Anwar Hamid Abdel Salam Muhammad Al-Ashmouri - Financial Director
- 6- Mukhtar Ali Ahmed Al-Mekhlafi - Resources Director
- 7- Safwan Abdel-Wareth Saeed Al-Aghbry - Director of Research and Development
- 8- Ali Abdul Jalil Abdul Wahab Ali - Accounts Manager
- 9- Taha Abdullah Muhammad Al-Khalidi - Warehouse Manager
- 10- Fatima Ahmed Hassan Muqbil Aishan - Purchasing Manager
- 11- Abdulraheeb Abdullah Muhammad Al-Hajri - Head of the Accounts Department
- 12- Muhammad Ahmed Saleh Hadi Al-Maamari - Treasurer

All banks and exchange companies are directed to seize and freeze all the balances, accounts and transfers of those mentioned above, and to inform us of what has been done urgently.

Judge: Sarem al-Din Mufaddal

Deputy Specialized Criminal Prosecutor

Annex 182: Smuggling of telecom equipment

The Houthis have been indulging in organised smuggling of various telecom items and the illegal sale proceeds of the same are utilised for its military purposes. The Houthi-controlled telecom companies have changed their procurement process by engaging suppliers to sell them equipment. These suppliers invariably smuggle the telecom equipment but in case of any seizure by the customs, the names of the telecom companies do not come out openly. Panel's sources have stated that the Ministry of Telecommunication of the GoY has prohibited imports of telecom equipment without its specific permission, and they have not issued any such permission to any Sana'a-based telecom companies to import the equipment. But the recent upgrade of telecom services to 4G and expansion of the subscriber base by these Houthi-controlled companies and the regular seizures by the Yemeni customs, clearly demonstrate that telecom equipment, including the dual-use items used for UAVs and other military and surveillance purposes are being smuggled into Houthi-controlled areas through an organised smuggling network operated by the Houthis.

Annex 183: Smuggling of prohibited pesticides

Several sources revealed that Houthis regularly facilitate smuggling of carcinogenic and toxic pesticides like 'mancozeb', 'methyl bromide', and 'durspan.' These are sold at high prices in their areas, especially in Saada Governorate, with proceeds used for military purposes.

Sources informed the Panel that a consignment of banned toxic pesticides (methyl bromide) was allegedly imported by Saba International Company, belonging to Abdul Azim Daghsan, without any permission from the Houthi-appointed Ministry of Agriculture. The consignment was loaded in two vehicles with license plate Nos. (6/23536) and No. (479609). However, on the night of 28 November 2023, two officers from the Battalion of the Rescue Forces, Abdullah Al-Barda and Nabil Lutfullah, acting under the rescue commander, Abu Badr Al-Marani, came in two vehicles, a Hilux bearing license plate No. 691 Police, a bus bearing license plate No. 5121 Police, along with a truck with armed personnel. They forcibly entered the customs area and took away the vehicles loaded with the pesticides, without payment of customs duty. The commander reportedly told the Director-General of Sana'a Customs Office and Control that they were acting under the directives from the top Houthi leaders. The Sana'a customs is reported to have lodged a complaint. The matter is under investigation by the Panel.

Annex 184: Smuggling of medicines

The Panel received information that similar syndicates, supported by the Houthis, involved in smuggling of medicines through the GoY ports and land borders and transporting the same to the Houthi-controlled areas. In one incident under investigation by the Panel, on 3 March 2024, several gunmen in military uniforms came in military vehicles, forcibly entered the office of the Supreme Medicines Authority in the city of Tai'zz and took away a consignment of smuggled medicines that the Al-Misrakh District police had seized on 23 February 2024 from one Hisham Ghazi Hassan Saif. The Panel's sources stated that the smuggled consignment, worth about YR180 million, was received in Aden and was on its way to Houthi-controlled areas, when the police intercepted it, and handed over to the office of the Supreme Authority for Medicines in Tai'zz. Investigations by the Panel revealed that medicines are regularly being smuggled into Aden and thereafter transported to "Al-Hawban" for further distribution in Houthi-controlled areas.

Annex 185: Seizure of cultural properties

The Panel received information from various sources that the Houthis have been indulging in smuggling and trafficking of antiques and antiquities, which form part of the cultural heritage of Yemen, and selling them abroad. The Panel's interview of a few experts on Yemeni cultural heritage, dealers in artefacts, intelligence and enforcement officials, customs clearance agents, and its confidential sources revealed the existence of a Houthi-backed organised network that smuggles these items from Yemen to different countries in the region and abroad and the sale proceeds are utilised for funding their war efforts in Yemen. The Panel is continuing to investigate these cases.

During the discussions with the Antiquities Authority officials of the GoY, the Panel was informed about the seizure of various such items by the authorities in Yemen and abroad, some of which are mentioned below. The Panel has not received any information linking these cases with the Houthis and is investigating these cases:

1. The authorities in the Sultanate of Oman seized 52 artefacts on 22 August 2017.

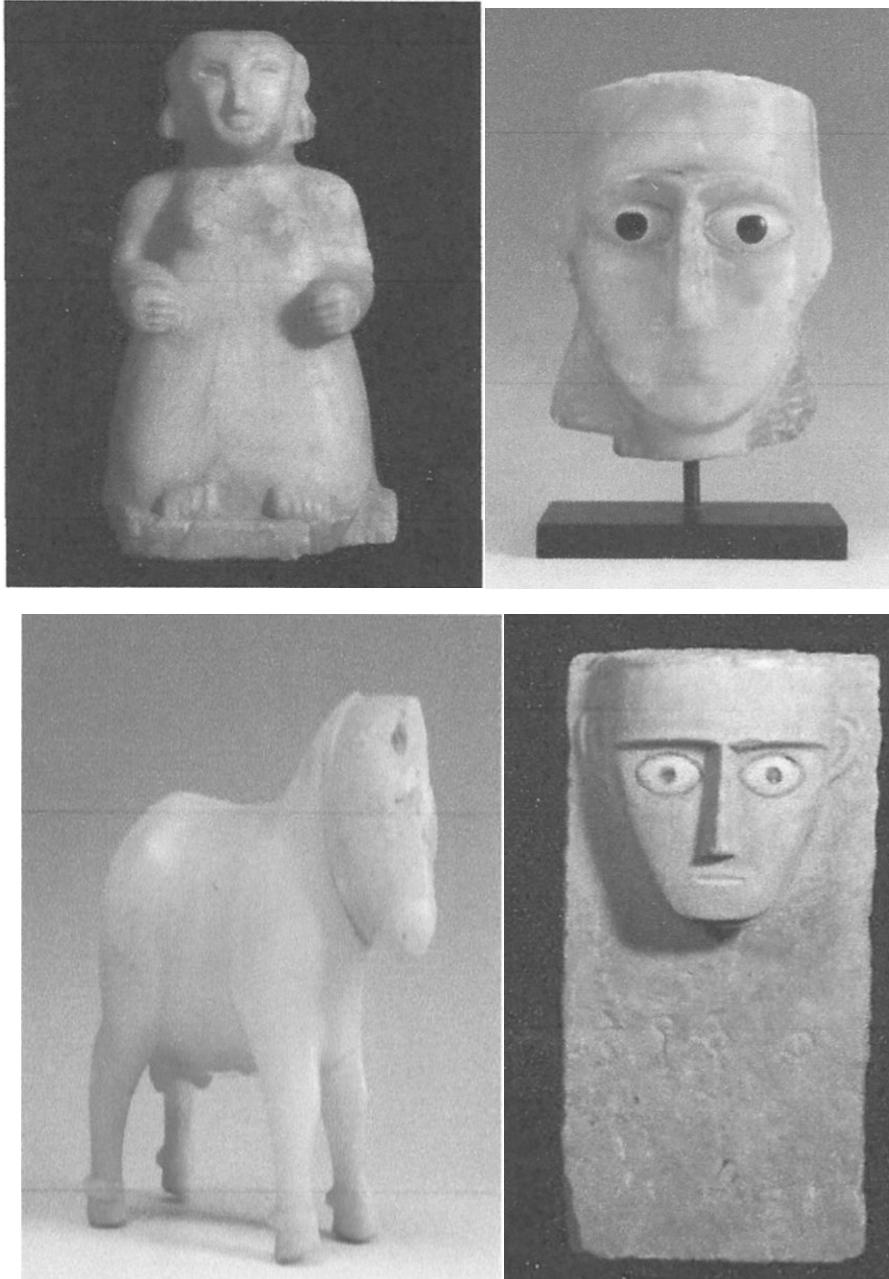

Source: GoY

2. The Department of Protection and Monitoring of Antiquities and Artifacts at the Heritage Authority in the Kingdom of Saudi Arabia received 14 artefacts dating back to the Kingdom of Qataban (4th century BC) from a Yemeni resident in Jeddah in September 2022.

Source: GoY

3. The authorities in Spain informed the GoY on 24 June 2022 about five Yemeni artefacts being offered for sale in Madrid. A case of theft has been registered and referred to the court.

Source: GoY

4. About 16 Yemeni artefacts have been seized in France, which were exhibited alongside pieces from Syria, Iraq, and Libya. GoY representatives have reportedly provided the French authorities with precise information about the origin of these artefacts.

Source: GoY

5. In London, an Auction House had offered, from 20 November to December 2022, for sale many items from different countries including 40 ancient items from Yemen. The GoY representative objected to the sale of these Yemeni artefacts, supported by reports from experts on Yemeni artefacts. The British authorities stopped the display of the specified Yemeni items and handed over the matter to the Metropolitan Police. Although most of these items were reportedly taken out of Yemen prior to the current conflict, such large-scale seizure of items outside Yemen point towards the existence of an organised market for artefacts that provide significant amount of opportunity for money.

6. Items Seized by Yemeni customs and Border Security:

- a. **List of Seizures at Al-Mualla Port – Aden:** The items were seized on 9 August 2023 under case number (4) 2023 and the matter is with the Public Funds court.

Annex 186: LPG Tankers

The Department of the US Treasury's Office of Foreign Assets Control (OFAC) sanctioned Palau-flagged LPG tanker *Raha Gas* (IMO: 8818219, MMSI 511101405), and its owner Arafat Shipping Company, set up on 19 January 2024, and registered in Marshall Islands (number 12831), for shipping millions of dollars of LPG falsely identified as having loaded in the UAE to Yemen on behalf of the al-Jamal network. Arif Ibrahim Khot, the captain of *Raha Gas* was also sanctioned for directing the LPG shipment to Yemen. OFAC also sanctioned the Palau-flagged LPG tanker *LPG OM* (IMO: 9160475, MMSI 511101151), and its owner and operator KDS Shipping Limited, set up on 27 Jun 2023, and registered in Marshall Islands (Number 120646) for carrying multiple shipments on behalf of Sa'id al-Jamal.

The Panel's investigations revealed that during the period from 1 January 2023 to July 2024, 44 requests for inspections of LPG vessels were received by the UNVIM from the vessels, out of which one request was rejected. Investigation further revealed that as per the UNVIM's records, for the shipment of 18 October 2023 of *LPG OM* and for the shipment of 8 June 2024 of *Raha Gas*, Mina Khalid port, UAE, was shown as the port of origin.

Annex 187: Landmines locally produced by the Houthis

1. The following figures display landmines produced locally by the Houthis, highlighting their specific features in terms of triggering mechanism and effects, e.g. bonding, horizontal effect.
2. According to a specialist, the Houthis' production of landmines is conducted in an artisanal manner, resulting in explosive contents that are less stable compared to those produced by specialized industries. This results in significant risks to both the local population residing near production and storage sites and to the EOD personnel tasked with clearing these areas.
3. The Panel notes that many of the anti-tank mines deployed by the Houthis are coupled with trigger mechanisms typically used for anti-personnel mines. Given the quantity of explosive contents, their explosion can have particularly severe consequences.
4. Additionally, the Houthis' failure to adhere to a mine-laying plan further complicates and increases the risks associated with the decontamination of affected areas, thereby exacerbating the dangers faced by both civilians and demining teams.

Annex 188: Attacks on civilians

1. The Panel's sources informed on individual cases of civilians killed and injured during indiscriminate attacks carried out by the Houthis. These include:

- On 19 March 2024, in Rada'a, Al-Bayda Governorate, a Houthi convoy of 14 heavily armed vehicles entered a residential area, and planted explosives in a residence. The explosion led to the destruction of neighbouring houses, resulting in the deaths of at least 13 civilians, including nine members of the same family, and four children.

Figure 188.1

Damage caused in Rada'a by explosives planted by the Houthis

Source:

GoY

- On 3 February 2024, in the Sabr Al-Mawadim District of Ta'izz Governorate, a 17-year-old boy was killed by sniper fire when he was in the vicinity of his residence.
- On 9 April 2024, in the Sahara District of Amran Governorate, a 35-year-old man was killed for reportedly performing the Maghrib prayer seven minutes after the prescribed time.
- On 24 April 2024, in the Salah District of Ta'izz Governorate, a seven-year-old girl was injured by sniper fire
- On 27 April 2024, a boy was shot by a guard at the entrance of a summer camp in Aflah Al-Yemen District, Hajjah Governorate.
- On July 20, 2024, Houthi armed men stormed into a mosque in the village of Minjarah, in the Al-Sawar district of Al-Mahwit Governorate, and fired live ammunition indiscriminately, resulting in the deaths of a man and a woman and injuring three other women.

2. Furthermore, sources indicated that during the reporting period:

- The Houthis targeted homes in Al-Mashareeh, in the densely populated northern part of Al-Dhale' Governorate. A 40-year-old woman reportedly sustained various injuries from a shell which struck her home. She had shrapnel lodged in her neck and other parts of her body. This incident occurred two days after a similar attack resulted in the death of an infant and injury to his father, following the shelling of their home in the Sulaim area, northwest of the Qatabah District.
- A 15-year-old girl was injured by Houthi-sniper fire on the outskirts of Wadi Al-Kharazah, west of Qatabah, Al-Dhale' governorate. The child was hit when she was reportedly heading to a relative's house.
- Two children aged 3 and 5 were killed and five children and one adult were injured during an attack on residential houses in the village of Habour in Sabir Al-Mawadim District, southwest of Ta'izz.

Annex 189: Attacks on civilian objects

1. The Panel was informed that, on 20 July 2024, a mosque in Manjara (Tyre District, Amran Governorate) was attacked by the Houthis. Live munitions were reportedly shot indiscriminately, resulting in two civilians killed (one male and one female) and three women injured.
2. On 2 January 2024, in the Shamila area of Al-Sabeen District (Amanat Al-Asimah), a building owned by a lawyer and human rights activist was seized. Residents received eviction orders issued by the Houthi-led specialized criminal court. It reportedly read that “the specialised criminal court was imposing a precautionary quarantine on all funds and property owned by” the activist, who was accused of committing “crimes against the security of the State, aiding the enemy and communicating with a foreign state”. It further reportedly advised that “other measures would be taken”, if the instructions were not followed.⁷³

3. The Panel is further investigating alleged attacks against cultural property in Yemen, including damages caused to the Military Museum of Aden and the Sultan’s Palace, in the same city.

Figure 189.1

⁷³ [https://acjus.org/l?l=e/2/A/c/1/4/4/4100/\(ACJ\):-Confiscating-the-property-of-citizens-and-activists-by-the-Houthi-group-is-a-violation-that-affects-fundamental-rights,-and-we-call-for-the-cestration-of-this-violation](https://acjus.org/l?l=e/2/A/c/1/4/4/4100/(ACJ):-Confiscating-the-property-of-citizens-and-activists-by-the-Houthi-group-is-a-violation-that-affects-fundamental-rights,-and-we-call-for-the-cestration-of-this-violation)

4. The Houthis have significantly disrupted crucial transportation routes, impeding the smooth flow of individuals and goods across Yemen. Among these routes are major highways linking Sana'a and Aden, such as the Aden-Dali-Sana'a road, the Aden-Ta'iz-Al-Houban road, the Aden-Yafa-Al Bayda-Sana'a road, and the Aden-Tor Al-Baha-Ta'iz-Sana'a road. Additionally, the road connecting the north-eastern governorates from Ma'rib to Sana'a, which is essential due to Ma'rib Governorate's role as a primary supplier of petroleum products, has been affected. Specifically, the road was obstructed at the Nihm crossroads, necessitating a detour through Al Bayda Governorate before reaching Sana'a. The closure of roads have resulted in prolonged travel time by land, consequently driving up the expenses associated with goods transportation due to heightened operational costs and a twofold increase in fuel consumption. For instance, the expense of hiring a truck for transporting a 40-foot container between Aden and Sana'a previously ranged from YR250,000 to YR280,000 but has now surged to YR1,600,000. This, in turn, also impacts the provision of humanitarian services and aid delivery.

5. However, recently, the GoY has taken some steps in repairing and relaying the roads and opening up of some roads and obstructions within its area.

Annex 190: Critique of Houthis' attacks on the Red Sea followed by arbitrary detention of its author

1. According to sources, in January 2024, Yemeni judge Abdulwahab Mohammad Qatran, who criticized the Houthis for human rights violations and the attacks on the Red Sea, was detained along with his family. They were questioned for hours without legal representation, and the judge was held incommunicado for three days, reportedly in solitary confinement at a Houthi detention centre in Sana'a. The judge was released in June 2024.

Figure 190.1

Message of Judge Qatran on X criticising Houthi attacks on the Red Sea

Unofficial translation

Enough of the antics and muscle building of the Yemeni people. Thirty million people did not delegate you to fight America. Fight hunger, poverty, ignorance, disease, begging. May God bless you abundantly.

Fight corruption and injustice in your courts, department and prisons.

Fight racism in the performance of your state, your group and your faction.

31 December 2024

2. The case of Judge Qatran has been documented by different legal and human rights organisations and entities, including Amnesty International, Human Rights Watch, and the Cairo Institute for Human Rights Studies.⁷⁴

Annex 191: Arbitrary detention of teachers and education experts

1. Different sources, including from the GoY, informed the Panel about a distinguishable trend of abducting teachers and education experts who oppose the politicization of the education system and academic curricula.
2. There follow the details, as reported by sources and corroborated by open-source material,⁷⁵ of a case which appears to integrate said trend.

Case Study: Death of Education Expert Sabri Abdullah Ali Al-Hakimi

Overview

Sabri Abdullah Ali Al-Hakimi was a 56-year-old education expert working in the Ministry of Education, in Sana'a. He was reportedly detained and tortured by the Houthi militia and died in detention, on 23 March 2024.

Background and Detention

Al-Hakimi, along with a colleague professor, was abducted by the Houthis at Yaslah point six months prior to his death while traveling to Dhamar Governorate.

As per reports, their homes were subsequently raided, and equipment and books were looted. Both were imprisoned without formal charges.

Al-Hakimi had been in dispute with Houthi authorities over primary and middle school curricula, advocating for educational materials free from sectarian and political biases. The Houthis opposed this view, preferring curricula that supported sectarian mobilization.

Conditions of detention

During his six-month detention, Al-Hakimi was reportedly subjected to torture and ill-treatment. His health deteriorated significantly due to the lack of medical care. He was denied communication with the outside world except for a single visitation where signs of torture were evident.

Release of the Body

Following prolonged delays, the Houthis reportedly released Al-Hakimi's body on 28 March 2024, under the condition that his family bury him swiftly without forensic examination or public disclosure. The family was reportedly threatened with retaliation if they disobeyed, and other male family members were arrested.

Aftermath

Ahmed Saif Hashid, a parliamentarian, is reported to have publicly questioned the official account of Al-Hakimi's death. He reported seeing visible injuries on Al-Hakimi's face and criticized the restricted view of the body, which was not allowed to be photographed. On 25 March 2024, a group of activists, university professors and Member of Parliament Saif Hashid published a letter demanding that authorities conduct an impartial and transparent investigation.⁷⁶ The letter reads that "*deaths in detention in the prisons of the intelligence services have increased*".⁷⁷ In late April 2024, Saif Hashid was reportedly the target of an attempted killing.⁷⁸

Source: GoY

2. Death sentences issued by the specialized criminal court appear to often follow prolonged arbitrary detentions and years of enforced disappearance. For instance, in late July 2024, three men (one with a physical disability) who had been convicted to death nine years prior, saw their sentences confirmed. The men are reported to have been kept incommunicado for years, denied legal representation and tortured. Reportedly, according to the National Authority for Prisoners and Abductees, there are 70 civilians under Houthi custody facing execution.⁷⁹

⁷⁹ <https://www.arabnews.pk/node/2558856/middle-east>

Annex 193: Reported influence of Hezbollah on the Houthis' summer camps and the alteration of curricula in Houthi-Controlled Areas

1. Some sources informed the Panel that members of Hezbollah operate in Sana'a, providing assistance to the Houthis, including in running summer camps and in the revision of academic curricula. Houthi-run summer camps are reportedly very similar to those carried out by Hezbollah. Children's uniform and the hijab worn by girls in Houthi summer camps present similarities with those in Hezbollah-run summer camps.

2. The figures that follow show similarities between Houthi and Hezbollah summer camps (uniforms and salute)

Figure 193.1
Houthi summer camp

Annex 194: Indoctrination and Promotion of Hatred, Violence and Discrimination among Children

1. The Houthis use multiple resources to indoctrinate children, promote hatred, violence and discrimination. For instance, sources informed the Panel that in Houthi-controlled areas, children initiate their school day with the following prayer rather than the national anthem:

“Oh God, we entrust you, we entrust you, your Messenger, we entrust Imam Ali, and we entrust whomever you commanded us to appoint, my master and lord, Abdul Malik Badr al-Din al-Houthi. Oh God, we disavow your enemy, the enemy of your Prophet, the enemy of Imam Ali, and the enemy of whomever you commanded us to appoint, my master and lord, Abd al-Malik al-Houthi. Humiliation is far from us.... Humiliation is far from us... Humiliation is far from us!!”

2. ‘Jehad mag’ is a Houthi open-source tool used to spread sectarian and discriminatory messages among children. Some examples of its content are as follows.

Figure 194.1

Normalisation versus Boycott

Flyer promoting boycott against the “enemy” referring to the “Zionist” and “America”

Unofficial translation

Yes, the Jews:

- Are the dangerous hostility of the nation that God warned us about and warned us against;
 - The children of Israel, who God chose and favoured, bore His message and religion, but when they rejected His guidance and disobeyed Him, He cursed them and became angry with them;
 - The Prophet abandoned them where the stone of the books of God were; they deviate from the line of His message;
 - No matter how much we try to please them and make concessions to them. We will never achieve peace with them, nor will they be satisfied with us;
 - They do not love us and do not wish us any good;
 - Those who occupy Palestine and Al-Aqsa Mosque and those who desecrate our sanctity and want to enslave us.

Faith is Yaman - Yemeni proverb.
What a Jew
Muslim advised
The meaning is that no matter how friendly
the Jew pretends to be to the Muslim, he
harbours evil for him and does not sincerely
seek his good. It refers to not relying on
someone who disagrees with you in your
religion, or sometimes in your belief.

3. Influencers are reportedly heavily involved in mobilizing the masses, rallying thousands of individuals, including children, and disseminating violent and sectarian messages. The following images, taken from a documentary, illustrate a day of demonstrations, in Sana'a, in support of Houthi authorities. Every Friday, after prayer, the Ansar Allah is reported to gather hundreds of thousands of supporters in the main square of the city. Everyone, including the youngest children, is urged to think of Palestine.

Annex 195: Directive issued by Houthi appointed authority on requirements for the operation of international organisations in Houthi-controlled areas

1. On 17 July 2024, the Houthi-appointed authority issued a directive demanding that international organisations operating in the areas under the group's control obtain its approval prior to hiring any staff, national or international. International organisations are further required to submit their detailed structure with the job title and function of employees.

Unofficial Translation

Presidency of the Republic
Supreme Council for the Administration and Coordination of Humanitarian Affairs and International Cooperation

General Secretariat

Date: 1/12/11
Number: 26

Subject: Functional Structure of International Organizations

Dear Representatives of International Organizations Working in Yemen,

The General Secretariat of the Supreme Council for the Administration and Coordination of Humanitarian Affairs and International Cooperation extends its sincere appreciation to you.

In reference to the above subject and in accordance with Article 5 of the basic agreement signed with your organization, which stipulates that organizations must employ local or foreign staff as needed, in consultation with and with prior approval from the government represented by the General Secretariat of the Supreme Council, we kindly request the following:

Please provide us with the job structure for your organization, including job titles and names of employees, while adhering to the requirement to obtain prior approval from the General Secretariat before completing the hiring process for any local or foreign staff. This request is in line with the provisions of the agreement and is essential for ensuring compliance with the agreement's terms and conditions.

We request that you submit the organization's functional structure within one week from the receipt of this circular. This is crucial for implementing the terms, conditions, and obligations outlined in the basic agreement, which governs the working relationship between the Yemeni government and international organizations operating in Yemen.

Thank you for your cooperation.

Sincerely,

[...]
